By permitting certain controlled clinical trials to be conducted with the involvement of human subjects who are confronted by a life-threatening condition and who are also unable to give informed consent because of that condition, the agency expects to provide individual access to potentially beneficial treatment. The agency also expects that research to result in advancement and improvement of therapies used in emergency medicine situations that currently have poor clinical outcome. As a result of this rule, many individuals confronted by life-threatening situations will benefit immediately. Survival of these individuals may be enhanced by their participation in controlled trials. As described previously, there are many conditions where current medicine cannot save many of the patients. For example, each year, approximately 350,000 people in the United States suffer a sudden cardiac arrest. Even small improvements in emergency medical care offers enormous life-saving potential.

Risks:

Modern trauma care is based on the "golden hour" following acute injury. Most patients who die from injury in the first 24 hours do so from processes set in motion at the time of injury. Because of this, any therapeutic intervention must be begun immediately to interrupt the injury-induced cascade of body reactions that lead to death. There are many conditions, such as heart attacks, closed head wounds, and spinal cord injuries, where current medicine cannot save many of the patients. For example, currently, despite efforts to instill basic life support education, only a small percentage of individuals who suffer sudden out-of-hospital cardiac arrests are resuscitated by bystanders. Few survive to leave the hospital. This percentage may be as low as 1 to 3 percent in some large metropolitan areas, with the best results estimated to be only in the 25 percent range. Given the large number of sudden cardiac arrests annually in the United States alone, even small improvements in care offer enormous life-saving potential.

Legal Deadline:

None

Abstract:

The Food and Drug Administration (FDA) regulates some 1,700 types of medical devices and places them in classes, depending on the level of risk they present. Currently, manufacturers of most medical devices are required to submit information to FDA and receive FDA clearance before putting a device on the market, even if the device poses an extremely low risk. FDA has determined that, for devices that pose a low level of risk to patients, review is not necessary to protect the public health, places an unnecessary regulatory burden on device manufacturers, and delays introduction of new devices.

Accordingly, FDA is proceeding, through notice and comment rulemaking, to exempt low-risk medical devices from premarket notification requirements. Of these, 450 types of low-risk devices (such as stethoscopes, hernia supports, and surgical microscopes) have already been exempted. On July 28, 1995, FDA proposed to exempt 12 more types of low-risk devices and, at the same time, to reclassify an additional 112 types of devices as low-risk (Class I) and to exempt them from premarket notification requirements as well. FDA receives some 700 submissions each year for devices in the categories affected by this rulemaking and will be able to redirect resources for the review of these products to more complex products. This final regulation will complete the rulemaking, at which time one-third of all categories of devices will be exempted from premarket notification requirements. Examples of affected devices include arterial blood sampling kits, therapeutic humidifiers for home use, dental floss, and otoscopes for examining the ear.

Statement of Need:

Premarket notification is burdensome to manufacturers of low-risk devices, and review of such notification is time-consuming, delaying marketing of the devices, and represents an inefficient use of FDA resources. Exempting low-risk devices from premarket notification allows new devices to be brought to market more quickly and allows FDA to use its resources to better protect the public health.

Summary of the Legal Basis:

Section 513(d) of the Food, Drug, and Cosmetic Act (21 USC 360d) authorizes FDA to exempt, by regulation, a generic type of class I device from, among other things, the requirement of premarket notification in section 510(k) of the act (21 USC 360K). Pursuant to section 513(e)(1) of the act, based on new information respecting a device, FDA may, upon its own initiative, by regulation change a device's classification and revoke, because of the change in classification, any regulation or requirement in effect with respect to such device under sections 514 or 515 of the act (21 USC 360d or 21 USC 360e).

Alternatives:

The exemption process is an ongoing one, and 450 categories of devices have been exempted so far. This action has reduced burden on manufacturers, allowed FDA resources to be redirected more usefully, and has not been shown to affect public health protection. The alternative to the exemptions and reclassifications included in this regulation would be to do nothing, in effect, and continue to require premarket notification. This has been shown to be burdensome to manufacturers and to make inefficient use of FDA resources without offering meaningful public health protection.

Anticipated Costs and Benefits:

The proposal will not impose any costs on manufacturers, but will relieve them of the burden of submitting premarket notification submissions for certain devices. FDA will also benefit by receiving approximately 700 fewer submissions per year and will be able to redirect its resources to more complex products.

Risks:

In view of the low level of risk presented by these devices, the likelihood of their causing harm or injury to patients is slight. Exemption from premarket notification is not an exemption from any of the other general controls under the act, including current good manufacturing practices. In addition, under the reporting provisions of the Safe

FINAL RULE STAGE

---

34. FINAL REGULATION TO ESTABLISH PROCEDURES FOR THE SAFE AND SANITARY PROCESSING AND IMPORTING OF FISH AND FISHERY PRODUCTS

Priority:

Economically Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

21 USC 342 Federal Food, Drug, and Cosmetic Act; 21 USC 371 Federal Food, Drug, and Cosmetic Act; 21 USC 374 Federal Food, Drug, and Cosmetic Act; 42 USC 264 Public Health Service Act; 21 USC 321; 21 USC 343; 21 USC 346; 21 USC 348; 21 USC 379e; 21 USC 381; 42 USC 241; 42 USC 242l; 42 USC 300u-l; 42 USC 216; 42 USC 243

CFR Citation:

21 CFR 123; 21 CFR 1240

Legal Deadline:

None

Abstract:

The Food and Drug Administration (FDA) is adopting regulations to ensure the safe and sanitary processing and importing of fish and fishery products. These procedures include the monitoring of selected processes in accordance with Hazard Analysis Critical Control Point (HACCP) principles. HACCP is a preventive system of hazard control that can be used by food processors. FDA is adopting these regulations because a system of preventive controls is the most effective and efficient way to ensure that these products are safe.

Statement of Need:

Ensuring the safety of seafood to consumers poses a unique challenge to both the industry that produces it and to regulators. Seafood involves more than 300 highly diverse species from around the world. It is the most perishable of all flesh foods. As stocks of traditionally consumed fish decline, the pressure to find new species increases. Most seafood is still wild caught, the range of possible human food safety hazards includes every hazard in the marine environment as well as those associated with aquaculture. It is essential that those who process seafood for consumers understand the hazards and the controls for those hazards. As a general rule, however, such knowledge is not a prerequisite for doing business. Preventive controls for ensuring safety are not always employed and good sanitation is not always practiced. Preventable illnesses from seafood do occur. Moreover, it is questionable whether the current regulatory system, which was developed for the general food supply, is best suited for the seafood industry. The current system provides the agency with a "snapshot" of conditions at a facility at the moment of the inspection. The reliability of the regulators' assumptions about conditions in the plant during the intervals between inspections creates legitimate concerns about the adequacy of the system. Moreover, the system places an undue burden on the regulator to find problems, rather than placing responsibility on the industry to demonstrate that it understands the human food safety hazards and is employing appropriate controls for those hazards. The HACCP system solves these problems. Processors design preventive controls that are tailored to their products and processes. In accordance with HACCP principles, these controls provide processors with immediate information about whether they are controlling hazards. The records generated by the monitoring of critical control points enable the plant and the regulator to observe key safety operations over time, rather than at a single moment.

Summary of the Legal Basis:

FDA's application of HACCP is intended for the efficient enforcement of sections 402(a)(1) and 402(a)(4) of the Federal Food, Drug, and Cosmetic Act, which applies to products that contain substances that may render the product injurious to health and to processing conditions that are insanitary and that could render a product injurious to health.

Alternatives:

Continuing the current system of highly generalized good manufacturing practices (GMPs) for seafood processors and intermittent inspections based on these GMPs would be less efficient and effective than a HACCP-based system for the reasons stated above. Continuous visual inspection is not a viable alternative. Few hazards associated with seafood are detectable through visual inspection. Moreover, the costs of such a system would likely exceed the nearly half-billion dollar public outlay now required to operate this kind of system for meat and poultry.

Another alternative would be to direct significant additional resources toward greatly increasing the frequency of FDA's inspection of seafood, as well as increasing the agency's sampling, laboratory analysis, and related regulatory activities with respect to seafood. Even if the funds for increased inspection and sampling were available, this approach alone would not be the best way for the agency to spend its resources on protecting the public health because the current form of inspection is inherently less efficient and effective than a HACCP-based inspection. Increased reliance on end-product testing, moreover, would involve a certain amount of inefficiency that would require very large sample sizes to overcome.

Anticipated Costs and Benefits:

Costs, first year, 69 million to 168 million, benefits first year 73-108 million, total discounted costs at 6 percent discounting: 677 million to 1,488 million. Total discounted benefits

at 6 percent: 1,435 million to 2,561 million.

Risks:

If this regulation is not adopted the U.S. industry will lose or be significantly hampered in exporting to the European Union market. In addition an opportunity to adopt an efficient and highly effective means of manufacturing and monitoring the safety of seafood will be lost. Finally, a major opportunity to significantly reduce the number of seafood related illnesses in the United States will also have been lost.

35. PRESCRIPTION DRUG PRODUCT LABELING; MEDICATION GUIDE

Priority:

Other Significant

Legal Authority:

21 USC 321; 21 USC 352; 21 USC 371; 21 USC 355; 42 USC 262

CFR Citation:

21 CFR 201; 21 CFR 208; 21 CFR 314; 21 CFR 600

Legal Deadline:

None

Abstract:

Inadequate access to appropriate patient information is a major cause of inappropriate use of prescription medications, resulting in serious personal injury and related costs to the health care system. The Food and Drug Administration (FDA) believes that it is essential that patients receive information accompanying dispensed prescription drugs. This information needs to be widely distributed and be of sufficient quality to promote the proper use of prescription drugs. Therefore, FDA is proposing performance standards that would define acceptable levels of information distribution and quality, and to assess supplied information according to these standards. In accordance with the Administration's philosophy of fairly assessing a voluntary approach before imposing requirements through regulations, FDA is proposing that this information be disseminated through voluntary private-sector initiatives. Preliminary evidence suggests recent increases in the distribution of privately produced patient medication information with dispensed prescriptions; however, estimated distribution rates indicate that significant numbers of patients still do not receive information with their medications. FDA analyses also indicate that there is a high variablility in the quality of this information. FDA believes that, with greater encouragement and clear objectives, the private sector will substantially improve the quality and distribution of patient information. Therefore, in concert with Healthy People 2000, FDA is proposing that private-sector initiatives meet the goal of distributing useful patient information to 75 percent of individuals receiving new prescriptions by the year 2000 and 95 percent of individuals receiving new prescriptions by the year 2006. FDA is proposing two alternative approaches to help ensure that these goals (performance standards) are achieved. FDA would periodically evaluate and report on achievement of these goals. If the goals are not met in the specified timeframes, FDA would either (a) implement a mandatory comprehensive Medication Guide program, or (b) seek public comment on whether the comprehensive program should be implemented or whether, and what, other steps should be taken to meet patient information goals.

Regardless of the approach chosen, a mandatory Medication Guide program would initially be limited to instances where a product poses a serious and significant public health concern requiring immediate distribution of FDA-approved patient information. FDA believes that substantial health care cost savings can be realized by ensuring that consumers obtain the inherent benefits of proper use of prescription drugs, and by reducing the potential for harm caused by inappropriate drug use by the patient.

Statement of Need:

A fundamental principle of an effective health care system is that patients have a right and responsibility to participate actively in decisions affecting their own health. This requires that patients receive their own information, including information about their medicines. Despite the existence of numerous voluntary programs designed to improve patient knowledge, however, FDA has concluded that the number of consumers who receive patient information with their prescription drug products is unacceptably low. This rule will establish a program of patient information distribution through voluntary programs that is designed to ensure that consumers achieve maximum benefits from the use of prescription drugs and reduce the potential for harm caused by inappropriate patient drug use.

FDA is proposing that useful written information, in nontechnical language that is directed to the patient, be developed by the private sector for dispensing with prescription drug and biological products that are used primarily on an outpatient basis without direct supervision by a health care professional. The patient labeling would inform the patient about the drug product and would include information such as the product's approved uses, contraindications, proper administration, adverse drug reactions, and cautions for specific populations (including pregnant women and children).

Summary of the Legal Basis:

The Federal Food, Drug and Cosmetic Act (21 USC 321 et seq.) authorizes FDA to regulate the marketing of drug products so that the products are safe and effective for their intended uses and are properly labeled. In order to carry out the public health protection purposes of the act, FDA (a) monitors drug manufacturers and distributors to help make certain that drug products are manufactured and distributed under conditions that ensure their identity, strength, quality, and purity; (b)

VOL
60
SS
2
28
NO
28
995
UMI

approves new drugs for marketing only if they have been shown to be safe and effective; and (c) monitors drug labeling and prescription drug advertising to help ensure that they provide accurate information about drug products.

The act authorizes FDA to promulgate a regulation designed to ensure that patients using prescription drugs will receive information that is material with respect to the consequences which may result from the use of a drug product under its labeled conditions. This interpretation of the act and the agency's authority to require patient labeling for prescription drug products has been previously upheld.

Alternatives:

FDA considered several alternative programs that could meet the objectives of this proposed regulation.

One alternative was to offer patients access to patient labeling through a catalogue or computer data base at the pharmacy or practitioner's office, but not necessarily dispense individual labeling with each product. FDA decided against this alternative because not all patients would be aware of or able to obtain sufficient information about the drug product, and because the information is needed at home where the drug product is consumed.

A second alternative was to provide patient labeling with both new and refill prescriptions. FDA decided against this alternative because of the relatively large economic burden it would place on pharmacists.

Anticipated Costs and Benefits:

FDA has analyzed the economic consequences of the proposed rule and has determined that patient labeling will have associated costs well below the $100 million threshold that defines a significant regulatory action. However, even though the rule is below this threshold, in accordance with Executive Order 12866 and the Regulatory Flexibility Act (Pub. L. 96-354), FDA has developed a preliminary regulatory impact analysis (PRIA). The PRIA concludes that, even when utilizing very conservative benefit estimates, implementation costs will be more than offset by the health care savings that result from an increase in compliance with prescribed drug therapy, and a decrease in the number of adverse drug reactions.

Risks:

FDA has concluded from a review of the current literature that patient noncompliance with prescribed drug regimens ranges from 30 to 50 percent. Patients who do not comply with prescribed regimens are subject to two types of risks: risk of therapeutic failure and risk of adverse drug reaction or drug interaction with other drugs and foods. Both types of risk are potentially very serious. The seriousness of therapeutic failure depends on the seriousness of the illness being treated, while the effects of drug reaction or interaction may range from mild and transitory to long-lasting and even life-threatening.

FINAL RULE STAGE

36. ORGAN PROCUREMENT AND TRANSPLANTATION NETWORK RULES

Priority:

Other Significant

Legal Authority:

42 USC 1320b-8 sec 1138 of the Social Security Act; 42 USC 274 sec 372 of the Public Health Service Act

CFR Citation:

42 CFR 121

Legal Deadline:

None

Abstract:

Section 1138 of the Social Security Act requires Medicare and Medicaid participating hospitals that perform organ transplants to be members of and abide by the rules and requirements of the Organ Procurement and Transplantation Network (OPTN) as established by section 372 of the Public Health Service Act. Section 1138 also requires that for organ procurement costs attributable to payments to an Organ Procurement Organization (OPO) to be paid by Medicare or Medicaid, the OPO must be a member of and abide by the rules and requirements of the OPTN. No other entity (for example, a histocompatibility laboratory) is required to be a member of or abide by the rules of the OPTN under the provisions of the statute. It is the Department's position that no rule, requirement, policy, or other issuance of the OPTN will be considered to be a "rule or requirement" of the Network within the meaning of section 1138 unless the Secretary has formally approved that rule. The OPTN is currently in operation and these rules will impose no further cost or provide any benefit other than that which now exists.

Statement of Need:

These regulations are required by law.

Summary of the Legal Basis:

Section 1138 of the Social Security Act (42 USC 1320b-8) requires Medicare and Medicaid participating hospitals that perform organ transplants to be members of and abide by the rules and requirements of the Organ Procurement and Transplantation Network (OPTN) as established by section 372 of the Public Health Service Act (42 USC 274).

Alternatives:

The alternative was to continue without codifying existing policies.

Anticipated Costs and Benefits:

There are no anticipated costs beyond the cost of preparing the regulations (approximately $100,000.00). The anticipated benefit is that the regulations will make mandatory adherence to the policies set forth in the regulations.

Risks:

None known.

HHS—Indian Health Service (IHS)

PROPOSED RULE STAGE

37. REVISION OF INDIAN SELF-DETERMINATION REGULATIONS

Priority:

Other Significant

Legal Authority:

PL 93-638; PL 100-202; PL 100-446; PL 100-472; PL 100-581; PL 101-301; PL 103-413; 25 USC 450

CFR Citation:

42 CFR 36; 48 CFR 380.4; 48 CFR 352.280-4

Legal Deadline:

Final, Statutory, March 1996.

Abstract:

Public Law 93-638, passed in 1975, requires the Indian Health Service (IHS) to turn over administrative responsibility for service delivery programs to tribes so requesting, using the mechanism of contracting. Public Law 93-638 also authorizes the IHS to make grants to tribes for the planning, development, and/or operations of health programs. Public Law 100-472, enacted October 5, 1988, made significant changes to the statute and required that regulations implementing the amendments be promulgated in final within 10 months of enactment. The NPRM was published on January 20, 1994. The 120-day comment period was extended until August 20, 1994. On October 26, 1994, Public Law 103-413 was enacted. These amendments superseded the published NPRM and authorized the Secretaries of Interior and Health and Human Services to publish joint regulations only in specified areas. These regulations would be developed using the negotiated rulemaking procedure and are to be published within 18 months of the passage of the authorizing legislation.

Statement of Need:

In response to the long-standing Indian interest in self-determination, Congress enacted the Indian Self-Determination and Education Assistance Act in 1975. The Indian people have long sought more meaningful participation in the planning, conduct, and administration of their programs and devices. The Act reflects a commitment to preserving the Federal relationship with and responsibility to the Indian people by promoting efforts to transfer the operation of service delivery programs of the Federal Government to Indian tribes. The 1975 Act requires the Indian Health Service (IHS) to contract with Indian tribal organizations for the operation of IHS service delivery programs.

The Act also authorizes IHS to make grants to tribes for the planning, development, and/or operation of Health Programs. On October 5, 1988, Congress amended the Act to expand its coverage and authorize a new nonprocurement contracting process which required revision of existing regulations. The Amendments (Public Law 100-472) provided that the regulations be developed with the participation of and in consultation with Indian tribes and tribal organizations.

Summary of the Legal Basis:

As mentioned above, on October 26, 1994, Public Law 103-413 was enacted. The amendments superseded the published NPRM and authorized the Secretaries of Interior and Health and Human Services to publish joint regulations only in specified areas.

Alternatives:

Public Law 103-413 authorizes the secretaries of Interior and HHS to publish joint regulations in certain specified areas, but does not require publication of any regulation. Regulations are under development using the negotiated rulemaking process. Therefore, the Secretaries and the tribes will jointly determine the nature and extent of the regulations.

Anticipated Costs and Benefits:

No additional costs are associated with this regulation. It is anticipated that Indian tribes and tribal organizations will benefit from having regulations required for "638" contracts and grants in one title of the Code of Federal Regulations.

Risks:

There are no public health risks addressed by this rule.

HHS—Health Care Financing Administration (HCFA)

PROPOSED RULE STAGE

38. HOME HEALTH AGENCY (HHA) CONDITIONS OF PARTICIPATION (BPD-819-P)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

VOL 60 ISS 228 NOV 1995 UMI

Legal Authority:

42 USC 1302; 42 USC 1395x; 42 USC 1395cc(a); 42 USC 1395hh; 42 USC 1395bbb

CFR Citation:

42 CFR 484

Legal Deadline:

None

Abstract:

This proposed rule would revise home health agency conditions of participation to center on the patient, using outcome-oriented measures. Most of the current HHA conditions of participation have remained unchanged since home health services became a Medicare benefit in 1966. Some limited modifications have been made over the years to comply with legislative changes. As a result, most of the conditions of participation continue to be structure and process oriented. They do not effectively support the mandate of the Omnibus Budget Reconciliation Act of 1987 (OBRA '87) to develop a patient-centered, outcome-oriented survey process that focuses on the organization and delivery of quality care services. This proposed rule is part of HCFA's regulatory reform initiative.

Statement of Need:

Most of the current HHA conditions of participation have remained unchanged since home health services became a Medicare benefit in 1966. Some limited modifications have been made over the years to comply with legislative changes. As a result, most of the conditions of participation continue to be structure and process oriented. They do not effectively support the mandate of OBRA '87 to develop a patient-centered, outcome-oriented survey process which focuses on the organization and delivery of quality care services.

Because the existing survey process continues to focus on structure and process measures, the discrepancy between a congressional mandate for outcome-oriented care and the authority for measuring the actual performance capabilities of HHAs in patient care services remains a problem. It presents difficulties for both providers and surveyors in areas of survey/certification, medical review, developing data based performance standards for HHA management and monitoring, and implementing a continuous quality improvement system for outcomes of care.

Regulations containing the Medicare HHA conditions of participation must be revised in order to provide a regulatory basis for a patient-centered, outcome-oriented system of home health quality assurance. The implementation of such a system will enhance Medicare's ability to ensure that high-quality care is furnished to the patients of Medicare-certified home health agencies. The Social Security Act authorizes us to regulate this area and no improvements in the survey process can be made without underlying regulatory authority.

The Health Care Financing Administration has already met with a variety of provider and consumer representatives to discuss the development of revised standards. Representatives of consumers, providers, and States participated in this effort. Additional consultations are ongoing and will continue during the development of the regulation.

Alternatives:

Congress has mandated the implementation of an outcome-oriented quality assurance system for home health. Therefore, the Medicare home health agency conditions of participation must be revised to provide the basis for implementation of such a system.

Because of this mandate, no alternatives to this action have been considered.

Anticipated Costs and Benefits:

The primary benefit of this rule will be the implementation of a more effective, efficient, and patient-centered system of quality assurance for HHAs. Costs and benefits associated with the implementation of the rule have not yet been estimated, but costs should not be significant.

Risks:

This rule would have the potential for reducing risks to patient health and safety. No quantitative estimates are available yet.

Abstract:

This proposed rule would revise current conditions of coverage for end-stage renal disease (ESRD) services covered by Medicare. It would update the conditions to reflect new developments in outcome-oriented standards technology and equipment, emphasize the total patient experience with dialysis and develop performance expectations for the facility that result in quality, comprehensive care for the dialysis patient. This rule is part of HCFA's regulatory reform initiative.

Statement of Need:

Section 1881(b)(1) of the Social Security Act stipulates that payment is made to individuals, providers of services, and renal dialysis facilities that meet the requirements for institutional dialysis services and supplies that are determined by the Secretary. These requirements are the end-stage renal disease (ESRD) conditions of coverage.

The ESRD conditions-of-coverage regulations have not been comprehensively revised since the regulation's inception in the late 1970s.

The current regulations are written in an outdated style that primarily focuses on process-oriented requirements, which are unnecessarily burdensome. They do not provide adequate support for a modern survey system based on an outcome-oriented approach. As a result, revised regulations must be issued to bring the ESRD coverage conditions up to current standards of practice in the ESRD community. The revised regulations must reflect new developments in technology and equipment, as well as addressing the outcome-oriented standards process.

The regulations need to be revised to reflect the innovations in the dialysis and transplant community. The purpose of revising the regulations is to focus on the patient and the results of the care provided to the patient. Thus, the emphasis should be on the total patient experience with dialysis and quality improvement. The revised regulations should focus on patient-centered, outcome-oriented standards where appropriate. In addition, they should emphasize patient functional well-being and indicate continuous quality improvement. Patient rights and satisfaction will also be key areas in the regulation. The revised regulations would develop performance expectations for the facility that would result in quality, comprehensive care for the dialysis patient.

The Health Care Financing Administration held an industry meeting to discuss the focus of the conditions of coverage revision. Additional discussions with the ESRD community will occur during the regulations process.

Alternatives:

In the past, HCFA has revised portions of the ESRD regulations. However, it was determined that a complete and thorough revision would be a more effective mechanism for developing a comprehensive approach to quality care for the dialysis patient. In addition, this approach provides the regulation with greater potential for future application. Another option is to update the current regulations and maintain the process-oriented standards without developing an outcome-oriented approach. However, we believe it is important now to move forward with the outcome-oriented approach.

Anticipated Costs and Benefits:

The purpose of this final rule is to ensure that ESRD beneficiaries are receiving quality care in both the areas of dialysis and transplantation. We believe that this regulation is a necessary step to ensure that all facilities are using the most effective technology and equipment. The primary benefit of updating the conditions of coverage is the development of performance expectations for the facility that will result in the comprehensive, integrated care and outcomes the patient needs and wants. As a result, the beneficiaries will receive an improved quality of care. In addition, the revised regulations will address the issue of adequacy of dialysis, and this would have a significant impact on ensuring that patients are not being underdialyzed.

Items that have the potential to affect the cost of the ESRD program include data gathering and infection control. However, at this time the cost or savings to the Medicare program are speculative.

Risks:

If the ESRD regulations are not updated, the regulations will not reflect new developments in technology and equipment, thereby denying the improved protections to patients' health care that would result from this proposed rule.

40. CATEGORIZATION AND CERTIFICATION REQUIREMENTS FOR A NEW SUBCATEGORY OF MODERATE COMPLEXITY TESTING (HSQ-222-P)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 263a

CFR Citation:

42 CFR 493.2; 42 CFR 493.3; 42 CFR 493.5; 42 CFR 493.18; 42 CFR 493.20; 42 CFR 493.21; 42 CFR 493.25; 42 CFR 493.43; 42 CFR 493.45; 42 CFR 493.48; 42 CFR 493.49; 42 CFR 493.51; 42 CFR 493.53; 42 CFR 493.638

Legal Deadline:

None

Abstract:

This rule would develop criteria for simple and easy-to-use test systems that have demonstrated accuracy and precision through scientific studies. It would waive the routine 2-year survey of users of accurate and precise technology (APT) tests, conducting surveys only if there are indications of problems or complaints. A small number of surveys would be conducted to validate the criteria for determining APT and to assure quality.

Statement of Need:

This rule would add a subcategory of moderate complexity tests called "accurate and precise technology" (APT) tests that clinical laboratories may perform under the CLIA program. These tests would have to meet less stringent requirements because they will have demonstrated accuracy and precision through scientific studies evaluated by the Centers for Disease Control and Prevention. The purpose of adding this subcategory is to provide regulatory relief to laboratories that perform testing using methodologies that have been determined to be precise and accurate.

Summary of the Legal Basis:

The proposal, based on consultation and in response to public comments, establishes less stringent regulatory requirements for tests that have demonstrated accuracy and precision through scientific studies.

Alternatives:

Laboratories would have to meet the requirements applicable to moderate complexity testing, incurring expenses for personnel, paperwork, and routine biennial inspections. Continual regulatory updates would be required

VOL 60 SS 228 NO 28 1995 UMI

to reflect innovative technological advances. The performance standards currently in place would potentially limit technology.

Anticipated Costs and Benefits:

This rule creates incentives for manufacturers to develop more reliable testing equipment by stimulating demand for accurate and precise technological testing systems. It reduces paperwork and costs for providers, especially for physician office laboratories, as well as reducing costs of program management. It includes specific requirements for the test system manufacturer or producer to include instructions to laboratories for meeting the CLIA requirements, thus lessening operating requirements, supervisory staff qualifications, and the need for routine survey activities.

Risks:

Less oversight reduces assurance that users are following manufacturers instructions and producing reliable results. Technology may not perform as reliably as expected in all workplace settings. Test systems may not perform as expected in different users' hands. Specimen procurement and handling may affect the reliability of testing. We expect no clinically meaningful change in test accuracy, or patient health, from this proposal.

41. CLIA PROGRAM: CATEGORIZATION OF WAIVED TESTS (HSQ-225-P)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 263a

CFR Citation:

42 CFR 493.2; 42 CFR 493.7; 42 CFR 493.9; 42 CFR 493.15; 42 CFR 493.20; 42 CFR 493.25; 42 CFR 493.35; 42 CFR 493.37; 42 CFR 493.39; 42 CFR 493.45; 42 CFR 493.47; 42 CFR 493.49; 42 CFR 493.53; 42 CFR 493.1775

Legal Deadline:

None

Abstract:

This rule would revise our current process of evaluating tests against generic criteria. A waiver would be granted to any test that meets the statutory criteria, provided that scientifically valid data were submitted verifying that the criteria were met.

Statement of Need:

This proposed regulation would clarify and expand the waiver criteria and streamline the waiver process so that more tests may be categorized as waived; that is, free from CLIA performance and personnel requirements. CLIA requirements would also be waived for tests approved for home use by the Food and Drug Administration.

Summary of the Legal Basis:

The Clinical Laboratory Improvement Advisory Committee (CLIAC) was established to advise and make recommendations on technical and scientific aspects of the regulations. The CLIAC recommended that the criteria for categorizing tests as waived be better defined. As a result of the comments concerning waived tests and the CLIAC recommendations, the Centers for Disease Control and Prevention developed criteria for placing tests in the waived category as outlined in this proposal.

Alternatives:

Performance standards based on current analysis specific criteria would have limited technology and impeded innovative ideas.

Anticipated Costs and Benefits:

This regulation decreases burden, especially for physician office laboratories due to virtually no regulatory oversight. It increases access to a greater variety of tests. Physician office laboratories may expand the range of tests they perform without an increase in costs/burden. The regulation creates incentives for manufacturers to develop more test systems that meet the clarified waiver criteria and criteria for approval for home use. It eliminates inspection fees for many of the 60,000 physician offices and other small laboratories performing tests that will fall into the expanded waived category.

Risks:

The proposed expansion of the waived criteria and development of a process protocol would provide for consistent application of detailed standards in order to ensure that tests categorized as waived preclude any reasonable risk of harm to patient as a result of testing error.

42. • CHANGES TO THE HOSPITAL INPATIENT PROSPECTIVE PAYMENT SYSTEM AND FISCAL YEAR 1997 RATES (BPD-847-P)

Priority:

Other Significant

Legal Authority:

42 USC 1395ww

CFR Citation:

42 CFR 412; 42 CFR 413

Legal Deadline:

NPRM, Statutory, May 1, 1996. Final, Statutory, September 1, 1996.

Abstract:

Medicare pays for hospital inpatient services under a prospective payment system (PPS) in which payment is made at a predetermined specific rate for the operating and capital-related costs associated with each discharge. These rules will announce the prospective payment rates for operating and capital-related costs for FY 1997. We will also revise the Medicare hospital inpatient prospective payment systems for operating costs and capital-related costs to implement necessary changes arising from our continuing experience with the system. In addition, we will set forth rate-of-increase limits as well as policy changes for hospitals and hospital units excluded from the prospective payment systems. These changes are applicable to discharges occurring on or after October 1, 1996.

Statement of Need:

Section 1886(e)(5) of the Social Security Act requires the Secretary to publish a proposed notice of prospective payment system policies and payment rates in the **Federal Register** by May 1 and a final rule by September 1.

Summary of the Legal Basis:

As noted above, publication of proposed and final rules concerning hospital PPS policies and payment rates is required by law. The statute sets forth several specific requirements concerning what must be included in the PPS proposed and final rules. (See sections 1886(b)(3)(B), 1886(d)(1)(A), 1886(d)(2)(H), 1886(d)(3)(A), 1886(d)(3)(E), 1886(d)(4)(C), 1886(e)(4), 1886(e)(5), and 1886(g)(1)(A) of the Act.)

Alternatives:

Publication of these rules is not discretionary. Thus, no alternatives exist.

Anticipated Costs and Benefits:

We are unable to estimate at this time the costs and benefits associated with these rules.

Risks:

Not applicable.

FINAL RULE STAGE

43. MEDICARE, MEDICAID, AND CLIA PROGRAMS: REGULATIONS IMPLEMENTING THE CLINICAL LABORATORY IMPROVEMENT AMENDMENTS OF 1988 (CLIA '88) (HSQ-226-F)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 263a

CFR Citation:

42 CFR 493

Legal Deadline:

None

Abstract:

Historically the Department regulated by "location," rather than by the types of tests they performed. CLIA changes this approach. CLIA requires that the Department "regulated by test," using what is commonly referred to as the "complexity model." A final rule with comment period was published February 28, 1992, that set forth standards for all laboratories, based on complexity, and responded to public comments on the proposed standards. The regulation was revised by rules with comment period published on January 19, 1993, December 6, 1994, and April 24, 1995. A final rule, which will respond to these public comments, will be issued.

Statement of Need:

On October 31, 1988, the Congress enacted comprehensive changes to existing laboratory regulations in CLIA. This statute requires the regulation of any facility (including physician offices) that performs tests on human beings for the purpose of providing information for the diagnosis, prevention, or treatment of any disease or impairment of, or the assessment of the health of, human beings. Historically, the Department had regulated laboratories by "location," rather than by the types of tests they performed. CLIA requires that the Department regulate by test, using what is commonly referred to as the "complexity model" to categorize individual laboratory tests based on the experience, skills, and judgment required to perform each test accurately. Requirements vary as a function of the complexity of the tests the laboratory conducts.

The law requires the Secretary to implement the numerous provisions through regulation to ensure the quality of laboratory testing, regardless of where it is provided or who is providing the testing. The law also requires the CLIA program be operated through the assessment of user fees paid by entities subject to these requirements.

On May 21, 1990, the Department published proposed rules to implement CLIA and received public comments from over 60,000 commenters. Based on any analysis of these comments, the Public Health Service (PHS) with the Health Care Financing Administration (HCFA) developed a final rule with comment period that set forth standards for all entities performing laboratory testing based on test complexity. This rule was published on February 28,

VOL
60
ISS
2
28
NO
28
995
UMI

1992, and was effective September 1, 1992. This regulation was revised by regulations with comment period published on January 19, 1993, December 6, 1994, and April 24, 1995.

Issues that will be addressed in this rule include quality control, quality assurance, personnel standards, cytology requirements; proficiency testing (PT) requirements; employee workplace drug testing; and other issues raised by commenters and experience with implementation.

With respect to PT requirements, it is important to note that the July 1995 report of the President and Vice President on Reinventing Health Care Regulations indicated that we will use PT "failures" for education and as an outcome indicator in laboratory quality. (PT is testing samples of known values to assess the accuracy of a laboratory's results.) Sanctions (for example, loss of Medicare payment or loss of approval to do testing) are imposed only in cases of immediate jeopardy or when the laboratory has refused to correct the problem or has had repeated failures on PT. This final rule with comment period will provide clarification on this issue.

The Clinical Laboratory Improvement Advisory Committee (CLIAC), which is composed of members of professional organizations and private citizens, is actively involved in making recommendations regarding technical and scientific aspects of the regulations. In addition, we actively solicit comments from outside organizations such as the American Medical Association, the Association of State and Territorial Public Health Laboratory Directors, and other professional and medical organizations regarding the interpretive guidelines for surveyors.

Summary of the Legal Basis:

This rule summarizes and responds to CLIAC recommendations and public comments to four previously published CLIA regulations.

Alternatives:

HHS is currently developing a final rule that will address comments received on the final rule with comment period published February 28, 1992, and further comments received in response to the January 19, 1993, December 6, 1994, and April 24, 1995 notices with comment period. Based on these comments, modifications to improve the cost-effectiveness of the CLIA standards are under consideration.

Anticipated Costs and Benefits:

It is not possible to project costs and benefits of the omnibus rule at this time. These regulations serve to ensure consistent, reliable laboratory testing which is an integral part of ensuring that individuals receive appropriate treatment.

Risks:

Inferior and inappropriate laboratory testing can result in misdiagnosis causing patient harm. CLIA reduces the potential for inaccurate diagnosis resulting from poorly performed laboratory testing since entities must meet requirements (e.g., quality assurance, proficiency testing, quality control, personnel requirements) which have a direct impact on laboratory testing results. Overly stringent standards could, however, discourage needed testing and reduce early detection of health problems. The Department does not at this time have an estimate of the magnitude and severity of these types of risks, but believes that both the original regulations and the revisions will on balance contribute to better diagnosis.

44. REVISION OF MEDICARE HOSPITAL CONDITIONS OF PARTICIPATION (BPD-745-P)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 1395x; 42 USC 1302; 42 USC 1395(cc); 42 USC 1395(hh)

CFR Citation:

42 CFR 482

Legal Deadline:

None

Abstract:

This proposed rule would revise the requirements that hospitals must meet to participate in the Medicare and Medicaid programs. The revised requirements focus on patient care and the outcomes of that care, reflect a cross-functional view of patient treatment, encourage flexibility in meeting quality standards, and eliminate unnecessary procedural requirements. These changes are necessary to reflect advances in health care practices since the requirements were last revised in 1986. This regulation is part of the Administration's Reinventing Government and regulatory reform initiatives.

Statement of Need:

The purpose of the hospital conditions of participation is to protect patient health and safety and help assure that quality care is furnished to all hospital patients. Hospitals must meet the conditions of participation in order to participate in Medicare or Medicaid. Revised conditions are necessary to ensure that our regulations focus primarily on the actual quality of care furnished to patients, and the outcomes of that care, rather than on procedural compliance. These changes are intended to give hospitals the flexibility needed to achieve high-quality outcomes in the most cost-effective manner.

In addition, the regulations are intended to promote a cross-functional, interdisciplinary approach to hospital performance, instead of an approach

geared towards evaluating each department of a hospital as a stand-alone entity. This approach is in line with current best practices in hospitals, in which patients routinely encounter many caregivers and services that often cut across department lines.

Summary of the Legal Basis:

Section 1961(e) of the Social Security Act (the Act) provides that a hospital participating in the Medicare program must meet certain specified requirements. In addition, section 19861(e)(9) of the Act specifies that a hospital also must meet such requirements that the Secretary finds are necessary in the interest of the health and safety of the hospital's patients. Under this authority, the Secretary has established in regulations the requirements that a hospital must meet to participate in Medicare. These requirements are set forth in regulations at 42 CFR Part 482, Conditions of Participation for Hospitals. Section 1905(a) of the Act provides that Medicaid payments may be applied to hospital services. Under regulations at 42 CFR 440.10(a)(3)(iii), hospitals generally are required to meet the Medicare conditions of participation in order to participate in Medicaid.

Alternatives:

HCFA considered the possibility of revising individual sections of the current hospital regulations. However, we determined that the best means of achieving the systematic changes needed in the regulations was to revise the hospital conditions in their entirety. The specific areas that are likely to form the core of the revised requirements include patient rights, patient assessment, patient care, quality assessment and improvement, and information management.

Anticipated Costs and Benefits:

There would not be significant costs associated with this proposed rule. The benefits that would be derived from the rule are discussed in the Need section, above.

Risks:

By revising these regulations to focus on the quality of the actual care given to an individual and the effectiveness of that care for the individual patient, we hope to reduce risks to beneficiaries' health and safety. Revised procedures can better focus on ensuring that the care being given to a patient is the care that is actually necessary and effective for that patient. No quantitative estimates of risk reductions are available yet.

45. MEDICARE PROGRAM: REVISIONS TO PAYMENT POLICIES AND ADJUSTMENTS TO THE RELATIVE VALUE UNITS (RVUS) UNDER THE PHYSICIAN FEE SCHEDULE FOR CALENDAR YEAR 1996 (BPD-827-FC)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 1395w-4

CFR Citation:

42 CFR 400; 42 CFR 405; 42 CFR 410; 42 CFR 411; 42 CFR 412; 42 CFR 413; 42 CFR 414; 42 CFR 415; 42 CFR 417; 42 CFR 489

Legal Deadline:

Final, Statutory, January 1, 1996.

Abstract:

This final rule with comment period revises various payment policies for specific physician services and the relative value units (RVUs) for certain existing procedure codes, effective January 1, 1996. It also establishes interim RVUs for new and revised procedure codes. The rule implements section 1848 of the Social Security Act.

Statement of Need:

The Omnibus Budget Reconciliation Act (OBRA) of 1989 changed the basis of the Medicare Physician payment system from reasonable charge to a fee schedule based on relative value units (RVUs). The fee schedule was first implemented in 1992. This document will announce the RVUs upon which Medicare payment for physician services will be based in 1996, including interim RVUs for procedure codes that are new or revised for 1996. The public was given a 60-day period to comment on the interim values. It will also explain the process by which the interim RVUs were reviewed and, in some cases, revised as a result of public comments.

After 3 full years of experience with the physician fee schedule, we have reevaluated several payment policies related to it. Proposed revisions to these policies were announced in a notice of proposed rulemaking on July 26, 1995. This final rule will respond to the public comments received on those proposals and announces the final policy decisions. Thus, it will discuss changes in payment for the services of teaching physicians, limiting payment for interpretation of electrocardiograms and x-rays taken in the emergency room, making budget neutrality adjustments on the conversion factor rather than the RVUs, and changes in the calculation of the multiple volume performance standard (MVPS). It will also announce final decisions regarding the extension of the site-of-service payment differential to ambulatory surgical centers, prohibition of separate payment for the transportation of diagnostic equipment to a patient, expansion of the definition of "diagnostic" mammography, and a variety of bundled services.

This document also discusses the process for periodic review and adjustment of all RVUs. In this regard, we have and will continue to work with the physician community through the American Medical Association Specialty Society Relative Value Update Committee.

Alternatives:

An alternative to this notice would be to continue to base payments on 1995 RVUs. This would continue inappropriate payments for certain services and would not allow a national basis for paying for new services. By

VOL
60
SS
2
28
NO
28
995
UMI

not revising the payment policies described in this notice, we would continue inadequate or inequitable payments for certain physician services.

Anticipated Costs and Benefits:

Section 1848(c)(2)(B) of the Social Security Act requires that adjustments to RVUs for a year may not cause the amount of expenditures to differ by more than $20 million from the amount of expenditures if the adjustments had not been made. In general, the payment policies and other revisions included in this notice will be implemented in a budget-neutral manner. Thus, total Medicare expenditures will not be increased or decreased as a result of most of these changes.

Risks:

Not applicable.

46. • CRITERIA AND PROCEDURES FOR EXTENDING COVERAGE TO CERTAIN DEVICES AND RELATED SERVICES (BPD-841-FC)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 1395y(a)(1)(A)

CFR Citation:

42 CFR 405; 42 CFR 411

Legal Deadline:

None

Abstract:

This final rule establishes in regulations that certain medical devices with an investigational device exemption (IDE) approved by the Food and Drug Administration (FDA) may be covered under Medicare. Specifically, it sets forth the process by which the FDA will assist HCFA in identifying nonexperimental investigational devices that may be potentially covered under Medicare. It is intended to provide Medicare beneficiaries with greater access to advances in medical technology.

Statement of Need:

In his National Performance Review, Vice President Gore directed the health agencies of the Department of Health and Human Services (HHS) to review their policies and processes to determine which requirements could be reduced or eliminated without lowering health and safety standards. In accordance with this directive, FDA reviewed its current regulatory approval processes and HCFA reviewed its Medicare coverage policies for medical devices that have not received full FDA approval.

The Medicare program has historically interpreted the statutory terms "reasonable and necessary" to mean that a service or medical device must be safe and effective, medically necessary and appropriate, and not experimental, in order to qualify for reimbursement. For Medicare coverage proposes, the term *experimental* has been used synonymously with the term *investigational*. Therefore, an approved investigational device exemption (IDE) application served as an indication that the device was not "reasonable and necessary" within the meaning of the Medicare program. Under this policy, Medicare coverage was denied for devices that require, but have yet to receive, 510(k) clearance and those that have received an IDE but have not received premarket approval (PMA).

There is increasing recognition that there are devices which are refinements of existing technologies or replications of existing technologies by other manufacturers. Many of these devices are placed within the IDE category as a means of gathering the scientific information necessary for FDA to establish the safety and effectiveness of the particular device, even though there is scientific evidence that the type of device can be safe and effective. Arguably, these devices could be viewed as "reasonable and necessary" by Medicare and recognized for payment if it were possible to identify them in the FDA's process.

Accordingly, FDA and HCFA are developing a revised policy to meet the needs of Medicare beneficiaries. The purpose of this effort is to determine if it is feasible to expand Medicare coverage to include certain medical devices that have not yet received FDA marketing approval/clearance without compromising the safety of medical care provided to Medicare beneficiaries. The intent is to devise ways to assure Medicare beneficiaries greater access to advances in proven medical technology, to encourage clinical researchers to conduct high-quality studies, and to clarify Medicare coverage of reasonable and necessary medical services during clinical trials for investigational devices.

Anticipated Costs and Benefits:

In most instances, payment for devices covered as a result of this regulation will be held to the level of the most similar approved device. However, it is possible that some beneficiaries may be better suited to the newly covered device, resulting in some additional claims. Program costs associated with any new claims are estimated at $7 million for fiscal year 1996, rising to $9 million in fiscal year 2000.

Risks:

The anticipated policy will make more effective medical devices available sooner without exosing clients to additional risks.

HHS—Administration for Children and Families (ACF)

PROPOSED RULE STAGE

47. QUALITY STANDARDS FOR HEAD START PROGRAMS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 9801

CFR Citation:

45 CFR 1301; 45 CFR 1304; 45 CFR 1309

Legal Deadline:

NPRM, Statutory, May 18, 1995.

Legal deadline only pertains to performance standards.

Abstract:

The NPRM will establish performance standards with respect to services provided to children 0 to 5 years old by Head Start Programs, including health, education, parent involvement, nutritional, social, and transitional services, administrative and financial management standards and standards relating to the condition and location of facilities used to carry out Head Start activities.

Statement of Need:

This regulation responds to the Administration's commitment to re-engineer the Head Start program in terms of quality improvement and capacity expansion and incorporates the Head Start Amendments of 1994 provision authorizing a new program of comprehensive, developmental services for low-income families with infants and toddlers. The statute requires the Department of Health and Human Services to publish performance standards governing the projects to be funded under this authority.

Summary of the Legal Basis:

Section 112, Title I (the Head Start Act Amendments of 1994) of the Human Resource Amendments of 1994.

Alternatives:

These rules are required by statutory mandate. To the extent that there is flexibility in regulating specific provisions, all reasonable alternatives were considered by the Administration for Children, Youth and Families prior to the promulgation.

Anticipated Costs and Benefits:

Any costs associated with this regulation are the result of legislation and therefore are reflected in the President's budget.

Risks:

None.

BILLING CODE 4150-04-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT (HUD)

Statement of Regulatory Priorities

The Mission of HUD

More than any other Federal agency, the Department of Housing and Urban Development (HUD) is defined by its relationship with communities across the Nation. Everything HUD does—enhancing homeownership opportunities, providing rental assistance to low-income families, expanding the supply of affordable housing, substantially reducing racial barriers to residential mobility, stimulating neighborhood economic activity—is geared towards supporting the development and maintenance of healthy, thriving communities of opportunity. This is why Secretary Henry G. Cisneros has defined HUD's central mission as "Helping People Create Communities of Opportunity."

Upon assuming the leadership of HUD in 1993, Secretary Cisneros made reinvention of HUD one of his first priorities. HUD's reinvention efforts took place in the context of President Clinton's governmentwide reinvention process, the National Performance Review (NPR), under the leadership of Vice President Gore. Secretary Cisneros recognized, as did NPR, that for HUD to fulfill its mission successfully, restructuring of HUD was necessary—restructuring of HUD's organization and its programs.

HUD's Regulatory Plan for fiscal year 1996 reflects HUD's commitment to its mission and also its commitment to reinvention. HUD is intent on moving away from overly bureaucratic, top-down approaches that tell communities what they need and how they should go about solving their problems. The new HUD believes that decisionmakers at the neighborhood, local, and State levels should have maximum flexibility to design and utilize Federal resources to solve problems and promote economic growth, consistent with national objectives.

The Transformation to a New HUD

Through its reinvention process, HUD established the framework for (a) assessing the Department's internal organization; (b) determining whether legislation, operating procedures, and regulations contribute to the achievement of HUD's purposes or impede it; and (c) defining results-oriented performance standards against which HUD policies and programs could be judged and the work of HUD's offices and employees could be evaluated. The overall objective of the reinvention process was to fundamentally transform HUD from an agency driven by numerous, individual, uncoordinated programs administered in isolation from each other; unnecessary procedures; and layers of regulations into an agency that is a responsive, problem-solving deliverer of affordable housing, and of community and economic development resources.

HUD determined that one of the first steps it needed to take in its transformation from the old HUD to the new HUD was the consolidation and streamlining of funding programs. HUD recognized that its effectiveness had been diminished by the proliferation of dozens of separate, albeit similar, funding programs. By allocating funds through many separate programs, HUD had undercut the incentive for States and local governments to engage in coordinated strategic planning. Consolidation of HUD funding programs would eliminate the fragmented delivery system of assistance that operates inefficiently and, at times, ineffectively. With fewer programs to administer, it would be possible to consolidate HUD's operational and administrative support functions to produce economies of scale and more efficient program administration.

The American Community Partnerships Act—HUD's Legislative Reinvention Proposal

On May 1, 1995, HUD took a major step forward in the reinvention of HUD. On that date, HUD submitted proposed legislation, the "American Community Partnerships Act," to the Congress. The American Community Partnerships Act proposes to streamline the delivery of housing and community development assistance to individuals and communities, and maximize the use of scarce Federal resources, by:

- Providing greater flexibility for State and local officials in deciding how to address locally identified needs;
- Providing individual choice for those in need of housing assistance, including the use of certificates for homeownership, while stressing the primacy of work and personal development; and
- Increasing homeownership rates through a new Federal Housing Corporation that is better equipped to serve low- and moderate-income homebuyers and that is in step with modern banking practices and services.

The American Community Partnerships Act also proposes to consolidate 60 separate programs into three performance-based funds: the Community Opportunity Fund, the Affordable Housing Fund, and the Housing Certificates Fund. These three funds will give communities the resources to address locally identified problems, free from the layers of Federal regulations and approvals that have characterized the scores of active HUD programs now on the books.

In addition to the three performance-based funds, the legislation proposes to provide the mechanisms to further reduce homelessness and transform public housing, Native American housing, and the Federal Housing Administration (FHA).

While this legislation is under consideration, HUD is continuing to work on consolidating and streamlining its programs through the regulatory process in an effort to achieve the objectives of the American Community Partnerships Act, to the extent possible given statutory parameters and barriers.

Regulatory Reinvention

A key component of HUD's reinvention has been reinvention of HUD's regulatory process and its approach to rulemaking. Reinvention of HUD's rulemaking operations was at the forefront of HUD's reinvention efforts launched in 1993.

At the foundation of HUD's reform of its regulatory process is Executive Order 12866 (Regulatory Planning and Review), issued by President Clinton on September 30, 1993. This order directs agencies to explore regulatory alternatives and, if regulations are determined to be necessary, to select approaches that maximize net benefits and involve enhanced public accessibility to and participation in the rulemaking process.

Under the leadership of Secretary Cisneros, public participation in HUD's rulemaking process has increased substantially. Consistent with Executive Order 12866, HUD has involved its program partners and the ultimate beneficiaries of HUD programs in the early stages of the rule development process by inviting them to participate as working groups and to share ideas about the issues to be addressed in a rule. HUD has also increased public participation in the rule development process through greater use of public meetings—both at the pre- and post-publication stages of a proposed rule. In addition to increasing public participation, HUD streamlined its internal process for development of regulations and began the process of streamlining rules and program requirements to make the programs operate more effectively and efficiently.

HUD's regulatory reinvention process gained momentum under President Clinton's regulatory reform initiatives. On March 4, 1995, the President issued a directive to all Federal departments and agencies to focus on the following four steps as part of the Administration's ongoing regulatory reform initiative: (a) cut obsolete regulations; (b) reward results, not red tape; (c) get out of Washington and create grassroots partnership; and (d) negotiate, don't dictate (provide for increased use of negotiated rulemaking). Through HUD's own reinvention efforts, begun in 1993 and following the guidance provided in Executive Order 12866, each one of these regulatory reform initiatives had already been implemented in varying degrees.

HUD's efforts to create grassroots partnerships began in early 1994, and HUD's successes in forming such partnerships across the country and the accomplishments of these partnerships were described in HUD's June 15, 1995, Summary Report to President Clinton on the President's Regulatory Reform Initiatives. HUD's successful efforts to involve the public in its rulemaking process were also described in the June 15, 1995, report, as well as in HUD's Regulatory Plan for fiscal year 1995, published in the **Federal Register** on November 14, 1994.

Although under Executive Order 12866 HUD had begun a review of its existing regulations to determine which should be modified or eliminated, the pace of this review increased under the President's March 4, 1995, directive to conduct a page-by-page review of all existing regulations and to complete that review by June 1, 1995. By the completion of this review, HUD had identified 65 regulatory parts that could be eliminated and an additional 153 parts that could be simplified and streamlined.

Regulatory Successes

HUD's regulatory reinvention has yielded several successes that affect HUD's current operations and programs. HUD has been successful in reducing paperwork and information collection requirements in several program areas, and has moved itself and its recipients further into the age of technology. HUD has completed its first negotiated rulemaking and has transferred more power and authority for the administration and operation of its programs to States and to local and tribal governments, to provide more flexibility in the operation of the programs. Specific examples of these successes are as follows:

- The Consolidated Plan final rule, published on January 5, 1995, replaces the separate application and reporting requirements for the Community Development Block Grant Program, the HOME program, the Emergency Shelter Grant Program, and the Housing Opportunities for Persons with AIDS Program.
- The Community Development Block Grant (CDBG) Program Economic Development Guidelines, published on January 5, 1995, established guidelines to assist CDBG recipients in evaluating and selecting economic development activities for assistance with CDBG funds, and makes certain changes to the CDBG program to facilitate the use of CDBG funds for economic development objectives.
- All of the requirements for Indian Housing program development and operations have been consolidated in a final rule published on April 10, 1995. The rule provides greater discretion and responsibility at the local level for the program, and reduces regulatory requirements by 40 percent for Indian Housing Authorities and tribes.
- HUD's Federal Housing Administration has streamlined requirements for mortgage insurance for newly constructed homes. This will reduce the paperwork burden on lenders and builders by as much as 75 percent.
- Required reporting to HUD on characteristics of tenants in assisted housing has been automated. Project-based reporting rules were issued in 1994 and a final rule to automate reporting by Public and Indian Housing Authorities was issued on March 2, 1995. These new requirements will substantially reduce the cost and burden of collecting this information.
- HUD's Office of Public and Indian Housing has streamlined the requirements for submission of operating budgets by housing authorities. As a result of this streamlining effort, it is anticipated that 3,000 housing authorities will not be required to submit operating budgets to HUD for review and approval.
- Revisions to the regulatory requirements for payment of Operating Subsidy for vacant units (the Vacancy rule) are being developed through negotiated rulemaking, the first use by HUD of this technique. HUD's proposed Vacancy rule was published on July 19, 1995, and received favorable public comment on the negotiated rulemaking process.
- On July 3, 1995, HUD published a final rule that combined and conformed HUD regulations governing tenant-based rental assistance under HUD's Rental Certificate Program and its Rental Voucher Program.
- On August 1, 1955, HUD published a final rule revising its regulations governing sanctions imposed by the Mortgage Review Board. This rule provides for the Board to delegate its hearing authority to a hearing official who will conduct informal hearings under stated time limitations, thereby streamlining the hearing process.
- On August 14, 1995, HUD's Government National Mortgage Association (Ginnie Mae) published a final rule that streamlined the existing Ginnie Mae regulations, and made them more flexible and customer-friendly. The regulations removed outdated parts and sections of parts to trim the Association's regulations to only those necessary to operate current programs.
- On September 11, 1995, (60 FR 47260), HUD published a final rule that removes approximately 40 obsolete or unnecessary parts and approximately 20 subparts and appendices. Development and publication of this rule stems from HUD's page-by-page review of its existing regulations.

Although HUD believes that it has made significant and important changes to its programs and operations through the regulatory process, it is committed to further regulatory changes to assist in the transformation to the new HUD.

HUD has several reinvention rules under development that will consolidate duplicative and repetitive program requirements to the extent possible given statutory parameters. To reduce the repetition of requirements applicable to all or the majority of HUD programs, HUD proposes to create a new part (and in the process eliminate other parts and subparts) that will contain (a) definitions that are used across the board in HUD programs, (b) a list of other Federal requirements applicable to HUD programs, (c) waiver authority (i.e., authority to waive regulatory provisions), (d) across-the-board funding requirements, and (e) admission and occupancy requirements. The consolidation into one part of all the above-noted provisions will help create uniformity in HUD grant programs that

VOL
60
ISS
2
28
NO
28
995
UMI

will benefit participants in these programs.

HUD also proposes to consolidate into a single rule, to the extent possible, the following nondiscrimination rules in 24 CFR: Parts 1 and 2—Nondiscrimination Under Title VI of the Civil Rights Act of 1964 (Nondiscrimination on the basis of race, color, or national origin in HUD-assisted programs) and Practice and Procedure for Hearings Under Part 1 (Nondiscrimination hearing procedures); Part 8—Nondiscrimination in HUD-Assisted Programs (Nondiscrimination on the basis of disability in HUD-assisted programs); Part 107—Nondiscrimination Under Executive Order 11063 (Nondiscrimination and equal opportunity in the sale, rental, or leasing of property owned by the Federal Government); Part 108—Compliance Procedures for Affirmative Fair Housing Marketing (Review of fair housing marketing plans); and Part 146—Nondiscrimination on the Basis of Age. These parts contain several identical or near-identical sections.

The Role of Regulations in the New HUD

In accordance with Executive Order 12866, the President's March 4, 1995, directive, and Secretary Cisneros' internal regulatory directives, HUD is committed to exploring alternatives to regulations, and to regulate only when necessary to achieve essential objectives or where mandated by statute to do so. Where regulations are required, HUD is committed to these regulatory principles.

HUD will ensure that its rules are consistent with HUD's reinvention objectives and that the rules are sensible, understandable, cost-effective, customer-friendly, and minimally burdensome. HUD will continue to consult with the public, using informal working groups, public meetings, regulatory negotiation, and other innovative techniques to increase public participation.

HUD will continue to work closely with other Federal agencies where regulatory matters overlap. HUD's noncitizens final rule, published March 20, 1995, reflects HUD's consultation with the Immigration and Naturalization Service. HUD's Base Closure rule, discussed more fully in this regulatory plan, reflects HUD's close working relationship with the Department of Defense. HUD is working closely with the Federal Highway Administration on a rule relating to standards for tires that transport manufactured homes.

HUD will continue to provide oversight and enforce the law in a number of key areas, including civil rights, operation of government-sponsored enterprises, real estate settlement processes, regulation of interstate land sales, and the establishment and enforcement of lead-based paint standards and manufactured housing. Changing the way that HUD fulfills its mission does not eliminate the need for HUD to continue to provide regulatory oversight in these key areas. However, HUD recognizes that its role as a regulator can be improved—that it can work more in partnership with the entities and individuals it regulates and other interested parties to achieve together the objectives of the regulatory authority (e.g., fair housing, safe manufactured housing, lead-based paint free housing, and protection of consumers).

Regulatory Priorities

For fiscal year 1996, HUD will focus its resources on regulatory actions that promote HUD's reinvention and HUD's mission, as demonstrated by the description of the following priority rules. Although the following rules reflect essential elements of HUD's reinvention efforts and a commitment to its mission, other regulations described in HUD's Semiannual Agenda of Regulations also reflect these efforts and commitment.

Priority: Reducing Homelessness

Reduce the number of homeless Americans through partnerships with local governments and private-sector nonprofit groups that help people gain access to housing and the services they need.

In early July 1995, HUD announced $900 million in grants to help the homeless. HUD's Office of Community Planning and Development issued 800 grants in 228 cities to help communities carry out a comprehensive plan to help homeless families and individuals. The award was the largest level of homeless assistance ever awarded and is a critical part of HUD's priority to help communities forge a comprehensive approach to break the cycle of homelessness. The following regulatory action is consistent with HUD's activities to date to work as a partner with communities to develop a coordinated strategy to aid the homeless population.

Regulatory Action: Use Base Closure Properties to Assist the Homeless

This interim rule, developed jointly with the Department of Defense (DoD), implements the Base Closure Community Redevelopment and Homeless Assistance Act of 1994 and creates a new community-based process wherein homeless assistance providers work directly with local redevelopment authorities on the reuse of former military installations. This rule assists HUD's efforts to reduce homelessness by providing a process by which former military properties may be used to address the needs of homeless individuals and families. Final regulatory action will establish the definitive procedures to be followed to maximize use of base closure property to assist the homeless.

Priority: Turning Around Public Housing

Make public housing a source of pride to communities by encouraging resident participation in its management; downsizing large developments; restoring deteriorating buildings; offering residents opportunities to move to low-poverty areas; giving residents incentives to work and lift themselves economically; and ensuring that public housing sites become safe, healthy, and attractive places to live and raise children.

HUD is vigorously pursuing its efforts to transform America's worst public housing into communities where families can build a better future. On July 31, 1995, Secretary Cisneros joined local officials in Charlotte, North Carolina, as the Earle Village, a 307-unit public housing development in deteriorating condition, was toppled by a bulldozer to make room for affordable housing. During the weekend of July 29, 1995, the demolition of the final buildings of the Raymond Rosen public housing complex in Philadelphia, Pennsylvania, occurred. This public housing complex had become an uninhabitable eyesore for the community. On August 21, 1995, the Housing Authority of Baltimore City, Maryland, began the demolition of Lafayette Courts, the city's worst public housing development. With a grant from HUD, the city prepares to revitalize the neighborhood by building garden-style townhouses to serve the needs of the Lafayette community.

The following regulatory actions continue HUD's efforts to turn around public housing.

Regulatory Action: Revision of the Public Housing Management Assessment Program

The Public Housing Management Assessment Program is the major tool for assessing the performance of public housing authorities. However, the current system includes some process-oriented, staff-intensive reporting requirements that are thought to be not necessarily accurate or objective measures of results. This rule will eliminate unnecessary paperwork and provide better measures of performance and program results to promote better management of public housing developments. The rule incorporates recommendations made as a result of a comprehensive review of the program regulations.

Regulatory Action: Public Housing Development Program Redesign

The current public housing development program regulations are outdated and contain unnecessary restrictions on the flexibility of housing authorities. This rule will revise the public housing development regulations to provide more flexibility for all participants with even greater flexibility to the best performers. "High performer" PHAs will have maximum latitude to develop public housing within very broad parameters and with minimal HUD oversight (with the exception of those elements that HUD, by statute, must perform). Remaining PHAs will be given broadened responsibility commensurate with their abilities and areas of expertise. HUD will retain the option of reviewing any PHA action, thus minimizing risk to the Department.

Streamlining the program will help to reduce a substantial preconstruction pipeline and expedite the provision of replacement housing for developments that should be fully or partially replaced. The rule will reflect the recommendations resulting from a comprehensive review of the public housing program.

Regulatory Action: Public/Private Partnerships for Mixed-Finance Development of Public Housing Units

This rule will authorize a public housing authority to enter into a partnership with an entity (or entities) for the purpose of developing and owning public housing properties. The resulting partnership would also be authorized to use a combination of public and private financing mechanisms, which may include borrowing public housing development funds from the PHA and/or the sale of low-income housing tax credits, to develop projects.

Conventional methods of public housing development are time-consuming and costly; by permitting PHAs to enter into partnerships with nonpublic entities, the development process can be expedited, with resulting savings in both financing and construction costs.

Priority: Expanding Housing Opportunities

Expand Housing opportunities for low- and moderate-income people through partnerships with State and local governments, private developers, lending institutions, and nonprofit agencies, and reestablish the Federal Housing Administration as an active facilitator of homeownership for low- and moderate-income families.

On November 5, 1994, President Clinton directed Secretary Cisneros to develop, in cooperation with the most significant members of the housing industry and all levels of government, a plan to boost homeownership to an all-time high in the United States—a strategy that recommits America to homeownership, that will add millions of new homeowners by the end of the century.

In response, HUD established a National Homeownership Partnership, bringing together the resources and commitments of the housing industry's major public, private, and nonprofit organizations. HUD's partners include the Federal National Mortgage Association (Fannie Mae), the Federal Home Loan Mortgage Corporation (Freddie Mac), the National Association of Home Builders, the National Association of Realtors, Habitat for Humanity and the National League of Cities. The partners recognized that the goal of the partnership will not be achieved without substantially increasing homeownership opportunities to moderate-income families, members of minority groups, newcomers to the United States, and residents of communities who aspire to own their own homes but whose needs have not been met by the conventional mortgage market.

On June 5, 1995, Secretary Cisneros joined President Clinton, Vice President Gore, and members of the National Homeownership Partnership to announce a national homeownership strategy that will add up to 8 million new families to the nation's homeownership rolls by the end of the year 2000. The strategy, announced at the June 5, 1995, meeting, does not require new government programs or new funds from Congress. Instead, national, State, and local groups will work together to make it less expensive to buy a home and easier to get a mortgage, and to eliminate obstacles to homeownership.

On July 26, 1995, Secretary Cisneros reported that recent Census Bureau data showed that the national homeownership rate grew one-half percentage point during the first six months of 1995, the strongest short-term gain in many months. At the end of June 1994, the homeownership rate was 64.2 percent. At the end of June 1995, the overall rate had increased to 64.7 percent.

The following regulatory action also reflects HUD's efforts to expand housing opportunities.

Regulatory Action: Federal Housing Enterprises Financial Safety and Soundness Act of 1992—Implementing Regulations

This final rule will establish housing goals for FNMA and FHLMC for 1995 and beyond, fair-lending requirements, guidelines for new program approval, regulations for proprietary information, reporting requirements, and other issues. The rule will focus additional effort by FNMA and FHLMC on underserved areas and lower-income families facing affordability problems. It will provide final guidance to replace the Interim Notice under which the program is currently operating.

Prior to issuance of the proposed rule, published on February 16, 1995, (FR 60 9154) HUD met many times with the GSEs (Fannie Mae and Freddie Mac) to discuss issues relating to the Interim Notice under which the GSEs were operating. HUD also held two roundtables to discuss the definition of "underserved" used in establishing the central cities, rural areas, and other underserved areas goal. Roundtable participants included the GSEs, researchers, other Federal agencies (Department of Agriculture, Farmers Home, Census Bureau), the Congressional Budget Office, and public-interest groups.

In developing the final rule, HUD considered the experience gained and lessons learned while operating under the interim notice during the transition period of 1993-1995, and held additional roundtable discussions. HUD also conducted extensive analysis and research to determine the appropriate changes to the housing goals.

Priority: Opening Housing Markets

Open housing markets to minorities through vigorous enforcement of fair housing laws and support for creative metropolitan-wide housing and urban development initiatives.

In addition to expanding housing opportunities, HUD is committed to opening housing markets by working to eliminate discrimination. Housing discrimination and segregation undermine the health and vitality of our Nation's communities. Discrimination denies minority families full and free choice about where to live, while denying minority neighborhoods the services and resources they need to thrive and grow.

HUD's reinvention approach to fair housing and equal opportunity is designed to strike a balance between enforcement and compliance. In an effort to obtain broad compliance with fair lending standards, HUD has encouraged mortgage companies to sign a voluntary fair-lending best practices agreement. Under this agreement, a lender voluntarily agrees to establish a set of policies and procedures that will ensure fair and equal treatment of all potential homebuyers. The objective is to provide an environment that increases lending and homeownership opportunities for historically underserved buyers. To date, approximately 10 mortgage entities have signed the agreement, including the Mortgage Bankers Association.

The following regulatory actions continue HUD's efforts to open housing markets, and will be developed with the participation and assistance of the real estate industry.

Regulatory Action: Methods of Proof of Discrimination under the Fair Housing Act.

This rule will describe the standards that HUD will apply in determining whether policies and practices in real estate-related transactions violate the Fair Housing Act. The standards used in making those determinations include overt discrimination, disparate treatment, and discriminatory effect. This rule will help promote compliance by those engaged in real estate-related transactions, eliminate uncertainty, and reduce litigation.

Regulatory Action: Fair Housing Council Regulation

This rule will describe the functions, organization, and operations of the President's Fair Housing Council; the Council's programs and activities; the responsibilities and obligations of member departments and agencies in ensuring that programs and activities related to housing and urban development are administered and executed in a manner that furthers fair housing; the responsibilities and obligations of applicants, participants, and other persons and entities involved in furthering the goal of fair housing; and a method to identify impediments in programs or activities that restrict fair housing choice and implement incentives that will maximize the achievements of practices that further fair housing.

Priority: Provide Maximum Flexibility to States and Local Governments to Design and Utilize Federal Resources

Empower communities by supporting local efforts to transform neighborhoods, by reinvigorating economic development programs and creating new opportunities for people and businesses, and by supporting community-based organizations.

In December 1994, President Clinton announced the designation of 72 areas as Empowerment Zones and Enterprise Communities (EZ/EC). These designations followed issuance of the EZ/EC rule and notice inviting applications, published in January 1994. The EZ/EC designations mean that distressed communities receive special tax, regulatory, and other forms of relief and incentives, plus seed money, to enact their own visionary plans for revitalization. The EZ/EC designations help to restore economic opportunity to distressed neighborhoods and enable communities to take responsibility for their own futures.

The EZ/EC rule and designations reflect one way in which HUD empowers communities to plan for and take charge of their own future. The following regulatory action also reflects HUD's efforts to vest more authority in States and local governments so that they will have better control over activities and resources.

Regulatory Action: Environmental Review Procedures

This proposed rule streamlines and updates current environmental procedures for entities assuming HUD environmental responsibilities for carrying out the environmental review in accordance with the National Environmental Policy Act (NEPA) of 1969 and the other related Federal environmental laws and authorities. This rule will ease the administration of environmental review responsibilities by recipients that are permitted to assume such responsibilities.

Regulatory Action: Final Rule Implementing the HOME Investment Partnerships Program

Improved administration of the HOME Program to increase its effectiveness as a vehicle for providing housing opportunities in communities has been a priority of the Department. This final rule will streamline and improve HOME Program operations at the State and local level by drawing upon public comments that were solicited as each HOME interim rule was published, upon HUD's experience in administering the program, and upon the input of program participants at numerous training sessions across the country.

Other Priority Regulations

The following rule supports a specific legislative initiative.

Regulatory Action: Revision of Lead-Based Paint Rules

The Housing and Community Development Act of 1992 made significant revisions to the requirements on the evaluation and control of lead-based paint hazards in federally assisted and federally owned housing. The regulations to be issued will specify what must be done, when, and by whom, in each housing program, and they will state minimum standards for how the activities must be done. The purpose of the requirements is to reduce childhood exposure to lead without reducing the supply of affordable housing.

These regulations consolidate a number of different requirements for different programs to control lead-based paint hazards. In the past, there were sometimes conflicting requirements for different programs. Lead-based paint regulations will now be targeted to controlling exposures and not necessarily to removal of all lead-based paint or to mere repainting. The requirements will be targeted to those dwellings most likely to poison children. They will now be consistent across all programs and will vary depending on the degree of Federal assistance provided to ensure that practical responses can be made to control lead-based paint hazards with available resources. The regulations are also based on valid approaches to most cost-effective ways of protecting children, based on scientific research. A companion piece to the regulations is provided by the recently released guidelines that describe how the various options to render housing lead-safe can be implemented.

HUD—Office of the Secretary (HUDSEC)

PROPOSED RULE STAGE

48. ENVIRONMENTAL REVIEW PROCEDURES FOR RECIPIENTS AND RESPONSIBLE ENTITIES ASSUMING HUD RESPONSIBILITIES (FR-3514)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 43320; 42 USC 3535(d)

CFR Citation:

24 CFR 58

Legal Deadline:

None

Abstract:

This proposed rule published September 25, 1995, streamlines and updates current environmental procedures for entities assuming HUD environmental responsibilities for carrying out environmental review in accordance with the National Environmental Policy Act (NEPA) of 1969 and the other related Federal environmental laws and authorities. When this rule is issued as a final rule, it will replace the current interim rule issued on April 12, 1982 (47 FR 15752).

Statement of Need:

This rule is needed to update and ease the administration of environmental review responsibilities by recipients that are permitted to assume such responsibilities.

Summary of the Legal Basis:

National Environmental Policy Act of 1969 (42 USC 4321-4347) and Federal laws and authorities cited in sections 58.5 and 58.6 of 24 CFR 58.

Alternatives:

HUD is considering legislative proposals that would permit additional HUD programs to qualify for the assumption of environmental review responsibilities by recipients.

Anticipated Costs and Benefits:

Costs: There would be incremental costs to entities that assume the environmental review responsibilities.

Benefits: Recipients would be empowered to conduct their own reviews and have greater control over their ability to draw funds. Additionally, because this rule will amend existing regulations to streamline and expedite the process of performing environmental reviews, it should ease the administrative burden on HUD as well as on recipients authorized to assume environmental review responsibilities. Costs should therefore be reduced. Costs are reduced for HUD because it is relieved of this responsibility for authorized recipients. Costs are reduced for recipients because new procedure minimizes the delays, and the costs incurred by such delays, in waiting for HUD (and its reduced staff resources) to perform the environmental review.

Risks:

This rule poses no risks to public health, safety, or the environment. It provides for the assumption of environmental review responsibilities by recipients and streamlines the governing regulatory requirements.

HUD—HUDSEC

FINAL RULE STAGE

49. LEAD-BASED PAINT POISONING PREVENTION IN CERTAIN RESIDENTIAL STRUCTURES (FR-3482)

Priority:

Economically Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 4822; 42 USC 3535(d)

CFR Citation:

24 CFR 35

Legal Deadline:

Final, Statutory, January 1, 1995.

Abstract:

The Office of Lead-Based Paint Abatement and Poisoning Prevention was established by Congress within the Office of the Secretary of HUD. The Office provides overall direction to HUD's lead-based paint activities.

Currently, part 35 of HUD's regulations addresses the Department's requirements on lead hazards in housing. The Residential Lead-Based Paint Hazard Reduction Act of 1992, which is title X of the Housing and Community Development Act of 1992, requires substantial revisions to HUD's current regulations for the evaluation and control of lead-based paint hazards in federally assisted and federally owned housing. The legislation evidences a concern with developing a national strategy to build the infrastructure necessary to eliminate lead-based paint hazards in all nonelderly, pre-1978 housing. Because of the scope of the problem, the strategy will be implemented on a priority basis, and is to be based in part on guidelines issued by the Secretary on August 25, 1995, on the conduct of federally supported work involving risk assessments, inspections, interim control, and abatement of lead-based paint hazards ("Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing"). The revisions required by title X will affect HUD's housing programs and the

VOL
60
ISS
2
28
NO
28
995
UMI

housing programs of other Federal agencies.

HUD is consolidating the multitude of lead-based paint regulations found throughout HUD programs and will make them consistent, creating a single point of reference for the Department's lead-based paint requirements.

Statement of Need:

The Centers for Disease Control and Prevention (CDC), the American Academy of Pediatrics, and the National Academy of Sciences have labeled lead poisoning as the leading environmental health hazard facing America's children. Childhood lead exposure has been shown to cause damage to the brain and nervous system, which causes behavior and learning problems; reduced IQ; slowed growth; hearing problems; hypertension and heart disease; reproductive problems for both men and women; kidney damage; and many other adverse health effect, in some cases even seizures, coma, and death. These effects result in increased medical care costs, increased special education costs, and decreased lifetime earnings. The reduction in IQ appears to be irreversible, and because lead is stored primarily in bone, internal exposures can occur for decades, even if environmental exposures are controlled. The results of CDC's third National Health and Nutrition Examination Survey (NHANES III, 1988-1991) indicate that population blood lead levels have deceased dramatically as a result of the deleading of gasoline and the elimination of lead in solder in food canning. However, the CDC report has concluded that lead paint in older housing remains the primary source of lead exposure. CDC found that 8.9 percent of all American children less than 6 years of age had blood lead levels greater than CDC's level of concern (10 ug/dL). In large central cities, the figure was 21 percent, and among non-Hispanic black children in large central cities, 36.7 percent had blood lead levels above the level of concern. This constitutes 1.7 million children under the age of 5 and is considered to be a major epidemic. The NHANES report concludes that without further action to control lead-based paint in housing and the contaminated soil and dust it generates, "further declines are unlikely."

Summary of the Legal Basis:

Title X amends the Lead-Based Paint Poisoning Prevention Act (42 USC 4822) to focus attention and resources on identifying and controlling lead-based paint hazards in federally assisted and federally owned housing before children are poisoned.

Alternatives:

The statute is generally prescriptive in requiring regulatory action to be taken by HUD. For certain HUD programs the Department has some discretion in the level of hazard evaluation and control measures to be undertaken. Alternatives being considered are primarily: (a) the amount of on-site work that is required for hazard evaluation and control; and (b) targeting by year of construction.

Anticipated Costs and Benefits:

Costs: Previous cost-benefit studies by CDC and other researchers estimate that the benefits of lead-based paint hazard control exceed costs by at least $17 billion per year. HUD is in the final stages of estimating the precise costs and benefits of the proposed rule. An extensive regulatory impact analysis will accompany the title X regulations.

There also will be some cost to the real estate industry in implementing the new lead-based paint notification requirements of title X, which are the subject of a separate rule that is being developed in coordination with the EPA.

Benefits: Health benefits of the new regulations will include a reduction in lead poisoning exposures among children, consequently reducing costs for medical treatment and special education and increasing lifetime earnings. The rule will also provide benefits to housing by improving overall conditions and paint quality. The regulations will offer environmental protection to more families with young children by reducing lead paint hazards in the country's housing stock.

Risks:

Without the regulatory changes required by title X, childhood lead exposures will continue at current levels.

50. REGULATIONS IMPLEMENTING THE SECRETARY'S AUTHORITY OVER FNMA AND FHLMC (FR-3481)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

12 USC 4501 to 4589

CFR Citation:

24 CFR 81

Legal Deadline:

Final, Statutory, April 28, 1994.

Abstract:

Under subtitle A, part 2, of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (Title XIII of the Housing and Community Act of 1992) (FHEFSSA), the Secretary has general regulatory authority over the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac) (jointly referred to as "enterprises").

The Secretary's responsibility does not encompass areas specifically under the authority of the Director of the Office of Federal Housing Enterprise Oversight or all other matters relating to the safety and soundness of the enterprises. The FHEFSSA provided the Secretary with new authority to ensure that each enterprise fulfills its obligations to facilitate the financing of affordable housing for low- and moderate-income families in a manner consistent with the enterprise's overall public purposes, while maintaining a strong financial condition and reasonable economic return. Pursuant to the FHEFSSA and in accordance with the requirements in part 2 for notice-and-comment rulemaking, this rule would implement the Secretary's regulatory authority over

Fannie Mae and Freddie Mac regarding the establishment of housing goals for 1996 and following years, fair-lending requirements, approval of new programs, proprietary information, reporting requirements, and other issues.

Statement of Need:

Status as a government-sponsored enterprise provides important benefits to the enterprises and their stockholders. The FHEFSSA outlines a strategy to ensure that the enterprises fulfill the public purposes set out in their charters. The Department of Housing and Urban Development (HUD) is currently operating under an interim notice that details the enterprises housing goals for 1993 - 1995. The statute requires that HUD publish a final rule by April 28, 1994, after notice-and-comment rulemaking.

Summary of the Legal Basis:

The regulations are required by section 1349 of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (12 USC 4589).

Alternatives:

In developing the final rule, HUD considered the experience gained and lessons learned while operating under the interim notice during the transition period of 1993 - 1995. HUD also conducted extensive analysis and research to determine the appropriate changes to the housing goals. Changes from the interim notice will be designed to make the regulatory process simpler and more streamlined for the enterprises. These changes would include streamlining the reports that the enterprises are required to provide to HUD and modifying requirements about which mortgage purchases would qualify for consideration in meeting the goals established for the enterprises. Under the modified requirements HUD expects more transactions to count toward mortgage purchase goals.

HUD has met numerous times with the enterprises to discuss issues relating to the interim notice under which the enterprises have been operating. In addition, HUD has also held a number of roundtables to discuss trends in the mortgage markets, the state of multifamily financing, and definitions of "underserved" used in establishing the mortgage purchase goals for central cities, rural areas, and other underserved areas. Roundtable participants included the enterprises, researchers, other Federal agencies and public-interest groups. HUD also held numerous meetings with the enterprises as the proposed rule was being developed, and during the revision of the proposed rule, for the purpose of clarifying assumptions HUD was making about the enterprises' operations and projections of future activities.

Anticipated Costs and Benefits:

Costs: Increased targeting to low- and moderate-income families and underserved areas will increase the credit risk or mortgage default costs experienced by the enterprises. The magnitude of this effect is expected to be small, given their expertise in attracting and underwriting creditworthy low-income borrowers. There may also be some increased cost associated with additional program outreach toward low-and moderate-income borrowers and borrowers in underserved market areas. With respect to fair housing regulations, there will be costs associated with the additional reporting and remedial actions by the enterprises that are mandated by FHEFSSA.

Benefits: The rule would establish that there are substantial unmet housing needs among low-income households and in distressed neighborhoods. The rule will benefit very low-, low-, and moderate-income families by assuring that an appropriate portion of the mortgage purchases of each enterprise relate to housing affordable to low-income families and housing in underserved areas. The rule will also establish a framework through which the enterprises will be involved in helping to eliminate discrimination in mortgage finance and to promote Federal fair housing objectives:

Risks:

This rule does not address a risk to public health, safety, or the environment.

51. • HOME iNVESTMENT PARTNERSHIP PROGRAM (FR-3962)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 12721

CFR Citation:

24 CFR 92

Legal Deadline:

None

Abstract:

Title II of the National Affordable Housing Act of 1990 established the HOME Investment Partnership Program. This program is intended to expand the supply of decent, safe and sanitary affordable housing. Under the HOME Program, the Department of Housing and Urban Development (HUD) provides formula allocations to participating States and units of local government to be used for specified eligible housing activities in accordance with the jurisdiction's approved housing plan. A portion of each allocation must be invested in housing that is developed, owned, or sponsored by community housing development organizations. HUD provides technical assistance to develop the capacity of participating jurisdictions and has developed model programs designed to assist participating jurisdictions in carrying out their programs.

HUD published an interim rule implementing the HOME Program in December 1991. HUD has since published several additional interim rules and a proposed rule. These rules were developed to implement statutory changes and to make changes in response to public comments that were solicited as each rule was published, HUD's experience in administering the

program, and to the input of program participants at numerous training sessions across the country. The changes simplify State and local operation of the HOME Program and make it more compatible with other Federal housing programs.

This final rule will merge the initial interim rule, the subsequent interim rules, and the proposed rule into a single, streamlined HOME Program rule. Wherever possible, text that only repeats statutory language and that is only advisory, rather than exclusive and legally binding, will be removed.

Statement of Need:

Promulgation of this regulation is necessary to permit HUD to simplify and improve the operation of the HOME Program.

Summary of the Legal Basis:

Section 206 of the National Affordable Housing Act requires that HUD promulgate regulations governing the operation of the HOME Program.

Alternatives:

HUD could continue the operation of the HOME Program under the current interim rule. However, it would forfeit the opportunity to make refinements to the program based upon experience and the attendant benefits to jurisdictions participating in the program.

Anticipated Costs and Benefits:

Costs: While the final rule is expected to streamline and simplify HOME program operations for participating jurisdictions, HUD does not expect that the final rule will significantly alter the reporting and paperwork burden estimates previously submitted by the Department and approved by the Office of Management and Budget.

Benefits: HUD expects that the opportunity to modify programmatic requirements in response to public comment based upon actual experience in implementing the program will result in substantial simplification of program administration. The jurisdictions administering the program, and the private and public for-profit and nonprofit entities participating in the program will be able to provide low-income housing more quickly and at lower cost.

Risks:

This rule does not address a risk to public health, safety, or the environment.

FINAL RULE STAGE

52. BASE CLOSURE COMMUNITY REDEVELOPMENT AND HOMELESS PROGRAM (FR-3820)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 3535(d); 42 USC 11301

CFR Citation:

24 CFR 586

Legal Deadline:

None

Abstract:

Title V of the Stewart B. McKinney Homeless Assistance Act of 1987, as amended, 42 U.S.C. 11411 (Title V), granted first priority on use of all surplus federally owned real and personal property, including former military installations, to the homeless. The title V provisions have worked reasonably well for small parcels. However, in the base closure and realignment environment the processes for reuse planning and homeless use were independent and the timing incompatible. On October 25, 1994, the President signed the Base Closure Community Redevelopment and Homeless Assistance Act of 1994 (the Redevelopment Act), which exempts base closure and realignment property from title V and substitutes a new community-based process wherein representatives of the homeless will work directly with Local Redevelopment Authorities (LRAs) on the reuse of former military installations.

HUD's interim rule, published on August 17, 1995, was jointly developed with the Department of Defense (DoD) and, together with DoD's rule published on July 20, 1994, will govern DoD's and HUD's role in implementing the Redevelopment Act. Through these rules, HUD and DoD have developed a flexible process which aims to balance the needs of the homeless with other development interests in the community in the vicinity of the installation.

Statement of Need:

Forty-five military installations from the 1988, 1991, or 1993 base closure/realignment rounds have elected to be included under the new process established by the Redevelopment Act. A regulation was necessary to establish the policy and procedures to be followed.

Summary of the Legal Basis:

The Base Closure Community Redevelopment and Homeless Assistance Act of 1994 (P.L. 103-421) and if enacted, certain amendments to P.L. 103-421 proposed in the Defense Authorization Act of 1995.

Alternatives:

HUD considered whether to treat installations approved for closure/realignment before enactment of the authorizing law the same or differently from installations approved after enactment, and the degree to which homeless assistance and economic development needs should be balanced in this rule.

Anticipated Costs and Benefits:

Costs: The costs would be mainly those to local redevelopment agencies from accepting and reviewing notices of interest from State and local governments and other interests, and the preparation of proposals by those entities.

Benefits: The benefits would be the value of the utilization of the installations in terms of benefits to individuals, families, private entities, and the localities in which the installations are situated.

Risks:

This rule poses no risks to public health, safety, or the environment.

PROPOSED RULE STAGE

53. METHODS OF PROOF OF DISCRIMINATION UNDER THE FAIR HOUSING ACT (FR-3534)

Priority:

Other Significant

Legal Authority:

42 USC 3600 to 3619

CFR Citation:

24 CFR 100

Legal Deadline:

None

Abstract:

This rule will describe the standards the Department will apply in determining whether policies and practices in real estate-related transactions violate the Fair Housing Act. The standards used in making those determinations include overt discrimination, disparate treatment, and discriminatory effect.

Statement of Need:

This rule is necessary to promote compliance by those engaged in real estate-related transactions and to assist HUD investigators by setting forth the standards to be applied in determining whether a violation of the Fair Housing Act has occurred or is about to occur.

Summary of the Legal Basis:

The Fair Housing Act prohibits discrimination on the basis of race, color, national origin, sex, religion, familial status, or disability.

Alternatives:

Administrative Law Judge and court decisions could provide guidance to the real estate industry and HUD investigators on a case-by-case basis, but a rule that establishes clear standards could make much litigation unnecessary.

Anticipated Costs and Benefits:

Costs: Firms in the real estate transactions industry will incur costs to develop and implement practices to avoid violating the standards in the rule, but operating costs under the new practices may be higher or lower than previous practices.

Benefits: Clearer and more rapid adjudication of cases of discrimination in real estate transactions; reduced incidence of discrimination in real estate transactions as firms conform business practices to the new guidelines; and better housing and labor market outcomes for protected classes.

Risks:

This rule does not address a risk to public health, safety, or the environment.

54. • PRESIDENT'S FAIR HOUSING COUNCIL RULE (FR-3958)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 3601 to 3619

CFR Citation:

24 CFR 100

Legal Deadline:

None

Abstract:

By Executive Order 12892, entitled "Leadership and Coordination of Fair Housing in Federal Programs: Affirmatively Furthering Fair Housing," President Clinton delegated to the Secretary of Housing and Urban Development (HUD), and where appropriate, to the Attorney General, primary authority for enforcement of Federal fair housing laws. In addition, the President directed the Secretary of HUD to take the lead in developing and coordinating measures to carry out the purpose of the order.

The order also establishes an advisory council entitled the "President's Fair Housing Council" ("Council"). The President directed the Secretary of HUD to chair the Council, which is to consist of the Secretary of Health and Human Services, the Secretary of Transportation, the Secretary of Education, the Secretary of Labor, the Secretary of Defense, the Secretary of Agriculture, the Secretary of Veterans Affairs, the Secretary of the Treasury, the Attorney General, the Secretary of the Interior, the Chair of the Federal Reserve, the Comptroller of the Currency, the Director of the Office of Thrift Supervision, the Chair of the Federal Deposit Insurance Corporation, and such other officials of executive departments and agencies as the President may, from time to time, designate.

This Council, in accordance with the Executive Order, will review the design and delivery of Federal programs and activities to ensure that they support a coordinated strategy to affirmatively further fair housing.

This rule will describe the functions, organization, and operations of the President's Fair Housing Council; the Council's programs and activities; the responsibilities and obligations of member departments and agencies in ensuring that programs and activities related to housing and urban development are administered and executed in a manner that furthers fair housing; the responsibilities and obligations of applicants, participants, and other persons and entities involved in furthering the goal of fair housing; and a method to identify impediments in programs or activities that restrict fair housing choice and to implement incentives that will maximize the achievements of practices that further fair housing.

Statement of Need:

The President has called upon the Fair Housing Council to review the design and delivery of Federal programs and activities to ensure that they support a coordinated strategy to further fair housing. He has also requested that the Council propose appropriate revisions to existing programs and activities, develop pilot programs and activities, and propose new programs and activities to achieve its goals. The proposed regulation is needed to guide the Council in carrying out the President's mandate.

Summary of the Legal Basis:

The Fair Housing Act of 1968 and the Fair Housing Amendments Act of 1988 require all executive departments and agencies to administer their programs and activities related to housing and urban development so as to further fair housing and to cooperate with the Secretary of Housing and Urban Development in doing so. Executive Order 12892 gives the Secretary the specific responsibility of promulgating regulations for the Fair Housing Council and its activities, as described in the Abstract, above.

Alternatives:

Executive Order 12892 requires HUD to promulgate regulations, and requires each executive agency to publish, within 180 days, proposed regulations consistent with HUD's, and to publish final regulations as soon as practicable after the proposed rule. HUD could publish a model regulation to be adopted by other executive agencies, thereby streamlining the overall rulemaking activity under the executive order.

Anticipated Costs and Benefits:

Costs: The costs are limited to the commitment of personnel and other resources of the member departments and agencies when they participate in Council meetings and activities.

Benefits: The benefits include increased efficiency in the administration of fair housing laws, increased coordination and consistency among the Council's member departments and agencies, reduced duplication of efforts, and the bridging of gaps identified in the present delivery of services.

Risks:

This rule does not address a risk to public health, safety, or the environment.

PROPOSED RULE STAGE

55. REFORM OF PUBLIC HOUSING MANAGEMENT (FR-3447)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 3535(d); 42 USC 1437d(j)

CFR Citation:

24 CFR 901

Legal Deadline:

None

Abstract:

This rule proposes an extensive revision of the Public Housing Management Authority Program, (PHMAP), which contains the policies and procedures used by the Department of Housing and Urban Development (HUD) to identify public housing authority (PHA) management capabilities and deficiencies; to designate high performing and troubled PHAs; and to enter into agreements and formulate plans to improve PHA management.

Statement of Need:

A new, revised rule is needed to address the following issues concerning the current PHMAP regulation: PHMAP reporting and processing are time-consuming; information required from PHAs is not always available by HUD's deadline; PHA appeals of HUD decisions can extend the PHMAP process for months; the system should be a better measure of actual performance rather than "paper" performance; redundant and unnecessary procedures and paperwork need to be eliminated, and the volume of PHMAP-related correspondence needs to be reduced.

Summary of the Legal Basis:

PHMAP was promulgated under section 502 of the National Affordable Housing Act (NAHA) (approved November 28, 1990, Pub. L. 101-625), which requires HUD to establish, by rulemaking under 5 U.S.C. 553, indicators to evaluate the management performance of PHAs and procedures for designating troubled PHAs.

Alternatives:

In developing a new proposed rule, HUD considered adding or eliminating indicators, combining indicators and/or components, assigning different weights to existing indicators, varying the applicability of indicators by PHA size, and changing the reporting period for assessments.

Anticipated Costs and Benefits:

Costs: Because the revised regulation would be a refinement or improvement of existing procedures, and should result in no additional, or a decrease in, monitoring or reporting burdens, additional costs to PHAs or to HUD are negligible.

Benefits: Increasing the objectivity of the assessment program, making the

assessment program more performance-oriented rather than simply compliance-oriented, and reducing redundant and unnecessary procedures and paperwork requirements will make the assessment process itself less expensive, and result in the more efficient use of public housing funds,

Risks:

This rule does not address a risk to public health, safety, or the environment.

56. • PUBLIC/PRIVATE PARTNERSHIPS FOR MIXED-FINANCE DEVELOPMENT OF PUBLIC HOUSING UNITS (FR-3919)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 1437b; 42 USC 1427c; 42 USC 3535(d)

CFR Citation:

24 CFR 941

Legal Deadline:

None

Abstract:

This interim rule adds a new subpart F to the public housing development regulations, authorizing a public housing authority (PHA) to enter into a partnership with an entity (or entities) for the purpose of developing and owning public housing properties. The resulting partnership would also be authorized to use a combination of public and private financing mechanisms, which may include borrowing public housing development funds from the PHA and/or the sale of low-income housing tax credits, to develop public housing projects. The rule includes requirements that must be met by the proposed partnership before HUD will approve a mixed-finance proposal and requirements that govern the development and operation of a project by the partnership.

Statement of Need:

Conventional methods of public housing development are time-consuming and costly; if PHAs are permitted to enter into partnerships with nonpublic entities, the development process can be expedited, with resulting savings in both financing and construction costs.

Summary of the Legal Basis:

The public housing development program is authorized by the U.S. Housing Act of 1937.

Alternatives:

With the extensive revision of the public housing development program, it is likely that PHAs would be able to increase the speed and efficiency with which they develop new units; however, the present proposal offers an additional development mechanism and permits investment of private-sector resources and skills in the creation of additional housing resources for lower-income families. It would be possible to try this approach on a demonstration basis, without a regulatory change, but HUD believes that a demonstration would be too limited to attract sufficient participation, and that the demonstration and evaluation processes would unnecessarily slow down delivery of the benefits of this innovative approach to development.

Anticipated Costs and Benefits:

This innovative approach will enable PHAs to enlist the resources and skills of the private sector in developing housing resources for lower-income families, provide PHAs and HUD Field Offices with additional flexibility to develop public housing that is oriented more to the needs of the community, and further the Secretary's goal of empowering PHAs and Field Offices.

Risks:

This rule poses no risk to public health, safety or the environment.

FINAL RULE STAGE

57. PUBLIC HOUSING DEVELOPMENT REGULATIONS (FR-3569)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 1437c

CFR Citation:

24 CFR 941

Legal Deadline:

None

Abstract:

This rule proposes a comprehensive revision of the public housing development and acquisition program regulation at 24 CFR 941. The purpose of the program redesign is to simplify the public housing development process to give housing authorities and localities maximum flexibility in developing public housing in their communities. The revised procedures will shift responsibilities for decisionmaking from headquarters to the Field Offices and to public housing

authorities (PHAs) wherever possible; reassign responsibility for development activities to Field Office Public Housing Divisions; ensure coordination between headquarters and the field; reduce the number and depth of HUD reviews; promote the development of units in mixed-income communities; create HUD/PHA/local government partnerships; and in the case of "high performing" PHAs, eliminate most HUD reviews of development activities. HUD anticipates that these changes will reduce average development times by 6 to 9 months.

Statement of Need:

The public housing development regulation (24 CFR 941) and Handbook (7417.1 REV-1) have not been substantively revised since October 1980 and thus do not take into consideration many of the statutory changes made to the program. As a result of the 1987 and 1990 acts in particular, there is a need to update processing standards and criteria to reflect current statutory requirements and to facilitate processing of proposed projects in a stagnated pipeline. In addition, HUD is reinventing and streamlining the present time-consuming and burdensome development process under the existing regulation. PHAs are currently required to obtain HUD approval of each step in the development process before proceeding to the next step. The result of this step-by-step approval process is a preconstruction pipeline that is estimated at approximately $2 billion and dates back to 1980. The failure to issue updated and simplified regulations would result in continued delay and inactivity in the inventory of development projects, and a deterioration in housing authorities' ability to complete proposals; and cost escalations; all leading to increased shortages of decent, safe, and sanitary housing for low-income persons.

Summary of the Legal Basis:

The public housing development program is authorized by the U.S. Housing Act of 1937, and was the subject of substantive amendments and updates in 1981, 1983, 1987, 1990, and 1992, plus incremental amendments made in annual appropriations bills.

Alternatives:

HUD has considered amending its handbooks to address the many changes to the public housing development program before issuing revised regulations, but the type of comprehensive revision needed requires notice and comment rulemaking.

Anticipated Costs and Benefits:

Costs: Because the revised regulations would streamline existing procedures, they result in few or no additional monitoring or reporting burdens. Additional costs to PHAs or to HUD are negligible.

Benefits: A complete revision of the 1980 regulation will provide PHAs and HUD Field Offices with the maximum flexibility to develop public housing that is oriented more to the needs of the community, and will eliminate much of the "red tape" currently associated with the development process. The reduction of burdensome requirements would result in reduced administrative costs and development costs to PHAs, and an increase in the supply of affordable public housing units.

Risks:

This rule poses no risk to public health, safety, or the environment.

BILLING CODE 4210-01-F

DEPARTMENT OF THE INTERIOR (DOI)

Statement of Regulatory Priorities

The Department of the Interior (DOI) is the Nation's principal conservation agency, responsible for the management of much of our public lands and resources. It also has major responsibility for actions involving American Indians, Alaska Natives, and residents of island territories under the administration of the United States. Its mission is to encourage the conservation and responsible management of the Nation's natural resources and to fulfill the trust responsibilities of the U.S. Government.

In carrying out these responsibilities, the Department pursues the following major objectives:

- Preserving the nation's national park, wilderness, and fish and wildlife resources, and managing its public lands;
- Managing the supply of quality water resources;
- Improving the Federal Government's relationship with State, local, tribal, and territorial governments;
- Promoting the economic and social well-being of American Indians, Alaska Natives, and people of the U.S. territories; and
- Enhancing America's ability to meet its needs for domestic energy and mineral resources.

Major Regulatory Areas

Only one of DOI's ten bureaus—the Office of Surface Mining Reclamation and Enforcement—is primarily engaged in activities most often considered "regulatory." Its regulations set environmental standards for coal mining and reclamation operations and ensure that these standards are met through State programs.

A number of other bureau activities, however, have regulatory components. Those regulations serve primarily to facilitate DOI programs, which focus upon the management of public or trust lands and natural resources under U.S. ownership or control. Some of the major areas of these regulations include:

- Management of migratory birds and preservation of certain marine mammals and endangered species;
- Management of dedicated lands, such as national parks, wildlife refuges, and American Indian trust lands;
- Management of public lands open to multiple use;
- Leasing and oversight of development of Federal energy, mineral, and renewable resources;
- Management of revenues from American Indian and Federal minerals;
- Fulfillment of trust and other responsibilities pertaining to American Indian tribes;
- Natural resource damage assessments; and
- Management of financial and nonfinancial assistance programs.

Regulatory Policy

DOI Regulatory Procedures and Their Consistency With the Administration's Regulatory Policies

Within the general requirements and guidance set forth in Executive Orders 12866, 12612, and 12630, DOI's regulatory program seeks to accomplish the following: (a) fulfill all legal requirements as specified by statutes or court orders; (b) perform essential functions that cannot be handled by non-Federal entities; (c) minimize regulatory costs to society while maximizing societal benefits; and (d) operate programs openly, efficiently, and in cooperation with Federal and non-Federal entities.

To help meet these objectives, the Department has restructured its regulatory process. In mid-1993, it created the Office of Regulatory Affairs (ORA) within the Office of the Secretary. A primary function of ORA is to help ensure that regulations are promulgated in a timely and efficient manner. As part of this task, ORA requires that all bureaus/offices establish realistic rulemaking schedules. ORA then monitors the development of all rulemakings to ensure that deadlines are met. This structure allows the public to plan more effectively for anticipated regulatory changes and helps regulators focus more clearly upon issues to be regulated.

ORA also coordinates the development of rules that cross bureau or Departmental jurisdictional lines and helps ensure that agreements are reached on policy issues early in the rulemaking process. This system substantially reduces delays caused by the late intervention of interested parties.

Encouraging Responsible Management of the Nation's Resources

One of DOI's fundamental goals is to encourage the responsible management of the Nation's natural heritage. The regulatory program is designed to help achieve this by striking appropriate balances between the use and preservation of natural resources. For example, the Department is seeking ways to provide incentives for users of public resources to adopt long-term strategies designed to meet current needs while preserving resources for future generations. DOI also is seeking to ensure that the Government receives fair prices for public resources.

Minimizing Regulatory Burdens

DOI has made a major effort to streamline its regulations and to reduce the burdens that they impose. Planning processes for land use and water development have been substantially modified to reduce unnecessary delays and paperwork associated with agency decisionmaking. Moreover, DOI is currently reviewing regulations to determine whether their benefits continue to outweigh their costs to society. Rules will continue to be reassessed periodically, and needed changes will be made as existing operations are evaluated.

The Department's review of potential rules focuses both on assuring consistency with broad regulatory policies and goals and on making certain that rules are technically feasible and understandable. DOI is encouraging the use of performance standards rather than traditional command-and-control regulations, providing regulated entities with greater flexibility to develop more efficient and less burdensome compliance procedures.

The Department has also undertaken an initiative to reform the style in which regulations are drafted. Too often, rules are poorly written, unclear, and difficult to understand. This causes confusion for the public and the agencies responsible for implementing the regulations. To remedy this problem, the Department is encouraging the use of "plain English" in rulemakings. A number of seminars have been held on this rule-drafting technique, and projects are underway.

Encouraging Public Participation and Involvement in the Regulatory Process

One of the goals of Executive Order 12866 is to ensure that the public has full and adequate opportunities to participate in the development of regulations. Encouraging increased public participation in the regulatory process so as to make regulatory policies more responsive to our customers' needs is a priority under this Administration. The Department is reaching out to communities and seeking their input on a variety of regulatory issues. For example, every year the Fish and Wildlife Service (FWS) establishes migratory bird hunting seasons. The FWS develops the

VOL
60
ISS
2
28
NO
28
995
UMI

annual migratory bird hunting seasons in partnership with "flyway councils," which are made up of State fish and wildlife agencies. As the process evolves each year, FWS holds a series of public meetings to afford other interested parties, including hunters and other special interest groups, adequate opportunity to participate in the establishment of the upcoming seasons' regulations.

DOI is also encouraging the use of negotiated rulemaking to develop rules with the full participation of affected communities. Several bureaus are currently either employing negotiated rulemaking techniques or are exploring whether negotiated rulemaking is appropriate and feasible for particular rules.

Finally, Departmental policies are designed to delegate decisionmaking, including development and operation of DOI's regulatory programs, to the lowest appropriate level. With decentralization, management procedures can be developed that are sensitive to the various local needs and interests affected by DOI programs.

Bureaus and Offices Within DOI

The following are brief descriptions of the regulatory functions of DOI's major regulatory bureaus and offices.

Office of the Secretary, Office of Environmental Policy and Compliance

The regulatory functions of the Office of Environmental Policy and Compliance (OEPC) stem from requirements under section 301(c) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (CERCLA). Section 301(c) requires the development of natural resource damage assessment rules and the biennial review and revision, as appropriate, of these rules. Rules have been promulgated for the optional use of natural resource trustees to assess compensation for damages to natural resources caused by oil or hazardous substances. OEPC is overseeing the study and possible promulgation of additional rules pursuant to section 301(c)(2) and the review and possible revision of the existing rules in compliance with section 301(c)(3).

In undertaking DOI's responsibilities under section 301(c), OEPC is striving to meet three regulatory objectives: (a) that the minimal amount of regulation necessary be developed; (b) that the assessment process provide for tailoring to specific discharges or releases; and (c) that the process not be considered punitive, but rather a system to achieve fair and just compensation for injuries sustained.

Bureau of Indian Affairs

The philosophy of the Bureau of Indian Affairs (BIA) is to encourage the development and management of human and other resources among American Indians and Alaska Natives, to encourage tribal assumption of BIA programs, and to fulfill trust and other responsibilities of the U.S. Government. BIA regulatory actions serve to balance its dual role as: (a) advocate in assisting tribes and encouraging their participation in BIA programs, and (b) trustee protecting and/or enhancing American Indian trust resources.

Important BIA programs are promulgated through regulations, rather than informal guidelines, so that American Indians are aware of, and have an opportunity to participate in, the development of standards and procedures affecting them. BIA regulatory policies seek to accomplish the following: (a) ensure consistent policies throughout American Indian Country; (b) promote American Indian involvement in the operation, management, planning, and evaluation of BIA programs and services; (c) provide guidance to applicants for BIA services; and (d) govern the development of American Indian lands and provide for the protection of American Indian treaty and statutory rights.

BIA's regulatory program is designed (a) to promote American Indian self-determination, (b) to provide American Indians and Alaska Natives with high-quality education and tribal development opportunities, (c) to meet BIA's trust responsibilities, and (d) to meet the needs of tribes and their members.

Bureau of Land Management

The Bureau of Land Management (BLM) is responsible for the development, management, and protection of public land resources that traditionally have been subject to multiple use. The principal authorities for the BLM's activities are the Federal Land Policy and Management Act of 1976, the Mineral Leasing Act of 1920, the Taylor Grazing Act of 1934, the Mining Law of 1872, the Wild and Free-Roaming Horse and Burro Act, and the Recreation and Public Purposes Act. BLM's programs cover three main program areas: energy and minerals, renewable resources, and lands, including conducting Federal land surveys and maintaining the official records for all Federal and former Federal lands and minerals.

BLM's fundamental regulatory philosophy is that public resources should be managed responsibly, providing maximum benefits to the public, while conserving scarce resources for future generations. BLM's regulatory program is designed to ensure that:

- The resources in the Nation's lands are effectively and efficiently managed in accordance with law;
- The public's concern for the resources will be reflected in significant opportunity for participation in the development of rules;
- The regulatory compliance burden on individuals, firms, and other affected entities is kept to a minimum; and
- Individuals and firms operating under BLM regulations are given the opportunity to respond to, and make decisions based upon, assessments of market situations.

Minerals Management Service

The Minerals Management Service (MMS) has two major responsibilities: (a) timely and accurate collection, distribution, accounting for, and auditing of revenues owed by holders of Federal onshore, offshore, and tribal land mineral leases in a manner that meets or exceeds Federal financial integrity requirements and recipient expectations; and (b) management of the resources of the Outer Continental Shelf (OCS) in a manner that provides for safety, protection of the environment, and conservation of natural resources. These responsibilities are carried out under the provisions of the Federal Oil and Gas Royalty Management Act, the Minerals Leasing Act, the Outer Continental Shelf Lands Act, the Indian Mineral Leasing Act, and other related statutes.

The regulatory philosophy of MMS is to develop clear, enforceable rules that support the missions of each program. MMS will continue periodic reviews of offshore regulations to identify changes needed as a result of changes in technology, operating practices, or other factors. Specific revisions to rules to be pursued include ensuring the ability of lessee to meet end-of-lease obligations, its authority under the Oil Pollution Act of 1990 to require spill response plans in State and Federal waters, and developing regulations for certification of financial responsibility for offshore facilities. MMS also plans to continue its review and revision of existing regulations and to issue rules to refine the royalty management regulations in chapter II of 30 CFR.

Office of Surface Mining Reclamation and Enforcement

The Office of Surface Mining Reclamation and Enforcement (OSM) was created by the Surface Mining Control and Reclamation Act of 1977 (SMCRA) to "strike a balance between protection of the environment and agricultural productivity and the Nation's need for coal as an essential source of energy."

The principal regulatory provisions contained in Title V of SMCRA set minimum requirements for obtaining a permit for surface coal mining operations, set standards for surface coal mining operations, require land reclamation once mining ends, and require rules and enforcement procedures to ensure that the standards are met. Under SMCRA, OSM serves as the primary enforcer of SMCRA until the States achieve "primacy," that is, until they demonstrate that their regulatory program meets all the specifications in SMCRA and has regulations consistent with those issued by OSM.

A primacy State takes over the permitting, inspection, and enforcement activities of the Federal Government. OSM then changes its role from regulating mining activities directly to overseeing and evaluating State programs. Today, 24 of the 27 key coal-producing States have primacy. In return for assuming primacy, States are entitled to regulatory grants and to grants for reclaiming abandoned mine lands. In addition, under cooperative agreements, some primacy States have agreed to regulate mining on Federal lands within their borders. Thus, OSM regulates mining directly only in nonprimacy States, on Federal lands in States where no cooperative agreements are in effect, and on American Indian lands.

SMCRA charges OSM with the responsibility of publishing rules as necessary to carry out the purposes of the Act. The most fundamental mechanism for ensuring that the purposes of SMCRA are achieved is the basic policy and guidance established through OSM's permanent regulatory program and related rulemakings. Its regulatory framework is developed, reviewed, and applied according to policy directives and legal requirements.

Litigation by the coal industry and environmental groups is responsible for some of the rules now being considered by OSM. Others are the result of efforts by OSM to address areas of concern that have arisen during the course of implementing OSM's regulatory program.

OSM has sought to develop an economical, safe, and environmentally sound program for the surface mining of coal by providing a stable regulatory framework. To achieve stability, OSM has endeavored to create a regulatory program that provides a high degree of continuity in its requirements and creates minimal uncertainty concerning the nature and pace of changes to existing provisions.

OSM also has worked to create a consistent regulatory framework. At the same time, however, OSM has recognized the need (a) to respond to local conditions; (b) to provide flexibility to react to technological change; (c) to be sensitive to geographic diversity; and (d) to eliminate burdensome recordkeeping and reporting requirements that over time have proved unnecessary to ensure an effective regulatory program.

Major regulatory objectives regarding the mining of surface coal include:

- Continuing outreach activities with interested groups during the rulemaking process to increase the quality of the rulemaking process, improve the substance of the rules, and, to the greatest extent possible, reflect consensus on regulatory issues;
- Minimizing the recordkeeping and regulatory compliance burden imposed on the public by means of a review and, where advisable, revision of unnecessary and burdensome regulatory requirements; and
- Publishing final rules to implement the Energy Policy Act of 1992, Public Law 102-486.

U.S. Fish and Wildlife Service

The U.S. Fish and Wildlife Service has three basic mission objectives:

- To assist in the development and application of an environmental stewardship ethic based on ecological principles and scientific knowledge of fish and wildlife;
- To guide the conservation, development, and management of the Nation's fish and wildlife resources; and
- To administer a national program to provide the public with opportunities to understand, appreciate, and wisely use fish and wildlife resources.

These objectives are met through the following regulatory programs:

- Management of Service lands, primarily national wildlife refuges;
- Management of migratory bird resources;
- Conservation of certain marine mammals and endangered species;
- Allowance of certain activities that would otherwise be prohibited by law; and
- Administration of grant and assistance programs.

The Service maintains a comprehensive set of regulations in the first category—those that govern public access, use, and recreation on national wildlife refuges and in national fish hatcheries. As required by law, the Service is authorized to allow such uses only if they are compatible with the purpose for which each area was established. These regulations will be as consistent with State and local laws as practicable and will afford the public as much economic and recreational opportunity as possible. Consistent with the purposes for which those areas are established, with very few exceptions, the Service provides these types of opportunities on each of the more than 500 refuges and hatcheries. These regulations are developed and continually reviewed for improvements, with a substantial amount of public input, and are typically of limited geographical interest.

Management of migratory bird resources, covered by the second category of regulations, entails fulfilling U.S. obligations contained in various international treaties. This regulatory program entails an annual issuance on migratory bird hunting seasons and bag limits, developed in partnership with the States, American Indian tribal governments, and the Canadian Wildlife Service. Although these rules are issued annually, this regulatory program has been in existence for more than 50 years and has not significantly changed over that period of time. The regulations are necessary to permit migratory bird hunting that would otherwise be prohibited. Although recent declines in waterfowl populations have reduced the numbers of such birds that may be harvested, the regulations generally do not change significantly from one year to another.

The third category includes regulations to fulfill the statutory obligation to identify and conserve species faced with extinction. The basis for determining endangered species is limited by law to biological considerations, although priorities for allocating Service resources are established consistent with the President's policies (by directing the Service's efforts to species most

VOL
60
SS
2
28
NO
28
995
UMI

threatened and those whose protection is of the most benefit to the natural resource). Also included in this program are regulations to enhance the conservation of listed species and of marine mammals for which DOI has management responsibility. This program also contains regulations that provide guidance to other Federal agencies to assist them in complying with section 7 of the Endangered Species Act, which requires them not to conduct activities that would jeopardize the existence of endangered species.

When a species is listed as endangered or threatened, the Service may designate critical habitat to promote the recovery of the species. Under section 7 of the Endangered Species Act, critical habitat designation limits activities carried out, funded, or authorized by Federal agencies within the critical habitat zone. In designating critical habitat, the Service considers biological information and economic and other impacts of the designation. Areas may be excluded from the designation where the benefits of exclusion outweigh the benefits of inclusion, provided that the exclusion will not result in the extinction of the species. For 1995, the Service is developing a number of proposed and final critical habitat rules, including: marbled murrlett (final); delta smelt (final); Alabama sturgeon (final); Louisiana black bear (final); Rio Grande silvery minnow (final); Arizona willow (final); two Klamath River fishes (proposed); Mexican spotted owl (proposed); and pecos pupfish (proposed).

The fourth category—the Service's regulatory program that permits activities otherwise prohibited by law—entails regulating possession, sale or trade, scientific research, and educational activities involving fish and wildlife and their parts or products. Generally, these regulations are supplemental to State protective regulations, and cover activities that involve interstate or foreign commerce, which must comply with various laws and international obligations. The Service is continually working with foreign and State governments, the industry and individuals affected, and other interested parties to minimize the burdens associated with Service-related activities. The easing of such burdens through regulatory actions continues to balance the benefits that may be made available with the necessity to ensure adequate protection to the natural resource. Most of the regulatory activities are permissive in nature, and the concerns of the public generally center on technical issues.

The last category—the Service's assistance programs—includes a limited number of regulations necessary to ensure that assistance recipients comply with applicable laws and Office of Management and Budget (OMB) Circulars. Regulations in this program help the affected parties to obtain assistance and to comply with requirements imposed by Congress and OMB.

Bureau of Reclamation

In recent years the Bureau of Reclamation's mission and goals have substantially changed. Its new mission is to manage, develop, and protect water and related resources in an environmentally and economically sound manner in the interest of the American public. To accomplish this mission, Reclamation applies management, engineering, and scientific skills that result in effective and environmentally sensitive solutions.

Reclamation projects provide for some or all of the following concurrent purposes: irrigation water service, municipal and industrial water supply, hydroelectric power generation, water quality improvement, groundwater management, fish and wildlife enhancement, outdoor recreation, flood control, navigation, river regulation and control, system optimization, and related uses.

The bureau's regulatory program is designed to ensure that its mission is carried out expeditiously and efficiently.

DOI—Assistant Secretary for Policy, Management and Budget (ASPMB)

FINAL RULE STAGE

---

58. NATURAL RESOURCE DAMAGE ASSESSMENTS; TYPE A—GREAT LAKES ENVIRONMENTS

Priority:

Other Significant

Legal Authority:

42 USC 9651(c) CERCLA

CFR Citation:

43 CFR 11

Legal Deadline:

NPRM, Judicial, August 8, 1994. Final, Judicial, January 16, 1996.

Settlement agreement

Abstract:

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the Clean Water Act allow natural resource trustees to bring a claim against a potentially responsible party for resources that have been injured by a release of a hazardous substance or a discharge of oil. CERCLA calls for the promulgation of two types of natural resource damage assessment regulations: simplified "type A" assessment procedures involving minimal fieldwork, and "type B" procedures calling for more detailed, site-specific assessments. CERCLA requires that the regulations be reviewed, and revised as appropriate, every 2 years.

The Department has issued regulations establishing an administrative process for assessing damages, a type A procedure for determining injury and damages from minor spills in coastal and marine environments, and site-specific type B procedures for determining injury and damages when the type A procedure is not applicable.

In 1989 the Department began the biennial review of the type A procedure for coastal and marine environments. Subsequently, the court in *State of Colorado* vs. *United States Department of the Interior*, 880 F.2d 481 (DC Cir 1989), ordered the Department to revise the type A procedure to incorporate restoration costs as well as lost economic values. The type A procedure for coastal and marine environments incorporates a computer model capable of calculating damages based on a small number of user-supplied data inputs. The Department is revising the computer model to comply with the court remand as well as with the biennial review requirement.

The Department is developing a new type A procedure for use in the Great Lakes. This procedure, like the type A procedure for coastal and marine environments, incorporates a computer model capable of calculating damages based on a small number of user-supplied data inputs. Both type A computer models have been subjected to extensive analysis and testing, which has resulted in multiple revisions and refinements.

Statement of Need:

These regulations are required by statute and judicial decree. With regard to the type A procedures, use of the site-specific type B procedures to assess damages from minor releases or discharges is usually not cost-effective. Therefore the revised type A procedure for coastal and maring environments and the new type A procedure for Great Lakes environments are needed to enable trustees to obtain funds to restore injured resources.

Summary of the Legal Basis:

These regulations are required by CERCLA, 42 USC 9651(c).

Alternatives:

Two alternatives were considered. Alternative 1 was to take no action. Alternative 2 was to develop a type A procedure for minor releases and discharges in the Great Lakes that utilizes a computer model capable of calculating damages based on a small number of user-supplied data inputs.

Anticipated Costs and Benefits:

The natural resource damage assessment regulations do not themselves authorize the assessment and recovery of damages; they simply provide guidance on how to perform assessments. Costs include the costs of preparing the regulation, the costs of developing a computer model, and the cost of performing an assessment using the regulation. Without a simplified type A procedure, it is unlikely that natural resource trustees would attempt to recover damages for the minor releases or discharges that occur frequently in the Great Lakes. Therefore, under Alternative 1 there would be no assessment costs. Under Alternative 2, assessment costs would consist solely of the expenses associated with developing model input data and applying the model.

Benefits consist of increased damage recoveries available for restoration of injured resources. The estimate under Alternative 1 assumes that no damages would be recovered because no assessments would be performed.

Alternative 1 would yield a net benefit of $14,294,000; Alternative 2 a net benefit of $S14,294,000.

Risks:

Without appropriate standards to promote the reliability of lost nonuse value estimates, the public may not in some cases be able to obtain full compensation for its losses, and in other cases polluters may be assessed damages in excess of actual public losses. Without the biennial review, trustees may be left without the best available assessment procedures, which could prevent trustees from recovering adequate funds to restore injured resources and result in excessive damage assessment costs. Without the new type A procedures, trustees are unlikely to seek compensation for injuries from minor discharges and releases in Great Lakes environments, which would leave injured resources unrestored and prevent polluters from adequately internalizing costs.

59. NATURAL RESOURCE DAMAGE ASSESSMENTS; TYPE A—COASTAL AND MARINE ENVIRONMENTS

Priority:

Other Significant

Legal Authority:

42 USC 9651(c) CERCLA

CFR Citation:

43 CFR 11

Legal Deadline:

NPRM, Judicial, December 8, 1994. Final, Judicial, January 16, 1996.

Settlement agreement

Abstract:

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the Clean Water Act allow natural resource trustees to bring a claim against a potentially responsible party for resources that have been injured by a release of a hazardous substance or a discharge of oil. CERCLA calls for the promulgation of simplified "type A" assessment procedures involving minimal fieldwork for use in cases of minor releases or discharges. In 1987, the Department issued a type A procedure for coastal and marine environments that incorporated a computer model capable of calculating damages based on a small number of user-supplied data inputs. CERCLA requires that assessment procedures be reviewed, and revised as appropriate, every two years. In 1989, the Department began the biennial review of the type A procedure for coastal and marine environments. Subsequently, State of Colorado v. United States Department of the Interior, 880 F.2d 481 (D.C. Cir. 1989), ordered the Department to revise the type A computer model to incorporate restoration costs as well as lost economic values.

Statement of Need:

These regulations are required by statute and judicial decree. Also, use of site-specific type B procedures to assess damages from minor releases or discharges is usually not cost effective. Therefore, the revised type A procedure for coastal and marine environments is needed to enable trustees to obtain funds to restore injured resources.

Summary of the Legal Basis:

These regulations are required by CERCLA, 42 USC 9651(c).

Alternatives:

Two alternatives were considered. Alternative 1 was to take no action, which would leave trustees with a type A procedure that calculates only lost economic values. Alternative 2 was to revise the type A procedure in compliance with the statutory biennial review requirement and the court remand to produce a computer model that calculates lost economic values as well as restoration costs.

Anticipated Costs and Benefits:

The natural resource damage assessment regulations do not themselves authorize the assessment and recovery of damages; they simply provide guidance on how to perform assessments. Costs include the costs of revising the computer model and the cost of performing assessments using the regulation. Benefits consist of increased damage recoveries available for the restoration of injured resources. Under Alternative 1, trustees would obtain damages only for lost economic values. Under Alternative 2, trustees would obtain damages for lost economic values as well as restoration costs. Alternative 1 would yield a net benefit of $14,212,000. Alternative 2 would yield a net benefit of $56,955,000.

Risks:

Without the revised type A procedures, trustees are unlikely to seek compensation for injuries from minor discharges and releases in coastal and marine environments, which would leave injured resources unrestored and prevent polluters from adequately internalizing costs.

PROPOSED RULE STAGE

60. TRIBAL SELF-GOVERNANCE

Priority:

Other Significant

Legal Authority:

PL 103-413

CFR Citation:

25 CFR 1000

Legal Deadline:

None

Abstract:

This rule will clarify how the Department and tribes will carry out their respective responsibilities under the Tribal Self-Governance Act of 1994. At the request of a majority of Indian tribes with self-governance agreements, the Secretary has established a negotiated rulemaking committee to negotiate and promulgate such regulations as are necessary to carry out the Act.

Statement of Need:

The Department of the Interior (DOI) needs to clarify how it and the tribes will carry out their respective responsibilities under the Tribal Self-Governance Act of 1994. Provisions are needed to clarify or establish:

- Procedures for conducting negotiations, defining stable base budgets, time lines for the transfer of funds for tribes, and the amount of residual funds to be retained;

- The processes for accepting new tribes into the self-governance program planning and negotiation process, for awarding planning and negotiation grants, for approving waiver requests, and for determining and negotiating tribal shares of BIA and eligible non-BIA programs;

- Mechanisms for reviewing tribal trust functions;

- Retrocession procedures;

- Procedures for ensuring that proper health and safety standards exist in construction projects and are included in annual funding agreements;

- Reporting requirements of tribes and DOI; and

- A mechanism for negotiating the inclusion of specific provisions of Federal procurement regulations into annual funding agreements.

DOI expects that the rulemaking process will identify other components of the program that require clarification.

Summary of the Legal Basis:

The Tribal Self-Governance Act of 1994 requires DOI, upon request of a majority of self-governance tribes, to negotiate and promulgate regulations to carry out the tribal self-governance program. The Act calls for a negotiated rulemaking committee under 5 USC 565, composed of Federal and tribal representatives, with a majority of the tribal representatives from self-governance tribes. The Act also authorizes DOI to adapt negotiated rulemaking procedures to the unique context of self-governance and the government-to-government relationship between the United States and the Indian tribes. On November 1, 1994, a majority of self-governance tribes wrote the Secretary requesting the immediate initiation of negotiated rulemaking.

Alternatives:

There is a range of alternatives for each of the program components, from maintaining discretion and flexibility at the local level to standardizing requirements and procedures on the national level.

Anticipated Costs and Benefits:

The rule is expected to promote greater efficiency of Federal and tribal government operations. It is also expected to reduce opportunity costs resulting from untimely Federal actions. The rule will improve the ability of Federal and tribal governments to plan their self-governance activities. This should lead to greater stability of operations. Clarifying procedures for conducting operations will improve the ability of governments to plan for the time and cost of conducting negotiations. Clarifying time lines for transfer of base funding and other funds to tribes will improve planning and reduce the opportunity costs resulting from the untimely transfer of funds under the self-governance program. Budget and operation planning will be improved by specifying the process for accepting additional tribes into the self-governance program planning and negotiating process as well as the process for awarding planning and negotiation grants. Since retrocession procedures will be specified, governments will be better able to plan for retrocessions. Standardization of tribal shares will allow the self-governance program to comply with statutory requirements not to limit or, reduce the services, contracts, or funds that any other Indian tribe or tribal organization is eligible to receive.

Risks:

By removing uncertainty and promoting a more stable framework for the program, the rule will greatly lower the risk of not achieving the stated goals of tribal self-governance. It will change the role of Federal agencies that serve tribes by shifting their responsibilities from day-to-day management of tribal affairs to those concerned with protecting and advocating tribal interests.

61. INDIAN SELF-DETERMINATION ACT AMENDMENTS OF 1994

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

25 USC 450; 25 USC 5911; 25 USC 1396; 25 USC 450 (PL 103-413)

CFR Citation:

25 CFR 900; 25 CFR 272; 25 CFR 274; 25 CFR 275; 25 CFR 277; 25 CFR 278

Legal Deadline:

Final, Statutory, April 25, 1995.

Negotiations for new regulations must be completed within 90 days of the Act's effective date unless the Secretary obtains written approval of an extension.

Abstract:

The Indian Self-Determination Contract Reform Act of 1994 (Public Law 103-413) significantly amends numerous provisions of the Indian Self-Determination and Education Assistance Act of 1975 (25 USC 450). Its purpose is to limit the promulgation of regulations under 25 USC 450 and to specify the terms of self-determination contracts entered into between the United States and Indian tribal organizations. The Act adds a new definition of the term "construction contract," excludes tribes or tribal organizations from the provisions of the Davis-Bacon Act, and recognizes the applicability of tribal employment and contract preference laws to contracts benefitting a single tribe. The latter provision in effect permits the application of tribal ordinances providing preference in employment to tribal members or other individuals. The Act also amends substantially the scope of contractable programs and the grounds for declination.

Statement of Need:

As a result of the passage of the Indian Self-Determination Contract Reform Act Amendments of 1994, the Department of the Interior (DOI) must revise the regulations governing how DOI, the Department of Health and Human Services (HHS) and the tribes will carry out their respective responsibilities. The Amendments significantly revise numerous provisions of the Indian Self-Determination and Education Assistance Act of 1975 (ISDEA). The overall purpose of Title I of ISDEA is to limit the promulgation of regulations and to specify the terms of self-determination contracts entered into between the United States and Indian tribes. Title I also makes contracting less burdensome for the tribes.

Summary of the Legal Basis:

The Indian Self-Determination Act of 1994 requires DOI to negotiate and promulgate regulations necessary to carry out the tribal Indian Self-Determination Program. The Act calls for DOI to establish a negotiated rulemaking committee composed of Federal and tribal representatives. It also authorizes the DOI to adapt negotiated rulemaking procedures to the unique context of self-determination and the government-to-government relationship between the United States and the Indian tribes.

During the week of April 13, 1995, DOI, HHS and tribal representatives held their first session in Arlington, Virginia, and formed the Indian Self-Determination Negotiated Rulemaking Committee. The Committee developed and approved the formal organizational protocols and preamble.

Alternatives:

The alternative to be considered is that of not issuing regulations or procedures and following the actual Indian Self-Determination Act, as amended in 1994.

Anticipated Costs and Benefits:

The rule is expected to promote greater efficiency of Federal and tribal government operations. The rule is also expected to reduce costs resulting from untimely Federal actions and transfer of funds to tribes. This reduction will reduce administrative costs for federal personnel and contracting tribes, allowing additional funds to provide services to the tribal clientele.

Risks:

If DOI, HHS, and tribal representatives are unable to reach an agreement on the proposed ISDEA regulations as amended, the Federal agencies and tribal representatives will be required to follow the amended Act without regulations and/or procedures. The deadline date for publication of the proposed regulations and the final rule cannot be extended without the approval of the tribes.

DEPARTMENT OF JUSTICE (DOJ)

Statement of Regulatory Priorities

The Department of Justice is not a major regulatory agency, and it carries out its vital investigative, prosecutorial, and other law enforcement activities principally through means other than the regulatory process. Even so, the Department does have significant responsibilities for implementing the Americans with Disabilities Act (ADA) as well as the immigration laws, including the Immigration Reform and Control Act of 1986 and the Immigration Act of 1990. The Department's key regulatory goals and initiatives are set forth in detail below.

The Department has worked actively to implement the general regulatory principles of Executive Order 12866. Relatively few of the Department's rules are significant regulatory actions requiring review by the Office of Management and Budget (OMB) under the Executive Order. Accordingly, the orientation of the OMB review process to focus on significant rules has required the Department to increase its own efforts to ensure that all of its regulations are carefully reviewed for consistency with the Administration's regulatory principles, including the large majority of rules that are not reviewed directly by OMB as significant regulatory actions.

Pursuant to section 4(c) of Executive Order 12866, the Department of Justice provides the following statement of regulatory priorities, focusing in particular on three regulatory initiatives in the areas of civil rights and immigration.

In addition to the specific initiatives set forth below, several other components of the Department carry out important responsibilities through the regulatory process. Although their regulatory efforts are not singled out for specific attention in this Regulatory Plan, those components carry out key roles in implementing the Department's law enforcement priorities. In particular, the Drug Enforcement Administration (DEA) is responsible for controlling abuse of narcotics and dangerous drugs by restricting the aggregate supply of those drugs. DEA accomplishes its objectives through coordination with State, local, and other Federal officials in drug enforcement activities; development and maintenance of drug intelligence systems; regulation of legitimate controlled substances; and enforcement coordination and intelligence-gathering activities with foreign government agencies. DEA has various regulatory actions under development relating to the drug control requirements and to streamlining initiatives undertaken pursuant to the Administration's Regulatory Reinvention initiative.

Also, the Federal Bureau of Investigation will be promulgating regulations under the Communications Assistance to Law Enforcement Act of 1994 (CALEA). Congress enacted CALEA to address the recent and continuing advances in telecommunications technology which have impaired and, in some instances precluded, law enforcement agencies from fully conducting various types of court-authorized electronic surveillance. The Attorney General is authorized to reimburse carriers for all of the reasonable costs directly associated with the modifications they perform on equipment, facilities, and services deployed on or before January 1, 1995. These regulations will provide the cost accounting standards for reimbursements.

Civil Rights

The Department and its Civil Rights Division are deeply committed to a rigorous and revitalized approach to the enforcement of this Nation's civil rights laws. In keeping with that commitment, the Division will be reviewing, updating, and improving its civil rights regulations, which are the Division's basic enforcement tools. As a priority for the coming year, the Division is completing the initial ADA rulemaking cycle by amending its regulations under the ADA to incorporate revised standards applicable to new buildings and facilities used by State and local governments. The Department's Regulatory Plan has one civil rights initiative.

The Department is planning to make revisions in its regulations implementing title II of ADA (and conforming changes to title III) in order to incorporate the revised accessibility design guidelines developed by the Architectural and Transportation Barriers Compliance Board (the Access Board). Subtitle A of title II of the ADA protects qualified individuals with disabilities from discrimination on the basis of disability in the services, programs, or activities of all State and local governments. Title III of the ADA protects qualified individuals with disabilities from discrimination on the basis of disability by public accommodations and in commercial facilities. The Access Board's new guidelines for State and local buildings and facilities are the subject of a related, pending rulemaking proceeding, and have been subject to considerable scrutiny through the Board's regulatory process. The Department of Justice, which is required by statute to promulgate regulations that do not go below the Access Board's minimum guidelines, will incorporate them into the Department's title II rule.

These amendments to the ADA regulations are an important step forward in fulfilling the promise of the ADA in ushering in a new era of opportunity and dignity for the many millions of Americans with disabilities. These regulations, which will apply to new construction and to alterations of State and local buildings and facilities, will open doors that have shut out people with disabilities in the past.

Immigration

The Immigration and Naturalization Service (INS) is responsible for facilitating the entry of persons legally admissible as visitors or as immigrants to the United States, for preventing unlawful entry or receipt of immigration benefits by those who are not entitled to receive them, and for apprehending or removing those aliens who enter or remain illegally in the United States. Though many of the Administration's goals for more effective immigration process require either new statutory authority or increased resources, the regulatory process is a vital aspect of carrying out the goals of the immigration laws.

Certainly, one of the regulatory challenges facing the Department of Justice is to improve the effectiveness of those regulatory efforts. Commissioner Meissner established three fundamental goals at the time of her confirmation: to increase the professionalism of the Service, to provide immigration control with compassion, and to build the Service's role in immigration policy leadership and communication. The regulatory priorities for the Service follow those priorities, though other desired improvements may require legislative action. Two INS initiatives are included in this regulatory plan.

The principal policy and program delivery regulations which will be presented this year address areas of vulnerability in the immigration system. They are also structured to facilitate the proper use of the system by deserving persons. The principal regulation will provide reforms which are geared to streamlining the naturalization process.

The Service has launched a major initiative, "Citizenship USA," designed

VOL
60
SS
2
28
NO
28
995
UMI

to increase access to citizenship. Through this project, INS will streamline the naturalization process to assure that eligible applicants are approved and sworn in as citizens within 6 months of filing their applications. A team of INS headquarters and field staff, with the assistance of outside experts, has reviewed the current process and will propose to the Commissioner a number of modifications to procedures and policies. One of the first of these changes is the designation of qualified organizations to provide assistance to individuals applying for naturalization, on a fee-for-service basis.

The second major program area to be addressed in this regulatory plan is the Service's ongoing effort to facilitate the U.S. business community's ability to comply with the Employer Sanctions provisions of the Immigration Control and Reform Act. Over the past year the Service has published a supplemental proposed rule which not only further reduced the number of acceptable documents for verifying employment eligibility, but also proposed the addition, based on public comments, of an employee attestation provision.

The Service has also been involved in discussions with various private- and public-sector organizations concerning the feasibility of an electronic Form I-9, Employment Eligibility Verification Form. Efforts are currently underway to allow a pilot demonstration program to test various phases of electronically handling and/or processing the Form I-9. The demonstration project is scheduled to be a 2-year project, after which the Service hopes to be in a position to present findings and recommendations for possible regulatory and/or legislative modifications.

Additionally, the Service will be promulgating regulations which will propose to eliminate references to several types of employment authorization documents (EADs) and to phase in replacement of these documents by a new, more secure, EAD.

DOJ—Civil Rights Division (CRT)

FINAL RULE STAGE

62. NONDISCRIMINATION ON THE BASIS OF DISABILITY IN STATE AND LOCAL GOVERNMENT SERVICES; PUBLIC ACCOMMODATIONS AND COMMERCIAL FACILITIES; ACCESSIBILITY STANDARDS

Priority:

Other Significant

Legal Authority:

42 USC 12134; 42 USC 12186; 5 USC 301; 28 USC 509; 28 USC 510; PL 101-336

CFR Citation:

28 CFR 35; 28 CFR 36; 28 CFR 37; 28 CFR 38

Legal Deadline:

None

Abstract:

On July 26, 1991, the Department published its final rules implementing titles II and III of the Americans with Disabilities Act (ADA), which prohibits discrimination on the basis of disability by public entities (title II) and in places of public accommodation and commercial facilities (title III). Those regulations included accessibility guidelines required for facilities covered by title III--the ADA Accessibility Guidelines for Buildings and Facilities (ADAAG)--but did not specifically include guidelines for facilities covered by title II, such as courthouses or prisons. Title II entities now have the option of using ADAAG (without certain exceptions applicable only to title III facilities) or another existing standard, the Uniform Federal Accessibility Standards.

The final rule will amend titles II and III to adopt a revised version of ADAAG, which incorporates new guidelines for facilities typically covered by title II. The new guidelines were issued as an interim rule by the Access Board and were published on the same day as the Department's proposed rule. The Department's final rule will also amend the compliance procedures set forth in subpart F of the title II regulation.

Statement of Need:

Section 504 of the ADA requires the Access Board to issue supplemental minimum guidelines and requirements for accessible design of buildings and facilities subject to the ADA, including titles II and III. Sections 204(c) and 306(c) of the ADA provide that the Attorney General shall promulgate regulations implementing titles II and III that are consistent with the Access Board's ADA guidelines. Because the Department of Justice is required by statute to promulgate regulations that do not go below the Access Board's minimum guidelines, and because this rule will adopt guidelines issued by the Access Board, as also required by statute, this rule is required by statute.

Summary of the Legal Basis:

The summary of the legal basis of authority for this regulation is set forth above in the Legal Authority and in Statement of Need.

Alternatives:

The Department is required by the ADA to issue this regulation as described in the Statement of Need above. All comments (including those that suggest alternatives to the current proposed guidelines) received by the Department on the proposed rule and by the Access Board on its current interim rule and its guidelines published December 21, 1992, have been and will continue to be thoroughly analyzed and considered by the Department prior to the adoption of any final rule.

Anticipated Costs and Benefits:

The Clinton Administration is deeply committed to ensuring that the goals of the ADA are met. Promulgating this amendment to the Department's ADA regulations will ensure that entities subject to the ADA will have one comprehensive regulation to follow. Currently, entities subject to title II of the ADA (State and local governments) have a choice between following the Department's ADA standards for title III, which were adopted for places of public accommodation and commercial facilities and which do not contain standards for common State and local government buildings (such as courthouses and prisons), or the Uniform Federal Accessibility Standards (UFAS). By developing one comprehensive standard, the Department will eliminate the confusion that arises when governments try to mesh two different standards. As a result, the overarching goal of improving access to the built environment to persons with disabilities will be better served.

The Access Board has analyzed the impact of applying its proposed amendments to ADAAG to entities covered by titles II and III of the ADA and has determined that they are a significant regulatory action for purposes of Executive Order 12866. The Access Board has prepared a Regulatory Assessment, which includes a cost impact analysis for certain accessibility elements and a discussion of the regulatory alternatives considered.

The Access Board has determined that this proposed rule will have a significant economic impact on a substantial number of small entities and, therefore, has included the flexibility analysis required by the Regulatory Flexibility Act in its regulatory assessment. The Access Board has made every effort to lessen the economic impacts of its proposed rule on small entities, but recognizes that such impacts are the necessary result of the mandate of the ADA itself. The Access Board's analysis also applies to the Department's proposed adoption of the revised ADAAG. The Department's proposed procedural amendments will not have a significant economic impact on small entities.

The Access Board has made every effort to lessen the impact of its proposed guidelines on State and local governments, but recognizes that the guidelines will have some federalism impacts. These impacts are discussed in the Access Board's Regulatory Assessment, which also applies to the Department's proposed rule.

Risks:

Without this amendment to the Department's ADA regulations, regulated entities will be subject to confusion and delay as they attempt to sort out the requirements of conflicting design standards. This amendment should eliminate the costs and risks associated with that process.

DOJ—Immigration and Naturalization Service (INS)

PROPOSED RULE STAGE

63. • STREAMLINING NATURALIZATION

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

8 USC 1103; 8 USC 1252b; 8 USC 1362; 8 USC 1421; 8 USC 1443; 8 USC 1447; 8 USC 1448

CFR Citation:

8 CFR 103; 8 CFR 292

Legal Deadline:

None

Abstract:

This regulatory change is part of the Immigration and Naturalization (INS) "Citizenship USA" Project to make the naturalization process more accessible to eligible immigrants. The change is intended to increase the availability of high-quality, low-cost assistance to applicants for naturalization and other immigration benefits. It will reduce the burden of current regulations and will clarify some regulatory provisions which have been confusing to affected parties. It will also expand the partnership between INS and organizations in local communities.

Statement of Need:

INS now receives far more applications for naturalization than in previous years. Many of these applications are filed with some of the required information missing, or improperly filled out. Processing these applications and returning them for additional information wastes time of INS employees, and adds delay to an applicant's waiting time.

Many voluntary organizations working in immigrant communities help individuals prepare their applications. INS has learned that these are more likely to be complete and legible, expediting processing. Further, these organizations provide information regarding INS requirements and procedures, which helps individuals decide whether and when to file applications for naturalization and other immigration benefits. INS believes that increasing the availability of such assistance will increase the efficiency and effectiveness of its naturalization efforts, reduce the waiting time for applicants, and increase satisfaction among its applicants.

INS will amend existing regulations to establish procedures to designate qualifying organizations and their individual employees on a provisional basis to assist applicants for various naturalization benefits, on a fee-for-service basis. These procedures will be coordinated with those regarding representation by organizations recognized by the Board of Immigration Appeals (BIA).

Summary of the Legal Basis:

The legal basis of authority for these regulatory modifications is set forth above in Legal Authority. No aspect of these actions is required by statute or court order.

Alternatives:

Some attorneys provide these services to their clients; however, the demand exceeds the supply. The BIA recognizes qualified organizations to provide representation, which may include application assistance; again, the need for assistance exceeds the total capacity of these organizations, which are restricted to charging no more than a nominal fee for services. By establishing its own procedures for designation, INS can expand the availability of high-quality, low-cost services. As such designated organizations will be able to charge fees to support these services, they should be able to expand to meet the need.

Anticipated Costs and Benefits:

There will be a relatively small cost for staff time necessary to determine the qualifications of organizations and their individual employees seeking designation, as well as a small cost for

monitoring the ongoing quality of such services and the designees' continued compliance with the requirements. The benefits include: shortened average processing time for applications due to improved accuracy; reduced demand for INS staff to answer routine application questions or provide forms; better understanding of requirements and procedures by potential applicants; fewer filings by clearly ineligible persons, saving them and INS time and money; and the potential for enhanced relationships between INS and the public in local communities. The INS anticipates that these benefits will substantially exceed the costs.

Risks:

These regulatory initiatives do not involve risk reduction efforts involving health, public safety, or environmental concerns.

DOJ—INS

FINAL RULE STAGE

---

64. CONTROL OF EMPLOYMENT OF ALIENS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

8 USC 1101; 8 USC 1103; 8 USC 1255a; 8 USC 1255a note; 8 USC 1324a; 8 USC 1160; 8 CFR 2

CFR Citation:

8 CFR 210; 8 CFR 245a; 8 CFR 274a

Legal Deadline:

None

Abstract:

The document reduction rule (INS No. 1399-93) reduces the number of Immigration and Naturalization Service (INS)-issued documents that are acceptable for purposes of completing the Employment Eligibility Verification Form (Form I-9). This rule proposes to further simplify compliance with the employment eligibility verification requirements and address the concerns of employers who allege confusion created by the multiplicity of acceptable documents on the Form I-9.

A supplemental proposed rule published on June 22, 1995, at 60 FR 32472 proposed creating a requirement on the part of the employee to sign an attestation in section 3 of Form I-9, during the reverification process indicating that they are still authorized to work in the United States (INS No. 1399S-94). The supplemental rule also proposed the elimination of Federal identification cards as acceptable List B identity documents.

Statement of Need:

In a March 1990 report, the General Accounting Office (GAO) noted that the multiplicity of acceptable work eligibility documents can give rise to confusion and uncertainty in the minds of employers seeking to determine whether individuals are eligible to work. (Immigration Reform: Employer Sanctions and the Question of Discrimination 62 (GAO/GGD-90-62, Mar. 1990)). A reduction in the number of acceptable documents should reduce confusion and uncertainty on the part of employers, and thereby reduce potential employment discrimination based upon misapplication of the employment eligibility verification requirements.

Summary of the Legal Basis:

The legal basis of authority for this regulation is set forth above in Legal Authority. No aspect of this regulatory action is required by statute or court order.

Alternatives:

One often repeated criticism of employer sanctions is the number of documents that are acceptable for completing the Form I-9. The Service has taken steps to address this criticism. In July 1988, the Service committed to the establishment of procedures for a uniform employment authorization policy. First, the Service limited the number and types of paper documents on which employment could be authorized. Second, the Service introduced the standardized Employment Authorization Document (Form I-688B). The Service has determined that further steps can be taken to streamline the employment eligibility verification system by reducing the number of documents acceptable for Form I-9 purposes. During the next few months the Service will issue a proposed regulation which introduces a new, more secure employment authorization document (EAD) which will eventually replace existing EADs.

Anticipated Costs and Benefits:

Employment is often the magnet that attracts individuals to come to or stay in the United States illegally. The employer sanctions provisions help reduce the strength of this magnet by requiring employers to hire only those individuals who may legally work in the United States. This rule, by reducing the number of documents that are acceptable for employment eligibility verification purposes, will reduce confusion and uncertainty on the part of employers in the application of the employment eligibility verification requirements. This, in turn, will increase employer compliance and thereby result in more jobs being available for those who are authorized to work in the United States. In addition, by reducing confusion and uncertainty on the part of employers, this rule will reduce potential employment discrimination based upon misapplication of the employment eligibility verification requirement.

Risks:

An employment eligibility verification system that relies on a multiplicity of documents, and is difficult to understand, may result in employment discrimination based upon

misapplication of the employment eligibility verification requirements. In addition, a complicated employment eligibility verification system may encourage fraud and result in individuals who are authorized to work in the United States being displaced by unauthorized individuals.

DEPARTMENT OF LABOR (DOL)

Statement of Regulatory Priorities

The Department of Labor's (DOL's) mission is to protect and promote the welfare of those who are employed, those who are retired, and those who are seeking a new or better job. In order to successfully fulfill its mission, the Department must provide a strong but flexible framework of rules for employers and others to follow. This framework is largely formed by the more than 180 labor laws and implementing regulations the Department administers. It is this framework of rules that guarantees workers' rights to a safe and healthful work place; to a minimum wage and overtime pay; to freedom from employment discrimination; to family and medical leave; and to unemployment insurance. In addition, the rules support the Department's effort to protect workers' pension and other benefit rights; provide job-training programs; help workers find jobs; and work to strengthen free collective bargaining.

DOL's framework of rules undergoes continual change—for instance, it must be updated to reflect newly enacted laws that provide protections or benefits to workers (such as the Family and Medical Leave Act of 1993). It must also be updated to take into account changes in the work place such as improved, safer technologies, or to reflect new workplace hazards. In addition, the Department recognizes that a comprehensive review of the framework is periodically needed to eliminate those sections that are outdated and to reinvent those parts that are unreasonably burdensome or confusing. DOL has recently undertaken such a review in response to President Clinton's April 24, 1995, "Regulatory Reinvention Initiative." The Department, in its "Reinventing Labor Regulations" report, made a commitment to the President to expand its efforts to improve DOL regulatory processes and regulations. As part of that commitment, each DOL regulatory agency conducted a page-by-page review of its rules. This process has led to the generation of a DOL regulatory reform strategy, followed by agency commitments to change or eliminate specific regulations. DOL's regulatory reform strategy is designed to:

- Set clear and sensible priorities for hazards and other issues that need to be addressed;
- Establish basic "building block" standards that provide a solid foundation for future regulatory efforts;
- Revise and revoke obsolete, confusing, or unnecessary rules;
- Reduce excessive compliance burden and costs;
- Employ plain language to make rules more user-friendly; and
- Initiate cooperative partnerships with business, labor, State governments, interest groups, professional societies, and other important stakeholder groups.

Some of the specific regulatory changes that were identified in the review are found in the eleven "reinvention" entries in this plan; others will be included in the Department's regulatory agenda. The purpose of these reform efforts is to ensure that our framework of rules is strong enough to effectively promote and protect workers and is built so that it imposes the smallest possible burden on those who must abide by the rules.

DOL's 1995 regulatory plan includes 20 of the Department's most important significant regulations from 5 of our major regulatory agencies: Employment Standards Administration (ESA), Employment and Training Administration (ETA), Mine Safety and Health Administration (MSHA), Occupational Safety and Health Administration (OSHA), and Pension and Welfare Benefits Administration (PWBA). These regulations were selected because of their significant impact on the economy or other government agencies and because they are central to each agency's mission or to their regulatory reinvention efforts. Although these regulations represent those that are likely to have the greatest impact, it is important to note that the Department views every regulatory effort it undertakes as important and necessary.

Regulatory Priorities

The Department of Labor is one of the largest enforcement agencies within the U.S. Government. Its regulations cover an estimated 7 million establishments and over 125 million current and former employees, as well as job applicants and retirees. Given this extensive mandate, the entries in the Regulatory Plan were carefully selected as the most important: that is, they are essential to the Department's mission to improve worker protections and job services. And, in keeping with the Department's promise to the President to improve our regulatory framework, these proposals will be designed so that they are effective, consistent, sensible and understandable. Some, in fact, are designed solely to improve existing regulatory requirements and reduce compliance costs.

The Employment Standards Administration's Wage and Hour Division is responsible for implementing and enforcing a number of statutes establishing minimum labor standards that protect the Nation's work force, such as the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act, the Employee Polygraph Protection Act, and certain provisions of the Immigration and Nationality Act. These labor standards include provisions for payment of minimum wages and overtime compensation, protection of working youth under child labor standards, job protections for employees who take leave for certain covered family or medical reasons, and requirements to observe minimum working conditions for agricultural workers. The regulatory activities required to implement these statutory responsibilities represent a very important aspect of the Division's work, the results of which reach over 100 million employees in the work force. When developing regulatory proposals, the Department's focus is on assuring fair, safe and healthful workplaces for workers, while at the same time making regulatory standards less burdensome to the regulated community. The particular regulations selected for inclusion in this Plan affect a wide array of workers and workplaces. Under the FLSA, the Wage and Hour Division is undertaking a comprehensive review of the regulatory criteria applicable to child labor and to the minimum wage and overtime exemption for "executive," "administrative," "professional," and "outside sales employees." Other regulatory actions include clarification of the criteria to be followed in determining whether a joint employment relationship exists in the employment of migrant and seasonal farm workers under MSPA, and the circumstances in which "helpers" may be used on federally funded and assisted construction contracts subject to the Davis-Bacon Act.

ESA is also charged with enforcing the nondiscrimination and affirmative action requirements of Executive Order 11246, section 503 of the Rehabilitation Act of 1973, as amended, and section 4212 of the Vietnam Era Veterans' Readjustment Assistance Act. Through these regulations, ESA's Office of Federal Contract Compliance Programs seeks to ensure that Federal contractors and subcontractors provide a level playing field to all employees and applicants for employment. The proposed changes to regulations implementing Executive Order 11246, which will streamline, clarify, and reduce paperwork requirements, are an important ESA regulatory priority.

The mission of the Mine Safety and Health Administration (MSHA) is to achieve the goal of the Federal Mine Safety and Health Act of 1977: making the first priority and concern of all in the mining industry the health and safety of its most precious resource—the miner. MSHA is committed to providing the Nation's miners a safer and healthier workplace. Despite MSHA's past efforts, miners daily face safety and health hazards at levels unknown in most other professions. Government intervention alone cannot eliminate occupational deaths, injuries, and illnesses in mining. Effective regulation can best be accomplished through the combined commitment of miners, mine operators, and the Government to prevent accidents and illnesses. To facilitate this commitment, MSHA's Regulatory Plan concentrates on improving existing safety and health standards and addressing technological advances in mining.

Two significant regulatory actions exemplify MSHA's commitment to improving workplace safety and health for miners. The first action addresses the need to update the Agency's existing standards for exposure to noise. The proposed noise rule would re-examine the level of protection provided by existing standards. This examination is necessary because many miners, who are exposed to the maximum noise levels currently permitted by MSHA regulations, may still be suffering hearing impairments.

The second significant regulatory action concerns diesel-powered equipment. The introduction of diesel-powered equipment in underground coal mines over the past decade has created new hazards associated with the presence of a potential ignition source and diesel fuel in an already explosive environment. In addition, the exhaust from such equipment can expose miners to hazardous airborne contaminants. To assure that diesel-powered equipment does not adversely affect the safety or health of miners, MSHA plans to issue a final rule that includes criteria for the approval of such equipment, safety standards for the storage and distribution of diesel fuel, training requirements for workers who maintain diesel equipment, and requirements for monitoring miners' exposure to diesel exhaust. (Although it will not be a Regulatory Plan entry, MSHA does intend to issue a separate proposed rule for controlling diesel particulate emissions that would complement the diesal equipment standard. This Regulatory Agenda proposal will address the potential health hazards associated with particulate in the exhaust emitted by diesel-powered equipment in the mining environment.)

In the past 2 years, the Occupational Safety and Health Administration (OSHA) has changed its fundamental mode of operation from one of command and control to one that provides employers with a real choice between a partnership with OSHA and a traditional enforcement relationship. In the regulatory arena, this means that OSHA has changed its approach to regulating to enable the Agency, for the first time, to establish and act on clear and sensible priorities, focus on developing a basic "building block" standard—the safety and health programs rule—and eliminate out-of-date, confusing, or duplicative rules from the books. Despite the change in OSHA's methods, however, its mission remains as important as it was on the day President Nixon signed the Occupational Safety and Health Act into law in 1970: this mission is that of saving the lives and improving the safety and health of America's working men and women.

Over the years, some of OSHA's standards, particularly those adopted wholesale from national consensus standards in 1971, have become technologically obsolescent, while others are written in highly detailed, specification-driven language. To address these problems, OSHA has launched a series of initiatives aimed at streamlining and rationalizing the Agency's regulations and ensuring that all future OSHA rules will pass plain-language and common-sense tests. In addition, the Agency is actively soliciting input from stakeholders—business, labor, small employers, professional associations, and affected government entities—as it moves forward on these rulemaking initiatives. The OSHA rules featured in the 1995 Regulatory Plan reflect the rulemaking approach that is being followed by "the New OSHA." For example, the Agency is carefully reviewing the massive docket resulting from months of public hearings and comments on one of the Agency's highest priorities, a standard for indoor air quality, and staff will continue to work on this project over the next year. The size of the docket and the complexity of the issues raised by the indoor air rulemaking, however, have necessitated a delay in the expected promulgation date; as indicated in the regulatory agenda. Regulatory action to address the serious risks posed to America's workers by environmental tobacco smoke and unhealthful indoor air is now planned for fiscal year 1997.

One of the most important regulatory initiatives ever undertaken by OSHA—development of a safety and health programs rule—is the centerpiece of the Agency's current regulatory plan. This standard, which will require employers to develop safety and health programs to address occupational safety and health hazards of all types, will ensure that employers in all industries treat worker protection as a fundamental goal of their business. Evidence of the effectiveness of safety and health programs in achieving OSHA's ultimate goal—the prevention of deaths, injuries, and illnesses on the job—is widespread and growing daily, as more and more companies report that their accident rates and their workers' compensation costs have fallen after the implementation of such programs. This safety and health program standard will assist employers to identify job-related hazards in the workplace, correct those so identified, and prevent others from occurring. To simplify and streamline the program for employers, OSHA has decided to roll a number of separate rulemaking initiatives into the safety and health programs rule; these include exposure assessment, which was listed in last year's Agenda as a separate rulemaking, and consolidated training and records maintenance requirements, which will replace the hundreds of procedural training and records maintenance requirements currently scattered throughout OSHA's standards. OSHA is also seeking input from stakeholders on the need to include an exposure-monitoring and a medical surveillance module in the safety and health programs rule. The Department believes that, by actively involving both employers and employees in the implementation of safety and health programs, this standard will help to produce the high-performance workplaces of tomorrow.

In summary, OSHA's four-point regulatory strategy—to establish clear and sensible priorities, to focus on the safety and health programs rule, to eliminate or fix problem standards, and to emphasize interactions with its stakeholders—is designed to achieve a body of standards that will make sense

to ordinary people and protect the safety and health of the U.S. work force.

The Pension Welfare and Benefits Administration (PWBA) protects the integrity of pensions, health plans, and other employee benefits for over 150 million workers, retirees, and dependents. PWBA's mission is to protect participants and beneficiaries in employment-based benefit plans by deterring and correcting violations of the law, by developing policies and laws that simplify compliance and encourage the growth and preservation of employment-based benefits, by assisting plan officials in understanding the requirements of the law, and by ensuring that employees receive the information they need to protect and secure their benefit rights. PWBA is preparing legislative and regulatory proposals to simplify compliance with benefits laws, improve pension and welfare benefit plan coverage, and protect the benefits of American workers. PWBA's top priority is, in conjunction with the Internal Revenue Service, Treasury, and the Pension Benefit Guaranty Corporation, to release for comment, before the end of 1995, a simplified report/return form for all employee benefit plans subject to the Employee Retirement Income Security Act's (ERISA) annual reporting requirements.

Reinvention Initiatives

The Department's June 15, 1995, report to the President, "Reinventing Labor Regulations," outlined the steps DOL will take to enhance its regulatory framework. The Department recognizes that one way to make rules more effective is to make them easier to understand and apply. This means eliminating duplicative, contradictory, unnecessary, or out-of-date rules; it means rewriting old rules or promulgating new rules that are easy to understand; and it means enlisting the help of the regulated community to identify better ways to fulfill our mission through changes in regulations. The Department knows that as it strives to provide a less burdensome, more effective, and more flexible framework, a strong business/labor consensus will be essential to the success of our reinvention initiative.

DOL's individual agencies are all taking part in the reinvention initiative. For example, the Employment Standards Administration conducted a comprehensive review of its existing regulations to identify rules that were obsolete or outdated, and those that could be streamlined to reduce regulatory burdens and simplify compliance obligations. ESA's initiative is designed to eliminate unnecessary overlap and duplication in rules wherever possible, provide meaningful opportunities for input from the regulated community as part of an agency's regulatory reform activities, and ensure that regulatory standards are easily understood, with reasonable compliance standards consistent with the underlying statutes they are intended to implement.

As a result of the Wage and Hour Division's "page-by-page review" of existing regulations, half were identified as possible candidates for reinvention, consolidation, or revocation. Out of 75 regulatory "parts" in the Code of Federal Regulations (CFR) administered by Wage-Hour, 28 (or 37 percent) were slated for elimination either through consolidation or repeal (because they are obsolete). Ten CFR parts (or 13 percent) will be reinvented and streamlined. This regulatory reform initiative is expected to result in removing 225 pages or nearly 20 percent of unnecessary regulatory text from the CFR, reducing excessive compliance burden and costs and making Wage-Hour's rules more "user-friendly."

The Federal Coal Mine Health and Safety Act of 1969, as amended, established a system for providing monthly cash payments and medical benefits to coal workers who are victims of pneumoconiosis (black lung) and to their survivors. The regulations implementing the law were reviewed by ESA's Office of Workers' Compensation Programs pursuant to the President's Regulatory Reinvention directive through a process involving front-line staff and extensive discussions with claimant and beneficiary groups. This review has identified areas of program administration for reinventing and streamlining so that service will be more prompt and economical. Specific modifications of existing regulatory impediments are now under development for proposed implementation in fiscal year 1996.

Under the reinventing government initiative, the Office of Federal Contract Compliance Program's emphasis is on regulatory reform, for example, revising the Executive Order 11246 regulations to reduce paperwork burdens, eliminate unnecessary regulations, and simplify and clarify the regulations while improving the efficiency and effectiveness of the contract compliance program.

ETA, as part of the reinvention effort, is currently re-engineering the labor certification process for the permanent employment of aliens in the United States, which has been criticized as being complicated, time consuming, costly, and burdensome to employers. ETA's goals are to make fundamental changes and refinements in that process that will (a) better serve customers, (b) streamline the process, (c) improve effectiveness, and (d) save resources. The re-engineering effort is a collaborative effort of Federal and State staff who are involved in the administration of alien certification programs. The re-engineering effort also involves consultation throughout the process with sponsors, stakeholders, State partners, and outside interest groups to solicit ideas and suggestions for change. Through this re-engineering effort, ETA hopes to achieve considerable savings in resources both for the Government and employers, without diminishing significant protections now afforded U.S. workers by the current regulatory and administrative requirements.

MSHA has also reviewed its regulations as part of the reinvention initiative. One type of reinvention arises from changes in technology that are not reflected in regulations. Thus, certain existing safety standards may need to be updated. One such instance is MSHA'S electrical standards. Advanced longwall mining systems that employ high-voltage electrical circuits have resulted in significant production gains for many underground coal mines, with no loss of safety, provided certain conditions are met. MSHA's electrical standards for underground coal mines currently prohibit high-voltage circuits in the area of the mine where coal is produced. As a result, mine operators have had to seek variances from MSHA to use high-voltage equipment. Over the past decade approximately 100 variances have been processed. MSHA intends to issue a final rule allowing the use of this type of equipment, reducing the burden on those mines that use this safe and highly productive method of mining coal.

The elimination and revision of outdated and restrictive regulations, most of which were adopted by OSHA nearly 25 years ago and have not been changed since, is another important aspect of the New OSHA's way of regulating. Several of the entries in this year's Regulatory Plan, including one titled, "Eliminating and Improving Regulations" and another titled "Revision of Certain Standards Promulgated under Section 6(a) of the Williams-Steiger Occupational Safety and Health Act of 1970," reflect the importance OSHA attaches to these projects. Finding and fixing confusing, hard-to-follow, and unnecessary regulations and streamlining and updating the Agency's excessively detailed and technologically obsolescent standards will further OSHA's primary goal—the protection of worker safety and health—and make it easier and less burdensome for employers to comply.

In addition, consolidating hundreds of procedural training provisions that are currently scattered throughout OSHA's general industry, construction, and maritime standards into a single module for incorporation into the proposed safety and health programs rule is a good example of regulating in a smart way. In the future, employers will have only a single set of training procedures to follow, regardless of which of OSHA's standards requires the training. For instance, the length of time an employer must keep OSHA-mandated training records will be standardized, as will the frequency of required training. Once the safety and health program rule is promulgated, OSHA will move to delete hundreds of training-related provisions from its existing standards, saving employers duplicative paperwork and unnecessary effort.

PWBA has worked with the Administration in developing and implementing the President's Pension Simplification Package. PWBA is coordinating with the Internal Revenue Service, Treasury, and the Pension Benefit Guaranty Corporation in order to simplify the Form 5500 Series, the annual report filed by over 750,000 employee benefit plans. Future plans for lessening the burden of this statutory requirement include developing software to allow plans to file electronically. In addition, PWBA will be soliciting comments on a proposal for eliminating obsolete regulations.

Regulations Included in the Plan

Twenty regulatory proposals are included in DOL's 1995 regulatory plan. These regulations acknowledge DOL's important role in rulemaking and the need to make regulations easier to understand and apply while increasing their effectiveness. As previously mentioned, these proposals were also selected because of their significant impact on the economy or other Government agencies. A detailed description of each follows.

DOL—Employment Standards Administration (ESA)

PROPOSED RULE STAGE

65. GOVERNMENT CONTRACTORS: NONDISCRIMINATION AND AFFIRMATIVE ACTION OBLIGATIONS (ESA/OFCCP)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

EO 11246, as amended; 38 USC 4212; 29 USC 793

CFR Citation:

41 CFR 60-1; 41 CFR 60-2; 41 CFR 60-20; 41 CFR 60-30; 41 CFR 60-50; 41 CFR 60-60; 41 CFR 60-250; 41 CFR 60-741; 41 CFR 60-742; 41 CFR 60-4

Legal Deadline:

None

Abstract:

These regulations cover nondiscrimination and affirmative action obligations of Federal contractors under Executive Order 11246, as amended; the Vietnam Era Veterans' Readjustment Assistance Act of 1974 (38 USC 4212), as amended; and Section 503 of the Rehabilitation Act of 1973, as amended. The NPRM published 08/25/81 and supplemented on 04/23/82 extended the effective date of a final rule published 12/30/80 and proposed amendments to that rule. OFCCP's review of regulatory options continues with emphasis on streamlining and clarifying the regulatory language and reducing paperwork requirements associated with compliance.

Statement of Need:

Parts of the regulations implementing Executive Order 11246 need to be revised, to reflect changes in the law that have occurred over time, streamlined, and clarified. Executive Order 11246 requires all Federal contractors and subcontractors and federally assisted construction contractors and subcontractors to apply a policy of nondiscrimination and affirmative action in employment with respect to race, color, religion, sex, and national origin. The regulatory revisions are necessary in order to allow the Department of Labor (DOL) to effectively and efficiently enforce the provisions of the Order. As a first step in updating its Executive Order 11246 regulations, the Department intends to propose changes to the provisions that govern the pre-award review requirements; recordkeeping and record retention requirements; certification requirements; and related provisions. In addition, revisions will be made that will conform Executive Order 11246 regulations to the recent changes made in the Department's regulations implementing Section 503 of the Rehabilitation Act.

A second phase of revision will contain proposals to change provisions that govern requirements for written affirmative action plans and the provisions concerning contractor evaluation procedures.

Alternatives:

After careful review, it was decided that the most effective way to improve compliance with the Executive Order 11246 provisions, and reduce burdens on compliant contractors, was to propose revisions to these regulations. Administrative actions alone could not produce the desired results. A determination was also made to publish revisions to the remaining regulatory provisions of the Executive Order at a later date so that careful consideration can be given to what changes are needed in each of the parts of the regulations.

Anticipated Costs and Benefits:

It is anticipated that the net effect of the proposed changes will be an increase in the rate of compliance with the nondiscrimination and affirmative action requirements of Executive Order 11246 and a reduction in compliance costs to Federal contractors. The Department will also be able to employ its resources more efficiently and more effectively.

Risks:

An assessment of the magnitude of the risk addressed by this action and how it relates to other risks within the jurisdiction of DOL will be prepared once decisions are reached on specific proposed changes in the Executive Order 11246 regulations.

68. CHILD LABOR REGULATIONS, ORDERS, AND STATEMENTS OF INTERPRETATION (ESA/W-H)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

29 USC 203(l)

CFR Citation:

29 CFR 570

Legal Deadline:

None

Abstract:

Section 3(l) of the Fair Labor Standards Act requires the Secretary of Labor to issue regulations with respect to minors between 14 and 16 years of age ensuring that the periods and conditions of their employment do not interfere with their schooling, health, or well-being. The Secretary is also directed to designate occupations that may be particularly hazardous for minors 16 and 17 years of age. Child Labor Regulation No. 3 sets forth the permissible industries and occupations in which 14- and 15-year-olds may be employed, and specifies the number of hours in a day and in a week, and time periods within a day, that such minors may be employed. The Department has invited public comment in considering whether changes in technology in the workplace and job content over the years require new hazardous occupations orders, and review of some of the applicable hazardous occupation orders and the method of their promulgation. Comment has also been solicited on whether revisions should be considered in the permissible hours and time of day standards for 14- and 15-year-olds. Comment has been sought on appropriate changes required to implement school-to-work transition programs.

Statement of Need:

Because of changes in the workplace and the introduction of new processes and technologies, the Department is undertaking a comprehensive review of the regulatory criteria applicable to child labor. Other factors necessitating a review of the child labor regulations are changes in places where young workers find employment opportunities, the existence of differing Federal and State standards, and the divergent views on how best to correlate school and work experiences.

Under the Fair Labor Standards Act, the Secretary of Labor is directed to provide by regulation or by order for the employment of youth between 14 and 16 years of age under periods and conditions which will not interfere with their schooling, health and well-being. The Secretary is also directed to designate occupations that may be particularly hazardous for youth between the ages of 16 and 18 years or detrimental to their health or well-being. The Secretary has done so by specifying, in regulations, the permissible industries and occupations in which 14- and 15-year-olds may be employed, and the number of hours per day and week and the time periods within a day in which they may be employed. In addition, these regulations designate the occupations declared particularly hazardous for minors between 16 and 18 years of age or detrimental to their health or well-being.

Public comment has been invited in considering whether changes in technology in the workplace and job content over the years require new hazardous occupation orders or necessitate revision to some of the existing hazardous orders. Comment has also been invited on whether revisions should be considered in the permissible hours and time-of-day standards for the employment of 14- and 15-year-olds, and whether revisions should be considered to facilitate school-to-work transition programs. When developing regulatory proposals (after receipt of public comment on the advance notice of proposed rulemaking), the Department's focus will be on assuring healthy, safe and fair workplaces for young workers, and at the same time promoting job opportunities for young people and making regulatory standards less burdensome to the regulated community.

Alternatives:

Regulatory alternatives will be developed based on the public comments responding to the advance notice of proposed rulemaking. Alternatives likely to be considered include specific additions or modifications to the hazardous occupation orders and changes to the hours 14- and 15-year-olds may work.

Anticipated Costs and Benefits:

Preliminary estimates of the anticipated costs and benefits of this regulatory action will be developed once decisions are reached on particular proposed changes in the child labor regulations. Benefits will include safer working environments and the avoidance of injuries with respect to young workers.

Risks:

An assessment of the magnitude of the risk addressed by this action will be prepared once decisions are reached on particular proposed changes in the child labor regulations.

DOL—ESA

67. DEFINING AND DELIMITING THE TERM "ANY EMPLOYEE EMPLOYED IN A BONA FIDE EXECUTIVE, ADMINISTRATIVE, OR PROFESSIONAL CAPACITY" (ESA/W-H)

Priority:

Economically Significant

Legal Authority:

29 USC 213(a)(1)

CFR Citation:

29 CFR 541

Legal Deadline:

None

Abstract:

These regulations set forth the criteria for exemption from the Fair Labor Standards Act's minimum wage and overtime requirements for "executive," "administrative," "professional" and "outside sales employees." To be exempt, employees must meet certain tests relating to duties and responsibilities and be paid on a salary basis at specified levels. A final rule increasing the salary test levels was published on January 13, 1981 (46 FR 3010), to become effective on February 13, 1981, but was indefinitely stayed on February 12, 1981 (46 FR 11972). On March 27, 1981, a proposal to suspend the final rule indefinitely was published (46 FR 18998), with comments due by April 28, 1981. As a result of numerous comments and petitions from industry groups on the duties and responsibilities tests, and as a result of recent case law developments, the Department concluded that a more comprehensive review of these regulations was needed. An ANPRM reopening the comment period and broadening the scope of review to include all aspects of the regulations was published on November 19, 1985, with the comment period subsequently extended to March 22, 1986.

The Department has revised these regulations since the ANPRM to address specific issues. In 1991, as the result of an amendment to the Fair Labor Standards Act (FLSA), the regulations were revised to permit certain computer systems analysts, computer programmers, software engineers, and other similarly skilled professional employees to qualify for the exemption, including those paid on an hourly basis if their rates of pay exceed 6-1/2 times the applicable minimum wage. Also, in 1992 the Department issued a final rule which provided, in part, that an otherwise exempt public sector employee would not be disqualified from the exemption's requirement for payment on a "salary basis" solely because the employee is paid according to a public pay and leave system that, absent the use of paid leave, requires the employee's pay to be reduced for absences of less than one workday. These revisions were limited in nature and the regulations are still in need of updating and clarification. In addition, recent court rulings have caused confusion as to what constitutes compliance with the regulation's "salary basis" criteria in both the public and private sectors. All of these factors have led the Department to conclude that a review of these regulations is both necessary and appropriate.

Statement of Need:

These regulations set forth the criteria used in the determination of the application of the FLSA exemption for "executive," "administrative," "professional," and "outside sales employees." The existing salary test levels used in determining which employees qualify as exempt from the minimum wage and overtime rules were adopted in 1975 on an interim basis. These salary level tests are outdated and offer little practical guidance in the application of the exemption. In addition, numerous comments and petitions have been received in recent years from industry groups regarding the duties and responsibilities tests in the regulations. These factors, as well as recent case law developments, have led the Department to conclude that a review of these regulations is needed.

These regulations have been revised in recent years to deal with specific issues. In 1991, as the result of an amendment to the FLSA, the regulations were revised to permit certain computer systems analysts, computer programmers, software engineers, and other similarly skilled professional employees to qualify for the exemption, including those paid on an hourly basis if their rates of pay exceed 6 1/2 times the applicable minimum wage. Also in 1991, the Department undertook separate rulemaking on another aspect of the regulations, the definition of "salary basis" for public-sector employers. This interim final rule provided, in part, that an otherwise exempt public-sector employee would not be disqualified from the exemption's requirement for payment on a "salary basis" solely because the employee is paid according to a public pay and leave system that, absent the use of paid leave, requires the employee's pay to be reduced for absences of less than one workday. In 1992, the Department issued its final rule on this matter.

Because of the limited nature of these revisions, the regulations are still in need of updating and clarification. In addition, recent court rulings have caused confusion as to what constitutes compliance with the regulation's "salary basis" criteria in both the public and private sectors.

Alternatives:

The Department has met with affected interest groups in developing regulatory alternatives. Following completion of these outreach and consultation activities, full regulatory alternatives will be developed.

Although legislative proposals have been introduced in the Congress to address certain aspects of these regulations, the Department will continue to pursue revisions to the regulations as the appropriate response to the concerns raised. Alternatives likely to be considered include particular changes to address "salary basis" and salary level issues to a comprehensive overhaul of the regulations that also addresses the duties and responsibilities tests.

Anticipated Costs and Benefits:

Some 23 million employees are estimated to be within the scope of these regulations. Legal developments in court cases are causing progressive loss of control of the guiding interpretations under this exemption and are creating law without considering a comprehensive analytical approach to current compensation concepts and workplace practices. These court rulings are creating apprehension in both the private and public sectors. Clear, comprehensive, and up-to-date regulations would

provide for central, uniform control over the application of these regulations and ameliorate this apprehension. In the public sector, State and local government employers contend that the rules are based on production workplace environments from the 1940s and 1950s, and that they do not readily adapt to contemporary government functions. The Federal government also has concerns regarding the manner in which the courts and arbitration decisions are applying the exemption to the Federal workforce. Resolution of confusion over how the regulations are to be applied in the public sector will ensure that employees are protected, that employers are able to comply with their responsibilities under the law, and that the regulations are enforceable. Preliminary estimates of the specific costs and benefits of this regulatory action will be developed once the various regulatory alternatives are identified.

Risks:

This action does not affect public health, safety, or the environment.

DOL—ESA

68. MIGRANT AND SEASONAL AGRICULTURAL WORKER PROTECTION (29 CFR PART 500)

Priority:

Other Significant

Legal Authority:

29 USC 1801 to 1872, as amended

CFR Citation:

29 CFR 500

Legal Deadline:

None

Abstract:

The legislative history of the Migrant and Seasonal Agricultural Worker Protection Act (MSPA) indicates that the principles found in *Hodgson* v. *Griffin and Brand*, 471 F.2d 235, are to be followed in determining whether a joint employment relationship exists in the employment of migrant and seasonal farm workers in a given fact situation. The Department intends to publish an NPRM to solicit comments on a clarification of the regulations to more closely comport with the legislative history of MSPA and the principles found in *Hodgson* v. *Griffin and Brand* and also possible modifications to the procedures for MSPA hearings, seeking more timely decisions.

Statement of Need:

These regulations need to be revised in order to provide needed clarifications and to make the hearing process more efficient. In the legislative history to the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), Congress stated that the term "joint employment" in MSPA was to have the same meaning as is found in the Fair Labor Standards Act (FLSA). Further remarks in the legislative history indicate that the principles found in *Hodgson* v. *Griffin and Brand*, 471 F.2d 235, were to be determinative. However, subsequent legal developments have created confusion as to appropriate criteria for determining the existence of a joint employment relationship. In its rulemaking, the Department will solicit comments to clarify the regulatory criteria for determining when a joint employment relationship exists between two or more employers. The Department will also consider modifying the rules relating to procedures for hearings, seeking more timely decisions.

Alternatives:

Regulatory alternatives will be developed as part of this review.

Anticipated Costs and Benefits:

There is no identifiable cost impact to the contemplated clarifying change in the regulations. Employers in the agricultural community will benefit from the clearer, more definitive criteria provided regarding joint employment relationships. An expedited hearing process will also be beneficial to all parties.

Risks:

This action does not affect public health, safety, or the environment.

69. PROCEDURES FOR PREDETERMINATION OF WAGE RATES (29 CFR PART 1) AND LABOR STANDARDS PROVISIONS APPLICABLE TO CONTRACTS COVERING FEDERALLY FINANCED AND ASSISTED CONSTRUCTION (29 CFR PART 5)

Priority:

Economically Significant

Legal Authority:

40 USC 276a to 276a(7)

CFR Citation:

29 CFR 1; 29 CFR 5

Legal Deadline:

None

Abstract:

The Department attempted to implement revised rules governing the

circumstances in which "helpers" may be used on federally funded and assisted construction contracts subject to the Davis-Bacon Act in May 1982 (see 47 FR 23644, 23658 (May 28, 1982); 47 FR 32090 (July 20, 1982)). After protracted litigation, a final rule was published in January 1989 (see 54 FR 4234) which became effective on February 4, 1991. Thereafter, on two occasions, Congress acted to prevent the Department from expending any funds to implement these revised helper regulations--through the Dire Emergency Supplemental Appropriations Act of 1991, PL 102-27, 105 Stat. 130,151 (1991), and then through section 104 of the DOL Appropriations Act of 1994, PL 103-112. Given the uncertainty of continuation of such moratoriums, the Department has determined that the helper issue may need to be addressed through rulemaking.

Statement of Need:

The current helper rules are difficult to administer and enforce, and--as evidenced by the prolonged litigation history and subsequent Congressional actions--are highly controversial. In May 1982, the Department attempted to implement revised rules governing the circumstances in which "helpers" may be used on federally funded and assisted construction contracts subject to the Davis-Bacon Act. After protracted litigation, a final rule was published in January 1989 and became effective on February 4, 1991. Thereafter, on two occasions, Congress acted to prevent the Department from expending any funds to implement these revised helper regulations through appropriations riders. Given the uncertainty of continuation of such moratoriums, the Department has determined that the helper issue may need to be addressed through further rulemaking.

Alternatives:

The Administration has determined that there are only limited alternatives to addressing this issue through rulemaking, in addition to possible legislative changes. Specific regulatory alternatives have not yet been developed pending current appropriations actions in the Congress.

Anticipated Costs and Benefits:

A new rulemaking regarding the helper criteria will seek to make administration of the Davis-Bacon Act more efficient by establishing reasonable "helper" criteria and methodology--thus resolving the controversy and uncertainty currently experienced by interested parties. Changes in the helper regulations may affect prior estimates of potential construction procurement cost savings anticipated from the earlier rulemaking. Estimates of the financial impacts of revised "helper" regulations will be prepared for inclusion in the NPRM.

Risks:

This action does not affect public health, safety, or the environment.

70. • BENEFITS UNDER THE FEDERAL COAL MINE SAFETY AND HEALTH ACT OF 1977, AS AMENDED AFFECTING THE BLACK LUNG BENEFITS ACT

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

30 USC 901 et seq

CFR Citation:

20 CFR 718; 20 CFR 722; 20 CFR 725; 20 CFR 726; 20 CFR 727

Legal Deadline:

None

Abstract:

The Division of Coal Mine Workers' Compensation reviewed its existing regulations, pursuant to Executive Order 12866, with a goal of eliminating outdated and unnecessary rules and streamlining the processes. The result is a proposal to revise existing rules to facilitate alternative dispute resolution, including the informal conference process; streamline the litigation process by encouraging the early development and submission of evidence and decentralizing control; reduce the costs of copying and mailing; raise the dollar limit for prior approval for medical equipment; and rewrite existing rules to make them more customer-oriented.

There will be no additional costs associated with these changes, but savings can be expected through streamlining.

Statement of Need:

The regulations implementing the Black Lung Benefits Act were last significantly revised in 1983. In the spirit of reinvention, the program proposes to update the rules to help improve services, streamline the adjudication process, and simplify the language.

Alternatives:

Regulatory alternatives will be developed based on the public comments responding to the notice of proposed rulemaking.

Anticipated Costs and Benefits:

Preliminary estimates of the anticipated costs and benefits of this regulatory action will be developed once decisions are reached on specific changes. Benefits will include a streamlined, more accessible process.

Risks:

Groups with a vested interest in a lengthy and expensive adjudication process will complain.

DOL—Employment and Training Administration (ETA)

PROPOSED RULE STAGE

71. LABOR CERTIFICATION PROCESS FOR THE PERMANENT EMPLOYMENT OF ALIENS IN THE UNITED STATES

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

INA 212(a)(5)(A)

CFR Citation:

20 CFR 656

Legal Deadline:

None

Abstract:

The Department of Labor (DOL) is currently re-engineering the labor certification process that is set forth in DOL regulations at 20 CFR 656. DOL's goals are to make fundamental changes and refinements that will (a) better serve customers, (b) streamline the process, (c) improve effectiveness, and (d) save resources. The re-engineering effort is a collaborative effort of Federal and State staff who are involved in the administration of alien certification programs. The re-engineering effort also involves consultation throughout the process with sponsors, stakeholders, State partners, and outside interest groups to solicit ideas and suggestions for change.

Statement of Need:

The labor certification process has been criticized as being complicated and time-consuming. It can take up to 2 years or more to complete the process; the process requires substantial government resources to administer, and it is reportedly costly and burdensome to employers. The Employment and Training Administration (ETA), therefore, is reexamining the effectiveness of the various regulatory requirements and the application processing procedure, with a view to achieving considerable savings in resources both for the Government and employers, without diminishing the significant protections now afforded U.S. workers by the current regulatory and administrative requirements.

Summary of the Legal Basis:

Before the Department of State and the Immigration and Naturalization Service may issue visas and admit certain immigrant aliens to work permanently in the United States, the Secretary of Labor, pursuant to section 212(a)(5)(A) of the Immigration and Nationality Act (INA), must certify to the Secretary of State and to the Attorney General that: (a) there are not sufficient U.S. workers who are able, willing, qualified, and available at the time of the application for a visa and admission into the United States and at the place where the alien is to work: and (b) the employment of the alien will not adversely affect the wages and working conditions of similarly employed U.S. workers (8 USC 1182(a)(5)(A)). The Department of Labor has promulgated regulations at 20 CFR 656 pursuant to and to implement section 212(a)(5)(A) of the INA. These regulations set forth the fact-finding process designed to support the granting or denial of a permanent labor certification.

Anticipated Costs and Benefits:

As indicated above, it is anticipated that the re-engineering effort will result in significant cost savings to the Government and to the regulated community. DOL will be able to provide a more precise estimation of anticipated cost reductions after the re-engineering of the permanent labor certification process is completed.

DOL—Pension and Welfare Benefits Administration (PWBA)

PROPOSED RULE STAGE

72. • REVISION OF THE FORM 5500 SERIES AND RELATED REGULATIONS UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974 (ERISA)

Priority:

Economically Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

29 USC 1021; 29 USC 1022; 29 USC 1023; 29 USC 1024; 29 USC 1025; 29 USC 1026; 29 USC 1027; 29 USC 1029; 29 USC 1030; 29 USC 1059; 29 USC 1135; 29 USC 1166; 29 USC 1168

CFR Citation:

Not yet determined

Legal Deadline:

None

Abstract:

Each year, pension and welfare benefit plans subject to title I of ERISA are generally required to file an annual return/report, the Form 5500 Series, regarding their financial condition, investments, and operations. The Form 5500 Series is the primary source of information concerning the operation, funding, assets, and investments of pension and other employee benefit plans. The Form 5500 Series is not only an important compliance and research tool for the Department, but is also a disclosure document for plan participants and beneficiaries and a source of information and data for use by other Federal agencies, Congress, and the private sector in assessing

employee benefit, tax, and economic trends and policies. As part of the President's Pension Simplification proposal, the agencies are undertaking a comprehensive review of the annual return/report forms in an effort to streamline the information required to be reported and the methods by which such information is filed and processed.

Statement of Need:

In the 20 years since Congress enacted ERISA to protect pension and other employee benefit promises made to employees, the laws and regulations have become more complex. There are many reasons for this: the desire for employers to have a high degree of flexibility in designing plans that best suit their work force; policies designed to ensure that all employees receive tax and savings benefits from retirement and other benefit plans that are comparable to those available to highly compensated employees and business owners; the need to protect the integrity of Federal tax revenues; and the prevention of tax-shelter abuses.

While each of these causes may have merit, and the private sector employee benefit system has been greatly strengthened as a result of ERISA, the cumulative result--together with frequent legislative changes--has been to raise compliance and administrative costs to a level that has created a disincentive for employers, and particularly small employers, to offer pension and other benefit plans to their employees.

A source of complexity and costs has been the Form 5500 Annual Return/Report Series, which is filed annually by an estimated 750,000 employee benefit plans. The Form 5500 Series is a joint Department of Labor, Internal Revenue Service, and Pension Benefit Guaranty Corporation form and serves as the principal source of financial information and data available to the Agencies, and participants and beneficiaries, concerning the operations of employee benefit plans. The proposed revision to the Form 5500 Series is being coordinated with the Internal Revenue Service, the Treasury Department, and the Pension Benefit Guaranty Corporation as part of the process of implementing the President's pension simplification proposal.

Title I of ERISA, sections 101 through 105, 107, 209, and 606, impose specific reporting and disclosure obligations on administrators of employee benefit plans. Section 104(a)(3) and 110 of ERISA provide the Secretary with the authority to prescribe exemptions and alternative methods of compliance for employee welfare benefit plans and employee pension benefit plans. Section 505 provides the Secretary with general authority to prescribe regulations necessary or appropriate to carry out the provisions of Title I of ERISA.

Alternatives:

The annual reporting requirement could be left unaltered. However, the Pension and Welfare Benefits Administration (PWBA) believes that compliance with the requirement may be facilitated without harming the security of the employment-based benefits system. Simplifying the Form 5500 Series is one step in improving ERISA's reporting and disclosure system. This initiative includes revision of the Form 5500 Series and related regulations. Filer costs from preparing forms and government costs for processing the Form 5500 Series can be reduced while enhancing the ability of the Government to protect workers' benefits by receiving more accurate and timely information on the operation, funding, investments, usefulness, and safety of employee pension and welfare benefit plans.

Anticipated Costs and Benefits:

Meaningful burden, hour, and cost reductions can be achieved only through an integrated implementation of changes to both the Form 5500 Series and the processing system. By simplifying the Form 5500 and creating an automated processing system for the filed reports, it is anticipated that filer costs of preparing forms, as well as Government processing costs, will be reduced. It is the goal of the Department to eliminate reporting requirements for information that is not needed to discharge its statutory responsibilities, while ensuring that participants and beneficiaries have access to the information they need to protect their rights and benefits under ERISA.

Risks:

The Form 5500 Series is part of ERISA's reporting and disclosure framework, which is intended to assure that employee benefit plans are operated and managed in accordance with certain prescribed standards and that participants and beneficiaries, as well as regulators, are provided or have access to sufficient information to protect the rights and benefits of participants and beneficiaries under employee benefit plans. Better focused annual reporting, through regulatory changes, should serve to facilitate compliance by plan administrators, thereby reducing litigation and penalty risks to plan administrators, fiduciaries, and sponsors, without increasing risks of benefit losses by participants and beneficiaries.

DOL—Mine Safety and Health Administration (MSHA)

PROPOSED RULE STAGE

73. NOISE STANDARD

Priority:

Other Significant

Legal Authority:

30 USC 811

CFR Citation:

30 CFR 56; 30 CFR 57; 30 CFR 70; 30 CFR 71

Legal Deadline:

None

Abstract:

Many miners are exposed to noise levels that are at or near maximum levels currently permitted by Mine Safety and Health Administration (MSHA) regulations. Notwithstanding MSHA's enforcement of its current noise regulations, miners are continuing to incur hearing impairment. Data indicate that protective action needs to be taken at a lower noise level than is currently required. MSHA is developing a proposed rule that would establish

uniform noise standards to apply to all mining, and which will consider requiring additional measures to protect miners, such as hearing protection and audiometric testing.

Statement of Need:

MSHA's experience under its current standards for occupational exposure to hazardous noise levels indicates that current standards do not provide the protection intended. Many miners are exposed to noise levels that are near the maximum currently permitted by MSHA regulations. Notwithstanding MSHA's enforcement of existing noise standards, miners continue to suffer hearing impairment. This proposed rule will consider establishing a lower action level for requiring hearing protection and will address methods for controlling exposure. The proposed rule also will consider requiring hearing conservation programs to determine the effectiveness of control measures in reducing the amount of hearing damage in exposed miners.

In addition, MSHA's current noise standards for coal mines differ from those for metal and nonmetal mines. MSHA's proposed rule would provide consistent requirements for all mines.

Alternatives:

MSHA published an advance notice of proposed rulemaking which requested industry comments and data on a number of issues. Based upon its own research and experience, and data and information submitted to the record, MSHA is considering numerous alternatives on a wide variety of complex issues. For example, MSHA is considering (a) the respective roles of personal hearing protection and engineering controls in controlling miners' exposures; (b) lowering the permissible exposure level; and (c) whether or not to require a hearing conservation program, including audiometric testing, exposure monitoring, and miner training. This proposed rule will be derived from MSHA's deliberations and decisions on these issues and alternatives.

Anticipated Costs and Benefits:

Depending on the form of the rule, MSHA expects costs could be incurred for engineering controls, personal hearing protection, exposure monitoring, audiometric testing, training, and recordkeeping. The major benefit of implementing the protection sought would be an average annual reduction of several hundred cases of hearing impairment from occupational noise exposure in mining, assuming that existing exposure levels and the number of miners remained constant and that miners were exposed for 20 years at these levels. The scope and nature of the proposed rule is currently under development and, thus, estimates of costs and benefits are preliminary.

Risks:

Noise is a serious occupational hazard in the mining industry. Occupational exposure to loud noises results in hearing loss and hearing impairment, which affects both quality of life and functional capacity. The Agency believes that the health evidence forms a reasonable basis for proposing revisions to MSHA's existing noise standards. In addition, cases of hearing loss reported to MSHA indicate that a significant number of these miners received all of their noise exposure under existing standards. This MSHA data is supported by State workers' compensation data.

DOL—MSHA

FINAL RULE STAGE

74. DIESEL-POWERED EQUIPMENT FOR UNDERGROUND COAL MINES

Priority:

Other Significant

Legal Authority:

30 USC 811; 30 USC 957

CFR Citation:

30 CFR 7; 30 CFR 70; 30 CFR 75

Legal Deadline:

None

Abstract:

The use of diesel-powered equipment in underground coal mines poses a risk of fire or explosion from two sources: internal combustion engines that introduce an ignition source into an environment where methane can be present; and underground handling and storage of diesel fuel. The Mine Safety and Health Administration (MSHA) currently has limited approval, safety, and health regulations that address the use of diesel-powered equipment in underground coal mines. In addition, some hazards are currently addressed in the mine ventilation plan. In 1988, a Secretarial advisory committee made recommendations concerning safety and health standards for the use of diesel-powered equipment in underground coal mines. In 1989, MSHA published a proposed rule based on those recommendations. This final rule will address criteria for the approval of diesel equipment and provisions for the safe use of such equipment in underground coal mines.

Statement of Need:

The use of diesel-powered equipment is increasing steadily in underground coal mines across the United States, from 175 units in 30 mines in 1977 to more than 2,885 units in 170 mines in 1995. Given the current state of the industry and assuming no change in existing regulations, MSHA projects that the presence of diesel equipment in the industry would increase to about 3,520 units in 250 underground coal mines by the year 2000.

Currently, MSHA regulations do not specifically regulate this type of equipment, in contrast to other more conventional mining equipment. Diesel equipment in underground coal mines poses a risk of fire or explosion, as a result of the introduction of an ignition source (the diesel engine) into an environment that may contain methane gas. Poor fuel handling and fuel transfer procedures underground present significant fire hazards. Between 1979 and 1992, MSHA investigated 10 diesel-equipment-related fires in underground coal mines. Because of the methane gas and coal dust present in the underground coal mining environment, any fire presents a significant risk of loss of life. Without rules for the design, use, and maintenance of diesel-powered equipment, the Agency also lacks an effective means to regulate health and safety hazards associated with diesel equipment.

Under current regulations, diesel-powered equipment is not required to have a number of important safety features that have long been required on electric equipment, such as cabs and canopies (which protect equipment operators from roof falls), automatic emergency parking brakes, and methane monitors, which shut equipment off when methane concentrations reach certain levels.

In July 1988, a Federal advisory committee convened by the Secretary of Labor made recommendations to the Secretary concerning safety and health standards for the use of diesel-powered equipment in underground coal mines. Based on those recommendations, in 1989 MSHA published a proposed rule that: included criteria for the approval of diesel engines and other related equipment; addressed exposure limits, monitoring, and recordkeeping requirements for certain diesel emissions; and provided corresponding safety standards for the use of diesel-powered equipment in underground coal mines, including the safe storage and transport of diesel fuel and the training of mechanics. MSHA is working on a final rule which will provide increased protection for miners, allow for flexibility in control technology, and minimize recordkeeping requirements.

Alternatives:

On January 6, 1992, MSHA published an advance notice of proposed rulemaking soliciting comments on the potential health effects from occupational exposure to diesel exhaust particulates, especially in the closed environment of the underground mine. MSHA has decided to continue to address the potential health effects from exposure to diesel particulates in a separate rulemaking.

MSHA considered third-party testing and certification of the results as an alternative to MSHA testing for the approval of diesel-powered equipment. The final rule may contain a combination of approaches to address this issue.

Anticipated Costs and Benefits:

The scope and nature of the final rule is currently under development and, thus, final estimates of costs and benefits have not been determined. MSHA had made a preliminary assessment in 1989 that the proposed rule would have had an incremental annual impact of over $20 million on the mining industry. Subsequent estimates, however, project the incremental annual cost to be from $16 million to $35 million, depending upon the alternatives selected.

MSHA projects that one benefit of implementing this regulatory protection will be a reduction in the risk of fires and explosions, and corresponding injuries, resulting from the use of diesel-powered equipment in underground gassy mines, as well as a reduction in the incidence of potential adverse health effects that result from exposure to diesel exhaust.

The final rule also will encourage the use of advanced diesel technology, such as flame arresters, spark arresters, water scrubbers, and exhaust filters in the approval of diesel engine design, all of which would improve the safety and health of miners. Also, because some hazards are currently addressed in the mine ventilation plan, the final rule will reduce the resources and paperwork associated with the submission and approval of this aspect of the ventilation plan. It also will provide for more uniform requirements, resulting in more consistent enforcement.

Risks:

The use of diesel-powered equipment in underground coal mines poses a risk of fire or explosion by introducing an ignition source through the engine itself and from the underground handling and storage of diesel fuel. Without rules for the design, use, and maintenance of diesel-powered equipment, the Agency lacks an effective means to control safety and health hazards associated with diesel-powered equipment in the confined environment of the underground coal mine.

DOL—MSHA

75. LONGWALL EQUIPMENT (INCLUDING HIGH-VOLTAGE)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

30 USC 811; 30 USC 957

CFR Citation:

30 CFR 18; 30 CFR 75

Legal Deadline:

None

Abstract:

Since 1970 MSHA regulations have required that high-voltage cables and transformers be kept at least 150 feet from the coal extraction area. The objective of this requirement is to prohibit the use of high-voltage cables and equipment that could serve as an ignition source for methane and coal dust in close proximity to the work area.

The modern development of highly productive longwall mining systems has resulted in their widespread use in the mining industry. Mine operators, however, currently must apply to MSHA for a variance from the existing standards in order to use this high-voltage equipment. The increased use of high-voltage longwalls in underground coal mines in recent years has led to the design of safe high-voltage electrical equipment and associated cables. These improvements have occurred specifically in the area of design and construction of explosion-proof equipment; insulation, short circuit, ground fault, and mechanical protection of cables; and equipment for safe handling of cables. For these reasons, in August 1992

MSHA published a proposed rule to establish safety requirements for the design, construction, installation, use, and maintenance of high-voltage longwall equipment and associated cables. The proposal would eliminate the need for a variance to use this equipment.

Statement of Need:

Because of the existing regulatory prohibition against using high-voltage cables and transformers within 150 feet of the extraction area, underground coal mine operators who wish to use high-voltage longwall equipment must apply for a variance from the standard. Over the years, MSHA has granted high-voltage longwall variances which require that the mine operator comply with certain requirements, including the use of explosion-proof high-voltage equipment, specially designed cable, cable-handling systems, and state-of-the-art ground fault and short-circuit protective devices. Since 1985 MSHA has granted about 90 variances for use of high-voltage longwalls and has denied only one. Since 1992, when the proposed rule was published, MSHA has granted about 30 variances for use of high-voltage longwalls.

The variance process involves substantial costs to the industry and MSHA. Most mine operators engage an attorney to prepare and submit a variance for the use of high-voltage longwall equipment. This part of the process alone can cost thousands of dollars. After receipt of the variance, MSHA processes the request, publishes a brief description in the **Federal Register**, has an inspector conduct an onsite investigation and prepare a report to the Administrator, and prepares a Proposed Decision and Order. Costs are incurred by industry in order to submit the appropriate documentation to support the variance. Agency costs are associated with processing, publication, and investigation of variances.

Alternatives:

MSHA intends to revise its regulations to allow underground coal mine operators to use high-voltage longwall equipment and associated cables. The regulations would be based on the Agency's experience with variances, and would require the use of properly designed and constructed equipment and cables, as well as electrical and mechanical protective devices.

Anticipated Costs and Benefits:

It is estimated that the rule would result in a cost savings. In the absence of the need to apply for variances, mine operators wishing to use high-voltage longwall equipment would realize reduced paperwork and significant savings associated with legal and administrative costs. In addition, high-voltage longwall equipment could be installed without waiting for MSHA to approve a variance. The normal length of time for preparing and processing a variance and issuing a decision is about 6 months to a year; but, on occasion, the entire process has taken several years. Eliminating the need to process and investigate variances would increase the resources available to both industry and MSHA personnel that could be directed to the proper installation, inspection, and maintenance of the equipment.

High-voltage longwall systems improve miners' safety from electrical hazards through improved technology in the areas of cable design and construction, circuit and equipment electrical protection, and cable handling and support systems. Additional benefits are realized from the convenient location of disconnect devices for the purpose of performing electrical work, and the use of barriers and interlock switches in electrical equipment to help guard against accidental contact with energized circuits.

Risks:

The mining industry, through the variance process, has been using high-voltage longwalls and associated cables since 1985. The Agency is unaware of any accidents attributable to the use of such equipment allowed under conditions approved through the variance process.

Abstract:

On December 29, 1992, the Occupational Safety and Health Administration (OSHA) announced its intention to form a negotiated rulemaking advisory committee to negotiate issues associated with a revision of the existing steel erection standard. Four of the primary issues to be negotiated include the need to expand the scope and application of the existing standard, construction specifications and work practices, written construction safety erection plan, and fall protection. The Steel Erection Negotiated Rulemaking Advisory Committee (SENRAC), a 20-member committee, was established, and the SENRAC charter was signed by Secretary Reich on May 26, 1994. The first meeting was held in the Washington area on June 14-16, 1994, and the Committee has met nine times since.

The negotiated rulemaking process has been successful in bringing together the interested parties that will be affected by the proposed revision to the steel erection rule to work out contrasting positions, find common ground on the major issues, and achieve consensus on a proposed rule. The use of this process and a neutral facilitator allowed the stakeholders to develop an ownership stake in the proposal that they would not have had without the use of this process.

The process has led to a draft revision to Subpart R of 29 CFR 1926 that contains innovative provisions that will help to minimize the major causes of steel erection injuries and fatalities. Many of these provisions could not have been developed without this process, which has brought together industry experts, via face-to-face negotiations, to discuss different approaches to resolving the issues. This process has proved mutually beneficial to all the parties involved (including OSHA), with each Committee member participating in resolving the issues and developing practical and effective rules to make the steel erection industry safer.

The Agency benefitted from this process by having industry members participate and add to the Agency's knowledge about steel erection. Also, the Agency has been able to work together constructively with the various parties and has avoided the adversarial environment that sometimes develops during OSHA rulemaking. The negotiated rulemaking process will enable the Agency to publish a proposal and go from proposal to final rule more quickly and with less controversy than would otherwise have been possible.

Statement of Need:

In 1989, OSHA was petitioned by the Iron Workers Union and National Erectors Association to revise its construction safety standard for steel erection through the negotiated rulemaking process. OSHA asked an independent consultant to review the issues involved in a steel erection revision, render an independent opinion, and recommend a course of action to revise the standard. The consultant recommended that OSHA address the issues by using the negotiated rulemaking process. Based on the consultant's findings and the continued requests for negotiated rulemaking, OSHA decided to use the negotiated rulemaking process to develop a proposed revision of Subpart R. The use of negotiated rulemaking was thought to be the best approach to resolving steel erection safety issues, some of which have proven intractable in the past.

Alternatives:

An alternative to using the negotiated rulemaking process is to publish a notice of proposed rulemaking developed by Agency staff and consider the concerns of the affected interests through the public comment and public hearing process. It is anticipated that using this alternative would result in an extremely long and contentious rulemaking proceeding, with subsequent challenge in the Court of Appeals. This alternative was therefore rejected. Another alternative would be not to revise the Agency's current steel erection rules for construction. This alternative was rejected because it would permit steel erection-related injuries and fatalities to continue.

Anticipated Costs and Benefits:

The scope and nature of the proposed rule are currently under development, and thus estimates of costs and benefits have not been determined at this time. Costs are not likely to exceed $100 million annually, and benefits will include the prevention of numerous fatalities and hundreds of injuries associated with steel erection activities.

Risks:

The magnitude of the risk associated with steel erection activities is great. It is estimated that about 40 workers are killed every year during steel erection activities. Falls are currently the number one killer of construction workers, and since the erection of buildings necessarily involves high exposure to fall hazards, the central focus of this rule will be to eliminate or reduce the risks associated with falls. All other construction trades are afforded a higher level of protection from falls by other rules in the construction safety and health standards.

77. RECORDING AND REPORTING OCCUPATIONAL INJURIES AND ILLNESSES (SIMPLIFIED INJURY/ILLNESS RECORDKEEPING REQUIREMENTS)

Priority:

Other Significant

Legal Authority:

29 USC 657; 29 USC 673

CFR Citation:

29 CFR 1904.1

Legal Deadline:

None

Abstract:

Over the years, concerns about the reliability and utility of injury and illness data derived from the employer-maintained OSHA records have been raised by Congress, NIOSH, BLS, the National Statistics (BLS), the National Academy of Sciences, the Office of Management and Budget (OMB), the General Accounting Office, business, and labor, as well as OSHA. In the late 1980s, to facilitate national policy dialogues, OSHA brought together representatives of industry, labor, government, and academia in a year-long effort to discuss problems with OSHA's injury and illness recordkeeping system. Keystone issued a report with specific recommendations on how to improve the system. Despite this effort, a regulatory revision was not formally begun. Earlier this year OSHA initiated an intensified effort to revive the revision process. Several meetings were again held with stakeholders from business, labor, and government in order to obtain feedback on a draft OSHA recordkeeping proposal and to gather related information. As a result of these meetings, OSHA is now planning to issue a proposed rule that will contain revised recordkeeping requirements, new recordkeeping forms, and new interpretive material to

VOL

995
UMI

improve the Nation's injury and illness statistics, simplify the injury and illness recordkeeping system, and reduce the burden of the new rule on employers. Benefits will include: (1) a system that is more compatible with modern computer technology and is easier for employers, employees and government to use; (2) more reliable and useful records; (3) for the first time, comprehensive injury and illness records for construction sites; and (4) greater employee involvement in and awareness of safety and health matters.

Statement of Need:

A revision to OSHA's outdated recordkeeping system has been contemplated for some time. The process of revision originated in BLS in 1987 and moved in 1990 to OSHA, when the recordkeeping function was transferred to the Agency.

The proposed rule reflects the input of many stakeholders, including OSHA field and national office staff, the participants in the 1987 Keystone policy dialogue, staff from other government agencies (BLS, MSHA, the Federal Railroad Administration (FRA) NIOSH and the States), and members of OSHA's advisory committees. OSHA has discussed the proposed revision with thousands of employers and representatives of the safety/health community in over 100 presentations for employer groups, trade associations, safety councils, and union groups.

Recently, OSHA shared copies of the draft proposal with stakeholders from labor, industry, trade associations, and other government agencies. The proposal also was reprinted in several occupational safety and health trade publications, and OSHA held two stakeholder meetings to discuss the proposal and obtain feedback. As a result of this recent stakeholder input, OSHA made over 50 changes to the document. Although the various stakeholders did not agree on every detail of the proposal, OSHA is confident that the multiphase process followed in developing this proposal has resulted in substantial agreement on the issues and consensus on the desirability of publishing the proposal in the *Federal Register* to enable OSHA to obtain input from the public at large.

The occupational injury and illness records maintained by employers are an important component of OSHA's program. The records are used by employers and employees to discover and evaluate workplace safety and health hazards, and they provide OSHA personnel with necessary information during workplace inspections. The records also provide the source data for the Annual Survey of Occupational Injuries and Illnesses conducted by the BLS.

The records have their greatest value when they are used by employers and employees to manage and develop workplace safety and health programs. These records are an effective way to quantify a firm's injury and illness experience. When problems are quantified and presented to employers and employees, they are much more likely to be solved. Hazardous conditions, departments and jobs also can be identified by reviewing injury and illness records. Once hazards are discovered and corrective actions are taken, the records can be used to monitor the effectiveness of control approaches taken. Employers and employees can also use injury and illness records to develop and operate safety and health programs. When information on workplace injuries and illnesses is not available or is incorrect, the ability to identify problems and take corrective action is diminished.

The Government also has several uses for injury and illness records. These records are used by OSHA safety and health inspectors during worksite visits to highlight potential problems that require additional scrutiny. The records are the source documents for the Bureau of Labor Statistics Annual Survey of Occupational Injuries and Illnesses, the nation's primary source of information on workplace injury and illness. The resulting statistics on the frequency, rate, and factors contributing to job-related injury and illness are used to measure the performance of the Nation's safety and health policies, determine regulatory actions, and provide a point of comparison for an individual company's safety and health performance. The statistics are also used by NIOSH, academia, and other safety and health researchers to determine trends, discover emerging occupational conditions, and evaluate occupational safety and health policies.

The records will also be the source documents for OSHA's data collection initiative. This program will allow OSHA to use limited resources to focus intervention efforts (e.g., consultation, training, outreach, and enforcement) on worksites with the highest injury and illness rates. The data collection initiative will also provide OSHA with a means for measuring its performance in terms of outcomes--changes in workplace injury and illness--rather than activities.

Alternatives:

One alternative to publication of the proposed revision is to take no action and continue to administer the injury and illness recordkeeping system using the current regulation, forms and guidelines. Another alternative is to publish the proposal without changing the coverage and scope of the rule (i.e., continue the current rule's small employer and Standard Industrial Classification exemptions).

The first alternative is unacceptable because it does not address the recognized problems of the current system. The second alternative is also unacceptable. Evaluation of the most current injury and illness data available shows that modification of the existing coverage (of small employers and employers in certain Standard Industrial Classification Codes) will lead to the collection of more injury and illness information and reduce the paperwork burden on employers with smaller-sized establishments and those operating in less hazardous private industry sectors.

Anticipated Costs and Benefits:

The average establishment affected by the proposed changes to the recordkeeping requirements would incur a net reduction in recordkeeping costs. Thus the proposed rule will not impose adverse economic impacts on firms in the regulated community. The proposed exemption from the regulation of all nonconstruction establishments with fewer than 20 employees will mean that small entities are likely to experience the greatest cost savings.

Risks:

Benefits will include: (a) a system that is more compatible with and easier for government to use; (b) more reliable and useful records; (c) construction sites; and (d) greater employee involvement.

29 CFR 1910; 29 CFR 1915; 29 CFR 1917; 29 CFR 1918; 29 CFR 1926; 29 CFR 1928

Legal Deadline:

None

Abstract:

Work-related musculoskeletal disorders are a leading cause of pain, suffering, and disability in American workplaces. Since the 1980's, the Occupational Safety and Health Administration (OSHA) has had a number of initiatives related to addressing these problems, including enforcement under the general duty clause, issuance of guidelines for the meatpacking industry, and development of other compliance-assistance materials.

Ultimately, the Agency decided that, given the increasing magnitude of the problem, a regulatory approach should be explored to ensure that the largest possible number of employers and employees become aware of the problems and ways of preventing work-related musculoskeletal disorders. The Agency was precluded from issuing a standard or guidelines in this area by a rider on its fiscal year 1995 rescission bill. It is unclear at this point whether similar Congressional restrictions will prevent OSHA from addressing this issue in fiscal year 1996.

An open process to develop and consider regulatory alternatives was initiated by the Bush Administration with the publication of an advance notice of proposed rulemaking on August 3, 1992 (57 FR 34192). About 300 comments were received in response to that request. In addition to the public comments, OSHA has examined and analyzed the extensive scientific literature documenting the problem of work-related musculoskeletal disorders, the causes of the problem, and effective solutions; conducted a telephone survey of over 3,000 establishments regarding their current practices to prevent work-related musculoskeletal disorders; and completed a number of site visits to facilities with existing programs. The Agency has also held numerous stakeholder meetings to solicit input from individuals regarding the possible contents of a standard to prevent work-related musculoskeletal disorders, and on a draft proposed regulatory text and supporting documents. Agency representatives have delivered numerous outreach presentations to people who are interested in this subject; consulted professionals in the field to obtain expert opinions on various aspects of the options considered by the Agency; and had some employers field-test certain requirements under consideration for the standard. A quantitative risk assessment has been drafted, as well as a preliminary assessment of potential costs and benefits.

OSHA is in the process of refining its regulatory approach based on stakeholder input and other information for inclusion in an NPRM. The Agency believes that the scientific evidence supports the need for a standard and that the availability of effective and reasonable means to control these hazards has been demonstrated. The criteria that have been developed for setting OSHA priorities support the Agency's determination that action is needed now to stop the escalating occurrence of work-related musculoskeletal disorders.

Statement of Need:

OSHA estimates that the occurrence of work-related musculoskeletal disorders in the United States ranges from more than 700,000 lost workday injuries and illnesses (30% of all lost workdays reported to the Bureau of Labor Statistics (BLS)) to more than 2.7 million annually awarded workers' compensation claims. These disorders now account for one out of every three dollars spent on workers' compensation. It is estimated that employers spend $20 billion a year on direct costs for workers' compensation, and up to five times that much for indirect costs, such as those associated with hiring and training replacement workers. In addition to these monetary effects, these disorders often impose a substantial personal toll on workers who experience their effects, and as a result are no longer able to work or to perform simple personal tasks like buttoning their clothes or brushing their hair.

Scientific evidence associates these disorders with stresses to various body parts caused by the way certain tasks are performed. The positioning of the body and the type of physical work that must be done to complete the tasks of a job may cause persistent pain and lead over time to deterioration of the affected joints, tissues, and muscles. The longer time the worker must maintain a fixed or awkward posture, exert force, repeat the same movements, experience vibration, or handle heavy items, the greater the chance that such a disorder will occur. These job-related stresses are referred to as "workplace risk factors," and the scientific literature demonstrates that exposure to these risk factors, particularly in combination with each other, significantly increases an employee's risk of developing a work-related musculoskeletal disorder. Jobs involving exposure to workplace risk factors appear in all types of industries and in all sizes of facilities. Musculoskeletal disorders occur in all parts of the body--the upper extremity, the lower extremity, and the back.

The evidence OSHA has assembled and analyzed indicates that there are technologically and economically feasible measures available that can significantly reduce exposures to workplace risk factors and the risk of developing work-related musculoskeletal disorders. Many companies that have voluntarily implemented ergonomics programs have demonstrated that effective ergonomic interventions are available and implementation of them is beneficial to the employer and the employee. Many of these interventions are simple and inexpensive, but nevertheless have a significant effect on the occurrence of work-related musculoskeletal disorders. Substantial savings in workers' compensation costs, increased productivity, and decreased turnover are among the benefits found.

Alternatives:

OSHA has considered many different regulatory alternatives since initiating the rulemaking process. These include variations in the scope of coverage, particularly with regard to industrial sectors; various phasing options related

to the size of facility; and limitations to the types of disorders to be covered by the proposed rule. In particular, OSHA is examining scope options that would narrow or focus coverage to a similar percentage of the population at risk. The Agency is also looking at different ways to addres the issue, such as having a program-oriented approach rather than focusing on the process for identifying and controlling hazards.

Anticipated Costs and Benefits:

Implementation costs associated with a regulatory approach would include those related to identifying and correcting problem jobs using engineering and administrative controls. Benefits expected include reduced pain and suffering, both from prevented disorders as well as reduced severity in those disorders that do occur, fewer workers' compensation claims and lower associated costs, and reduced lost work time. Secondary benefits may accrue from improved quality and productivity due to better designed work systems.

Risks:

The data OSHA has obtained and analyzed indicate that employees are at a significant risk of developing or aggravating musculoskeletal disorders due to exposure to risk factors in the workplace. In addition, information OSHA has obtained from site visits, scientific literature, compliance experience, and other sources indicates that there are economically and technologically feasible means of addressing and reducing these risks to prevent the development or aggravation of such disorders, or to reduce their severity. These data and analyses will be presented in the preamble to any proposed standard published in the *Federal Register*.

None

Abstract:

The Occupational Safety and Health Administration (OSHA), many of the States, members of the safety and health community, insurance companies, professional organizations, companies participating in the Agency's Voluntary Protection Program, and many proactive employers in all industries have recognized the value of worksite-specific safety and health programs in preventing job-related injuries, illnesses, and fatalities. The effectiveness of these programs is seen most dramatically in the reductions in job-related injuries and illnesses, workers' compensation costs, and absenteeism that occur after employers implement such programs. To assist employers in establishing safety and health programs, OSHA in 1989 (54 FR 3904) published nonmandatory guidelines that were based on a distillation of the best safety and health management practices observed by OSHA in the years since the Agency was established. OSHA's decision to expand on these guidelines by developing a safety and health programs rule is based on the Agency's recognition that occupational injuries, illnesses, and fatalities are continuing to occur at an unacceptably high rate. In fact, in the most recent year for which data are available--1993--fatalities rose by 1.7 percent over 1992, and injuries and illnesses continued at approximately the same rate as in the past.

Although the precise scope of the standard (e.g., what industries will be covered, what sizes of firms will be covered) has not yet been determined, the safety and health programs contained in the proposed rule will include at least the following elements: management leadership of the program; active employee participation in the program; analysis of the worksite to identify safety and health hazards of all types; requirements that employers eliminate or control those hazards in an effective and timely way; safety and health training for employees, supervisors, and managers; and regular evaluation of the effectiveness of the safety and health program. In addition, in response to preliminary meetings with OSHA stakeholders, the Agency has decided to incorporate several program elements into this rule that were under consideration for separate rulemaking action. These elements include exposure assessment and medical surveillance for workers exposed to chemical hazards in their places of work. In the last Regulatory Plan (see 59 FR 57138, November 14, 1994), for example, OSHA presented separate entries for a proposed rule addressing Exposure Assessment Programs for Employees Exposed to Hazardous Chemicals and for a proposed rule on Medical Surveillance Programs for Employees. At the present time, however, OSHA intends to address exposure assessment as part of the worksite analysis that will be required of employers by the proposed safety and health programs rule and to obtain additional input from stakeholders about the need for a medical surveillance module in this rulemaking. OSHA has also decided, in response to President Clinton's April 24, 1995, Regulatory Reinvention Initiative, to undertake a general consolidation of duplicative elements across current standards. For example, OSHA plans to consolidate hundreds of training and records maintenance provisions, that are currently found throughout OSHA's general industry, construction, and maritime standards, into the proposed safety and health programs rule. This means that, once the programs rule has been promulgated, all of the Agency's procedural requirements for training and records maintenance (e.g., who must be trained, how often training must be conducted, how long training records must be kept) will be found in one place--in the programs rule--rather than in hundreds of individual standards, as is current practice. In keeping with the President's directive, this regulatory consolidation will eliminate duplicative paperwork, make compliance easier for employers, and standardize the procedural aspects of training and records maintenance. OSHA is also developing a program evaluation directive and a program evaluation profile to be used by compliance officers to evaluate the completeness and effectiveness of an employer's safety and health program. Those employers who can demonstrate effective and comprehensive programs will receive penalty reductions for any cited violations found by the compliance officer. OSHA believes that the effect of these enforcement initiatives, coupled with the regulatory requirements of the safety and health programs rule, will act as incentives to employers to establish safety and health programs that protect workers, enhance productivity, and decrease employer costs.

Statement of Need:

Worksite-specific safety and health programs are increasingly being recognized as the most effective way of reducing job-related accidents, injuries, and illnesses. Ten States have to date passed legislation and/or regulations mandating such programs for some or all employers, and insurance companies have also been encouraging their client companies to implement these programs, because the results they have achieved have been so dramatic. In addition, all of the companies in OSHA's Voluntary Protection Program have established such programs and are reporting injury and illness rates that are sometimes only 20 percent of the average for other establishments in their industry. Safety and health programs apparently achieve these results by actively engaging front-line employees, who are closest to operations in the workplace and have the highest stake in preventing job-related accidents, in the process of identifying and correcting occupational hazards. Finding and fixing workplace hazards is a cost-effective process, both in terms of the avoidance of pain and suffering and the prevention of the expenditure of large sums of money to pay for the direct and indirect costs of these injuries and illnesses. For example, many employers report that these programs return between $5 and $9 for every dollar invested in the program, and almost all employers with such programs experience substantial reductions in their workers' compensation premiums. OSHA believes that having employers evaluate the job-related safety and health hazards in their workplace and address any hazards identified before they cause occupational injuries, illnesses, or deaths is an excellent example of "regulating smarter," because all parties will benefit: workers will avoid the injuries and illnesses they are currently experiencing; employers will save substantial sums of money and increase their productivity and competitiveness; and OSHA's scarce resources will be leveraged as employers and employees join together to identify, correct, and prevent job-related safety and health hazards.

Alternatives:

In the last few years, OSHA has considered both nonregulatory and regulatory alternatives in the area of safety and health program management. First, OSHA published, in 1989, a set of voluntary management guidelines designed to assist employers to establish and maintain programs such as the one envisioned by the proposed safety and health programs rule. Although these guidelines have received widespread praise from many employers and professional safety and health associations, they have not been effective in stemming the growing tide of job-related deaths, injuries, and illnesses, which have continued to occur at unacceptably high levels. Many of the States have also recognized the value of these programs and have mandated that some or all covered employers establish them; however, this has led to inconsistent coverage from State-to-State, with many States having no coverage and others imposing stringent program requirements. OSHA believes that this experience clearly points to the need for a national regulation that will be consistent across State lines, will apply to all or to a clearly identified group of employers, will have provisions that are widely recognized as being effective, and will be cost-effective in implementation.

Anticipated Costs and Benefits:

The scope and nature of the proposed rule are currently under development, and thus estimates of costs and benefits have not been determined at this time. Costs are likely to exceed $1 billion annually, and benefits will include the prevention of many of the thousands of fatalities and millions of injuries and illnesses associated with a broad spectrum of occupational hazards.

Risks:

Workers in all major industry sectors in the United States continue to experience an unacceptably high rate of occupational fatalities, injuries, and illnesses. In 1993, the latest year for which statistics are available, the Bureau of Labor Statistics reports that 5,590 fatalities and 6.7 million injuries and illnesses occurred within private industry. There is increasing evidence that addressing hazards in a piecemeal fashion, as employers tend to do in the absence of a comprehensive safety and health program, is considerably less effective in reducing accidents than a systematic approach. Dramatic evidence of the seriousness of this problem can be found in the staggering workers' compensation bill paid by America's employers and employees: $54 billion annually. These risks can be reduced by the implementation of safety and health programs, as evidenced by the experience of OSHA's Voluntary Protection Program participants, who regularly achieve injury and illness rates averaging one-fifth to one-third those of competing firms in their industries. Other benefits of reducing accidents include enhanced productivity, improved employee morale, and reduced absenteeism. Because these programs address all job-related hazards--including those that are covered by OSHA standards as well as those not currently addressed by these standards--the proposed rule will be effective in ensuring a systematic approach to the control of long-recognized hazards, such as lead, and emerging hazards, such as lasers and heat stress.

80. OCCUPATIONAL EXPOSURE TO TUBERCULOSIS

Priority:

Economically Significant

Legal Authority:

29 USC 655(b)

CFR Citation:

Not yet determined

Legal Deadline:

None

Abstract:

On August 25, 1993, the Occupational Safety and Health Administration (OSHA) was petitioned by the Labor Coalition to Fight TB in the Workplace to initiate rulemaking for a permanent standard to protect workers against occupational transmission of tuberculosis (TB). Although the Centers for Disease Control and Prevention (CDC) have developed recommendations for controlling the spread of TB in several work settings (correctional institutions, health-care facilities, homeless shelters, long-term care facilities for the elderly, and drug treatment centers), the petitioners stated that in every recent TB outbreak investigated by the CDC noncompliance with CDC's TB control guidelines was evident. After reviewing the available information, OSHA has preliminarily concluded that significant risk of occupational transmission of TB does exist for some workers and has decided to initiate a standard 6(b) rulemaking. The Agency is currently developing a proposed rule which would require certain employers to take steps to eliminate or minimize employee exposure to TB. OSHA already regulates the biological hazard of bloodborne pathogens (e.g., HIV, hepatitis B) under 29 CFR 1910.1030 and believes that development of a TB standard is consistent with the Agency's mission and previous activity. OSHA is currently pursuing a dialog with parties outside of the Agency with regard to the developing proposal. The draft preliminary Risk Assessment is being peer-reviewed by four individuals with specific knowledge in the areas of tuberculosis and risk assessment. One reviewer is from the Centers for Disease Control and Prevention (CDC) and three are from academia. In addition, OSHA is conducting stakeholder meetings with representatives of relevant professional organizations, trade associations, labor unions, and other groups. These meetings provide the opportunity for both general and frontline stakeholder representatives to present OSHA with their individual comments, observations, and concerns about the contents of the draft proposal. OSHA is also remaining cognizant of the activities of other Federal agencies relative to TB. In October of 994, CDC published revised guidelines for protection against transmission of TB. Similarly, the National Institute for Occupational Safety and Health published new respirator certification procedures in June 1995. OSHA will give careful consideration to these documents during development of the proposed standard.

Statement of Need:

For centuries, TB has been responsible for the deaths of millions of people throughout the world. TB is a contagious disease caused by the bacterium *Mycobacterium tuberculosis*. Infection is generally acquired by the inhalation of airborne particles carrying the bacterium. These airborne particles, called droplet nuclei, can be generated when persons with pulmonary or laryngeal tuberculosis in the infectious state of the disease cough, sneeze, speak, or sing. In some individuals exposed to droplet nuclei, TB bacilli enter the alveoli and establish an infection. In most cases, the bacilli are contained by the individual's immune response. However, in some cases, the bacilli are not contained by the immune system and continue to grow and invade the tissue, leading to the progressive destruction of the organ involved. While in most cases this organ is the lung (i.e., pulmonary tuberculosis), other organs outside of the lung may also be infected and become diseased (i.e., extrapulmonary tuberculosis).

From 1953, when active cases began to be reported in the United States, until 1984, the number of annual reported cases declined 74 percent, from 84,304 to 22,255. However, this steady decline in TB cases has not continued. Instead, from 1985 through 1992, the number of reported TB cases increased 20.1 percent. In 1992, more than 26,000 new cases of active TB were reported in the United States. In New York City alone, 3,700 cases of active TB were reported in 1991. Although a 5.1 percent decrease was observed in 1993, this number still represents a 14 percent increase over the number of cases reported in 1985. In addition to the resurgence of TB, strains of tuberculosis have emerged that are resistant to several of the first-line anti-TB drugs. This multidrug-resistant TB (MDR-TB) has a higher probability of being fatal due to the difficulty of halting the progression of the disease. Individuals with MDR-TB often remain infectious for longer periods of time due to delays in diagnosing resistance patterns and initiating proper treatment. This lengthened period of infectiousness increases the risk that the organism will be transmitted to other persons coming in contact with such individuals.

As the number of individuals with tuberculosis who require health care for the disease increases, so does occupational exposure to TB among health care workers. In fact, several outbreaks of tuberculosis, including MDR-TB, have recently occurred in health care facilities, resulting in transmission to both patients and health care workers. CDC found that factors contributing to these outbreaks included delayed diagnosis of TB, delayed recognition of drug resistance, delayed initiation of effective therapy, delayed initiation and inadequate duration of TB isolation, inadequate ventilation in TB isolation rooms, lapses in TB isolation practices, inadequate precautions for cough-inducing procedures, and lack of adequate respiratory protection. CDC's analysis of data collected from three of the health care facilities involved in the outbreaks indicated that transmission of TB decreased significantly or ceased entirely in areas where recommended TB control measures were implemented.

Alternatives:

Before deciding to publish a proposal, OSHA considered a number of options, including whether or not to develop an emergency temporary standard, publish an advance notice of proposed rulemaking, or enforce existing regulations.

Anticipated Costs and Benefits:

Costs will be incurred by employers for engineering controls, respiratory protection, medical surveillance, training, exposure control, recordkeeping, and work practice controls. Benefits will include the prevention of occupationally related TB transmissions and infections, and a corresponding reduced risk of exposure among the general population. The scope and nature of the proposed rule are currently under development and thus estimates of costs and benefits have not been determined at this time.

Risks:

Since 1985, the number of reported cases of TB in the United States increased, reversing a previous 30-year downward trend. In addition to the resurgence of TB, strains of multidrug-resistant TB have emerged which are even more likely to be fatal. Along with the increase of TB among the general population is an increased risk of occupational transmission to employees in work settings such as health care or correctional facilities who have contact with infectious individuals. TB is a contagious disease spread by airborne particles known as droplet nuclei. Active disease can cause signs and symptoms such as fatigue, weight loss, fever, night sweats, loss of appetite, persistent cough, and shortness of breath, and may possibly result in serious respiratory illness or death.

81. • ELIMINATING AND IMPROVING REGULATIONS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will eliminate existing text in the CFR.

Legal Authority:

29 USC 655(b)

CFR Citation:

29 CFR 1901; 29 CFR 1910; 29 CFR 1926; 29 CFR 1928; 29 CFR 1950; 29 CFR 1951

Legal Deadline:

None

Abstract:

OSHA has made a continuing effort to eliminate confusing, outdated, and duplicative regulations. In 1978 and again in 1984, the Agency conducted comprehensive revocation and revision projects that resulted in the elimination of hundreds of unnecessary rules. In response to the President's Memorandum of March 4, 1995, and the April 24, 1995, Presidential Directive, the Agency is again renewing its effort to eliminate unnecessary regulations and improve others. Following a page-by-page review of regulations that was required as part of the President's April 24, 1995 regulatory reform initiative, OSHA developed a list of standards it proposes to revoke or revise. These standards were deemed to be out of date, duplicative, inconsistent with other OSHA standards, or preempted by the regulations of other Federal agencies. Administrative changes will also be addressed in this rulemaking.

Statement of Need:

This rulemaking is part of OSHA's response to the President's Regulatory Reform Initiative, as embodied in the Department of Labor's report of June 15, 1995. In carrying out OSHA's responsibilities under the Presidential directive, and as part of OSHA's reinvention efforts, the Agency is reworking many health and safety standards, particularly those that were first adopted by OSHA in 1971, into standards that are more understandable to employers and employees, are flexible in their means of compliance, and are founded in common-sense approaches to preventing or controlling workplace safety and health hazards. This standards project is a key part of the Agency's initial effort to meet this objective.

Workplace safety and health standards should be both protective of workers and user-friendly for employers and employees. If OSHA standards are duplicative, employers have more difficulty in achieving compliance. For example, rubber insulating equipment requirements in 29 CFR 1910.268(f) should be revoked, because these same requirements appear in a more up-to-date form in 29 CFR 1910.137. Similarly, information given in respirator fit test procedures contained in 29 CFR 1910.1000 is repeated in a number of other locations in OSHA health standards and could be eliminated by the addition of a cross reference to a single source.

In addition, any OSHA standards that are out of date as a result of industry changes in the use of materials or equipment should be revised to accommodate these changes. For example, only approved metal safety cans can be used for the storage and handling of flammable and combustible liquids in the construction industry, as required in 29 CFR 1926.152(a)(1). Since plastic cans are now also approved and acceptable for this purpose, the OSHA standard should be revised to allow this industry to use such equipment if desired.

OSHA standards that are preempted by similar standards enforced by other Federal agencies (as specified in Section 4(b)(1) of the OSH Act) should also be removed from OSHA's regulations. For example, the capacity limits for liquefied petroleum gas (LPG) cylinders addressed in 29 CFR 1910.110(e)(10) are preempted by regulations enforced by the Department of Transportation for the same equipment. The inclusion of such standards in OSHA regulations unnecessarily increases the burden on employers trying to understand and comply with applicable standards.

There are also some OSHA standards that conflict with the rules of other Federal agencies. For example, OSHA requires empty boxes that previously contained high explosives that are being disposed of to be burned (29 CFR 1910.109(e)(2)), although some employers have been prohibited from burning these boxes by local air pollution requirements. OSHA will be revising these standards to allow flexibility and common-sense alternative methods and procedures.

Administrative actions will also be proposed in this rulemaking to reduce employer burden. These actions include the elimination of obsolete standards that address such matters as effective dates and sources of standards.

Alternatives:

OSHA has considered issuing de minimis citations for noncompliance with many of the duplicative, outdated, or confusing standards that would be addressed in this notice. Such enforcement actions, however, do not eliminate the continuing problem for employers who must attempt to identify the standards that apply to their worksites. OSHA believes that the selective elimination of unnecessary standards and the revision and updating of others is the most satisfactory approach to resolving this problem.

Anticipated Costs and Benefits:

No additional costs are anticipated for employers. Employers should benefit from this action because it will enhance their ability to comply with OSHA standards that are more user-friendly.

Risks:

Employee protection is likely to be enhanced to some extent by this action, which will clarify and update regulatory requirements.

DOL—OSHA

82. • PERMISSIBLE EXPOSURE LIMITS (PELS) FOR AIR CONTAMINANTS

Priority:

Economically Significant

Legal Authority:

29 USC 655 (b)

CFR Citation:

Not yet determined

Legal Deadline:

None

Abstract:

OSHA enforces hundreds of permissible exposure limits (PELs) for toxic air contaminants found in U.S. workplaces. These PELs set OSHA-enforceable limits on the magnitude and duration of employee exposure to each contaminant. The amount of exposure permitted by a given PEL depends on the toxicity and other characteristics of the particular substance. OSHA's PELs for air contaminants are codified in 29 CFR 1910.1000, Tables Z-1, Z-2, and Z-3. The air contaminant limits were adopted by OSHA in 1971 from existing national consensus standards issued by the American Conference of Governmental Industrial Hygienists and the American National Standards Institute. These PELs, which have not been updated since 1971, thus reflect the results of research conducted in the 1950s and 1960s. Since then, much new information has become available that indicates that, in most cases, these early limits are outdated and insufficiently protective of worker health. To correct this situation, OSHA published a proposal in 1988 updating the air contaminant limits in general industry. That proposal became a final rule in 1989 (54 FR 2332); it lowered the existing PEL for 212 toxic air contaminants and established PELs for 164 previously unregulated air contaminants. On June 12, 1992 (57 FR 26001), OSHA proposed a rule that would have extended these limits to workplaces in the construction, maritime, and agriculture industries. However, on July 10, 1992, the Eleventh Circuit Court of Appeals vacated the 1989 final rule on the grounds that "(1) OSHA failed to establish that existing exposure limits in the workplace presented significant risk of material health impairment or that new standards eliminated or substantially lessened the risk; (2) OSHA did not meet its burden of establishing that its 428 new permissible exposure limits (PELs) were either economically or technologically feasible." The Court's decision to vacate the rule forced the Agency to return to the earlier, insufficiently protective limits.

OSHA continues to believe that establishing a rulemaking approach that will permit the Agency to update existing air contaminant limits and establish new ones as toxicological evidence of the need to do so becomes available is a high priority. The rulemaking described in this Regulatory Plan entry reflects OSHA's intention to move forward with this process. In determining how to proceed, OSHA is being guided by the OSH Act and the Eleventh District Court decision regarding the extent of the risk and feasibility analyses required to support revised and new air contaminant limits. OSHA is planning to propose new PELs for a smaller number of substances (substantially fewer than in the 1989 rulemaking) by July of 1996. The Agency will rely on a risk-based prioritization system to identify those air contaminants that present significant risks to exposed employees and for which technologically and economically feasible controls exist. State-of-the-art risk assessment methodologies will be utilized for both carcinogens and noncarcinogens, and the determinations of feasibility contained in the economic analysis accompanying the proposal will be extensive. The specific hazards associated with the air contaminants to be regulated will depend on the particular contaminants selected for rulemaking. Using priority planning criteria, such as the severity of the health effect, either acute or chronic, and the number of exposed workers, will ensure that significant risks are addressed and that workers will experience substantial benefits in the form of enhanced health and safety. Publication of the proposal will allow OSHA to institutionalize a mechanism for updating and extending its air contaminant limits, which will, at the same time, provide added protection to many workers who are currently being overexposed to toxic substances in the workplace.

Statement of Need:

OSHA's current Tables Z-1, Z-2, and Z-3 contain approximately 470 PELs for various forms (e.g., dust, fumes, vapors) of the regulated contaminants, many of which are widely used in industrial settings. These PELs, which were adopted wholesale by OSHA in 1971 and have not been revised since then, are in many cases seriously unprotective of worker health. In addition, new chemicals are constantly being introduced into the working environment, and exposure to these substances can result in both acute and chronic health effects, with chronic effects being the more frequent and serious. Acute effects include respiratory and sensory irritation, chemical burns, and ocular damage; chronic effects include cardiovascular disease, respiratory, liver and kidney disease, reproductive effects, neurological damage, and cancer. For these reasons, it is a high OSHA priority to establish an ongoing regular process that will allow OSHA routinely to update existing PELs and establish limits for previously unregulated substances. The first step in achieving this goal is to publish an air contaminants proposal for a limited number of substances that will establish streamlined but scientifically sound and defensible procedures for conducting risk assessments and performing feasibility analyses that will permit regular updating and review of permissible exposure limits for air contaminants. The ability to lower existing limits and establish limits for new contaminants is an essential component of OSHA's mandate to protect the health and functional well-being of America's workers.

Alternatives:

OSHA has considered a variety of nonregulatory approaches to address the problem of the Agency's outdated exposure limits for air contaminants. These include the issuance of nonmandatory guidelines, enforcing lower limits through the "general duty" cause of the OSH Act in cases where substantial evidence exists that exposure presents a recognized hazard of serious physical harm, and the issuance of hazard alerts. OSHA believes, however, that the problem of overexposure to hazardous air contaminants is so widespread, and the Agency's current limits are so out of date, that only a regulatory approach will achieve the necessary level of protection. The regulatory approach also has advantages for employers, because it gives them the information they need to establish appropriate control strategies to protect their workers and reduce the costs of job-related illnesses. This first phase of an ongoing air contaminants updating and revision process thus will begin to resolve a problem of long-standing and major occupational health import.

Anticipated Costs and Benefits:

The scope of the proposed rule is currently under development, and thus quantitative estimates of costs and benefits have not been determined at this time. Implementation costs associated with the proposed standard include primarily those related to identifying and correcting over-exposures using engineering controls and work practices. Additional costs may be incurred for the implementation of administrative controls and the purchase and use of personal protective equipment. Estimates of the magnitude of the problem of occupational illnesses, both acute and chronic, vary considerably. In 1989, OSHA concluded that its Air Contaminants rule in general industry, which lowered 212 exposure limits and added 164 where none had previously existed, would result in a reduction of approximately 55,000 illnesses and over 23,300 lost-workday illnesses annually. Chronic effects include cardiovascular disease, respiratory, liver and kidney disease, reproductive effects, neurological damage, and cancer. Acute effects include respiratory and sensory irritation, chemical burns, and ocular effects.

83. • REVISION OF CERTAIN STANDARDS PROMULGATED UNDER SECTION 6(A) OF THE WILLIAMS-STEIGER OCCUPATIONAL SAFETY AND HEALTH ACT OF 1970

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

29 USC 655(b); 5 USC 533

CFR Citation:

29 CFR 1910.106; 29 CFR 1910.107; 29 CFR 1910.108; 29 CFR 1910.94(c); 29 CFR 1910.94(d); 29 CFR 1911

Legal Deadline:

None

Abstract:

The Occupational Safety and Health Administration (OSHA) adopted its initial package of workplace safety and health standards from various nationally recognized consensus standards and from standards that had already been promulgated by other Federal agencies. These standards reflected technologies that were current at the time the Williams-Steiger Occupational Safety and Health Act of 1970 (the Act) became law. Section 6(a) of the Act permitted OSHA to adopt significant nationally recognized consensus standards, developed by groups such as the National Fire Protection Association (NFPA) and the American National Standards Institute (ANSI), and existing Federal standards for use as OSHA standards without public participation or public comment. OSHA refers to the standards it adopted under section 6(a) of the Act as "6(a) standards." Since their adoption, many of these 6(a) standards have been identified by the regulated community as being overly complex, difficult to read and follow, and out of date with current technology.

This project is part of a Presidential initiative to respond to the general criticism concerning the complexity and obsolescence of certain Federal regulations. OSHA believes that some of the Agency's section 6(a) standards in subpart H of part H of part 1910 meet the criteria for critical review set forth in the Presidential initiative. OSHA has identified three standards from subpart H that need to be revised and updated to eliminate their complexity and obsolescence. These standards include 29 CFR 1910.106, Flammable and Combustible Liquids; 29 CFR 1910.107, Spray Finishing Using Flammable and Combustible Materials; and 29 CFR 1910.108, Dip Tanks Containing Flammable or Combustible Materials.

With this project, OSHA is initiating three separate rulemakings that will revise and update three of OSHA's most complex and out-of-date section 6(a) standards. These specific sections address flammable and combustible liquid storage, handling, and use; spray finishing using flammable and combustible liquids; and dip tanks containing flammable and combustible liquids. The regulations contained in 29 CFR 1910.106, 1910.107, and 1910.108 have long been criticized by labor, management, and government for their

VOL
60
ISS
228
NO
28
995
UMI

complexity, duplicative nature, and obsolescence. 29 CFR 1910.106 contains outdated and duplicative standards as well. 29 CFR 1910.107 and 1910.108 also contain substantive ventilation requirements that are duplicative with ventilation requirements contained in 29 CFR 1910.104, paragraphs (c) and (d).

OSHA intends to issue three separate proposals individually addressing 29 CFR 1910.106; 29 CFR 1910.107 and 1910.94(c); and 29 CFR 1910.108 and 1910.94(d). The purpose of these rulemakings will be to solicit public participation in the revision and updating of these standards to current levels of technology. It is also the purpose of the rulemakings to eliminate the complexity, duplicative nature, and obsolescence of the current existing standards and to write them in "plain language," as directed by the President's report.

Statement of Need:

These three OSHA safety standards are being revised and updated as part of the President's initiative on Federal regulations discussed in the U.S. Department of Labor report of June 15, 1995. The Department of Labor report was issued in response to the President's Regulatory Reform Initiative dated April 24, 1995.

Fire hazards in the workplace associated with exposure to flammable and combustible liquids create a variety of safety and health problems, including thermal burns, chemical burns, smoke inhalation, respiratory inflammations, nausea, dizziness, other serious physical injuries and death. Overexposure to vapors, fumes, and mists created during spray applications or dipping processes involving flammable or combustible liquids create a variety of health problems, including respiratory infections, nausea, dizziness, respiratory allergies, heart disease, lung cancer, decreases in pulmonary function, other serious illnesses, and death.

Fires and explosions continue to occur frequently in the industrial environment. Such fires, which are often catastrophic, are often caused by improper storage, handling and use of flammable and combustible liquids, including improper or inadequate ventilation of their vapors, fumes, or mists. Control of the fire and health hazards that employees are exposed to during operations involving flammable and combustible liquids requires adequate fire control and ventilation procedures. These procedures can protect employees from the adverse physical safety or health effects resulting from exposure to flammable and combustible liquids and their vapor, fumes, or mists.

Employees are also exposed to significant health hazards when they work around spray finishing operations or dip tank operations that use nonflammable or noncombustible liquids. Many employers will use such nonflammable or noncombustible liquids in spray finishing or dipping operations to eliminate fire or explosion hazards. However, some chemicals, such as perchlorethylene, create significant health hazards to employees when used by spray finishing and dip tank operations. Health problems such as respiratory infections, nausea, dizziness, respiratory allergies, heart disease, lung cancer, decreases in pulmonary function, other serious illnesses, and death may occur if employee exposure to toxic, nonflammable or toxic noncombustible liquids are not controlled.

When 29 CFR 1910.94(c), 1910.94(d), 1910-106, 1910.107, and 1910.108 were promulgated, many of the protective technologies and work practices recognized today in industries using flammable and combustible liquids did not exist. Advances in fire prevention strategies and equipment and in ventilation techniques and equipment necessitate the updating of these OSHA standards. Revising and updating these sections of Subpart H to recognize these new technologies and work practices will improve the occupational safety and health of employees by introducing new fire control and ventilation techniques into the workplace. The revision of these standards will also make them consistent with current nationally recognized consensus standards adopted by various authorities having jurisdiction over fire safety and health hazards. A consistent set of standards will make compliance with these rules easier for the regulated populations of employees and employers.

Alternatives:

OSHA has considered several alternative approaches to controlling these hazards, including issuing guidelines, using the "general duty clause" of the OSHA Act to cite serious and unsafe work practices not regulated by the existing standards, issuing hazard alerts, issuing program directives, and revising and updating the current OSHA standards to reflect the updated national concensus standards. OSHA believes that, in this case, revising and updating these standards is the most appropriate way to proceed. It is the only approach that will assure public participation in the updating and revision of outdated, complex, and obsolete rules. It will also assure that employers will provide the most recent technologies to protect their employees from fire and explosion hazards.

Anticipated Costs and Benefits:

The benefits and costs associated with these revisions are undetermined at this time; however, OSHA anticipates that cost savings and increased benefits will be associated with these actions due to the use of newer technologies, equipment, and procedures to reduce employee injuries and fatalities in the workplace.

Risks:

Physicial injuries and fatalities caused by thermal burns, chemical burns, smoke inhalation and traumatic injuries are common among employees exposed to fire or explosion hazards in the workplace. In addition, overexposure to vapors, fumes, and mists created during spray applications or dipping processes involving flammable or combustible liquids can create a variety of health problems, including respiratory infections, nausea, dizziness, respiratory allergies, heart disease, lung cancer, decreases in pulmonary function, other serious illnesses, and death.

DOL—OSHA

FINAL RULE STAGE

84. WALKING WORKING SURFACES AND PERSONAL FALL PROTECTION SYSTEMS (PART 1910) (SLIPS, TRIPS, AND FALLS PREVENTION)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

29 USC 655(b)

CFR Citation:

29 CFR 1910.21; 29 CFR 1910.22; 29 CFR 1910.23; 29 CFR 1910.24; 29 CFR 1910.25; 29 CFR 1910.26; 29 CFR 1910.27; 29 CFR 1910.28; 29 CFR 1910.29; 29 CFR 1910.30; 29 CFR 1910.31; 29 CFR 1910.32; 29 CFR 1910.128; 29 CFR 1910.129; 29 CFR 1910.130; ...

Legal Deadline:

None

Abstract:

Standards for walking and working surfaces and personal fall protection systems will be issued concurrently as a final rule. The Occupational Safety and Health Administration's (OSHA's) existing standards for walking and working surfaces need to be revised because they are out of date and limit technological innovation in the means employers can use to comply. The final rule is performance-oriented, written in plain language, and flexible in the means of compliance permitted. In addition, OSHA's existing standards do not contain criteria for personal fall protection systems. Consequently, requirements containing criteria for such systems will be added to 29 CFR Part 1910, Subpart I, Personal Protection Equipment, to enhance employee protection from injury and death due to falls to different elevations.

Statement of Need:

The existing standards for walking/working surfaces were originally adopted in 1971 under Section 6(a) rulemaking procedures. These standards are now out of date, restrict technological innovation, and contain gaps in coverage. Currently, there are also no standards for personal fall protection systems that cover all general industry applications. This rulemaking action will thus revise and update OSHA's existing regulations for walking/working surfaces (29 CFR Part 1910, Subpart D) and add new coverage for personal fall protection systems to the current personal protective equipment standards (29 CFR Part 1910, Subpart I). The revised rules will be written in plain English so that they will be easier for employers and employees to understand.

The new standard will use a performance-oriented approach to permit flexibility in the means of compliance and to encourage innovation. New criteria for personal fall protection systems will be added to allow these systems to be used as additional alternatives to provide fall protection and to ensure that this type of equipment functions properly and is used correctly.

The legal basis for this action is that employees in general industry are exposed to a significant risk of falls, both falls on the same level and falls from an elevation. However, this action is not specifically required by statute, and is not required by court order.

The new standard will reduce risks to workers by providing clearer, up-to-date requirements to minimize fall hazards. The standard will also cover new areas of fall protection such as special surfaces and manhole steps, and the use of qualified climbers. The new standard will also recognize personal fall protection systems as an acceptable option for fall protection, as well as provide the criteria to ensure that such systems will safely stop a worker's fall.

Alternatives:

The following alternatives were considered for analysis:

1. Retaining the existing regulation unchanged. A number of the existing requirements are specification-oriented provisions that in some situations are inappropriate, unnecessarily costly, and inflexible. For example, the existing standard mandates guardrails for most roof perimeters and requires that fixed ladders on most towers and other structures be fitted with cages or ladder safety devices; but in some limited circumstances, such requirements are unnecessarily restrictive. Also, personal fall protection systems, which are suited to many difficult fall protection situations, are not permitted under the existing rule.

2. Issuing the final rule without an exemption for qualified climbers. This option would require that all fixed ladders over 24 feet in height utilize cages or ladder-safety devices. Under this option, the benefits of the standard would be about the same as they are for the version reflected in the final rule, but the first-year capital cost of compliance would be increased by more than a factor of eleven.

3. Issuing the revised final rule as a final standard, including the exemption for qualified climbers, requirements for fall protection systems, and other flexible provisions for such protective devices as guardrails. OSHA believes that this alternative will result in the greatest amount of employee protection at the least cost to employers of all the alternatives considered.

Anticipated Costs and Benefits:

Modifications to existing requirements are expected to involve annual costs of less than $20 million. Benefits include the prevention of dozens of fatalities and thousands of injuries associated with falls and other work-surface-related incidents.

Risks:

Nearly all workplaces and employees covered by the OSHA general-industry standards are affected by the standards for walking and working surfaces. These standards cover about 84 million workers. Examples of walking and working surfaces included in these standards are stairs, step bolts, manhole steps, ramps, ladders, floors, fall-protection systems, scaffolds, and mobile ladder stands.

The Bureau of Labor Statistics (BLS) reported from the 1987 and 1988 annual surveys that falls accounted for 12 percent of all deaths of employees in workplaces with 11 or more employees.

The National Institute of Occupational Safety and Health (NIOSH) publication, "Fatal Injuries to Workers in the United States, 1980-1989: A Decade of Surveillance," reports that deaths from falls are the fourth leading cause of occupational fatalities, accounting for 10 percent of all deaths in the workplace. According to the Insurance Institute for Highway Safety, falls are the second largest cause of occupational fatalities, next after death due to over-the-road motor vehicle accidents. Falls are also second only to motor vehicle accidents as a cause of brain injuries.

OSHA has determined that hazards associated with walking and working surfaces persist and must be addressed with improved standards. OSHA's preliminary regulatory impact analysis estimated that as many as 105,000 disabling injuries and 132 fatalities that occur annually are potentially preventable by compliance with the revised final rule.

A number of special studies have also been conducted to gain a better understanding of the nature and causes of employee injuries, and the methods required for reducing their numbers. One such study on ladders, conducted by BLS, indicated that in about 55 percent of ladder-related accidents where employee injuries occurred, the ladder either moved, slipped, fell or broke. The study also indicated that ladders were not secured or braced in about 50 percent of these injury incidents. Furthermore, in nearly 60 percent of the incidents, employees were carrying something in their hands at the time of the incident. The final standard will address these problems by requiring design criteria and employee training in the use of ladders. Another study of scaffold fatalities and catastrophes developed by OSHA indicated that 90 percent of fatally injured employees were performing their normal job activities at the time of the accident, and 55 percent of these employees were performing their basic or primary work tasks.

BILLING CODE 4510-23-F

DEPARTMENT OF TRANSPORTATION (DOT)

Statement of Regulatory Priorities

The Department of Transportation (DOT) consists of nine operating administrations and the Office of the Secretary, each of which has statutory responsibility for a wide range of regulations. For example, DOT regulates safety in the aviation, motor carrier, railroad, mass transit, motor vehicle, maritime, commercial space, and pipeline transportation areas. DOT regulates consumer and economic issues in aviation and provides financial assistance and writes the necessary implementing rules for programs involving highways, airports, mass transit, the maritime industry, railroads, and motor vehicle safety. It writes regulations carrying out such disparate statutes as the Americans with Disabilities Act and the Uniform Time Act. The Department establishes tolls and operational requirements for the St. Lawrence Seaway. It regulates the construction and operation of bridges over navigable waters, the prevention of oil pollution, and the security of commercial aviation and passenger vessels. Finally, DOT has the usual housekeeping regulations governing everything from conflicts of interest to the Privacy Act to seismic standards for building construction.

Although it carries this heavy regulatory workload, the Department has long been recognized as a leader in Federal efforts to improve and streamline the regulatory process and ensure that regulations do not impose unnecessary burdens. The Department was the first major Federal agency to establish a comprehensive internal management and review process for new and existing regulations.

This process is codified in the Department's regulatory policies and procedures, which ensure that the Secretary and other appropriate appointed officials review and concur in all significant DOT rules. These policies and procedures emphasize that DOT regulations should be necessary, clear, timely, reasonable, and fair, without imposing unnecessary burdens on individuals, the private sector, or State or local governments.

For virtually all DOT rules, the initiating office must prepare an analysis that includes a discussion of the problem intended to be addressed, the major alternatives, the reasons for choosing one alternative over another, and the economic and other consequences of the action. The Department has a management process that permits key officials to follow closely the development of significant regulatory projects. The process is intended to ensure that these rulemakings are completed in a timely manner, and it facilitates top management's involvement in these actions.

Under the leadership of Secretary of Transportation Federico Peña, the Department has adopted a regulatory philosophy that applies to all its rulemaking activities. This philosophy is articulated as follows: DOT regulations must be clear, simple, timely, fair, reasonable, and necessary. They will be issued only after an appropriate opportunity for public comment, which must provide an equal chance for all affected interests to participate, and after appropriate consultation with other governmental entities. The Department will fully consider the comments received. It will assess the risks addressed by the rules and their costs and benefits, including the cumulative effect. The Department will consider appropriate alternatives, including nonregulatory approaches. It will also make every effort to ensure that legislation does not impose unreasonable mandates.

Consistent with this process and the Department's regulatory philosophy, DOT continually seeks ways of improving the way it conducts regulatory work. The creation of an electronic docket for the Department and steps to shorten the internal review process for new rules are examples of these efforts. In addition, the Department consistently seeks out opportunities to review, in depth, certain regulations or groups of regulations. Some recent examples include the Federal Highway Administration's (FHWA's) "zero-based" review of its motor carrier safety rules, a Coast Guard-initiated review to cull out unnecessary and obsolete rules, and a Federal Aviation Administration (FAA) review of rules cited by the 1993 Airline Commission report as burdening the industry. The FAA also used an innovative technique for getting public input concerning priorities for regulatory reviews, by asking interested parties to list the three regulations they would most like to see FAA change.

This Department's regulatory process and philosophy also facilitated the Department's successful participation in President Clinton's 1995 Regulatory Reinvention initiative. The cumulative impact of this effort was significant. The Department has committed to removing 13.2 percent of its Code of Federal Regulations (CFR) pages and reinventing an additional 19.6 percent of its CFR pages. In addition, DOT identified a number of specific, substantial regulatory projects that will help the Administration to achieve its regulatory policy objectives. The following are a few examples:

- FAA rules to harmonize aviation safety rules with European standards should save the industry at least $100 million (perhaps up to $1 billion, depending on economic conditions) over 10 years.
- As part of a review of air traffic control procedures, the FAA determined it could expand pilot participation in selecting the most desirable routings for long-distance flights. This program, which is now in effect, saves the industry about $40 million per year; FAA is considering expanding the program in ways that could save an additional $40 million annually.
- DOT has suspended the requirement for preemployment alcohol testing and has proposed legislation to make such testing permanently discretionary. This should save the motor carrier, mass transit, aviation, and railroad industries $28 million a year.
- The Office of the Secretary (OST) is considering a proposal to align passenger fare tariff filing requirements more closely with international aviation policies and review requirements. This effort could substantially change the aviation tariff filing requirement for a significant number of the parties now covered. The remaining parties would file electronically. The result would be a significant reduction in paperwork.
- The Coast Guard is proposing to amend its rules to allow U.S. flag vessels to be inspected by the American Bureau of Shipping or other qualified private organizations rather than by the Coast Guard. This will eliminate duplication in inspection requirements and reduce "down time" for vessels.
- The Federal Railroad Administration (FRA) plans a major paperwork reduction initiative that would allow many "Hours of Service Act" records to be maintained and reported electronically. For Class I railroads, this initiative could save $2.3 million annually by eliminating requirements to store 7.3 million paper records at any given time and create 3.6 million paper records per year.
- FHWA is considering a new rule to exempt motor carriers and drivers from the requirement to record duty

VOL
60
SS
2
28
NO
28
995
UMI

status on a specified grid for each 24-hour period if they use advanced technology to provide an accurate reflection of the driver's compliance with the hours-of-service regulations. Currently about 3.3 million drivers are subject to this safety requirement. This application of new technology would make possible a major paperwork reduction.

In other areas of the President's initiative, the Department reported on the ways in which we will ensure that our compliance efforts reward results and deemphasize red tape. This report focuses on such matters as improved performance measures (e.g., vessel casualties per 1,000 passenger vessels, commercial motor vehicle out-of-service rates), customer service training for front-line employees, development of a framework for performance management requiring that evaluation of the work of all employees, not just front-line regulators, be based on results, and education and training programs to assist regulators and customers to work together to achieve compliance.

The Department's enforcement policies are consistent with the effort to reward results and deemphasize red tape. For example, the Coast Guard authorizes its personnel to issue warnings, rather than impose penalties, for minor violations that are corrected promptly. It recently implemented a "pollution ticket" program that reduces paperwork and reduces penalties for first- and second-time minor violations of some environmental requirements. The Research and Special Programs Administration (RSPA) is implementing a program to waive up to 100 percent of penalties for violations that are corrected in a stated time frame. The FHWA's policy is to impose penalties only as a last resort when other means of obtaining compliance, such as education and training, have failed. The FRA's guidance to its inspectors emphasizes exercising discretion to waive or reduce initial penalty assessments, focusing particularly on efforts to achieve compliance.

The Department has engaged in a wide variety of activities to help cement the partnerships between its agencies and its customers that will produce good results for transportation programs and safety. For example, Secretary Peña participated in four transportation safety summits, along with front-line regulators and representatives of regulated industries. These concerned pipeline safety (July 1994), rail safety (September 1994), aviation safety (January 1995), and, most recently, a national truck and bus safety summit (March 1995). Administrators and other high officials of the operating administrations have participated in a wide variety of meetings with customers to form viable partnerships among industries, consumers, and front-line regulators. For example, the Federal Transit Administrator recently participated in a "Paratransit Summit" involving disability community groups and transit providers, which discussed issues concerning accessible public transportation. In addition, the Department's agencies have established a number of continuing partnership mechanisms. For example, the FAA's Aviation Rulemaking Advisory Committee (ARAC) is an ongoing grassroots effort. ARAC provides a forum for all elements of the aviation community to participate in the early development of FAA rulemakings.

The Department of Transportation was a pioneer in creating the regulatory negotiation concept, and it conducted the Federal Government's first negotiated rulemaking. Since that time, DOT has conducted regulatory negotiations on a variety of subjects, such as the Air Carrier Access Act and aspects of the Oil Pollution Act. The Department has also used advisory committees to obtain customer input on regulatory projects, such as the Americans with Disabilities Act rule. There are several regulatory negotiation projects currently planned or underway, concerning such subjects as roadway worker safety (FRA), oxygen use by airline passengers (OST), headlamp aimability (the National Highway Traffic Safety Administration, NHTSA), incorporating physical fitness determinations in the commercial drivers' license program (FHWA), and the definition of and safety requirements for gas gathering lines (RSPA).

The Department's regulatory process and philosophy also make it possible for the Department to achieve the aims of the DOT Strategic Plan. Many of the objectives of this plan—Tie America Together, Invest Strategically in Transportation Infrastructure, Promote Safe and Secure Transportation, Actively Enhance Our Environment, and Put People First—call for creating, reinventing, or improving DOT regulations.

Office of the Secretary of Transportation (OST)

The Office of the Secretary (OST) oversees the regulatory process for the Department. OST implements the Department's regulatory policies and procedures and is responsible for ensuring the involvement of top management in regulatory decisionmaking. Through the General Counsel's office, OST is also responsible for ensuring that the Department complies with Executive Order 12866 and other legal and policy requirements affecting rulemaking. Although OST's principal role concerns making the Department's regulatory process run smoothly and effectively, this office also plays an important role in the substance of rulemaking projects concerning aviation economic rules and those having cross-modal significance. In connection with its oversight and coordination role, the Office of the Secretary also led the Department's work to carry out President Clinton's Regulatory Reinvention Initiative.

OST provides guidance for use of regulatory personnel throughout the Department on compliance with requirements concerning the regulatory process. For example, OST provided guidance concerning implementation of the regulatory portions of the Unfunded Mandates Act, as well as providing updated information on such matters as compliance with Executive Orders, economic analyses, paperwork reduction, the Regulatory Agenda and Plan, and other regulatory policy matters. During the next year, OST plans to provide guidance and training concerning cost-benefit analyses and risk assessments, as well as continuing to offer DOT personnel a periodic 2-day training course on regulatory development and process.

OST led and coordinated the Department's response to the Administration and Congress in 1995 concerning legislative proposals for regulatory reform. The General Counsel's office worked closely with representatives of other agencies, the Office of Management and Budget, the White House, and Congressional staff to provide information on how various proposals would affect the ability of the Department to perform its safety, infrastructure, and other missions. OST gathered substantial information from the operating administrations to provide examples of the effects of these proposals. If regulatory reform legislation is enacted, OST will have the lead responsibility for providing Department-wide guidance and training on its implementation. Regardless of action on the pending proposals, OST and the operating administrations will continue their efforts to ensure that problems identified by proponents of the legislation do not exist in the Department's programs.

The Office of Commercial Space Transportation (OCST) is responsible for providing regulatory guidance to the emerging U.S. commercial space transportation industry. (Effective October 1, 1995, OCST will move from OST to the Federal Aviation Administration, where it will operate as a "seventh line of business.") U.S. aerospace companies, which have traditionally constructed launch vehicles and conducted launches as contractors of the U.S. Government, have been successfully marketing commercial services worldwide and are now conducting commercial launches on a regular basis. Commercial launch firms are developing and testing innovative vehicle technologies that will serve the important small-payload market. The Department, as the agency authorized by statute to license and otherwise regulate commercial space launch activities, is responsible for ensuring that these activities are conducted in a safe manner. At the same time, the Department must also shape its policies and requirements in a way that does not unduly burden the U.S. commercial space transportation industry. OCST, therefore, is seeking to streamline and further refine its regulatory processes, while continuing to consult with other agencies having responsibilities related to commercial space transportation.

United States Coast Guard (USCG)

The United States Coast Guard, an armed force of the United States, has many peacetime missions directly affecting the public. These missions include placing and maintaining aids to navigation, enforcing laws and treaties, protecting the marine environment, performing search and rescue, and ensuring marine safety and security. Various statutes authorize the Coast Guard to issue regulations in connection with these missions. The Coast Guard traditionally provides for pollution prevention and safety of passengers, crew, cargo, and ports through a framework of regulations that apply to U.S. flag vessels and foreign vessels that call at U.S. ports. The Marine Safety Council, a group of senior Coast Guard officers, establishes regulatory policy, reviews each rulemaking project, and advises the Commandant of the Coast Guard on regulatory matters.

The Oil Pollution Act of 1990 mandated over 30 different rulemaking projects, affecting pollution liability, personnel training and qualification, and vessel construction and equipment requirements. A number of regulations issued under the authority of the Oil Pollution Act of 1990 are now in effect, including requirements for financial responsibility, double-hull construction, and vessel and facility oil spill response plans. Other rulemaking projects, including requirements for hazardous substances response plans and structural and operational measures to prevent pollution from existing tank vessels, are in progress.

The percentage of foreign vessel traffic in U.S. ports has increased significantly over the past several years. As a result, the Coast Guard is shifting its emphasis from "flag state control," directed primarily at U.S. vessels, to "port state control." Its goal will be to identify substandard foreign vessels and operators, and ensure that deficiencies are corrected. Through Coast Guard initiatives at the International Maritime Organization (IMO), international standards have been raised to a level comparable with U.S. domestic requirements. The Coast Guard intends to increase its acceptance of international standards and eliminate or reduce inconsistencies with domestic regulations, while still ensuring an appropriate level of safety.

The Coast Guard recognizes its obligation to engage in a partnership with the regulated public. It will continue to provide meaningful opportunities for public participation at all stages of the regulatory process, using negotiated rulemaking when possible. The Coast Guard also recognizes its obligation to protect the maritime interests of the United States through helping the regulated public to achieve compliance with effective, efficient regulations. Finally, the Coast Guard is working to reduce unnecessary paperwork burdens. Very few of the Coast Guard information collection requirements are in the form of regularly scheduled reports. As directed by the President, the Coast Guard has reviewed its reporting requirements and has identified only six reports of this nature.

In the past year, the Coast Guard has reviewed each part of the Code of Federal Regulations for which it is responsible, primarily in titles 33 and 46. It received suggestions for improving these regulations from members of the affected public at local grassroots meetings, at a meeting at Coast Guard Headquarters, in written comments, and from Coast Guard field personnel. In identifying regulations to be eliminated or reinvented, the Coast Guard selected those parts which impose the greatest burdens and provide the least benefits. As a result of this review, the Coast Guard currently plans to remove over 300 pages from the Code of Federal Regulations.

Federal Aviation Administration (FAA)

Title 49, United States Code, Subtitle VII—Aviation Programs, charges the Administrator of the FAA with promoting safety of flight of civil aircraft in air commerce. The stated FAA mission is to provide a safe, secure, and efficient global aviation system which contributes to national security and the promotion of U.S. aviation. The agency relies on its Regulatory Plan to provide that system.

The FAA currently has underway a major initiative to improve the regulatory process in the spirit of Executive Order 12866, which charges agencies to promulgate regulations that are effective, consistent, sensible, and understandable. As a matter of policy, the FAA will promulgate no regulation if a nonregulatory solution exists. Other innovations include:

- Involving the aviation community early in the regulatory process to obtain input, both on the rule and the economics, from affected parties prior to publishing a proposed regulation. The Aviation Rulemaking Advisory Committee represents members from all aviation interests and is presently working on the resolution of more than 100 issues.
- Improving the agency's economic analysis process. The agency sponsored a Benefit Cost Conference on June 28, 1994, to obtain public input for the improvement of the process. An action plan has been developed to respond to concerns raised at the conference.
- Harmonizing the U.S. aviation regulations with those of other countries. The harmonization of the U.S. regulations with the European Joint Aviation Regulations (JAR) is the FAA's most comprehensive long-term rulemaking effort. The differences worldwide in certification standards, practices and procedures, and operating rules must be identified and minimized to reduce the regulatory burden on the international aviation system. The differences between the FAA regulations and the requirements of other nations impose a heavy burden on U.S. aircraft manufacturers and operators. Harmonization and standardization should help the U.S. aerospace industry, which contributed approximately $23 billion in trade surplus for 1990, to remain internationally competitive. While the

VOL
60
ISS
2
28
995
NO
28
UMI

overall effort to achieve this is global, it will be accomplished by many small, individual, nonsignificant rulemaking projects.

- Reviewing the regulations to identify those rules that are inconsistent with state-of-the-art technology or current industry practice. To enhance its ability to perform its statutory role without undue economic burden on the aviation industry, the agency announced a comprehensive review on January 10, 1994, asking interested parties to identify those regulations that are believed to be unwarranted or inappropriate. The comments provided in response to this notice will assist the agency in establishing its priorities for future regulatory changes. Other reviews will be conducted periodically.
- Improving the regulatory process. To improve its internal process, the FAA is experimenting with a new method of processing regulations that will require earlier involvement by all interested parties. Also, through an improved prioritization process, top management at the FAA now identifies certain projects that are designated as expedited rulemakings. These are generally simple, relieving rulemakings that are accomplished quickly through a dedication of resources. In addition, the FAA is working on a rulemaking proposal that would allow the use of a finding of equivalent level of safety that could be used in lieu of exemptions.

On July 13, 1995, Administrator Hinson announced CHALLENGE 2000—a comprehensive review of the FAA's regulation and certification capabilities. The purpose of the review is to determine what the agency will need to do to overcome the increasing challenges of regulating the aviation industry and certifying rapidly changing technologies as America enters the 21st century. Near term initiatives of CHALLENGE 2000 include an aggressive education program, targeting rulemaking initiatives to enhance safety, voluntary accreditation of parts suppliers, and a status report on the Safety Summit held in January 1995.

Top regulatory priorities of the FAA for 1995-1996 include a review of regulations affecting commuter operations and general certification and operations requirements, security at airports, harmonization of U.S. regulations with those of other countries, certification and maintenance of aircraft, survival equipment, and drug enforcement.

Federal Highway Administration (FHWA)

FHWA will continue to promulgate regulatory actions to implement the Intermodal Surface Transportation Efficiency Act of 1991 and other relevant statutes and will revise existing regulations where appropriate. The FHWA will rigorously pursue regulatory reform in areas where project development can be streamlined or accelerated, duplicative requirements can be consolidated, recordkeeping requirements can be reduced or simplified, and the decisionmaking authority of our State and local partners can be increased.

The major areas in which the FHWA will initiate or continue to develop significant rulemaking actions are in its ongoing zero-base review of the Federal Motor Carrier Safety Regulations and in implementing the Intermodal Surface Transportation Efficiency Act. The goals and objectives of the zero-base review project are to (a) focus on those areas of enforcement and compliance which are most effective in reducing motor carrier accidents, (b) reduce compliance costs, (c) encourage innovation, (d) clearly and succinctly describe what is required, and (e) facilitate enforcement. Through the zero-base review, the FHWA intends to develop a unified, performance-based regulatory system that will enhance safety on our Nation's highways while minimizing the burdens placed on the motor carrier industry. In addition, the FHWA is currently redrafting the Rules of Practice for Motor Carrier Safety and Hazardous Materials Proceedings. It plans to simplify the current process to facilitate responses by the accused motor carriers and drivers, and to offer alternative means of adjudicating the claims. It also intends to promulgate comprehensive rules covering the entire enforcement process from initial contact with the motor carrier to the final disposition of the claim.

National Highway Traffic Safety Administration (NHTSA).

The statutory responsibilities of the National Highway Traffic Safety Administration (NHTSA) include reducing and mitigating motor vehicle crashes and related fatalities and injuries, providing motor vehicle information to consumers, and improving automotive fuel efficiency. The agency pursues policies that encourage the development of nonregulatory approaches when feasible in meeting its statutory mandate; issues new standards and regulations or amendments to existing standards and regulations when appropriate; ensures that regulatory alternatives reflect a careful assessment of the problem and a comprehensive analysis of the benefits, costs, and other impacts associated with the proposed regulatory action; and considers alternatives consistent with the Administration's regulatory principles.

In addition to numerous programs that focus on the safety and performance of the motor vehicle, the agency is engaged in a variety of programs to improve driver behavior. These programs emphasize the human aspects of motor vehicle safety and recognize the important role of the States in this common pursuit. This goal is accomplished by a number of means, including encouraging initiatives in such areas as safety belt usage, motorcycle helmet usage, child safety-seat usage, activities aimed at combating drunk driving and driving under the influence of other drugs, and consumer information activities.

Furthering initiatives begun under the National Performance Review, NHTSA is conducting several program evaluations that are designed to review and evaluate the actual benefits, costs, and overall effectiveness of existing standards and regulations. For example, the agency is continuing an evaluation of the effectiveness of Standard No. 208's automatic crash protection requirement and is beginning an evaluation of Standard No. 214's new dynamic side-impact protection requirements.

NHTSA's regulatory program includes additional proposals that will be undertaken in order to allow design flexibility, promote new technology, and encourage market competition and consumer choice. Also, pursuant to the President's 1995 Regulatory Reinvention Initiative, NHTSA has undertaken a review of all its regulations and directives. During the course of this review, the agency identified several regulations that are potential candidates for rescission or amendment. NHTSA will continue to pursue these actions during the next year. The agency also will be continuing other ongoing safety rulemakings.

Federal Railroad Administration (FRA)

The Federal Railroad Administration (FRA) exercises regulatory authority over all areas of railroad safety. The Federal Railroad Safety Act of 1970 is the primary source of this authority.

FRA promotes safe, environmentally sound, and successful railroad transportation to meet the current and future needs of all its customers. It encourages policies and investment in infrastructure and technology to enable rail to reach its full potential.

FRA seeks to develop a regulatory program that is based on the regulatory principles enunciated in Executive Order 12866 and that satisfies the Order's basic criteria for such programs. FRA's vision is of a regulatory program that protects the health and safety of all persons affected by railroading in America and enhances the environment without imposing unreasonable costs on society. FRA seeks to create regulations that are as "effective, consistent, sensible, and understandable" as those envisioned by the President in his Order. More specifically, given the significant number of pending congressional mandates for railroad safety regulations, FRA is also challenged to address the most important regulatory issues on the agency's own agenda in the most timely and reasonable manner possible.

Our current regulatory priorities include the issuance of final rules on several important subjects: track safety; power brake inspection and maintenance; whistle bans at highway-rail grade crossings; and railroad accident reporting. Each of these rules will embody cost-effective improvements of the way railroads currently conduct business. These measures, we believe, will increase safety performance significantly within an industry that is already performing at high safety levels.

Pursuant to the President's 1995 Regulatory Reinvention Initiative, and for over the past 2 years on its own initiative, FRA has conducted a vigorous review of its regulations, consulting both its own safety professionals and our external customers in the industry. In so doing, FRA has identified numerous opportunities to eliminate or improve significant aspects of our regulatory program. For example, FRA identified 11 pages of the CFR, representing roughly 3 percent of the CFR parts, that it should eliminate. In addition, FRA identified roughly 55 percent of the CFR parts, the majority of those items identified for reinvention, as requiring significant improvements.

FRA has also commenced various nonstatutory regulatory reform initiatives. First, FRA is using negotiated rulemaking to create, with the industry, a rule addressing the issue of roadway worker safety. Begun early this year, the negotiated rulemaking advisory committee recently came to agreement on the recommendations they will make to the agency for ensuring the safety of roadway workers. This negotiated rulemaking represented an historic departure from FRA's traditional rulemaking program.

Second, based on the beneficial aspects of its negotiated rulemaking experience, FRA is intensively pursuing a new regulatory paradigm. This new model will consist of a more collaborative rulemaking program and will include the creation of a Rail Safety Advisory Committee (RSAC). RSAC will consist of members of rail management, labor, FRA and other interested parties and will operate by seeking agreement on the facts and data underlying any real or perceived safety problem; identifying cost-effective solutions based upon stipulated facts; and, where appropriate, identifying regulatory options to implement these solutions.

Finally, FRA is examining revising the User Fee Program to ease the user fee burdens imposed upon small entities who do not fit within the formulaic approach to assessment. FRA is required to establish and maintain a schedule of fees to be assessed equitably upon railroads to defray the costs of administering FRA's safety laws. Currently, many small entities that have low formula-based amounts assessed pay a minimum user fee that is higher than the formula assessment. Thus, FRA is considering proposing revisions to the user fee regulations to exempt small railroads or to eliminate a minimum fee for them.

Federal Transit Administration (FTA)

The Federal Transit Administration (FTA) provides financial assistance to State and local governments for mass transportation purposes. The regulatory activity of FTA focuses on establishing the terms and conditions of Federal financial assistance available under the Federal transit laws.

FTA's policy regarding regulations is to:

- Implement statutory authorities in ways which provide the maximum net benefits to society;
- Keep paperwork requirements to a minimum;
- Allow for as much local flexibility and discretion as is possible within the law;
- Ensure the most productive use of limited Federal resources;
- Protect the Federal interest in local investments; and
- Incorporate good management principles into the grant management process.

As mass transportation needs have changed over the years, so have the requirements for Federal financial assistance under the Federal transit laws and related statutes. FTA's regulatory priority for 1995 is to assist FTA recipients in complying with the drug and alcohol testing regulations.

Maritime Administration (MARAD)

MARAD administers Federal laws and programs designed to promote and maintain a U.S. merchant marine capable of meeting the Nation's shipping needs for both national security and domestic and foreign commerce.

MARAD's regulatory objectives and priorities are prescribed by statute and reflect the agency's responsibility for ensuring the availability of efficient water transportation services to American shippers and consumers. To advance these objectives, MARAD's regulations, which are principally administrative and interpretive in nature, are issued so as to provide a significant net benefit to the maritime industry. MARAD works closely with other agencies, for example, the Department of Defense and the Department of Agriculture, to ensure that its cargo preference regulations can be implemented by those agencies in a cost-effective manner. MARAD's proposal in the present Regulatory Plan is designed to bring government procurement of ocean transport more in line with commercial practices, and thus support a system that is more cost-effective to carriers, shippers, and ultimately the consumer.

Research and Special Programs Administration (RSPA)

The Research and Special Programs Administration (RSPA) has responsibility for rulemaking under three programs. Through the Associate Administrator for Hazardous Materials Safety, RSPA administers regulatory programs under Federal hazardous materials transportation law and the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990. Through the Associate Administrator for Pipeline Safety, RSPA administers regulatory programs under the Federal pipeline safety laws and the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990.

The Associate Administrator for Research, Technology, and Analysis is responsible for collecting, evaluating, and disseminating the necessary tariff information to support the aviation

VOL
60
SS
2
28
NO
28
995
UMI

programs of the Department under the Federal aviation laws. In the aviation tariffs area, the regulatory priorities are to fully automate tariff filings by air carriers and eliminate routine filing of cargo tariffs. However, this function is expected to be moved to OST on October 1, 1995, in order to improve program coordination.

In the area of hazardous materials transportation, the regulatory priorities are to complete the rulemaking actions mandated by the 1990 amendments of the Federal hazardous materials law, including extending Federal regulation to the intrastate highway transportation of hazardous materials. Another priority is to adopt a simplified compliance enforcement procedure that involves ticketing shippers, carriers, and other persons for minor violations of hazardous materials regulations. Also, as part of the President's 1995 Regulatory Reinvention Initiative, RSPA is considering the elimination of unnecessary, obsolete, and duplicative regulations and a simplification and reformatting of the remaining regulations that potentially may reduce the size of the Code of Federal Regulations by 100 pages and may reduce the size of the hazardous materials regulations by one volume, thereby reducing the cost to industry by more than $75,000 per year.

The regulatory priorities in the pipeline area are to manage the risks inherent in pipeline transportation through strategies directed at prevention, detection, and mitigation activities. Specific regulatory actions to implement these activities include excavation damage prevention programs, mandating participation in one-call notification systems, increased inspection requirements using instrumented internal inspection devices, and prescribing risk-based approaches to pipeline safety regulations.

Bureau of Transportation Statistics (BTS)

The Office of Airline Information (OAI), which recently became part of the Bureau of Transportation Statistics (BTS), is the only BTS function with regulatory authority. OAI collects airline passenger, cargo, traffic, and financial data. This information gives the Government consistent and comprehensive economic and market data on individual airline operations and is used, for instance, in supporting policy initiatives, negotiating international bilateral aviation agreements, awarding international route authorities, and meeting international treaty obligations. The aviation, travel, and tourism communities value this information for a variety of purposes, such as conducting analyses of on-time performance, denied boardings, and market trends.

BTS has two short-term regulatory priorities. The first is to resolve the requirement for on-time flight information in a way that meets consumer needs without compromising safety. The second is to consider whether to include foreign carriers among those that provide passenger origin and destination data for their operations within the United States.

BTS will also conduct a complete review and modernization of the passenger origin and destination survey. BTS can make significant improvements by providing data for the needs of DOT and other users in a way that takes advantage of the information revolution and matches the dramatically changed airline industry.

DOT—Office of the Secretary (OST)

PROPOSED RULE STAGE

85. +LICENSING COMMERCIAL SPACE LAUNCH ACTIVITIES

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

49 USC 70101 to 70119

CFR Citation:

14 CFR 400 to 415

Legal Deadline:

None

Abstract:

The Commercial Space Launch Act of 1984, as amended, grants the Department of Transportation's Office of Commercial Space Transportation authority to license and otherwise regulate commercial launches and the commercial operation of launch sites. The Office must ensure that commercial space launch activities are conducted in a manner that does not jeopardize public health and safety and the safety of property, without, however, imposing unnecessary regulatory burdens on the commercial launch industry. The industry has grown in size and complexity since the original regulations were published in 1988, and the Office's licensing program continues to evolve to reflect these changes. This rulemaking would modify the current regulations to reflect a streamlined and more mature licensing regime developed over the past few years. Such changes would benefit the industry by reducing regulatory burdens, thus reducing costs.

This rulemaking is significant because of substantial public interest.

Statement of Need:

On April 4, 1988, the Office of Commercial Space Transportation (OCST) published final regulations for licensing commercial space launch activities. The regulations include the general administrative procedures of OCST as well as revised and expanded policies for licensing commercial launch activities. The industry has grown in size and complexity since the licensing regulations were first published in 1988. As a result, the Office has continued to refine its approach to licensing launch proposals in a manner that facilitates private sector launch activities. This rulemaking would modify the current regulations to reflect a more efficient licensing regime. In addition, the rulemaking will address the procedures and requirements applicable to the licensing of commercial spaceport operators.

Summary of the Legal Basis:

The Commercial Space Launch Act of 1984, as amended, 49 USC 70101 to 70119, confers upon the Department of Transportation the responsibility to license and otherwise regulate launches by the private sector of launch vehicles and the commercial operation of launch sites. The Department's Office of Commercial Space Transportation carries out this responsibility for ensuring that these commercial launch activities do not jeopardize public health and safety, the safety of property, and national security and foreign policy interests of the United States.

Alternatives:

No alternatives were considered. OCST is required by the Commercial Space Launch Act to review and act upon applications for licenses to conduct commercial launches and commercial launch site operations. The Act does not permit OCST to follow alternative approaches in carrying out this responsibility. Therefore, although this rulemaking will make further refinements to the licensing process, the basic regulatory approach will not change.

Anticipated Costs and Benefits:

The rule should impose no additional costs on the commercial space transportation industry. By streamlining the licensing process that is already in place, the rule should benefit the industry by reducing the regulatory burden. The rule should benefit the Office by establishing a more efficient licensing mechanism, thereby reducing staff time.

Risks:

DOT's Office of Commercial Space Transportation must ensure that commercial space launch activities do not jeopardize public health and safety and the safety of property and also ensure compliance with international obligations of the United States. Although the historical safety record of government and commercial launch firms is excellent, significant risks or hazards are presented by the launch of launch vehicles. Risks or hazards include possible explosions and fires involving liquid or solid rocket propellants and ordnance, as well as the generation of launch vehicle and payload debris. Launch accidents, including in-flight failures of guidance or destruction systems, may result in injury to launch personnel and the public and in damages to or loss of government and private property. The potential maximum probable loss for injuries and damages from a single launch typically is in the tens of millions of dollars. The OCST licensing process, in conjunction with U.S. Government launch facilities' range safety control procedures, are directed at ensuring that these launch activities do not jeopardize public safety or U.S. national interests. In addition, OCST imposes financial responsibility requirements on licensees to protect the public and the government, pursuant to the 1988 amendments to the Commercial Space Launch Act.

PRERULE STAGE

86. +FACILITY RESPONSE PLANS FOR HAZARDOUS SUBSTANCES (CGD 94-048)

Priority:

Other Significant

Legal Authority:

33 USC 1321(j); PL 101-380

CFR Citation:

33 CFR 154

Legal Deadline:

None

Abstract:

This project would implement provisions of the Oil Pollution Act of 1990 that require an owner or operator of a marine transportation-related facility transferring bulk hazardous substances to develop and operate in accordance with an approved response plan. The regulations would apply to marine transportation-related facilities that, because of their location, could cause substantial or significant and substantial harm to the environment by discharging a hazardous substance into or on the navigable waters or adjoining shoreline. This would be defined as any facility capable of transferring hazardous substances regulated under 46 CFR Subchapters D and O to or from a vessel with a capacity of 250 barrels or more. A separate rulemaking under RIN 2115-AE88 would address hazardous response plan requirements for tank vessels. This action is considered significant because of substantial public interest.

Statement of Need:

This rulemaking is intended to reduce the impact from hazardous substance spills from vessels and marine transportation-related facilities.

Summary of the Legal Basis:

Section 4202(a) of the Oil Pollution Act of 1990 (OPA 90), codified at 33 USC 1321(j)(5), mandates that the President issue regulations requiring the preparation of oil and hazardous substance discharge response plans. Although 4202(b)(4) of OPA 90 established an implementation schedule for these response plans for oil, it did not establish a deadline for submission or approval of hazardous substances response plans. The Coast Guard has issued separate interim rules governing response plan requirements for vessels carrying oil in bulk as cargo and facilities that handle, store, or transport oil in bulk. Under section 1321, "hazardous substances" are designated by the Administrator of the Environmental Protection Agency. The Administrator has designated 297 chemicals as hazardous substances under this section. However, the Coast Guard has identified only 83 hazardous substances currently transferred in bulk by marine transportation-related facilities.

Alternatives:

The Coast Guard intends to determine what types of response strategies would be required to address spills of different types of hazardous substances. For some substances, containment and recovery may be the appropriate response. However, some spilled substances may not be recoverable from the water and other actions may be necessary. Plans would be required, by statute, to address responses to a "worst case discharge." For facilities, a "worst case discharge" is "the largest foreseeable discharge in adverse weather conditions." The Coast Guard is considering requirements for response plans for less than "worst case discharges," similar to the requirements adopted in the vessel and facility response plans rules for oil discharges. Additionally, as in the vessel and facility response plans for oil discharges, owners or operators are

required by statute to maintain contracts or other acceptable arrangements with spill-response organizations.

Anticipated Costs and Benefits:

The potential costs of this rulemaking may include the costs of developing and implementing a hazardous substance response plan, maintaining contracts with spill response organizations, reviewing and updating hazardous substance response plans, maintaining any required equipment, and training and exercising response personnel. Potential benefits include enhanced environmental quality from improved ability to respond to, contain, and recover spilled hazardous substances and a reduction in the severity of the impact of accidental hazardous substance discharges. The Coast Guard does not yet have sufficient information to estimate the potential monetary costs and benefits of this rule. A key element in developing effective regulations for hazardous substance response plans will be the development of an approach for addressing different types of hazardous substances.

Risks:

Response plans are required by statute. A response plan will not prevent a discharge of a hazardous substance, but it may improve the response and, in certain cases, help to minimize personal injury and damage to the environment. This rule should not affect the economic viability of facilities involved in transferring hazardous substances in bulk or have a significant impact on the volume of hazardous substances shipped by marine transportation-related facilities. Most facilities involved in transferring hazardous substances in bulk have developed plans, but there have not been requirements for standardization.

87. +TANK VESSEL RESPONSE PLANS FOR HAZARDOUS SUBSTANCES (CGD 94-032)

Priority:

Other Significant

Legal Authority:

33 USC 1231; 33 USC 1321(j); PL 101-380

CFR Citation:

33 CFR 155

Legal Deadline:

None

Abstract:

This project would implement provisions of the Oil Pollution Act of 1990 that require an owner or operator of a tank vessel carrying bulk hazardous substances to develop and operate in accordance with an approved response plan. The regulations would apply to vessels operating on the navigable waters or within the Exclusive Economic Zone (EEZ) of the U.S. that carry bulk hazardous substances regulated under 46 CFR Subchapters D and O. A separate rulemaking under RIN 2115-AE87 would address hazardous substances response plan requirements for marine transportation-related facilities. This action is considered significant because of substantial public interest.

Statement of Need:

This rulemaking is intended to reduce the impact from hazardous substance spills from vessels.

Summary of the Legal Basis:

Section 4202(a) of the Oil Pollution Act of 1990 (OPA 90), codified at 33 USC 1321(j)(5), mandates that the President issue regulations requiring the preparation of oil and hazardous substance discharge response plans. Although 4202(b)(4) of OPA 90 established an implementation schedule for these response plans for oil, it did not establish a deadline for submission or approval of hazardous substances response plans. The Coast Guard has issued separate interim rules governing response plan requirements for vessels carrying oil in bulk as cargo and facilities that handle, store, or transport oil in bulk. Under section 1321, "hazardous substances" are designated by the Administrator of the Environmental Protection Agency. The Administrator has designated 297 chemicals as hazardous substances under this section. However, the Coast Guard has identified only 83 hazardous substances currently transferred in bulk by marine transportation-related facilities.

Alternatives:

The Coast Guard intends to determine what types of response strategies would be required to address spills of different types of hazardous substances. For some substances, containment and recovery may be the appropriate response. However, some spilled substances may not be recoverable from the water and other actions may be necessary. Plans would be required, by statute, to address responses to a "worst case discharge." For vessels, a "worst case discharge" is "a discharge in adverse weather conditions of its entire cargo." The Coast Guard is considering requirements for response plans for less than "worst case discharges," similar to the requirements adopted in the vessel and facility response plans rules for oil discharges. Additionally, as in the vessel and facility response plans for oil discharges, owners or operators are required by statute to maintain contracts or other acceptable arrangements with spill response organizations.

Anticipated Costs and Benefits:

The potential costs of this rulemaking may include the costs of developing and implementing a hazardous substance response plan, maintaining contracts with spill-response organizations, reviewing and updating hazardous substance response plans, maintaining any required equipment, and training and exercising response personnel. Potential benefits include enhanced environmental quality from improved ability to respond to, contain, and recover spilled hazardous substances and a reduction in the severity of the impact of accidental hazardous substance discharges. The Coast Guard does not yet have sufficient information to estimate the potential monetary costs and benefits

of this rule. A key element in developing effective regulations for hazardous substance response plans will be the development of an approach for addressing different types of hazardous substances.

Risks:

Response plans are required by statute. A response plan will not prevent a discharge of a hazardous substance, but it may improve the response and, in certain cases, help to minimize personal injury and damage to the environment. This rule should not affect the economic viability of vessels involved in transferring hazardous substances in bulk, or have a significant impact on the volume of hazardous substances shipped by vessel. Most vessels carrying hazardous substances in bulk have developed plans, but there have not been requirements for standardization.

DOT—USCG

PROPOSED RULE STAGE

88. +STRUCTURAL AND OPERATIONAL MEASURES TO REDUCE OIL SPILLS FROM EXISTING TANK VESSELS WITHOUT DOUBLE HULLS (CGD 91-045)

Priority:

Economically Significant

Legal Authority:

46 USC 3703; PL 101-380

CFR Citation:

33 CFR 157

Legal Deadline:

Final, Statutory, August 26, 1991.

Abstract:

This rulemaking will address the interim measures existing vessels must take to provide substantial protection to the environment. The interim measures will apply to existing vessels until the vessel must comply with the double-hull regulations. No tank vessel without a double hull may operate after January 15, 2015. Interim measures are to include structural and operational standards to provide substantial protection to the environment that are economically and technologically feasible. This rulemaking is considered significant due to substantial public interest and environmental impact.

Statement of Need:

This rulemaking is intended to reduce the likelihood of, and impact from, oil spills from existing tank vessels.

Summary of the Legal Basis:

Section 4115(b) of OPA 90, codified at 46 USC 3703a, mandates that the Secretary of Transportation "... issue a final rule to require that tank vessels over 5,000 gross tons ... comply until January 1, 2015, with structural and operational requirements that the Secretary determines will provide as substantial protection to the environment as is economically and technologically feasible."

Alternatives:

In 1989, the Coast Guard commissioned the National Academy of Sciences to conduct a study of alternative tank vessel designs. The study addressed the feasibility and ramifications of implementing various design options. An advance notice of proposed rulemaking (ANPRM) was published on November 1, 1991, and solicited comments on a number of possible structural and operational measures. Comments were specifically solicited on the number of vessels affected, technical feasibility, and costs of various measures. Based on comments received and the Coast Guard's own analysis, the range of possible alternatives was narrowed. Remaining options included protectively located noncargo tanks (PL/Spaces), emergency rapid transfer systems, emergency rescue systems, underpressure systems, and hydrostatically balanced loading (HBL). Following publication of a notice of proposed rulemaking (NPRM) on October 22, 1993, the Coast Guard conducted a public meeting and received additional comments. Several comments expressed concern over the effectiveness of some of the proposed structural and operational measures, such as protectively located spaces and hydrostatic balance loading. Therefore, the Coast Guard is considering a three-prong approach. A partial final rule addressed emergency lightering equipment and prearrival notification requirements. Two SNPRMs will address operational and structural measures respectively and solicit additional comments.

Anticipated Costs and Benefits:

The costs of the proposed rule will depend on what combination of alternatives is eventually selected. Costs may range from approximately $50,000 to create PL/Spaces on a small, pre-MARPOL ship to approximately $25 million to add a double bottom to a very large crude carrier. Lost cargo capacity may also impose substantial costs for certain alternatives, especially HBL, double sides, and double bottoms. The principal benefit of the proposed rule will be a potential reduction in oil spillage into U.S. waters. This should result in reduced cleanup costs and natural resource damages. The proposed regulation would provide environmental benefits during the period of time that single-hull vessels remain in service.

Risks:

The effectiveness of this rulemaking will depend on the combination of alternatives selected.

DOT—Federal Aviation Administration (FAA)

FINAL RULE STAGE

89. +AIRCRAFT FLIGHT SIMULATOR USE IN PILOT TRAINING, TESTING, AND CHECKING AND AT TRAINING CENTERS

Priority:

Other Significant

Legal Authority:

49 USC 1301; 49 USC 1303; 49 USC 1344; 49 USC 1348; 49 USC 1352; 49 USC 1355; 49 USC 1401; 49 USC 1421 to 1431; 49 USC 1471; 49 USC 1472; 49 USC 1502; 49 USC 1510; 49 USC 1522; 49 USC 2121 to 2125; 49 USC 106(g)

CFR Citation:

14 CFR 61; 14 CFR 91; 14 CFR 121; 14 CFR 125; 14 CFR 135; 14 CFR 141; 14 CFR 142

Legal Deadline:

None

Abatract:

This action would amend the pilot and flight instructor certification rules to include additional use of aircraft, aircraft flight simulators, and flight training devices for pilot training, testing, and checking. This notice also would propose a new part 142 that would govern a new concept called *training centers*. This new concept will emphasize the use of flight simulators in training applicants for pilot certificates. This rulemaking is considered significant because of substantial public interest; it involves a major change in the way industry trains applicants.

Statement of Need:

The training roles of several elements of the aviation community have expanded during the past 10 years. In October 1989, an advisory committee studying matters relating to training and qualification recommended that the FAA standardize the use of flight simulators and flight training devices, provide a means to certificate entities called training centers, and permit the training centers to apply for national approval of core curriculums that could be used by individuals receiving training. This rulemaking project responds to this recommendation by including the concept of a certificated training center.

Summary of the Legal Basis:

Secs. 601 and 602 of the Federal Aviation Act: section 601 empowers the Administrator to prescribe the minimum standards governing appliances such as simulators; section 602 empowers the Administrator to issue airmen certificates.

Alternatives:

Since the FAA accepted the recommendations of the advisory committee, it will not pursue any nonregulatory options.

Anticipated Costs and Benefits:

The total 10-year cost to implement part 142 is estimated to be about $1.3 million discounted. The benefits of this rule, however, far outweigh its costs. Most of the cost savings come from lowered operations costs. The estimated savings from existing simulator training centers training pilots will be $808 million, discounted over the next 10 years.

Risks:

Flight simulators will expand under the changes in the simulator rule. The future use of simulators should reduce the need for pilot instructional flights and the incidence of instructional flight accidents. Each year many student pilots and their instructors die in instructional flight accidents. In the 10-year period 1983 through 1993, the National Transportation Safety Board reported 307 fatal instructional accidents resulting in 553 fatalities. The FAA estimates the average value of such an accident equals $4.8 million. Instructional flight accidents are a risk that would follow in the absence of the simulator rule.

90. +AIRWORTHINESS STANDARDS: FLIGHT RULES BASED ON EUROPEAN JOINT AVIATION REQUIREMENTS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

49 USC 134; 49 USC 1354(a); 49 USC 1355; 49 USC 1421; 49 USC 1423; 49 USC 1425; 49 USC 1428; 49 USC 1429; 49 USC 1430; 49 USC 106(g); PL 97-449

CFR Citation:

14 CFR 23

Legal Deadline:

None

Abstract:

The FAA established an Aviation Rulemaking Advisory Committee (56 FR 20492, May 3, 1991), to provide advice and recommendations to the FAA on the full range of aviation-related issues. The ARAC has been tasked to recommend airworthiness standards for standard and commuter category airplanes in part 23 of Title 14 of the CFR. The FAA has also committed to harmonizing its requirements applicable to type certification of new airplanes, rotocraft, aircraft engines, and propellers with those of the European members of the Joint Aviation Authorities (JAA). This proposal and the three related proposals, which resulted from recommendations from the ARAC, will harmonize the airworthiness requirements of part 23 with those of the JAA, and will result in significant cost savings to applicants for type certification for part 23 airplanes.

Statement of Need:

The FAA has committed to harmonizing the requirements that apply to type certification of new airplanes, rotocraft, aircraft engines, and propellers. Currently, an applicant for U.S. and European type certificates for a product must demonstrate that its design complies with Title 14 of the CFR, and the airworthiness requirements of the European countries in which applications are made. Because of differences between U.S. and European requirements, type certification programs can involve multiple certification efforts, including costly expenditures for flight testing and computer data generation and modeling. This is often redundant, because the requirements have common safety objectives. This effort to harmonize will result in type certification programs for which an applicant for multiple certification need only demonstrate compliance once. This rule is one of four such proposals to harmonize part 23 of the CFR with European requirements. Other areas are systems and equipment (2120-AE59), propulsion (2120-AE60), and airframe (2120-AE62).

Summary of the Legal Basis:

Former Title VI of the Federal Aviation Act of 1958, as amended, now codified at 49 USC 44701, requires the FAA to promote safe flight of civil aircraft in air commerce by prescribing minimum standards required in the interest of safety for the design, material, construction, quality of work, and performance of aircraft, aircraft engines, and propellers.

Alternatives:

The only alternative to harmonization of the FAA's type certification requirements would be to allow the status quo to continue; that would mean that applicants for U.S. and foreign type certificates would continue to demonstrate compliance with multiple sets of rules.

Anticipated Costs and Benefits:

These flight harmonization rules would reduce the regulatory burden on type certificate applicants, both domestic and foreign, who apply for U.S. and foreign type certificates. A typical new airplane certification in the commuter category can cost tens of millions of dollars for a U.S. type certificate; demonstrating compliance with additional requirements for one or more foreign aviation authorities can cost additional millions of dollars. The overall cost benefits to the domestic and foreign aircraft, engine, and propeller manufacturers will be a function of the numbers of products for which new type certificate applications will be made. That is difficult to predict. However, it should be noted that typical type certification programs for new transport airplanes are more expensive than those for commuter airplanes, and programs for new engines and propellers are less expensive than for commuter airplanes.

Risks:

The aircraft, aircraft engine, and propeller industry has identified the additional, and sometimes redundant, cost of certifying a product to different sets of standards. Should the FAA not harmonize its rules with those of the other countries in which modern aircraft are operated, it will have lost an opportunity to achieve an important goal of "reinventing" government by decreasing the financial burden of regulations. The FAA has evaluated the proposed rules to ensure that they will further the public interest in a high level of aviation safety.

91. +COMMUTER OPERATIONS AND GENERAL CERTIFICATION AND OPERATIONS REQUIREMENTS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

49 USC 1153; 49 USC 40101 to 40103; 49 USC 40113; 49 USC 44105; 49 USC 44106; 49 USC 44111; 49 USC 44701; 49 USC 44722; 49 USC 44901; 49 USC 44903; 49 USC 44904; 49 USC 44912; 49 USC 44914; 49 USC 49936; 49 USC 44938; ...

CFR Citation:

14 CFR 121; 14 CFR 135

Legal Deadline:

None

Abstract:

This action would respond to the 10 recommendations from the National Transportation Safety Board dated November 15, 1994. The primary objective of this action is to revise the Federal Aviation Regulations (FAR) to require all scheduled passenger operations conducted with airplanes with more than nine passenger seats to be conducted under the requirements of Part 121. Other projects that the FAA already has ongoing include: Part 142, Training Centers; Flight Crewmember Duty Limitations and Rest Requirements; and the 121/135 Training Program. This rulemaking is considered significant because of substantial public interest.

Statement of Need:

The accident record of Part 135 operators is not as good as that of Part 121 operators. There has been a growing public perception that flying under Part 135 is not as safe as flying under Part 121. Although the safety record of Part 135 operators is improving, several accidents in the past several years have increased the public's desire for a single set of requirements for all passenger-carrying operations. These accidents led to NTSB to recommend to the FAA that scheduled passenger-carrying operations conducted in aircraft with 10 or more seats comply with Part 121.

Summary of the Legal Basis:

Section 44701, Title 49 of the United States Code states that the Administrator shall promote safety of flight of civil aircraft in air commerce by prescribing minimum standards required in the interest of safety.

Alternatives:

The FAA is reviewing the comments submitted by the public. It is in the process of evaluating whether any suggested alternatives should be pursued in lieu of some regulatory proposals.

Anticipated Costs and Benefits:

In the notice of proposed rulemaking, the FAA anticipated that the safety benefits would be $393 million (discounted) from 1996-2005. Over the same period, the rule would impose costs of $275 million (discounted). The FAA is considering comments on these estimated costs and benefits to determine a final economic evaluation.

Risks:

Since the FAA initiated this rulemaking, one additional commuter airplane accident has occurred, resulting in the deaths of five persons. If issued as proposed, this rulemaking would add requirements, for example, for additional pilot training, a dispatch system, and enhanced performance requirements, that the FAA believes would increase the level of safety for the traveling public. On the other hand, these requirements will be very expensive for some operators. Alaska operators and air tour operators have indicated that, if the rule is imposed, they will convert to smaller, less safe 9-seat airplanes. This in turn would mean an increase in noise and air traffic. Other operators have pointed out that the costs would be passed on to passengers, making the price of tickets so expensive that the public would choose to travel by automobile, a less safe means of travel.

DOT—Federal Highway Administration (FHWA)

PRERULE STAGE

92. • +ADVANCED TECHNOLOGY IN COMMERCIAL MOTOR VEHICLE OPERATIONS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

49 USC 31136; 49 USC 31502

CFR Citation:

49 CFR 395

Legal Deadline:

None

Abstract:

Current Federal Motor Carrier Safety Regulations limit the hours of service of commercial motor vehicle (CMV) drivers in order to reduce fatigue-related accidents. These regulations include substantial recordkeeping requirements to monitor drivers' hours of service. The Federal Highway Administration (FHWA) is considering ways to reduce the recordkeeping burden while maintaining or improving safety. This is significant because of the broad industry impact.

Statement of Need:

The hours-of-service regulations adopted by the FHWA are intended to address the issue of driver fatigue and to enhance highway safety by reducing the number and severity of accidents caused by fatigue. The recordkeeping associated with this regulation, primarily the requirement for drivers to maintain daily records of duty status, imposes a significant burden on drivers and motor carriers. •

The FHWA believes that advances in technology may hold the promise for substantially reducing the paperwork burden of this rule while improving compliance with the underlying hours-of-service limitations, thus enhancing highway safety.

Summary of the Legal Basis:

The FHWA is authorized to regulate hours of service of CMV drivers in order to enhance highway safety. Beginning in 1935, the Federal Government (first the Interstate Commerce Commission and then the Federal Highway Administration) has regulated the hours of service of interstate drivers. See 49 USC 31502. In 1984, the Congress directed the Secretary of Transportation to prescribe regulations to ensure that commercial motor vehicles are operated safely and that the physical condition of operators of CMVs is adequate to enable them to operate safely. See 49 USC 31136. Finally the Congress has provided that, if the Secretary prescribes a regulation about the use of monitoring devices in CMVs to increase compliance with hours of service regulations, the regulation is to ensure that the devices are not used to harass vehicle operators. See 49 USC 31137(a).

Alternatives:

Current Federal safety regulations require drivers to maintain records of duty status on handwritten forms or alternatively, at a motor carrier's option, electronically through the use of on-board recording devices (49 CFR 395).

The FHWA has considered the use of satellite tracking technology to replace handwritten records of duty status. The FHWA believes that system modifications necessary to allow the use of this technology for this purpose is not cost effective at this time. Satellite tracking systems, as currently configured, are primarily designed to track vehicle location. They do not provide driver identification or supporting documentation for roadside enforcement.

The FHWA is now planning further study of the use of on-board recording devices to monitor drivers' hours of service. This study will include recent advances in technology and current costs.

Anticipated Costs and Benefits:

Current recordkeeping requirements directly affect 3.3 million drivers who are required to complete records of duty status. The motor carrier industry expends 14.8 million burden hours at an estimated cost of $340 million annually.

Risks:

Hours of service recordkeeping requirements are intended to reduce safety risks associated with driver fatigue. No risks have been identified with increased use of onboard recording devices.

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

49 USC 20103; 49 USC 21101 to 21108; 49 USC 21303 to 21304; 49 USC 21311

CFR Citation:

49 CFR 228

Legal Deadline:

None

Abstract:

The Federal Railway Administration (FRA) will launch a major project to facilitate maintenance of hours-of-service records and submission of "excess service" reports in an electronic, rather than a paper, format. FRA will host an industry forum and propose to issue a model waiver to railroads interested in maintaining electronic records for train and engine service employees. These employees compose the vast majority of those subject to the statutory limitations on hours of service. This project will eventually lead to the formal revision of 49 CFR 228.

Statement of Need:

Two of the goals of FRA's Strategic Plan are to increase our customer focus by giving our best to the customer's needs and priorities and to "advance technological innovation in rail transportation through leadership and partnership." It is consistent with these goals to allow greater flexibility in the maintenance of hours-of-service records and to encourage the railroads' use of electronic recordkeeping. Moreover, when meeting with sectors of the industry pursuant to the President's March 4, 1995 Reinvention Initiative, FRA learned that the industry is interested in obtaining greater flexibility in this area. Consequently, it is anticipated that FRA will change the hours-of-service regulations' paper records and reports requirements for subscribing railroads. This will improve these regulations by providing flexibility in the generation of payroll and hours-of-service records from the same databases, by facilitating electronic filing of excess service records, and by providing data to FRA in a format that can be more readily analyzed.

Summary of the Legal Basis:

Under the Federal railroad safety laws, the FRA (by delegation from the Secretary), has regulatory and enforcement authority over all areas of railroad safety. This plenary authority certainly covers a modification of the method employed in the maintenance of hours-of-service records. There is currently no statutory or judicial requirement to make this modification.

Alternatives:

Because this rulemaking is at such a formative stage, it is premature to discuss alternatives. However, during the process of developing this waiver project, FRA will consider all reasonable alternatives.

Anticipated Costs and Benefits:

While FRA cannot yet conclusively provide an analysis of the costs and benefits of this project, it is estimated that this project will, after the initial cost of systems is recovered, yield savings to the industry of 2.3 million dollars annually for Class I railroads. These savings will flow from the elimination of the requirement to create 3.6 million paper records each year and to store 7.3 million records at any given time.

Risks:

As this project is designed to allow railroads to make technological improvements in the manner of creating and maintaining hours-of-service records, it is not anticipated that there will be any risks associated with allowing participating railroads to waive the requirements of paper recordkeeping.

DOT—Research and Special Programs Administration (RSPA)

PROPOSED RULE STAGE

94. +EMERGENCY FLOW-RESTRICTING DEVICES

Priority:

Other Significant

Legal Authority:

49 USC 60101 to 60125

CFR Citation:

49 CFR 195

Legal Deadline:

Final, Statutory, October 24, 1996.

Abstract:

This rulemaking would specify those circumstances under which operators of hazardous liquid pipelines are required to use emergency flow-restricting devices, and other procedures, systems, and equipment to detect and locate pipeline ruptures and minimize releases. This action is considered significant because of substantial public interest.

Statement of Need:

The adverse safety and environmental effects of pipeline accidents are often the result of an operator's failure to rapidly detecf and locate a leak and to rapidly shut down the pipeline. Quicker response to pipeline leaks through the strategic placement and use of emergency flow-restricting devices, with a reliable leak detection capability, can reduce the amount of liquid spilled into the environment and the consequent damages to life and property.

Summary of the Legal Basis:

Section 212 of the Pipeline Safety Act of 1992 requires the Secretary to survey and assess the effectiveness of emergency flow-restricting devices (including remotely controlled valves and check valves) and other equipment used to detect and locate pipeline ruptures and minimize product releases. Section 212 requires the Secretary, within 2 years after completing the survey and assessment, to issue regulations prescribing the circumstances under which operators of hazardous liquid pipeline facilities must use emergency flow-restricting devices or other equipment.

Alternatives:

The alternatives under consideration are different types of emergency flow-restricting devices and associated leak detection systems, and the sites that would maximize the usefulness of these devices and systems.

Anticipated Costs and Benefits:

The potential costs and benefits of this action have not yet been determined.

Risks:

This action addresses the increased risks to safety and the environment that result from the lack of prompt response to a line leak. Although the magnitude of potential risk reduction has not yet been determined, an example of the type of accident that this action might mitigate is the 1989 spill from an Exxon pipeline in the harbor between New York and New Jersey. Over 500,000 gallons of No. 2 fuel oil entered the water from a gash in the pipeline. A leak detection system that had been malfunctioning for 12 years failed to alert the operator to shut down the pipeline immediately.

This action is related to an action required by the Oil Pollution Act of 1990. This other action, now in effect under an interim final rule, but subject to change, requires operators to develop and execute approved oil spill response plans. Both actions are directed toward improving operators' accident response capabilities and minimizing accident consequences.

DOT—RSPA

FINAL RULE STAGE

95. +HAZARDOUS MATERIALS IN INTRASTATE COMMERCE

Priority:

Other Significant

Legal Authority:

49 USC 5101 to 5127

CFR Citation:

49 CFR 171 to 179

Legal Deadline:

None

Abstract:

This rulemaking proposes to extend the application of the hazardous materials regulations (HMR) to all intrastate transportation of hazardous materials in commerce. The 1990 amendments to Federal hazardous material transportation law mandate that the Research and Special Programs Administration (RSPA) regulate the safe transportation of hazardous materials in intrastate, in addition to interstate and foreign, commerce. The goal of this action is to raise the safety level of hazardous transportation by promoting national uniformity of the regulations. Currently the regulations generally do not apply to intrastate carriage by highway, with the exception of hazardous waste, hazardous substances, and flammable cryogenic liquids in portable tanks and cargo tanks. The supplemental notice would propose to extend the mandatory compliance date for regulations applicable to certain cargo tanks, and propose a "materials of trade" exception for relatively small quantities of hazardous materials contained on service vehicles operated by plumbing, welding, and lawn service companies.

Statement of Need:

Section 5103(b)(1) of Title 49, USC, specifies that the Secretary shall prescribe regulations for the safe transportation of hazardous materials in intrastate, interstate, and foreign commerce. This statutory mandate follows the Department's long-standing policy of encouraging the States to adopt the HMR as a means of promoting national uniformity and transportation safety. In addition, the Federal Highway Administration (FHWA) requires States to adopt and enforce the highway-related portions of the HMR to qualify for grants under FHWA's Motor Carrier Safety Assistance Program.

Comments submitted in response to the original notice of proposed rulemaking advised RSPA that many cargo tank motor vehicles currently used by farmers and small businesses would need to be removed from hazardous materials service far in advance of the useful life of the tanks, or require extensive retrofitting. Other commenters noted the potential for significant adverse impact on small businesses that engage in the incidental transportation of hazardous materials used in support of their non-transportation-related commercial activities. To adequately address these concerns, RSPA is considering certain proposals that would require prior notice to the regulated community.

Summary of the Legal Basis:

Section 5103(b)(1) of Title 49 USC, specifies that the Secretary shall prescribe regulations for the safe transportation of hazardous materials in intrastate, interstate, and foreign commerce.

Alternatives:

The statutory mandate to regulate the transportation of hazardous materials in intrastate commerce requires RSPA to take affirmative action. The alternative to the proposed action is to require immediate and uniform application of hazardous materials by motor vehicle.

Anticipated Costs and Benefits:

A preliminary regulatory evaluation prepared by RSPA considered potential costs and benefits in seven States (California, Georgia, Iowa, Illinois, Kansas, Texas, and Wyoming) having State regulations that are not in full conformance with the HMR. The preliminary estimate of costs and benefits for these seven States (where the regulatory cost impact would be the greatest) demonstrates a favorable benefit/cost ratio of approximately 3:1. The supplemental notice for "materials of trade" has the potential for annual savings by small businesses on the order of $50 million.

Risks:

There are several major considerations involved in developing uniform intrastate/interstate regulations for the transportation of hazardous materials in commerce. Most hazardous materials are of such a nature that no useful distinction can be made as to why intrastate transportation should be subject to less demanding safety standards than interstate counterparts. For example, the transportation of gasoline in a cargo tank presents the same level of risk to the public regardless of whether the transportation is intrastate or interstate.

It is neither economical nor efficient for each of the 50 states to duplicate RSPA's expertise and safety research efforts with respect to classification of hazardous materials; determination of transportation risks; and development of effective transportation safety standards. Economically and administratively, it is more efficient for State and local emergency response and enforcement personnel to focus on and become more proficient in one set of regulations that uniformly apply to the transportation of hazardous materials regardless of whether intrastate or interstate.

Emergency response personnel may not be able to make distinctions as to whether hazardous materials carriers are in intrastate or interstate service. Emergency response personnel reacting to incidents involving hazardous materials must first identify the specific hazards before determining a proper response. An inappropriate response involving an unfamiliar hazardous material carried intrastate by a cargo tank not subject to the HMR can significantly endanger the public, community, and environment. Also response to an incident involving materials, carried intrastate by a cargo tank, which are found to be nonhazardous, may cause inconvenience and needless economic hardship on the public and surrounding community. Communities have been evacuated on the mere suspicion that hazardous materials are present. Major roads and arteries have been closed and transportation patterns and delivery schedules have been disrupted or delayed because of poor or inadequate emergency planning and response. By adopting and becoming more proficient in one set of regulations, the effectiveness of State and local emergency response and enforcement programs will be increased, and transportation safety will be enhanced with respect to both intrastate and interstate transportation of hazardous materials.

This rule will address legitimate public concerns about incidents involving hazardous materials in intrastate commerce. Such incidents now lead to public concern regarding the transportation of hazardous materials and the risks associated with such movements in the form of increased State activity and Congressional pressure to further regulate both intrastate and interstate carriers of hazardous materials without regard to the underlying costs and benefits.

BILLING CODE 4910-60-P

DEPARTMENT OF THE TREASURY (TREAS)

Statement of Regulatory Priorities

The primary missions of the Department of the Treasury are: Protecting and collecting the revenue under the Internal Revenue Code and customs laws; supervising national banks and thrift institutions; managing the Community Development Financial Institutions Program and the Bank Enterprise Award Program; managing the fiscal operations of the Federal Government; enforcing laws relating to counterfeiting, Federal Government securities, firearms and explosives, foreign commerce in goods and financial instruments, and smuggling and trafficking in contraband; protecting the President, Vice President, and certain foreign diplomatic personnel; training Federal, State, and local law enforcement officers; and producing coins and currency.

Consistent with these missions, most regulations of the Department and its constituent bureaus are promulgated to interpret and implement the laws as enacted by the Congress and signed by the President. Unless circumstances require otherwise, it is the policy of the Department to issue a notice of proposed rulemaking (NPRM) and carefully consider public comments before adopting final regulations. Also, in particular cases the Department invites interested parties to submit views on rulemaking projects while the NPRM is being developed, and to hold public hearings to discuss a proposed rule.

To the extent permitted by law, it is the policy of the Department to adhere to the regulatory philosophy and principles set forth in Executive Order 12866 and to develop regulations that maximize aggregate net benefits to society while minimizing the economic and paperwork burdens imposed on persons and businesses subject to those regulations.

Pursuant to the President's regulatory reform initiative, each of the Department's regulatory offices and bureaus conducted a thorough page-by-page review of all of its regulations. As a result of this process, which included consultation with regulated entities, the Department identified over 2,200 pages of its nontax regulations in the Code of Federal Regulations (CFR) that will be streamlined or eliminated. In addition, the Internal Revenue Service identified over 1,200 pages of CFR regulations and other ruling documents that will be streamlined or eliminated. During fiscal year 1996, the Department will accord priority to implementing as many of these changes as possible, taking into consideration its ongoing regulatory responsibility to issue regulations necessary to implement or interpret the laws as enacted by the Congress.

Internal Revenue Service

The Internal Revenue Service (IRS), working with the Office of the Assistant Secretary (Tax Policy), promulgates regulations that interpret and implement the Internal Revenue Code and related tax statutes. In developing these regulations, every effort is made to carry out the tax policy determined by Congress in a fair, impartial, and reasonable manner, taking into account the intent of Congress, the realities of relevant transactions, the need for the Government to administer the rules and monitor compliance, and the overall integrity of the Federal tax system. The goal is to make the regulations practical and user-friendly by providing guidance that is as clear and simple as possible.

Most IRS regulations interpret tax statutes to resolve ambiguities or fill gaps in the tax statutes. This includes interpreting particular words, applying rules to broad classes of circumstances, and resolving apparent and potential conflicts between various statutory provisions.

During fiscal year 1996, the IRS will accord priority to the following regulations:

- *Substantiation and Disclosure Requirements for Certain Charitable Contributions.* The Omnibus Budget Reconciliation Act (OBRA) of 1993 amended the Internal Revenue Code to require a taxpayer desiring an income tax deduction for a charitable contribution of $250 or more to obtain a written acknowledgment of the contribution from the donee organization containing information not typically provided by donee organizations. In addition, OBRA 1993 amended the Internal Revenue Code to require donee organizations to supply a disclosure statement to the donor when the organization provided goods or services in return for a payment in excess of $75. In fiscal year 1995, proposed regulations were issued providing a number of simplifying and clarifying provisions to facilitate taxpayers' compliance with the new provisions. For example, the proposed regulations provide that certain token items and customary membership benefits that are offered to donors can be disregarded when calculating charitable contribution deductions or preparing acknowledgment and disclosure statements. Final regulations providing additional guidance will be published in fiscal year 1996.
- *Mark-to-Market Accounting for Dealers in Securities.* OBRA 1993 amended the Internal Revenue Code to require dealers in securities to account for their securities by marking them to market. The statutory definitions of the terms "security" and "dealer in securities" are extremely broad. Preliminary guidance in the form of temporary regulations was provided in 1993. A regulation providing additional guidance will be published in fiscal year 1996.
- *Allocation of Interest Expense to U.S. Trade or Business of a Foreign Corporation.* Section 882(a) of the Internal Revenue Code imposes a tax on the income of a foreign corporation that is effectively connected with the conduct of a trade or business within the United States (effectively connected income, or ECI). Section 882(c) allows deductions and credits only to the extent that they are connected with ECI, and further provides that the proper allocation and apportionment of deductions shall be determined as provided in regulations. Current regulations prescribe rules for allocating interest expense, using an approach that combines concepts of fungibility of funding and tracing of interest expense. Proposed regulations published in 1992 to replace existing rules better reflect the current economic environment and changes in the law since the original regulations were promulgated. The proposed regulations, among other things, impose a 96 percent cap on a bank's actual debt-to-assets ratio; reduce the elective fixed ratio to 93 percent; and eliminate the separate currency pool method of determining the appropriate interest rate for U.S. liabilities.
- *Original Issue Discount; Debt Instruments With Contingent Payments.* Sections 1271-1275 of the Internal Revenue Code, added by the Tax Reform Act of 1984, govern the taxation of debt instruments with original issue discount (OID). These sections provide that OID must be currently accrued by both issuers and holders of debt instruments on a constant yield basis, but the rules provided apply only to debt instruments calling for payments of principal and interest that are fixed

both as to timing and amount. Section 1275(d) of the Internal Revenue Code authorizes the issuance of regulations to address the taxation of OID on debt instruments providing for contingent payments. Proposed regulations issued in December 1994 address this issue; these regulations are expected to be finalized in fiscal year 1996.

- *Amortization of Intangible Assets.* OBRA 1993 added section 197 of the Internal Revenue Code to provide for a 15-year amortization of goodwill and certain other intangible assets. In addition, OBRA 1993 amended section 167 to provide specified amortization periods for certain computer software and mortgage-servicing rights. These provisions are generally effective for intangibles acquired after August 10, 1993. Proposed regulations will be issued to implement these two Code sections and provide guidance to taxpayers on the meaning and scope of certain provisions of the statute and its antichurning rules.
- *Withholding Tax Regulations Under Section 1441.* Section 1441 requires withholding of income tax on most payments of U.S. source income made to foreign persons. New regulations under section 1441 will streamline and modernize the existing regulations by coordinating the domestic reporting and backup withholding provisions and the section 1441 withholding requirements. Special provisions for omnibus accounts also will be provided.

Office of the Comptroller of the Currency

The primary mission of the Office of the Comptroller of the Currency (OCC) is to ensure a strong, safe-and-sound banking system that supports economic growth. The OCC's other goals include promoting bank competitiveness, increasing the efficiency of bank supervision (including reducing regulatory burden), and ensuring fair and equal access to credit. The OCC achieves these goals by regularly examining approximately 3,100 national banks with about $2 trillion in assets, representing approximately 56 percent of the total assets of commercial banks. In addition, the OCC issues rules and regulations that implement Federal law governing national banks, as well as taking actions against national banks that do not conform to laws and regulations, or that engage in unsound banking practices. The OCC also approves or denies applications for new national bank charters, branches, capital, or other changes in corporate or banking structure.

The OCC's Regulation Review Program, which was instituted in mid-1993, comprises a top-to-bottom review of all OCC regulations. This review embodies a fundamental rethinking of the OCC's approach to regulation, designed to better tailor the rules it imposes to the goals it seeks to achieve. The program is part of the agency's overall effort to promote the President's Regulatory Reform efforts by creating an environment where risk is prudently managed by banks and appropriately monitored by their regulator, without imposing unnecessary regulatory burdens that undermine the ability of banks to operate efficiently and provide credit and other financial products and services to their customers.

The program seeks to ensure that all OCC regulations are focused on those activities and products that present the greatest risks to safety and soundness, the payments system, or the general economic stability of the Nation. Critical elements of the program are to identify and eliminate rules that impose burdens on banks that are not necessary to maintain bank safety and soundness, to support equitable access to banking services for consumers, or to accomplish other statutory responsibilities of the OCC. Rules also are being examined to determine if they achieve their purpose at the least possible cost to the regulated institutions.

The following are some of the OCC's priority Regulation Review Program projects for fiscal year 1996:

- *Investment Securities*: The regulation that prescribes standards under which national banks purchase, sell, deal in, and underwrite investment securities are being substantially revised and rewritten. The revisions will reorganize the rules by placing related subjects together, clarify areas where the rules are unclear, and update various provisions to address market developments and to incorporate significant OCC interpretations, judicial decisions, and amendments to the governing statute.
- *Corporate Activities*: The OCC has published proposed regulations to revise the rules, policies, and procedures for national bank corporate activities and corporate transactions to make the regulations more user-friendly and to incorporate more flexible supervisory approaches for banks that are healthy and well-managed. The proposed revised rules (a) restructure and update the regulations by incorporating interpretive rulings and significant OCC interpretative positions; (b) establish procedures that will allow certain eligible banks to receive expedited approval of their applications for branches, corporate reorganizations, operating subsidiaries, and office relocations; (c) seek to achieve greater clarity by setting forth the application requirements for various filings and including directions that explain the contents of each section; and (d) recognize the evolution of the "business of banking" by introducing new approaches in areas such as operating subsidiaries and branching which provide additional flexibility for national bank activities.
- *Interpretive Rulings*: The OCC has proposed a revision to its interpretive rulings pertaining to national banks. Under the proposal the rulings are being reorganized and updated to reflect current policies and interpretations and to delete obsolete provisions, and to add new interpretive rulings to address current issues regarding permissible national bank activities.
- *Fiduciary Powers and Collective Investment Funds*: The regulation pertaining to the exercise of fiduciary powers by national banks is being modified to make less burdensome the requirements regarding the exercise of fiduciary powers, while preserving appropriate protection for trust customers. The review will also consider the manner in which investment advisory services are currently regulated, and whether provisions more tailored to investment advisory functions should be added. The revised regulation will also reflect recent court and administrative decisions relating to, among other things, collective funds for IRA and Keogh accounts.
- *Community Development Corporation and Project Investments*: The regulation relating to community development corporations and project investments is being revised to conform its standards and procedures to the processes and concepts employed in other OCC regulations. The OCC also is exploring alternatives that would give banks greater flexibility in conducting their community development activities and investments.
- *International Banking*: The regulations governing the international operations of national banks and the operations of foreign banks through Federal branches and agencies in the United States are being streamlined to reduce

compliance costs. The revised regulations will consolidate most of the OCC's regulations relating to international activities into Part 28, to improve clarity. The new regulations also will implement and clarify provisions of the Foreign Bank Supervisory Enhancement Act of 1991 relating to Federal branches and agencies.

- *Extensions of Credit to Insiders*: The rules limiting extensions of credit to national bank insiders are being reviewed to determine the extent to which burden and complexity can be reduced by achieving greater conformity with the standards in the OCC lending limits regulations.
- *Real Estate Lending and Appraisals*: The OCC has begun a comprehensive review of its real estate lending and appraisal regulations. The OCC has already published a final rule that relieved unnecessary burdens imposed by the original appraisal rule by raising the threshold loan amount for which appraisals are required, and providing other, prudent exceptions to the appraisal requirements.

Office of Thrift Supervision

As the primary Federal regulator of the thrift industry, the Office of Thrift Supervision (OTS) has established regulatory objectives and priorities to effectively and efficiently supervise thrift institutions. These include maintaining and enhancing the safety and soundness of the thrift industry; a flexible, responsive regulatory structure that enables savings associations to provide credit and other financial services to their communities, particularly housing credit; and an approach to supervision that is risk-focused and proactive. These objectives and priorities are consistent with those established by the President.

Pursuant to section 303(a) of the Community Development and Regulatory Improvement Act of 1994 (CDRIA) and the President's regulatory reform initiative, the OTS has conducted a page-by-page review of its regulations to determine whether each is necessary, imposes the least possible burden consistent with safety and soundness, and is written in a clear and straightforward manner. As a result of this review, OTS is undertaking a five-step process to improve its regulations:

First, the OTS is seeking public comment on a number of potential ways the OTS could streamline and restructure its regulations to make them more user-friendly.

Second, the OTS is seeking comment on the elimination of a number of individual regulations as well as entire parts of the Code of Federal Regulations that the agency has identified as outdated or unnecessary.

Third, under the auspices of the Federal Financial Institutions Examination Council, the OTS is participating with the other Federal banking agencies in implementing section 303(a)(2) of CDRIA by making regulations and guidance implementing common statutory provisions and supervisory policies more uniform.

Fourth, the OTS has identified and brought to the attention of the Congress certain statutory impediments to updating some regulations. These include the liquidity regulations required by section 6 of the Home Owners' Loan Act (HOLA), the requirement that Federal savings associations maintain membership in a Federal Home Loan Bank required by HOLA section 5(f), and additional lending flexibility under the Qualified Thrift Lender Test required by HOLA section 10(m).

Finally, the OTS will be substantively revising a number of its regulations. During fiscal year 1996, the OTS will accord priority to developing regulatory proposals to make significant burden-reducing changes in a number of key areas of its regulations, including those governing lending, subsidiaries, charters and bylaws, insurance, preemption, and adjustable-rate mortgages.

In its regulatory plan for fiscal year 1995, the OTS identified as its most important significant regulatory action the overall review of its regulations implementing the Community Reinvestment Act (CRA). The OTS adopted a final rule completing this regulatory reform action and revising its CRA regulations on May 4, 1995 (60 FR 22156). This final rule emphasizes performance, rather than process, in establishing a framework to assess depository institutions' records of helping to meet the credit needs of their communities. The rule should promote consistency in evaluations, eliminate unnecessary burdens, and reduce recordkeeping and reporting requirements.

United States Customs Service

The United States Customs Service is responsible for administering laws concerning the importation of goods into the United States. This includes inspecting imports, collecting applicable duties, overseeing the activities of persons and businesses engaged in importing, and enforcing the laws concerning smuggling and trafficking in contraband. The regulatory priorities of Customs for fiscal year 1996 are to continue to facilitate procedures for legitimate commercial transactions and to provide further obstacles to the flow of narcotics and other contraband into the United States.

During fiscal year 1995, one of Customs priorities was to issue a regulation to permit the Commissioner of Customs to conduct limited test programs to implement the National Customs Automation Program mandated under the customs modernization provisions of the North American Free Trade Agreement Implementation Act (NAFTA). Customs did issue that regulation, which enables Customs to ask members of the trade community to volunteer and participate in tests that will help evaluate alternative approaches to achieving more efficient and effective processing of passengers, carriers, and merchandise before rulemaking procedures are initiated. Two tests are underway now—one relating to remote location filing and another relating to reconciliation. Customs plans to conduct more tests this year that will assist Customs in modernizing and streamlining the way it does business with the trade community.

During fiscal year 1996, Customs plans to undertake several regulatory actions that will affect the traveling and importing public, customs brokers, carriers, and commercial importers. Customs will be continuing the reinvention of its regulatory procedures begun under authority granted by NAFTA. Customs reinvention efforts, in accordance with the principles of Executive Order 12866, have involved and will continue to involve much input from the importing public. During fiscal year 1996, Customs will accord priority to several regulatory actions focusing on the development of a more automated environment to expedite the entry, processing, and release of imported commercial merchandise. These regulations will benefit the importing public by facilitating the work of Customs officers and the trade community. Among the actions that Customs will pursue in this regard, which will improve the efficiency of Customs operations, reduce paperwork and administrative costs, are:

- Allowing for paperless procedures regarding extension and suspension of liquidation notices, and generally improving and clarifying the administrative process and

simplifying the regulations pertaining to liquidations and extensions and suspensions of liquidation notices.
- Allowing elements of an entry, other than those relating to the admissibility of merchandise, that are undetermined at the time an entry summary or an import activity summary statement is required to be submitted, to be provided to Customs at a later date. This reconciliation process will expedite the release of commercial merchandise.
- Accrediting commercial laboratories to permit them to analyze a wide range of commercial products for Customs purposes. This change will facilitate the release of merchandise because it will enable importers to receive laboratory results earlier.

Also during fiscal year 1996, Customs plans to:
- Develop more uniform rules for determining the country of origin of merchandise under the Customs and related laws (including for-country-of-origin marking and duty assessment purposes) to provide predictability and certainty for Customs and the trade community; and
- Amend its regulations to reflect a reorganization that will make the agency more efficient and responsive to its customers.

Bureau of Alcohol, Tobacco and Firearms

The Bureau of Alcohol, Tobacco and Firearms (ATF) issues regulations to enforce the Federal laws relating to the manufacture and commerce of alcohol products, tobacco products, firearms, and explosives.

ATF's regulations carry out these missions and are designed to:
- Curb illegal traffic in, and criminal use of, firearms and assist State, local, and other Federal law enforcement agencies in reducing crime and violence;
- Facilitate investigations of violations of Federal explosives laws, including arson-for-profit schemes;
- Regulate the alcohol, tobacco, firearms, and explosives industries, including the issuance of licenses and permits;
- Assure the collection of all alcohol, tobacco, firearms, and ammunition tax revenues and obtain a high level of voluntary compliance with those laws;
- Suppress commercial bribery, consumer deception, and other prohibited practices in the alcoholic beverage industry;
- Suppress the illicit manufacture and sale of alcoholic beverages for which Federal tax has not been paid; and
- Assist the States in their efforts to eliminate interstate trafficking in, and the sale and distribution of, cigarettes in avoidance of State taxes.

In its fiscal year 1995 regulatory plan, ATF accorded priority to issuing regulations implementing the provisions of the Brady handgun law and adding standards necessary to effectively enforce the exclusion provisions of the Federal Alcohol Administration (FAA) Act. Final regulations implementing the Brady law were issued on February 27, 1995 (60 FR 10782); final regulations concerning the exclusion provisions of the FAA Act were issued on April 26, 1995 (60 FR 20402).

Pursuant to the President's regulatory reform initiative, ATF conducted a page-by-page review of all of its regulations. In addition, ATF published a notice in the **Federal Register** requesting comments from the public concerning obsolete, unnecessary, and burdensome regulations. Copies of this notice were mailed to 30 trade associations representing the alcohol, tobacco, firearms, ammunition, and explosives industries. As a result of this process, ATF identified over 650 pages of its regulations in the Code of Federal Regulations that it will streamline or eliminate. During fiscal year 1996, ATF will accord priority to making as many of these changes as possible. For example, ATF expects to replace the alcoholic beverage label and formula approval system with a simplified registration system, to streamline the registration and operational activity requirements for small breweries (brewpubs), and to reduce the administrative burdens associated with the current basic permit application process for producers, wholesalers, and importers of alcoholic beverages.

ATF is also according priority during fiscal year 1996 to issuing a final rule implementing Public Law 103-322, the Violent Crime Control and Law Enforcement Act of 1994. This project is described below, as RIN 1512-AB35.

Financial Management Service

Regulations of the Financial Management Service (FMS) are promulgated to implement its mission of improving the quality of government financial management by linking program and financial management objectives, and by providing financial services, information, advice, and assistance. The FMS serves taxpayers, the Treasury Department, Federal program agencies, and government policymakers.

FMS's regulatory objectives for fiscal year 1996 include integrating new technologies to process Federal payments and collections more efficiently. The FMS plans to implement an Electronic Federal Tax Payment System in April 1996. This system will eliminate paper processing. Concurrent with this effort, the FMS plans to revise the Government's Automated Clearinghouse (ACH) standards to meet the needs of the new tax payment system. These changes will speed the flow of funds to the Treasury and ease the regulatory burden on private industry. These initiatives relate to the President's goals of improving technology to streamline financial services, and of using electronic funds transfers where possible.

Bureau of the Public Debt

The Bureau of the Public Debt administers regulations governing transactions in government securities effected by government securities brokers and dealers to fulfill the Treasury's statutory responsibility to safeguard the efficient functioning of the government securities market.

The Government Securities Act of 1986 (GSA), as amended, authorizes the Secretary of the Treasury to prescribe rules governing financial responsibility, the protection of customer funds and securities, and recordkeeping and reporting for all government securities brokers and dealers, including financial institutions. These rules are designed to prevent fraudulent and manipulative acts and practices and to protect the integrity, efficiency, and liquidity of the government securities market. The Department is committed to implementing rules that make sense from both a regulatory and market efficiency perspective. Accordingly, pursuant to Executive Order 12866, the Department seeks to balance the benefits of regulation with the compliance costs imposed on the government securities market and its participants.

The GSA regulations establish a consistent regulatory approach for all government securities brokers and dealers, including both securities firms and financial institutions, in a manner which minimizes the creation of any competitive advantages for any class of firm. Consistent with the principles in Executive Order 12866 and regulatory reform initiatives, regulations are only developed after actively involving market participants in the rulemaking process and fully considering existing regulations applicable to various broker/dealers, including financial institutions. The regulations are designed to minimize burdens and duplication or overlap with existing regulations. To help meet this objective, the Treasury actively consults with other regulatory organizations, including the Securities and Exchange Commission (SEC) and the bank regulators, to better coordinate its activities in securities regulation.

During fiscal year 1996, priority will be accorded to the following regulation:
- *Holders of Large Positions in Treasury Securities.* This regulation will establish recordkeeping and reporting requirements for holders of large positions in specific Treasury securities. The objectives of the regulation are to identify and monitor concentrations of ownership in Treasury securities, to assist regulators in conducting market surveillance, and to help the SEC carry out its enforcement duties under the Federal securities laws. This regulation will be promulgated under authority granted the Treasury in the Government Securities Act Amendments of 1993.

Financial Crimes Enforcement Network

The regulations of the Financial Crimes Enforcement Network (FinCEN) constitute the core of Treasury's anti-money-laundering initiative and are an essential component of Treasury's law enforcement and antinarcotics efforts. The Bank Secrecy Act (BSA) authorizes the Secretary of the Treasury to issue regulations requiring financial institutions to keep records and file reports that are determined to have a high degree of usefulness in criminal, tax, or regulatory proceedings, and to implement counter-money-laundering programs and compliance procedures.

Since mid-1994, FinCEN has been engaged in a thorough review of its regulatory policies and has been building a partnership between Government and the financial sector to fight money-laundering. The keystone of that partnership is the recognition that only a cooperative relationship between Government and industry can provide a way to implement a three-pronged strategy of prevention, detection, and enforcement against those who truly seek to use the financial system to promote or further illegal activity. FinCEN recognizes that BSA compliance imposes costs on the financial community, and that it should only require recordkeeping and reporting when the benefits to the Government are clear. In the coming year, FinCEN will continue to review and revise its existing regulations. In all cases, FinCEN will continue to work with the financial community to reduce administrative burdens associated with complying with the statutes while enhancing the usefulness of BSA information for law enforcement, financial regulators, and policymakers.

During fiscal year 1995, FinCEN completed a number of important regulatory projects, including the following:
- *Simplified Cash Transaction Report (CTR) Form.* As part of the general effort to reduce reporting burdens and emphasize the reporting of suspicious transactions, FinCEN developed and introduced a new CTR form, which became effective October 1, 1995.
- *Casino Recordkeeping Rules.* After extensive consultations with the industry, FinCEN issued final recordkeeping rules for casinos that were significantly less burdensome than the rules originally proposed.
- *Funds Transfer Regulations.* FinCEN, both independently and jointly with the Board of Governors of the Federal Reserve System, published in early 1995 final rules relating to recordkeeping for funds transfers. FinCEN will accord priority to revising certain aspects of these regulations during fiscal year 1996 (see below).

During fiscal year 1995, FinCEN also withdrew as unnecessary proposed regulations (a) regarding the mandatory aggregation of currency transactions and the filing of CTRs by magnetic media, and (b) requiring that financial institutions verify and record identifying information about purchasers of certain monetary instruments valued at $3,000 or more.

During fiscal year 1996, FinCEN is initiating a general revision and simplification of all of its regulations, and will also accord priority to the following projects:
- *Funds Transfer Regulations.* In response to concerns raised by the banking industry, FinCEN expects to finalize amendments to its funds transfer regulations.
- *Indian Gaming.* FinCEN will issue final regulations governing reporting and recordkeeping by tribal casinos, implementing a 1994 amendment to the BSA. This project is one step in a general effort to unify and simplify the application of the Bank Secrecy Act to gaming establishments.
- *Suspicious Transaction Reports.* FinCEN will issue final regulations concerning suspicious transaction reporting by banks. A similar regulation concerning nonbank financial institutions will also be issued. The new reporting system will greatly reduce the burdens on the financial industry.
- *Exemptions from CTR Requirements.* As required by legislation enacted in 1994, FinCEN will seek to reduce the number of CTRs required to be filed by 30 percent. FinCEN expects to exempt many transactions from the CTR filing requirement, including those between banks, between banks and Government entities, and between banks and certain businesses.

Community Development Financial Institutions Fund

The Community Development Financial Institutions Fund was established by the Community Development Banking and Financial Institutions Act of 1994 (12 U.S.C. 4701 et seq.) The primary purpose of the Fund is to provide investments in and assistance to community development financial institutions (CDFIs), principally through the CDFI Program. The Fund also administers the Bank Enterprise Award (BEA) Program, which encourages insured depository institutions to engage in certain eligible development activities and to make equity investments in CDFIs. The Fund's regulatory priorities for fiscal year 1996 are to issue a temporary regulation for public comment in October 1995 in order to immediately conduct an initial round of funding for the CDFI and BEA Programs, and to finalize these regulations in May 1996. This project is described below (RIN 1505-AA71).

TREAS—Departmental Offices (DO)

FINAL RULE STAGE

96. • COMMUNITY DEVELOPMENT FINANCIAL INSTITUTIONS PROGRAM; BANK ENTERPRISE AWARD PROGRAM REGULATIONS

Priority:

Other Significant

Legal Authority:

12 USC 4703; 12 USC 4713; PL 104-19; 42 USC 4332

CFR Citation:

12 CFR 1805 (New); 12 CFR 1806 (New); 12 CFR 1815 (New)

Legal Deadline:

None

Abstract:

Not applicable; any costs and benefits associated with this rule are derived from the CDFI and BEA provisions of the Community Development Banking and Financial Institutions Act of 1994 as enacted by the Congress.

Statement of Need:

The Department of the Treasury is issuing a temporary rule for public comment to implement two new programs that will be administered by the Community Development Financial Institutions (CDFI) Fund: the CDFI Program and the Bank Enterprise Award (BEA) Program. These programs were authorized by the Community Development Banking and Financial Institutions Act of 1994. The CDFI Program will provide financial and technical assistance to selected applicants in order to enhance their ability to make loans and investments and provide services for the benefit of designated investment areas and targeted populations. The purpose of the BEA Program is to encourage insured depository institutions to engage in certain eligible development activities within distressed communities and to make equity investments in CDFIs. The regulations establish eligibility criteria and application procedures for financial assistance through these programs. The regulations also establish the appropriate environmental review procedures for these two programs.

Summary of the Legal Basis:

Section 119 of the Community Development Banking and Financial Institutions Act of 1994 requires the promulgation of regulations to carry out the CDFI and BEA programs.

Alternatives:

Not applicable; this regulation merely implements the CDFI and BEA provisions of the Community Development Banking and Financial Institutions Act of 1994 as enacted by the Congress.

Anticipated Costs and Benefits:

Not applicable; any costs and benefits associated with this rule are derived from the CDFI and BEA provisions of the Community Development Banking and Financial Institutions Act of 1994 as enacted by the Congress.

Risks:

Not applicable.

97. IMPLEMENTATION OF PUBLIC LAW 103-322, THE VIOLENT CRIME CONTROL AND LAW ENFORCEMENT ACT OF 1994

Priority:

Other Significant

Legal Authority:

5 USC 522(a); 18 USC 847; 18 USC 921 to 930; 18 USC 1261; 19 USC 1607; 19 USC 1610; 19 USC 1612 to 1613; 19 USC 1618; 26 USC 7101; 26 USC 7322 to 7326; 31 USC 9301; 31 USC 9303 to 9304; 31 USC 9306; 40 USC 304(k); 44 USC 3504(h); ...

CFR Citation:

27 CFR 55; 27 CFR 72; 27 CFR 178; 27 CFR 179

Legal Deadline:

None

Abstract:

The Bureau of Alcohol, Tobacco, and Firearms (ATF) is issuing this temporary rule to implement the provisions of Public Law 103-322, the Violent Crime Control and Law Enforcement Act of 1994, enacted September 13, 1994. These regulations implement the law by restricting the manufacture, transfer, and possession of certain semiautomatic assault weapons and large-capacity ammunition feeding devices. Regulations are also prescribed with regard to reports of theft or loss of firearms from a licensee's inventory or collection, new requirements for Federal firearms licensing, responses by firearms licensees to requests for gun trace information, possession of firearms by persons subject to restraining orders, and possession of a handgun, or ammunition for a handgun, by juveniles.

Statement of Need:

Issuance of this regulation is necessary to implement the provisions of the Violent Crime Control and Law Enforcement Act of 1994, and ATF issued a temporary rule and a cross-reference notice of proposed rulemaking in April 1995. The temporary rule implements this law by restricting the manufacture, transfer, and possession of certain semiautomatic assault weapons and large-capacity ammunition-feeding devices. The regulation also concerns reports of the theft or loss of firearms from a licensee's inventory or collection; new requirements for Federal firearms licensing; responses by firearms licensees to requests for gun trace information; possession of firearms by persons subject to restraining orders; and possession of a handgun, or ammunition for a handgun, by juveniles. AFT expects to issue a final rule in early 1996.

Summary of the Legal Basis:

The Violent Crime Control and Law Enforcement Act of 1994 amended the Gun Control Act of 1968 (GCA) by prohibiting the manufacture, transfer and possession of semiautomatic assault weapons (with certain exceptions). The 1994 Act also amended the GCA to make it unlawful to transfer or possess large capacity ammunition-feeding devices, as well as the possession of firearms by certain persons.

Alternatives:

Not applicable; no alternatives are possible because this regulation merely implements the provisions of the Violent Crime Control and Law Enforcement Act of 1994 as enacted by the Congress.

Anticipated Costs and Benefits:

Not applicable; any costs and benefits associated with this rule are derived from the Violent Crime Control and

Law Enforcement Act of the 1994 as enacted by the Congress.

Risks:

Not applicable.

DEPARTMENT OF VETERANS AFFAIRS (VA)

Statement of Regulatory Priorities

The Department of Veterans Affairs (VA) is the custodian and administrator of important public obligations to those who served this Nation. The VA's regulatory responsibility is almost solely confined to carrying out the mandate of the laws enacted by Congress relating to programs for veterans and their beneficiaries. VA's major regulatory objective is to implement these laws with fairness, justice, and efficiency.

Most of the regulations issued by the VA involve three VA components: the Veterans Benefits Administration, the Veterans Health Administration, and the National Cemetery System. The basic goal of the Veterans Benefits Administration is to provide high-quality and timely nonmedical benefits to eligible veterans and their beneficiaries. The principal goal of the Veterans Health Administration is to provide high-quality health care on a timely basis to eligible veterans through its system of medical centers, nursing homes, domiciliaries, and outpatient medical and dental facilities. The National Cemetery System's primary mission is to bury eligible veterans, members of the Reserve components, and their dependents in VA National Cemeteries and to maintain those cemeteries as national shrines in perpetuity as a final tribute of a grateful Nation to honor the memory and service of those who served in the Armed Forces.

The VA is conducting regulatory reform initiatives. After obtaining input from representatives of veterans service organizations and other interested individuals, VA personnel undertook a line-by-line review of the more than 1,700 pages of VA regulations published in the Code of Federal Regulations. Actions are now underway to make appropriate changes. Consistent with the President's goals, this is the beginning of VA's effort to create better and more effective regulations governing the programs the VA administers for the Nation's veterans and their beneficiaries.

VA

FINAL RULE STAGE

98. SCHEDULE FOR RATING DISABILITIES—THE CARDIOVASCULAR SYSTEM

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

38 USC 1155

CFR Citation:

38 CFR 4.100; 38 CFR 4.101; 38 CFR 4.102; 38 CFR 4.103; 38 CFR 4.104

Legal Deadline:

None

Abstract:

The Department of Veterans Affairs (VA) is conducting the first comprehensive review of its rating schedule since 1945. These revisions will update the rating schedule to ensure that it uses current medical terminology and unambiguous criteria, and that it reflects medical advances that have occurred since the last review.

Statement of Need:

Because evaluation criteria in the rating schedule are based on medical findings, the advances that have occurred in medicine since the last overall revision of the rating schedule in 1945 need to be incorporated into the schedule so that it reflects the current state of medicine, including the use of new techniques and procedures, such as liver and heart transplants. Some medical terms and nomenclature in the current schedule are obsolete, and the course of some illnesses has changed because of modern therapy. The rating schedule criteria need to reflect these advances. There are also new disease entities that have been defined or become more common since the last revision.

Summary of the Legal Basis:

Under 38 USC 1155, the Secretary of Veterans Affairs is required to establish a schedule for rating disabilities and has the authority to readjust the schedule from time to time in accordance with experience.

Alternatives:

Although VA has made some ad hoc revisions and additions to the rating schedule, this is the first comprehensive review since 1945. We could continue to make ad hoc revisions; however, we feel that this would be inadequate. We also intend to review three to four body systems per year on a cyclical basis to ensure that the schedule remains current.

Anticipated Costs and Benefits:

There are no known administrative costs directly related to these regulatory amendments of 38 CFR, part 4. The same personnel will adjudicate disability claims utilizing the same procedures. There are no readily ascertainable entitlement costs or savings related to these amendments. There is no accurate way to quantify their impact. We expect these revisions to result in greater precision and consistency within the disability evaluation process, but anticipate no net savings or cost within the entitlement account.

Risks:

None known.

VA

99. ELIGIBILITY REPORTING REQUIREMENTS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

38 USC 501(a)

CFR Citation:

38 CFR 3.256; 38 CFR 3.277

Legal Deadline:

None

Abstract:

The Department of Veterans Affairs (VA) is amending its adjudication regulations regarding submission of annual eligibility verification reports (EVRs) by changing the criteria for determining who would be required to submit EVRs.

Statement of Need:

EVRs are used to obtain information for determining continued eligibility for pension or parents' dependency and indemnity compensation (DIC). Until recently, VA was required by law to secure a completed EVR at least once a year from every pension beneficiary and every parents' DIC beneficiary under the age of 72. Public Law 103-271 gave the Secretary of Veterans Affairs discretionary authority to require submission of income and resource reports by recipients of income-based benefits. It appears that, in most cases, VA can obtain the necessary information for these income-based benefits from computer matches. In addition to reducing VA processing costs, VA estimates that adoption of the proposal would reduce the number of persons required to submit an EVR during a calendar year from 825,000 to 325,000, and would reduce the total annual reporting hours for the EVRs from 412,000 to 162,500 hours.

Summary of the Legal Basis:

38 U.S.C. 501, 1315,1506

Alternatives:

VA could have continued to require annual submission of EVRs by all beneficiaries of income-based benefits.

Anticipated Costs and Benefits:

No direct benefit savings or costs are expected from these amendments. Since VA estimates that roughly 500,000 fewer EVRs will be processed at regional offices, VA expects to be able to redirect approximately 135 full-time employees from EVR processing to other claims processing activities.

Risks:

VA conducts regular computer matches with the Social Security Administration, the Internal Revenue Service, and other Federal Agencies. These matches furnish information about income received by recipients of VA's means-tested programs. These matches are keyed to the beneficiary's Social Security number. The Social Security Administration furnishes information about the rate of Social Security benefits paid to VA beneficiaries shortly after the annual cost-of-living adjustment is accomplished. VA uses this information to verify the accuracy of Social Security rate information in its records. Since this Social Security rate information is current, it is not necessary to require beneficiaries whose Social Security numbers have been verified by the Social Security Administration, and who have no other income, to submit an annual EVR. Historically, few pensioners who have reported no income or only Social Security income start receiving income from some new source. VA will continue to require completion of annual EVR by any beneficiary whose Social Security number or whose spouse's Social Security number has not been verified by the Social Security Administration, since we cannot rely on computer matches to verify their income. We will also require submission of annual EVRs by beneficiaries with income other than Social Security. VA retains the authority to require any beneficiary to complete an EVR if it determines that submission of an EVR is necessary to preserve program integrity.

ENVIRONMENTAL PROTECTION AGENCY (EPA)

Statement of Regulatory Priorities

EPA's Commitment to Change

When President Clinton and Vice President Gore came into office more than 2 1/2 half years ago, they made a public commitment to simplifying, streamlining, and reducing the costs of the Federal Government. While emphasizing the importance of the Federal Government's functions, they made it clear that those functions could be carried out in commonsense, cost-effective ways. The reinvention and improvement of the Federal Government thus has been one of the hallmarks of the Clinton Administration.

Administrator Browner of EPA has made that same commitment to simplify, streamline, and reduce the costs of Federal programs to better protect the environment and public health. She has applied common-sense principles to all EPA's actions in order to promote cleaner, cheaper, and smarter environmental and public health protection. As a result, EPA today is in the midst of the most profound and comprehensive reevaluation and change in its history.

The Agency is changing its internal operations—restructuring organizations, streamlining management, and broadening employee responsibilities. It is changing its external relationships—shifting more responsibility to States, improving customer service, strengthening stakeholder partnerships, and emphasizing the constructive involvement of regulated entities. The Agency is reinventing itself with one eye on the past—building on the lessons learned through a quarter-century of regulatory experience. And it is reinventing itself with one eye on the future—developing a new generation of environmental protection to meet the emerging challenges of the 21st century.

Although the current environmental protection system has generated a cleaner environment, with substantial human health and ecological benefits, over the past 25 years, the system will not be sufficient to meet the environmental and economic challenges of the future. The health of the economy, the health of the American people, and the health of the environment are inextricably intertwined, and the linkages among them are becoming more complex over time. EPA is changing so that it is better prepared to protect and enhance all three simultaneously in the future.

EPA is the single Federal organization with primary responsibility for protecting the environment, and the Agency is committed to using all available tools—regulatory and nonregulatory—to protect the environment and public health of all Americans. At the same time, because EPA is only one of many entities—public and private—with environmental responsibilities, EPA is working to ensure that more information and decisionmaking are shared with the States, tribes, and communities affected by EPA's actions.

EPA is reshaping its environmental and public health protections to make them simpler and more sensible, especially to regulated entities. In many cases, all stakeholders, including businesses, communities, labor, and public interest groups, are participating in developing new, more effective, less costly approaches. EPA's employees are taking on new responsibilities in new programs: Enforcers are emphasizing compliance assistance, permitters are paying more attention to pollution prevention and market mechanisms, and rule writers are adopting innovative alternatives proposed by regulated industries, without sacrificing one ounce of public health protection. Resources are being targeted where risks are the greatest, and programs are being scaled back, if necessary, where risks are the least. Most important, EPA is emphasizing environmental and public health results, not the fulfillment of regulatory mandates, as its primary goal, because flexibility, good stewardship, and strong partnerships between the public and private sectors inspire better solutions to public health and environmental problems.

The Process

Although EPA's commitment to public health and environmental quality remains undiminished, the Agency is refining and improving the methods it uses to protect them. EPA has undertaken a number of reinvention efforts, such as the Common Sense Initiative and line-by-line review of its regulations, either on its own or in response to Presidential directives. On March 16, 1995, President Clinton announced 39 additional EPA projects that will further the reinvention of public health and environmental regulations.

Reinvention at EPA is not the sum of all the new activities currently underway. Neither is it an overlay of new activities in addition to the traditional work of the Agency. Rather, reinvention is the fundamental, comprehensive change of EPA, both in terms of its internal organization and external relationships, so that the Nation achieves more public health and environmental benefits at less cost by using a system that makes more sense to all the people involved. Thus most of EPA's regulatory activities in the years ahead will incorporate parts of, or respond to, this overall reinvention effort at the Agency.

EPA's reinvention effort is intended to achieve two distinct purposes. First, it is aimed at strengthening the current system, which is largely composed of regulations driven by existing environmental laws that mandate action by regulated entities and, in many cases, specify public health and environmental goals. Second, EPA is building a new system that will use innovative, nonprescriptive, consensus-based techniques to achieve environmental and public health goals beyond those set by existing laws.

Strengthening the Current System

EPA is strengthening the current regulatory system in three basic ways by:

1. Simplifying Regulations and Reporting Requirements

The Agency is reexamining all environmental regulations and reporting requirements now in place in order to simplify and streamline them, and to reduce the time and costs associated with them, without compromising public health or the environment. For example, last February the President announced that all Federal agencies would conduct a line-by-line review of their regulations and then eliminate those that were obsolete or redundant. EPA is proposing to delete more than a thousand pages from the Code of Federal Regulations or more than 10 percent of the pages currently devoted to EPA regulations. In response to the President's March 16 directive to reduce paperwork requirements imposed on regulated entities by 25 percent, the Agency is identifying all monitoring, recordkeeping, and reporting requirements that can be eliminated. EPA is developing a one-stop emissions report (consolidating multiple environmental reports that businesses now are required to submit to the Agency) and a consolidated air rule (combining all Federal air quality regulations facing a specific industry into one comprehensive rule). EPA also has established a permits improvement team to streamline permit programs, reduce their administrative costs, and enhance pollution prevention and public participation in the permitting process. Many of the rules in EPA's regulatory plan and regulatory agenda will help accomplish this kind of simplification and streamlining.

2. Defining New Roles and Responsibilities

Reinvention necessarily involves changing the relationships among EPA offices and between EPA and the various stakeholders involved in and affected by environmental protection programs. Externally, EPA is encouraging increased authority and flexibility for State, tribal, and local governments through its State capacity building project and Performance Partnership Grants. EPA also is consulting regularly with regulated industries early in rule development by relying on types of consensus-based rulemaking, such as regulatory negotiation. Internally, EPA is streamlining management by reducing the ratio of supervisors to employees and reorganizing virtually every program and regional office. EPA also is reshaping the budget process to support reinvention initiatives and principles.

3. Retargeting Existing Programs to Achieve Better Results

EPA is proposing specific, targeted improvements in existing programs. For example, EPA is modifying the Resource Conservation and Recovery Act (RCRA) program to refocus hazardous waste regulations on the high risk wastes. In addition, EPA convened a multistakeholder process to identify specific RCRA requirements that could be revised to reduce costs and increase environmental benefits. The Agency is recommending changes in EPA's drinking water program to focus drinking water treatment requirements on the highest risks to public health. EPA also will expand pollution trading markets in specific airsheds and watersheds to increase flexibility and reduce costs. Again, the entries in EPA's regulatory plan will help accomplish these improvements.

Building a New Generation of Environmental Protection

Strengthening the existing regulatory system will not, by itself, do enough to achieve EPA's reinvention goals. So EPA is testing new, innovative ideas that promise either lower costs, greater environmental benefits, or both. Three basic kinds of new activities will help EPA build a new system that ensures a new generation of environmental protection:

1. Industry and Facility-Based Programs

EPA is redesigning the regulatory system so that it makes more sense to the regulated community and costs less, while achieving greater environmental and public health benefits. The Common Sense Initiative (CSI)—the centerpiece of this effort—is bringing together representatives from industry, public interest and environmental justice organizations, labor, and State and local governments to find better ways of achieving environmental goals in six specific industries. Under Project XL, which promotes environmental excellence and leadership, specific facilities, whole industries, and government agencies subject to environmental regulations are testing new strategies that simplify procedures, reduce costs, and provide greater environmental benefits than under the current system. EPA's Design for the Environment project is testing the use of innovative designs, processes, and materials that improve both environmental and economic performance in specific industries.

2. Community-Based Programs

To increase the effectiveness of environmental programs, EPA is coordinating and integrating environmental protection efforts in specific places like local communities and ecosystems. Building on place-based approaches used in successful ecosystem management and watershed protection programs, the Agency will initiate XL for Communities to integrate environmental quality and economic development goals in specific communities. EPA also is working with communities and States to identify and provide site-specific risk assessment tools to help local decisionmakers determine their environmental priorities. To promote place-based planning for sustainable development, EPA is providing Sustainable Development Challenge Grants to several communities through a national competition.

3. New Results-Based Tools

Over the long term, EPA will shift its focus, and the focus of regulated industries, away from meeting narrowly defined regulatory requirements and toward the achievement of environmental results. Thinking about results unleashes innovation and helps the public and private sector find new solutions to old problems. EPA is experimenting with several results-based tools that will help businesses and communities better focus their efforts and thus achieve better environmental results. To improve compliance with environmental regulations, for example, EPA will provide compliance incentives for small businesses and communities, and it will establish compliance assistance centers for small businesses as well. To collect the information necessary to measure environmental results, and to indicate where further efforts are needed, EPA will establish a center for environmental information and statistics and ensure public electronic access to EPA information. Finally, EPA already has initiated a series of voluntary programs that prevent or control pollution and, in many cases, lead directly to economic benefits.

Highlights of EPA's Regulatory Plan for 1996

The entries contained in EPA's regulatory plan reflect the Agency's continuing commitment to streamline and simplify its regulatory programs to achieve better environmental results at less cost. Many of these entries are designed to implement the new directions discussed above. While many of EPA's new directions are nonregulatory in nature, the Agency's entries focus on those changes that can be made through its regulatory activities. Here are some of the highlights of this ongoing commitment.

Office of Air and Radiation

EPA is committed to using the flexibility granted by the Clean Air Act to enable companies, communities, and individuals to protect public health by meeting clean air goals using innovative approaches at lower costs. The Office of Air and Radiation is committed to nearly 200 changes in existing rules and is changing many forthcoming rules to reflect the common-sense principles of the reinvention effort.

EPA recently issued an advance notice of proposed rulemaking requesting comment from the public on the need and potential for additional reduction of nitrogen oxides, hydrocarbons, and particulate matter from mobile heavy-duty engines. This action initiates work on a proposed rulemaking to establish standards for model year 2004 and later heavy-duty highway engines. The rulemaking seeks to bring together potentially affected industries, States, regional air management organizations, and public health and environmental interest groups to further their mutual goal of reducing emission of harmful air pollutants.

Building on successful State programs, EPA has been working with stakeholders to develop a more streamlined process for permit revisions to help facilities obtain required operating permits from State or local agencies. Under the proposed change, States would have greater flexibility to decide the amount of EPA and public review for most permit revisions by matching the level of review to the environmental significance of the change.

EPA's policy on open-market emissions trading is intended to establish a trading program that minimizes transaction costs and harnesses the power of the marketplace to enhance air quality and thus protect public health. In this regard, EPA will issue a final policy and model rule for open-market trading of ozone smog precursors (volatile organic compounds and oxides of nitrogen) that will provide more flexibility for companies to trade emission credits without prior State or Federal approval. EPA believes this action will ensure compliance with the established ozone standard at far less cost and an increased incentive to develop innovative emission-reduction technologies.

EPA also plans to modify requirements in two other significant air regulatory programs. We will propose changes to simplify and streamline the New Source Review program which requires newly built facilities or those undergoing major modification to obtain a permit to ensure that emissions will not cause or contribute to air pollution problems.

In addition, EPA plans to amend the original transportation conformity rule to streamline the conformity process and provide additional flexibility for State and local transportation and air quality agencies. This rulemaking, initiated in response to stakeholder concerns, will further enhance State and local governments' ability to meet requirements under the Clean Air Act Amendments of 1990 in common-sense, cost-effective ways and ensure that transportation plans do not further exacerbate existing air quality problems.

Other significant activities related to EPA's air programs include reviews of the national ambient air quality standards for sulphur dioxide, ozone, and particulate matter. The sulphur dioxide review is intended to examine existing standards to determine whether further protection for certain exposed individuals is needed. The ozone and particulate matter reviews seek to incorporate new scientific and technical information that has become available since the last reviews.

EPA will issue a final rule implementing a 49-State low-emission vehicle program. It is a voluntary emissions standards program applicable to manufacturers of light-duty vehicles and trucks beginning in model year 1997. This program is designed to be an alternative national program that provides emissions reductions equivalent to the Northeast Ozone Transport Commission's low-emission vehicle program. EPA anticipates that this program would relieve the 13 States in the northeastern part of the country of the December 1994 regulatory obligation to adopt their own motor vehicle programs. The rulemaking also harmonizes Federal and California low-emission vehicle standards and test procedures to enable automakers to design and test vehicles to one set of standards nationwide.

In further efforts to provide flexibility and adhere to common-sense principles, EPA will issue final rules in the areas of medical waste incinerators and municipal waste combustion that have incorporated comments from industry and many small entities. The emissions limits established under these rules are part of EPA's integrated combustion strategy, whereby EPA will regulate various forms of combustion under a coordinated plan.

EPA will propose an integrated rule for the pulp and paper industry that deals with both effluent guidelines and air emission standards to control the release of pollutants to both water and air. The regulations are being developed jointly to provide greater protection to human health and the environment, to promote the concept of pollution prevention, and to enable industry to more effectively plan compliance via a multimedia approach.

Finally, EPA is planning a proposed rule that will introduce additional flexibility into its compliance-assurance monitoring program. This action focuses on preventing pollution rather than imposing additional command-and-control regulations. This is a significant change in Agency direction for implementation of the monitoring and compliance certification requirements in titles V and VII of the Clean Air Act. The goal of the action is to provide reasonable assurance of compliance rather than a direct connection between monitoring and certification and will reduce the emphasis on assuring compliance through the threat of enforcement. Instead, this approach emphasizes assuring compliance by placing the burden on regulated sources to monitor their performance and take proactive steps to minimize emission exceedances.

Office of Water

EPA is streamlining four of its water-related programs to reduce burdens associated with them and to provide additional flexibility: National Pollutant Discharge Elimination System (NPDES) permits, national primary drinking water regulations, the pretreatment program, and water-quality planning and management. EPA estimates that 80 percent of regulations published under the jurisdiction of the Office of Water are undergoing change or modification. The following are highlights of efforts in 1996.

In the NPDES permits program (Part 122), EPA is removing outdated requirements, streamlining permit application and modification procedures, and reducing monitoring and reporting requirements. For example, EPA will consolidate and revise industrial and municipal permit application requirements and forms and streamline the application process. It will also revise the permit application requirements for municipal separate storm water sewer systems to reduce significantly the cost and burden of reapplication for succeeding permit terms. EPA will not require resubmission of information available from the earlier application or not pertinent to the approval process.

EPA is planning a major revision of the NPDES (Part 141) that will have a number of benefits for States and the regulated community. First, EPA will delete a number of obsolete provisions and simplify and reformat the remaining regulations to make it easier for managers of public water systems to understand and implement the requirements and for State officials to enforce. EPA will also streamline the public notification requirements to allow States more flexibility to design programs that will ensure notice to the public in a timely and effective manner.

Regulations in the pretreatment program for publicly owned treatment works (POTWs) (Part 403) will be streamlined and revised to delete obsolete requirements, simplify program operation, and eliminate unnecessary reporting requirements. For example, under streamlined procedures, only the most significant elements of an approved pretreatment program would be included in a POTW's NPDES permit, eliminating the need for a permit revision every time small changes are made to the pretreatment program.

EPA is undertaking revisions in its requirements for water-quality planning and assessment and waterbody listing requirements for State water-quality management programs. EPA will be soliciting public comment in the near future, through an advance notice of proposed rulemaking, on potential revisions to this program.

In addition, the Agency will be pursuing innovative, nonregulatory approaches, such as effluent trading within watersheds, to realize cost savings and reduce water pollution.

Office of Prevention, Pesticides, and Toxic Substances

The Office of Prevention, Pesticides, and Toxic Substances is using existing authorities under the Toxic Substances Control Act (TSCA) and the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) to decrease cost and burden to regulated entities, while at the same time providing additional flexibility. EPA will be amending or deleting 88 percent of its pesticides and toxics regulations that are currently in the Code of Federal Regulations. Among their major efforts in the coming year are the following actions:

As a follow up to the President's announcement in August of this year in support of Community Right to Know (CRTK), a proposed rule is being developed that will expand the universe of sources that are currently required to be reported to the Toxics Release Inventory (TRI). The TRI is a data base that provides communities with information on releases to air, water, and land of approximately 600 toxic chemicals. Currently, only the manufacturing sector collects TRI data. The upcoming rule will propose to require reporting from other sources of toxic chemicals that pose potentially significant risks to communities.

By the summer of 1996, EPA plans to issue a rule that will make over 50 modifications, additions, and deletions to the existing management program for polychlorinated biphenyls (PCBs) under TSCA. This rulemaking is the first comprehensive review of the PCB regulations in 17 years. The modification will allow currently prohibited activities which do not pose an unreasonable risk of injury to health and the environment.

In the area of pesticide regulation, a significant action in the prerule stage is the effort to evaluate self-certification as a possible approach to reinventing the registration process for pesticides. As one of the approaches under consideration, self-certification would allow a registrant to certify that a registration application (or part of it) complies with Agency requirements and then obtain EPA approval for the registration after an abbreviated review or no review at all.

Pursuant to its data-consolidation initiative, EPA is developing a proposed regulation for collecting uniform facility identification information under one regulation. The uniform facility information will be used to link data reported under various Federal environmental laws and will substantially reduce regulatory burden for facilities.

Finally, as part of President Clinton's directive to conduct a comprehensive review of the regulations, EPA has identified a number of pesticides and toxics regulations that can be eliminated from the Code of Federal Regulations or otherwise modified to reduce regulatory burden. EPA is seeking comments from the public and affected stakeholders to develop specific recommendations to reduce burden or duplication or streamline requirements. As these actions are developed, they will be included in the regulatory agenda as appropriate.

Office of Solid Waste and Emergency Response

The Office of Solid Waste and Emergency Response (OSWER) is planning to propose a number of actions that would streamline and simplify compliance under the Resource Conservation and Recovery Act (RCRA). As part of its effort to refocus hazardous waste regulation on high-risk wastes, EPA seeks to tailor standards to the nature or degree of risk posed by particular wastes. Toward this end, EPA is undertaking a number of actions in 1996 to implement this goal.

A rule entitled "Hazardous Waste Identification: Contaminated Media," is designed to resolve problems with the current RCRA cleanup program by deregulating large volumes of low-risk contaminated media (e.g., soil). The Agency will also create a more common-sense regulatory structure for those clean-up wastes that remain regulated.

Also related to hazardous waste identification is an action to modify certain regulations distinguishing "listed" hazardous waste. Certain current regulations, including the "mixture" and "derived from" rules, apply to listed wastes regardless of the concentrations and the mobility of toxicant in the waste, thereby regulating certain low-risk wastes and, in particular, treatment residuals. The modifications will establish exemption standards for these low-risk "listed" hazardous waste management requirements.

As part of its corrective action program, EPA will publish an advance notice of proposed rulemaking dealing with solid waste management units at hazardous waste management facilities. EPA believes final regulations are needed in this area to promote national consistency, clarify corrective action requirements, and reduce the number of site-specific negotiation and legal challenges. The public will be asked to comment on several alternatives presented in the notice.

EPA also plans to establish new emissions standards for hazardous waste combustors under joint Clean Air Act and RCRA authority. These revised standards will avoid duplicative Agency effort and piecemeal regulation of the hazardous waste management industry while enhancing EPA's ability to be adequately protective of human health and the environment in the areas of chlorinated dioxins and furans.

Finally, EPA will also issue an advance notice of proposed rulemaking concerning the definition of solid waste and regulations for hazardous waste recycling. This action will simplify and clarify what wastes/processes are and are not subject to RCRA jurisdiction.

Summary

In addition to these actions, EPA's Regulatory Plan contains entries on:

- Review of the Federal test procedures for emissions from vehicles and motor vehicle engines;
- Emission standards for new nonroad spark-ignition engines at and below 19 kilowatts;
- The risk management program for chemical accidental release prevention;
- Land disposal restrictions—phase III, decharacterized wastewaters, carbamate wastes, and spent aluminum potliners;
- Land disposal restrictions—phase IV, treatment standards for certain mineral processing wastes; TC metals, newly listed wastes from wood preserving and from dyes and pigments;
- Effluent guidelines and standards for the metal products and machinery category (phase I); and
- Selected rulemakings for abating lead hazards.

In developing these required actions EPA is committed to flexible, common-sense, cost-effective regulatory programs that protect human health and the environment.

EPA

PRERULE STAGE

100. STREAMLINING REVISIONS TO THE WATER QUALITY PLANNING AND MANAGEMENT REGULATIONS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

33 USC 1313/CWA 303

CFR Citation:

40 CFR 130

Legal Deadline:

None

Abstract:

Section 303(d) of the Clean Water Act (CWA) requires States to identify waters still requiring total maximum daily loads (TMDLs). The TMDL is a tool for achieving State water quality standards. The TMDL process provides a framework for solving point and nonpoint source pollution problems in an integrated fashion. Current regulations implementing section 303(d) require States to submit their list of waters requiring TMDLs to the Environmental Protection Agency (EPA) every 2 years. This action will revise existing regulations to require States to submit their 303(d) list of waters still requiring TMDLs to EPA every 5 years rather than every 2 years. This revision is part of EPA's goal to comprehensively characterize State waters every five years. Currently, waters are identified on a number of lists as required by the CWA sections 303(d), 305(b), 314(a), and 319(a). The **Federal Register** notice proposing the revision will also announce the availability of supplemental TMDL guidance which will clarify the definition of a TMDL.

Statement of Need:

EPA identified this rule revision in response to the President's request to undertake a line-by-line review of the parts of the Code of Federal Regulations relevant to the Agency's programs. This revision should reduce the burdens associated with the Water Quality Planning and Management Program and make it more efficient. EPA's June 1 "Report to the President: Eliminating and Streamlining Regulations" included a commitment to streamline the Program.

Summary of the Legal Basis:

EPA has no statutory or court obligation to complete this rule.

Anticipated Costs and Benefits:

Firm cost-benefit data is not available at this time.

Risks:

EPA's streamlining efforts will address opportunities to reduce program implementation costs without jeopardizing public health or environmental protection.

EPA

101. CORRECTIVE ACTION FOR SOLID WASTE MANAGEMENT UNITS (SWMUS) AT HAZARDOUS WASTE MANAGEMENT FACILITIES

Priority:

Economically Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 6924/RCRA 3004(u), 3004(v)

CFR Citation:

40 CFR 264; 40 CFR 270

Legal Deadline:

None

Abstract:

Past and present waste management practices at Resource Conservation and Recovery Act (RCRA) facilities have resulted in releases of hazardous constituents from some waste management units. These releases may cause contamination of soils, groundwater, surface water, and air. This regulation provides a framework for investigating and remediating releases at RCRA facilities as necessary to protect human health and the environment.

The Agency plans to issue the corrective action regulations in several phases. Phase I was issued in February 1993 (i.e., regulations concerning Corrective Action Management Units (CAMU)). The next task will include issuing an advance notice of proposed rulemaking (ANPRM). The following phase (Phase II) will include finalizing certain provisions of the July 27, 1990, proposal at the same time as issuing a proposal that includes a reproposal of some provisions from the July 1990 notice plus some new provisions. The last phase (Phase III) will involve finalizing the newly proposed provisions.

Statement of Need:

The corrective action program is curently being implemented using minimal regulatory authorities; the proposed Subpart S rule has been used as guidance since July 1990. The Agency thinks final regulations are needed to promote national consistency, clarify corrective action requirements, and reduce the amount of site-specific negotiations and legal challenges, thereby promoting faster, more efficient cleanups.

In addition, some stakeholders have told the Agency that the current corrective action process can be too slow and expensive. The Agency is currently exploring additional options which could make cleanups faster and more efficient, without sacrificing protectiveness or public involvement. This rulemaking may be used to propose regulatory changes necessary to implement these options.

Alternatives:

The Agency is currently evaluating a number of alternatives that are aimed at achieving the following primary objectives: (a) create a more consistent, holistic approach to cleanup at RCRA facilities; (b) establish protective, "common-sense" cleanup expectations; (c) encourage the regulated community to conduct voluntary/proactive cleanups; (d) provide meaningful and inclusive opportunities for public involvement throughout the cleanup process.

The Agency plans to use an ANPRM, (see schedule below) to discuss rulemaking alternatives in greater detail. Some of the alternatives currently under consideration include: relying on performance criteria rather than prescriptive requirements; allowing for greater consideration of industrial and other nonresidential land uses; and promoting greater consistency between cleanup actions at individual areas of a RCRA site.

Anticipated Costs and Benefits:

Analysis of costs and benefits will be conducted as part of the economic analysis for this rule as required under Executive Order 12866.

Risks:

The objective of establishing protective, "common-sense" cleanup expectations reflects, in part, the Agency's position that the scope of remedial actions should accurately reflect the risks posed by the contamination. The Agency intends to design the rule with flexibility sufficient to select smart and cost-effective remedies in order to achieve the Agency's risk-reduction objectives more efficiently. More quantitative evaluation of the risks and risk reduction associated with this rule will be included in the economic analysis.

EPA

PROPOSED RULE STAGE

102. • DATA CONSOLIDATION INITIATIVE; KEY IDENTIFIERS REPORTING

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

FIFRA, TSCA, RCRA, CAA, SDWA, PPA, etc.

CFR Citation:

Not yet determined

Legal Deadline:

None

Abstract:

Using the various EPA regulatory authorities, the Environmental Protection Agency (EPA) EPA is developing a proposed regulation for collecting uniform facility identification information under one regulation. The uniform facility information will be used to link data reported under various Federal environmental laws, and is expected to substantially reduce regulatory burden for facilities. This action will provide more meaningful access to environmental data and is the foundation for moving forward the longer-term vision of full data integration and uniform reporting.

Statement of Need:

Facilities currently subject to Federal environmental data collections must submit facility identification information with each of a variety of individual data submissions to EPA or the State. The Key Identifiers Rule is a necessary first step toward consolidation of such reporting requirements. The facilities involved must periodically supply and update varying combinations of facility identification data to different data collections. Many of these facility data elements are common, such as name, address, standard industrial classification (SIC) code, and parent company identification. Burden to continually supply such data in varying formats can be reduced by establishing one authoritative record for each facility. A new, unique identification number would be supplied to the facility and it would become the "key" to this reduced facility data reporting. Entering this key id number on any given reporting form would signal that the Agency or State has a detailed record on file.

Alternatives:

An alternative to this rule would be to amend rules authorizing each current, individual data collection to require a uniform set of facility identification data elements. This approach may provide the same data elements submitted but would not necessarily promote the establishment and maintenance of a uniform record for each facility because such forms may be completed with differing entries over time.

Anticipated Costs and Benefits:

Costs estimates are not yet available. Benefits to the facility include lower overall reporting burden and the ability to determine the status of its submission records maintained by EPA and the State. EPA and the State will increase their data management efficiency by having this common identifier for the facility in each relevant data system. This action will

also provide the foundation for later consolidated reporting initiatives.

Risks:

This rule will assist in the evaluation of risks to human health and the environment by improving the coordination of existing environmental data sources.

EPA

103. FACILITY COVERAGE AMENDMENT; TOXIC CHEMICAL RELEASE REPORTING; COMMUNITY RIGHT-TO-KNOW

Priority:

Other Significant

Legal Authority:

42 USC 11013; 42 USC 11023; 42 USC 11048; 42 USC 11076; EPCRA 313

CFR Citation:

40 CFR 372

Legal Deadline:

None

Abstract:

The original Toxics Release Inventory (TRI) required reporting from facilities in Standard Industrial Classification (SIC) codes 20-39. These SIC codes cover manufacturing facilities only. This requirement was imposed under the Emergency Planning and Community Right-To-Know Act (EPCRA) section 313(b)(1)(A). The Environmental Protection Agency (EPA) is considering expanding this original list. EPCRA section 313(b)(1)(B) and (b)(2) provide the Administrator with the authority to add or delete SIC codes and the discretion to add particular facilities based on a broad set of factors. EPA is currently conducting analysis to determine which SIC codes (or portions thereof) should be considered for coverage in TRI. Facilities in a broad set of industries are under consideration, including but not limited to, electric utilities, waste management facilities, mining, oil and gas production, materials recovery and recycling, and some warehousing activities.

Statement of Need:

TRI is the most complete and accessible source of information for the public on toxic chemical releases in communities across America. The intention of Congress was for TRI, and indeed all of EPCRA, to provide information to local communities. Communities need this information to better understand the nature of the releases at the local level. The intent of TRI has been to share information on releases with local communities to help in their assessments of the risks. This basic local empowerment is the cornerstone of the right-to-know program.

Yet TRI collects data from only the manufacturing sector, and for only a subset of toxic chemicals that are introduced into the environment. Congress gave EPA the authority to expand TRI, both in terms of the chemicals reported and the facilities required to report, because it recognized that the American public has a right to know what is happening to the environment near their homes, schools, and businesses. Manufacturing facilities account for only a portion of the toxic chemicals released in the United States. EPA recognizes the reporting burden inherent in TRI, and is continuing to take every reasonable opportunity to reduce this burden.

The industries under consideration for addition to TRI would conceivably add significantly to the data available to the public on toxic chemical releases. For this proposal, industries will be selected based on a number of factors including the importance of the releases to the community, the relative rank of release estimates, the relationship of activities in these industries to manufacturing, and the compatibility of these activities with current reporting requirements.

Alternatives:

Although data on releases from many of the facilities under consideration can be found, there is no centralized, publicly available, comprehensive, easily understandable, or consistently collected source of information for the public on toxic chemical releases from facilities outside of manufacturing. EPA has examined all available data sources, including information reported under the Clean Air Act, Clean Water Act, and Resource Conservation and Recovery Act, as well as other sections of EPCRA, State data collection programs, and available data provided by industry. EPA can find no information comparable to the data which TRI provides the American public. Consequently, there are only two alternatives to the expansion of TRI reporting requirements to cover additional facilities: voluntary reporting by facilities or a determination that any additional information TRI might collect from these facilities is of little or no value in terms of community right-to-know.

Anticipated Costs and Benefits:

The anticipated costs of this action are unknown at present. The addition of facilities to TRI is intended to expand upon the past success of the program in enabling all interested parties to establish credible baselines and to set realistic goals over time. The information reported in TRI increases knowledge levels of pollutants released to the environment and pathways to exposure, improving scientific understanding of the health and environmental risks of toxic chemicals; allows the public to make informed decisions on where to work and live; enhances the ability of corporate lenders and purchasers to more accurately gauge a facility's potential liability; and assists Federal, State, and local authorities in making better decisions on acceptable levels of toxics in communities.

Risks:

Manufacturing facilities, which are currently required to report to TRI, represent only a portion of the facilities that release toxic chemicals in the United States. Although what portion of releases these facilities represent is uncertain, the Congressional Office of Technology Assessment has estimated that the original chemical and facility coverage of TRI in 1987 resulted in data on only 5 percent of releases in the U.S. EPA believes that the public has a right to know about such releases and about what facilities are doing to manage wastes. The public can then use this data to evaluate potential risks from these facilities and to determine how to avoid these risks.

EPA

104. • CFR REGULATORY REVIEW RELATED INITIATIVES

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

40 USC 11013 EPCRA 313

CFR Citation:

0 CFR 150 to 189; 40 CFR 372; 40 CFR 700 to 799

Legal Deadline:

None

Abstract:

On March 4, 1995, the President directed all Federal agencies and departments to conduct a comprehensive review of the regulations they administer, and by June 1, 1995, to identify those rules that are obsolete or unduly burdensome. The Office of Prevention Pesticides, and Toxic Substances (OPPTS) has reviewed regulations under its purview, that is, those issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), the Toxic Substances Control Act (TSCA), and the Emergency Planning and Community Right-to-Know Act (EPCRA). As a result of that review, OPPTS identified a number of regulations that can be eliminated from the CFR; in addition, OPPTS also identified a significant number of potential burden-reduction and streamlining opportunities through modifications to regulations and is further evaluating other regulations to determine if they can be simplified or streamlined. The Agency plans to involve the public as much as possible by soliciting comments and conducting stakeholder meetings and consultations.

Statement of Need:

There are many regulations currently on the books that pertain to pesticides and toxic chemicals. Some regulations are obsolete or are no longer applicable to the Agency's current needs, some are confusing, and many have become overly burdensome to all concerned, both the public and EPA. The goal of this project is to assess the regulations from a common-sense approach. The objectives are multifold: to identify regulations in the CFR that are confusing, contradictory, unnecessary, or not written in plain English; evaluate the underlying programs described by the regulations for streamlining possibilities; and seek opportunities to reduce reporting and recordkeeping burdens. OPPTS has identified regulations in the CFR which would benefit from modifications or which require evaluation prior to proposing specific recommendations. Current activities focus on determining the extent to which its regulations could be changed to achieve the objectives of the Regulatory Review initiative without sacrificing health or environmental protection. Changes are being considered at all levels and include, in addition to regulatory changes, procedural changes, policy changes, administrative changes, and legislative changes.

Alternatives:

Alternatives are being explored continually. Public suggestions and recommendations for deregulation activities and streamlining efforts are being evaluated to the extent they can be practicably implemented without increasing risk to the public health or environment.

Anticipated Costs and Benefits:

This is a streamlining exercise, therefore overall costs to the regulated community are expected to decrease. Benefits include reduced regulation, decreased paperwork, less burden, and increased Agency efficiency. No comprehensive analyses have been done to date. When specific regulatory objectives and alternatives are identified, costs and benefits will be evaluated.

Risks:

The principal objective of this project is to improve the infrastructure of the pesticide regulation system. Each recommendation for change is assessed for potential impact on public health and environmental protection. In considering modifying existing regulations, any alternatives must be at least as protective as current requirements.

revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

33 USC 1251/CWA 101; 33 USC 1311/CWA 301; 33 USC 1314/CWA 304; 33 USC 1317/CWA 307; 33 USC 1328/CWA 318; 33 USC 1342/CWA 402; 33 USC 1345/CWA 405

CFR Citation:

40 CFR 122; 40 CFR 403

Legal Deadline:

None

Abstract:

The Environmental Protection Agency (EPA) is revising regulations, guidance documents, and forms to streamline procedures for compliance with the National Pollutant Discharge Elimination System (NPDES) requirements. The rule and form revisions will eliminate redundant regulations, provide clarification, and remove unnecessary procedures which do not provide any environmental benefit. Revising and reducing burdensome procedures will promote efficiency and simplify the operation of the NPDES programs. Where possible, through the reliance on existing data and collection of data in electronic form, the burden on small businesses and other entities will be reduced.

Statement of Need:

EPA identified these rulemaking actions in response to the President's request to undertake a line-by-line review of the Parts of the Code of Federal Regulations relevant to the Agency's programs. These revisions should reduce the burdens associated with the NPDES Program, including pretreatment, and make the programs more efficient. EPA's June 1 "Report to the President: Eliminating and Streamlining Regulations" included commitments to streamline the NPDES Program.

Summary of the Legal Basis:

EPA has no statutory or court obligation to complete these rules.

Anticipated Costs and Benefits:

Firm cost-benefit data is not available at this time. While some of the rule revisions will include new requirements which have costs associated with them (e.g., the permit application forms and associated regulation revisions), most of the revisions will lead to cost savings. The proposals under development will consolidate application forms and clarify/streamline application procedures (e.g., minimize the need for sequential requests for additional information). The revisions are expected to reduce permit backlogs, the cost of duplicative work, and paperwork burdens and costs for State and local governments, businesses, and others that must comply with NPDES regulations.

Risks:

For the most part, EPA's streamlining efforts will address opportunities to reduce program implementation costs without jeopardizing public health or environmental protection. While the Industrial, Municipal, and Sludge Permit Application Rules will include new requirements which have costs associated with them, they should make the permit process more efficient and predictable. The revised application requirements should make it easier for the Agency and States to collect the information they need regarding the discharge of toxic contaminants and support the development of permit limits that will protect the quality of our Nation's waters.

EPA

106. • STREAMLINING REVISIONS TO THE NATIONAL PRIMARY DRINKING WATER REGULATIONS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 300/SDWA 1412

CFR Citation:

40 CFR 141

Legal Deadline:

None

Abstract:

As part of the Environmental Protection Agency's (EPA's) efforts to realign regulatory development priorities for the Drinking Water Program to maximize risk reduction and to focus and improve implementation of the existing regulatory program, EPA is initiating work on several streamlining rules. First, EPA is reorganizing/reformatting Part 141 to make it easier for public water systems to understand and comply with and for States, local, and tribal governments to implement. EPA is also undertaking a comprehensive review of numerous monitoring and reporting requirements to identify opportunities to reduce the monitoring and reporting burden associated with both regulated and unregulated contaminants. Along with the comprehensive review of monitoring requirements, EPA is reexamining existing requirements that trigger increased monitoring of individual pollutants to try to raise the trigger and, thereby, reduce particular increased monitoring requirements. Finally, EPA is reviewing and streamlining existing public notification (PN) requirements which apply to systems which do not comply with drinking water standards. EPA plans to streamline PN requirements to allow States increased flexibility to design programs which will ensure notice to the public in a timely and effective manner.

Statement of Need:

EPA identified these rulemaking actions in response to the President's request to undertake a line-by-line review of the Parts of the Code of Federal Regulations relevant to the Agency's programs. These revisions should reduce the burdens associated with the National Primary Drinking Water Program and make the regulations easier to read and understand. EPA's June 1 "Report to the President: Eliminating and Streamlining Regulations" included commitments to streamline the Drinking Water Program.

Summary of the Legal Basis:

EPA has no Statutory or Court obligation to complete these rules.

Anticipated Costs and Benefits:

Firm cost-benefit data is not available at this time.

Risks:

EPA's streamlining efforts will address opportunities to reduce program implementation costs without jeopardizing public health protection.

EPA

107. MODIFICATIONS TO THE DEFINITION OF SOLID WASTE AND REGULATIONS OF HAZARDOUS WASTE RECYCLING: GENERAL

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 6905/RCRA 1004; 42 USC 6921 to 6928/RCRA 3001 to 3008

CFR Citation:

40 CFR 261; 40 CFR 266

Legal Deadline:

None

Abstract:

The benefits include lessening the burden on the regulated community by clarifying requirements for all hazardous waste recyclers, and reducing those requirements for many recyclers. Costs will be determined as the Agency decides which recycling facilities will be under Resource Conservation and Recovery Act (RCRA) jurisdiction.

Statement of Need:

Revisions are needed to improve EPA's regulation hazardous waste recycling by: (a) eliminating disincentives for the safe recycling of hazardous waste; (b) concentrating on higher-risk materials that pose greater hazards; and (c) developing simpler definitions and regulations.

Summary of the Legal Basis:

This action is not mandated by statute or court order. However, the Agency intends to respond to several court decisions by clarifying which recyclable materials are excluded from RCRA hazardous waste management requirements.

Alternatives:

Alternatives to be considered include not modifying the current regulations. Other alternatives include different mechanisms for determining which recyclable materials are subject to RCRA, such as the degree to which the recycling process resembles ongoing manufacturing and whether the materials are transferred off-site. For recyclable materials remaining under

VOL
60
SS
2
28
NO
28
995
UMI

RCRA, we are examining alternative management requirements and approval systems for different types of recyclers.

Risks:

This action aims at more effective risk management by streamlining and tailoring management requirements for low-risk recyclers (including eliminating requirements that are redundant with other statutes). This will allow regulatory resources to be concentrated on those recyclers who engage in activities posing a greater threat to human health and the environment.

EPA

108. IDENTIFICATION AND LISTING OF HAZARDOUS WASTES: HAZARDOUS WASTE IDENTIFICATION RULE (HWIR); WASTE

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 6905, 6912(a), 6921, 6922, and 6926

CFR Citation:

40 CFR 260; 40 CFR 261; 40 CFR 262; 40 CFR 264; 40 CFR 268

Legal Deadline:

NPRM, Judicial, November 13, 1995.
Final, Judicial, December 15, 1996.

Abstract:

Under the current Resource Conservation and Recovery Act (RCRA) "mixture" and "derived from" rules, some low-risk wastes are currently regulated by the Environmental Protection Agency's (EPA's) hazardous waste regulations. To address this problem, this deregulatory action will make modifications to the "mixture" and "derived from" rules, and establish new criteria that would exempt certain low-risk wastes from the hazardous waste regulations. In developing this action, EPA is considering the views of all members of a Federal Advisory Committee Act (FACA) committee. This action will be implemented by EPA and authorized States.

Statement of Need:

EPA is proposing to amend its regulations under RCRA for hazardous waste identification. The amendment would establish exemption criteria for low-risk listed hazardous wastes, waste mixtures, and derivatives.

Under the amendment, low-risk listed hazardous wastes, waste mixtures, and derivatives meeting the exemption criteria would no longer be subject to hazardous waste management requirements under subtitle C of RCRA.

The provisions of this proposal will reflect a balancing of the Agency's informational needs for oversight and enforcement with the practical resource considerations of the generator. This proposal would reduce the demand on scarce subtitle C landfill capacity and would not increase risk to humans or the environment, because the exempt waste would be low-risk and not warrant management under subtitle C. This proposal will also promote pollution prevention, waste minimization, and development of innovative waste treatment technology.

This notice will also contain the Agency's response to a petition for rulemaking submitted by the Chemical Manufacturers Association.

Alternatives:

A variety of alternatives for establishing the exemption criteria and the implementation requirements were identified by a FACA committee co-chaired by EPA and the States. EPA is forging a strong partnership with the States in the interest of our co-regulator, co-implementor roles. The proposal will include a basic exit option and request comment on contingent management alternatives.

Anticipated Costs and Benefits:

Draft estimates are that 60-80 million tons of waste water, and 0.25 to 0.28 million tons of nonwastewater could exit subtitle C annually. Cost savings to industry could range from $70-$80 million annually.

Risks:

This proposal would maintain current levels of risk protection.

109. REVISED STANDARDS FOR HAZARDOUS WASTE COMBUSTION FACILITIES

Priority:

Economically Significant

Legal Authority:

42 USC /RCRA 3004(a)(q); RCRA 3005(a), CAAA section 112

CFR Citation:

40 CFR 60; 40 CFR 61; 40 CFR 260; 40 CFR 261; 40 CFR 264; 40 CFR 265; 40 CFR 266; 40 CFR 270

Legal Deadline:

None

EPA has signed a settlement agreement to promulgate revised rules for industrial furnaces and incinerators by December 1996 and boilers by December 1999.

Abstract:

The Environmental Protection Agency's (EPA's) strategy for hazardous waste minimization and combustion and a judicial settlement agreement commit EPA to upgrade its standards for burning hazardous waste in incinerators, boilers, and industrial furnaces. These standards would be applicable during the construction and operation of these combustion facilities.

Statement of Need:

Under the Clean Air Act (CAA) Amendments of 1990, EPA is required to establish National Emission Standards for Hazardous Air Pollutants (NESHAPs) for most hazardous waste combustors (HWCs) (i.e., incinerators, cement kilns, boilers, and some types of smelting furnaces). In addition, under the Resource Conservation and Recovery Act (RCRA), EPA is required to establish standards for all HWCs as necessary to ensure protection of human health and the environment. EPA is concerned that its current RCRA standards for HWCs may not be adequately protective given that there are no emission standards for chlorinated dioxins and furans and that there have been advances both in risk assessment and control technologies since promulgation of the current standards.

Consequently, the Agency plans to establish new emissions standards for HWCs under joint CAA and RCRA. This will avoid duplicative Agency effort and piecemeal regulation of the hazardous waste management industry.

Alternatives:

Under provisions of the CAA, the Agency plans to consider the cost-effectiveness of emission limits more stringent than the minimum limits mandated by the statute. Further, the Agency plans to evaluate approaches to reduce emissions of hazardous air pollutants by improving good operating practices (e.g., controlling the way in which problematic materials such as toxic metals are introduced into the combustor).

Anticipated Costs and Benefits:

The cost and benefit analyses are currently undergoing internal Agency review.

Risks:

The risk analyses for this rulemaking are undergoing internal Agency review.

EPA

110. IDENTIFICATION AND LISTING OF HAZARDOUS WASTES; HAZARDOUS WASTE IDENTIFICATION RULE (HWIR): CONTAMINATED MEDIA

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 6912(a)/RCRA 3001; 42 USC 6905; 42 USC 6921; 42 USC 6922; 42 USC 6926

CFR Citation:

40 CFR 260; 40 CFR 261; 40 CFR 262; 40 CFR 264; 40 CFR 268

Legal Deadline:

None

Abstract:

The goal of this regulation is to establish a new regulatory framework under the Resource Conservation and Recovery Act (RCRA) for the management of contaminated media that are generated from remediating hazardous waste sites. The new regulation will reform the current standards by creating more flexibility for Agency decisionmakers in setting cleanup requirements, and by better aligning the RCRA regulations with the actual risks posed by managing contaminated media. The rule will exempt certain lower risk contaminated media from the traditional RCRA regulations and will set treatment standards for higher risk media that reflect the inherent differences between contaminated media (e.g., soils, groundwater) and newly generated hazardous wastes. The regulations will also simplify and streamline RCRA permit requirements for cleanups that involve managing hazardous materials.

Statement of Need:

Since 1980, the Environmental Protection Agency (EPA) has promulgated comprehensive regulations under subtitle C of RCRA governing the treatment, storage, disposal, and transportation of hazardous wastes. These regulations have been designed primarily to discourage hazardous waste generation, and for those wastes generated, to prevent future environmental contamination by ensuring safe management and disposal. In contrast, the primary objective of the cleanup program is to achieve environmental improvement as quickly and effectively as possible.

In 1993, EPA, States, and representatives from industry, environmental groups, and the hazardous waste treatment industry (constituting a Federal Advisory Committee (FACA)) reached a tentative agreement on a "harmonized approach" to address this issue. This approach distinguishes between "higher" and "lower" level (bright line) contaminated media based on assessment of potential human health and environmental risks. The bright line would be set at a relatively high-risk level to allow States and EPA to identify hot spots that would be subject to subtitle C requirements (land-disposal regulations and MTR). Media above bright-line concentrations would be subject to specific national treatment requirements; media below the bright line would be exempt from subtitle C if subject to enforceable site-specific management by the overseeing agency.

Alternatives:

Alternative regulatory approaches for this rule will be proposed and analyzed.

Anticipated Costs and Benefits:

Analyses of costs and benefits will be conducted as part of the economic

analysis for this rule required under Executive Order 12866.

Risks:

One of the primary objectives of this rule is to establish requirements for management of contaminated media that more accurately reflect the risks posed by such wastes. Thus, the rule is expected to result in cleanups that achieve the Agency's risk reduction objectives in a more efficient and expeditious manner. More quantitative analysis of the risks associated with this rule will be included in the economic analysis.

EPA

111. NEW SOURCE REVIEW (NSR) REFORM

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

Clean Air Act as amended in 1990, title I

CFR Citation:

40 CFR 51.160 to 51.166; 40 CFR 51, app S; 40 CFR 52.21; 40 CFR 52.24

Legal Deadline:

None

Abstract:

The purpose of this action is to revise the Clean Air Act new source review (NSR) regulations, which govern the preconstruction air quality review and permitting programs that are implemented by States and the Federal Government for new and modified major stationary sources of air pollution. This rulemaking seeks to deregulate, that is, exclude from major NSR program requirements those activities of sources that, with respect to air pollution, have little environmental impact. The rulemaking will encourage pollution control and pollution prevention projects at existing sources. Control technology requirements will be clarified with respect to when and how they apply to sources that are covered. The action will more clearly define the roles and requirements of sources, permitting authorities and Federal land managers in the protection of air-quality-related values in Federal Class I areas (i.e., certain national parks and wilderness areas) under the new source review regulations. State, local, and tribal permitting agencies will be given more flexibility to implement program requirements in a manner that meet their specific air quality management needs. Consequently, the rulemaking decreases the number of activities that are subject to NSR requirements and also expedites the permitting process for those sources that are subject to NSR. This action is designed to reduce the regulatory burden over all industries without respect to commercial size or capacity; therefore, it should have no detrimental impact on small businesses. Finally, this action also addresses several pending petitions for judicial review and administrative action pertaining to new source review applicability requirements and control technology review requirements. Regulations that will be affected are State implementation plan requirements for review of new sources and modifications to existing sources (40 CFR 51.160-166), the Federal prevention of significant deterioration program (40 CFR 52.21), and Federal restriction on new source construction (40 CFR 52.24) to be proposed in another rulemaking action.

Statement of Need:

In August 1992, EPA voluntarily initiated a comprehensive effort to reform the NSR process. This effort was initiated to examine complaints from the regulated community that the current regulatory scheme is too complex, needlessly delays projects, and unduly restricts source flexibility. Currently there are no applicable statutory or judicial deadlines for the NSR reform rulemaking effort. The goal of this effort is to address industries' concerns without sacrificing the environmental benefits embodied in the present approach; that is, protecting and improving local air quality, and stimulating pollution prevention and advances in control technologies.

In August 1992 and March 1993, public workshops were held to obtain ideas and comments and discuss options for reforming NSR, but not to attempt to reach consensus with the group. In July 1993, the New Source Review (NSR) Reform Subcommittee was formed under the auspices of the Clean Air Act Advisory Committee. The Subcommittee's purpose is to provide independent advice and counsel to EPA on policy and technical issues associated with reforming the NSR rules.

The Subcommittee is composed of representatives from industry, State/local air pollution control agencies, environmental organizations, EPA headquarters and regions, and other Federal agencies (Federal Land Managers, National Park Service and Forest Service), Department of Energy, and the Office of Management and Budget). Six subgroups were formed to address Class I area and control technoloy issues identified by the Subcommittee. Another two subgroups were formed at the November 1993 meeting, one to address NSR applicability issues and the other to address the impact of existing sources on Class I areas.

Summary of the Legal Basis:

There are no applicable statutory or judicial deadlines for the NSR reform rulemaking effort. However, the rule will address two outstanding settlement agreements: CMA Exhibit B and Top-down BACT. The pending settlement on WEPCO may impose a judicial deadline on the rulemaking.

Alternatives:

The Subcommittee discussed numerous options for implementing NSR reform. However, EPA's primary focus will be to consider the specific recommendations developed by the Subcommittee and, where appropriate, use them in this rulemaking effort.

Anticipated Costs and Benefits:

From a cost perspective, this rulemaking represents a decrease in costs to industry of at least $6 million per year, as compared to the preexisting program, based primarily on the fact that fewer sources will need to apply for major source permits. In addition, the cost to State and local agencies will be reduced by approximately $1.4 million per year. The Federal Government should realize a savings of approximately $116,000 per year. Additional cost reductions, which are difficult to quantify, will be realized due to the streamlining effect of the rulemaking on the permitting process, for example, the opportunity costs for shorter time periods between permit application and project completion and reduced uncertainty in planning for future source growth.

Risks:

This is a procedural rule applicable to a wide variety of source categories. Moreover, it applies to criteria pollutants for which NAAQS have been established. This action is considered environmentally neutral. However, any potential risks are considered in the NAAQS rulemaking from a national perspective.

112. NAAQS: OZONE (REVIEW)

Priority:

Economically Significant

Legal Authority:

42 USC 7408 section 108 Clean Air Act; 42 USC 7409 Section 109 Clean Air Act

CFR Citation:

40 CFR 50.9

Legal Deadline:

Final, Statutory, December 31, 1980.

Review at 5-year intervals thereafter.

Abstract:

The Environmental Protection Agency (EPA) is reviewing and updating the air quality criteria for ozone to incorporate new scientific and technical information. Based on the revised criteria, the EPA will determine whether revisions to the standards are appropriate.

Statement of Need:

In March 1993, the EPA concluded that revision of the NAAQS was inappropriate, based on the existing air quality criteria for ozone, but decided to expedite the next review of the ozone criteria and NAAQS in light of potentially significant new information. On February 3, 1994, EPA announced an accelerated schedule for completing the new review. In litigation challenging the March 1993 decision, the EPA subsequently sought and received a voluntary remand of the decision so that it could be reconsidered in light of the new information. The EPA intends to complete the remand proceedings on the schedule announced in February. Consistent with that schedule, a draft Criteria Document was sent to the Clean Air Scientific Advisory Committee (CASAC) and made available for public review during February and March of 1994. The CASAC met in July 1994 to review the criteria document and provided oral and written comments, which are being considered by EPA in revising the draft document. Subsequent CASAC meetings were held to review the revised draft criteria document and drafts of the staff paper in March and September 1995.

Alternatives:

Section 109 of the Clean Air Act requires periodic review of the NAAQS. This review is being undertaken to satisfy the statutory requirement.

Anticipated Costs and Benefits:

The anticipated costs and benefits resulting from this rulemaking will be part of the Agency's regulatory impact analysis of this rule. The Agency has just begun this analysis; therefore, the anticipated costs and benefits are not available at this time.

Risks:

As part of this review, EPA is preparing exposure/risk analyses. These analyses are undergoing review. Therefore the results are not available at this time.

EPA

113. NAAQS: PARTICULATE MATTER (REVIEW)

Priority:

Economically Significant

Legal Authority:

42 USC 7408 to 7409

CFR Citation:

40 CFR 50.6

Legal Deadline:

NPRM, Judicial, June 30, 1996. Final, Judicial, January 31, 1997.

Abstract:

The Environmental Protection Agency (EPA) is reviewing and updating the air quality criteria for particulate matter to incorporate new scientific and technical information that has become available since the last review. Based on the revised criteria, EPA will determine whether revisions to the standards are appropriate.

Statement of Need:

The EPA last completed a review of the particulate matter NAAQS in July 1987. Since that time a growing body of scientific information has associated particle pollution with excess-mortality and morbidity effects at levels below the existing 24-hour primary standard. Many in the scientific community believe that these effects are most likely associated with fine particles. In light of this, EPA is in the process of updating the air quality criteria for particulate matter. An external review draft of revised criteria document was reviewed by the Clean Air Scientific Advisory Committee (CASAC) in August 1995. The CASAC will meet to review the associated staff paper in November/December 1995.

Alternatives:

Section 109 of the Clean Air Act (42 USC 7409) requires periodic review of the NAAQS. This review is being undertaken to satisfy the satisfactory requirement.

Anticipated Costs and Benefits:

The anticipated costs and benefits resulting from this rulemaking will be part of the Agency's regulatory impact analysis of this rule. The Agency has just begun this analysis; therefore, the anticipated costs and benefits are not available at this time.

Risks:

Particle pollution has been associated with excess mortality and with respiratory illness at levels below existing 24-hour standards. As part of this review, EPA will examine the risk associated with particle pollution.

EPA

114. OPERATING PERMITS: REVISIONS (PART 70)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 7661 et seq

CFR Citation:

40 CFR 70; 40 CFR 71; 40 CFR 51

Legal Deadline:

None

Abstract:

In response to litigation on the part 70 regulations, to several problems identified through implementation of part 70, and to comments provided in response to notices of proposed rulemaking, parts 51, 70, and 71 are being revised. The changes include the following: streamlined procedures for revising stationary-source operating permits issued by State and local permitting authorities or the Environmental Protection Agency (EPA) under title V of the Clean Air Act; changes to the certification of compliance that is required to be submitted as part of the permit documentation; clarification of the title I and title V permitting requirements for certain smaller research and development facilities; and changes in procedural requirements in order to clarify the flexibility States possess in processing minor new source review actions under title I of the Act.

Statement of Need:

These revised rules will establish a simpler, more flexible system for revising operating permits. These revisions reflect the principles articulated in the President's and the Vice President's March 16, 1995 report "Reinventing Environmental Regulation." That report established as goals for environmental regulation the building of partnerships between EPA and State and local agencies, minimizing costs, providing flexibility in implementing programs, tailoring solutions to the problem, and shifting responsibility to State and local programs.

Alternatives:

The Clean Air Act requires that EPA develop regulations which set minimum standards for State operating-permit programs. The Clean Air Act also requires that EPA promulgate and administer a Federal operating-permits program for States that have not obtained EPA approval by November 15, 1995. In response to concerns expressed in response to comments on the initial notice of proposed rulemaking, the EPA sought further input from representatives from State and local permitting authorities, industry and environmental groups to learn more directly of their implementation concerns. This action incorporates many of those recommendations into a final rule.

Anticipated Costs and Benefits:

Costs were estimated in terms of the administrative burden on permitting authorities, EPA, and permitted sources. Administrative costs include a range of costs which cover the source's preparing an application through EPA's and the permitting authority's effort to complete the process. The administrative costs of implmementing these revisions to parts 70 and 71 is estimated to be approximately $33 million. In comparison, implementing the current part 70 permit revision system is estimated to be approximately $118 million in administrative burden. The actual impact of implementing the revised regulations represents a significant reduction in costs over implementing the current regulations.

Risks:

All major sources of air pollution are required to have a permit to operate by the Clean Air Act and are subject to the emission requirements of the State Implementation Plans. No adverse effect on the public health or ecosystems should result from this action.

EPA

115. • TRANSPORTATION CONFORMITY FLEXIBILITY AND STREAMLINING

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 7521(a)/CAA 176(c)

CFR Citation:

40 CFR 51; 40 CFR 93

Legal Deadline:

None

Abstract:

The Clean Air Act Amendments (CAAA) of 1990 recognized that transportation planning and air quality planning must be coordinated towards achieving the National Ambient Air Quality Standards (NAAQS). The transportation conformity rule was promulgated in November of 1993, in response to CAAA concerns. Conformity ensures that transportation planning does not (a) produce new air quality violations, (b) worsen existing violations, and (c) delay timely attainment of the NAAQS. This rulemaking is the third in a series of amendments to the original transportation conformity rule. This rulemaking will streamline the original rule to simplify the conformity process in response to conformity stakeholder concerns. Flexibility will be added for rural nonattainment areas. Difficulties associated with the build/no-build test and adding transportation projects to plans will be resolved, and non-Federal projects will have additional flexibility through these amendments.

Statement of Need:

This rulemaking will streamline the original transportation conformity rule in response to stakeholder concerns. This rulemaking will continue to ensure attainment and maintenance of the CAAA's air quality standards in order to protect public and environmental health.

Alternatives:

This rulemaking amends the original transportation conformity rule to simplify the conformity process for State and local transportation and air quality agencies. Conformity stakeholders have assisted EPA and the Department of Transportation (DOT) in formulating a new approach to reaching attainment through the conformity process. Several alternative approaches to conformity revisions have been considered by involved stakeholders. Since this rulemaking is a direct result of the stakeholder process, opting for the alternative (i.e., maintaining the original transportation conformity rule as currently written) would not address stakeholder concerns in a satisfactory manner.

Anticipated Costs and Benefits:

There are no significant direct monetary costs associated with this rulemaking as stipulated in Executive Order 12866. Benefits associated with this rulemaking include all benefits connected to attaining the NAAQS. In addition, by involving transportation and air quality agencies during initial planning processes, long-term planning will become more efficient by ensuring that transportation investments do not interfere with clean air goals.

Risks:

This rulemaking addresses risks which are associated with not attaining the NAAQS.

EPA

116. INTEGRATED NESHAP AND EFFLUENT GUIDELINES: PULP AND PAPER

Priority:

Economically Significant

Legal Authority:

42 USC 7412; 42 USC 7414; 42 USC 7601; Clean Air Act Amendments of 1990 section 112, 114, and 301; 33 USC 1311, 1314, 1316, 1317, 1318, and 1361; Clean Water Act section 301, 304, 306, 307, 308, and 501

CFR Citation:

40 CFR 63; 40 CFR 430

Legal Deadline:

Final, Statutory, November 15, 1997.

Abstract:

The Clean Air Act (CAA) Amendments of 1990 direct the Environmental Protection Agency (EPA) to set National Emission Standards for Hazardous Air Pollutants (NESHAP) for new and existing sources under section 112 and to base these standards on maximum achievable control technology (MACT). The Clean Water Act (CWA) directs EPA to develop effluent guidelines for

VOL
60
ISS
2
28
NO
28
995
UMI

certain categories and classes of point sources. These guidelines are used for setting discharge limits for specific facilities that discharge to surface waters or municipal sewage treatment systems. For the pulp and paper industry, EPA is developing an integrated regulation that includes both effluent guidelines and air emission standards to control the release of pollutants to both the water and the air. The regulations are being developed jointly to provide greater protection to human health and the environment, to promote the concept of pollution prevention, and to enable the industry to more effectively plan compliance via a multimedia approach.

Statement of Need:

This action will limit surface water discharges of toxic, conventional, and nonconventional pollutants and emissions of hazardous air pollutants (HAPs) from pulp and paper mills. The NESHAP will limit the release of HAPs such as chloroform, formaldehyde, acetaldehyde, and methanol. The effluent guidelines will limit the discharge of dioxin, furan, and other toxic and conventional pollutants to rivers and other surface waters.

Alternatives:

Both the CAA and the CWA specify that these regulations be established on a technology basis. The CAA specifices that MACT for existing sources can be no less stringent than the average emission limitations achieved by the best-performing similar source. The CWA specifies that effluent limitations guidelines and standards be based on specific technology levels, such as the best available technology economically achievable. For the integration of air and water standards, EPA developed regulatory alternatives from combinations of process changes and pollution control technologies. The Agency considered the combined costs and impacts of these alternatives while remaining responsive to the statutory requirements under both laws.

Anticipated Costs and Benefits:

The proposed integrated air and water rules comprise effluent guidelines for all pulp and paper mills and MACT standards for the noncombustion sources at those mills. The Agency plans to propose MACT standards for the combustion sources in early 1996 and include them in the integrated air and water rules to be promulgated. For the rulemaking components that have been proposed, the Agency estimated total annualized costs of $600 million (1992 dollars). The Agency has received extensive public comments on the cost estimates; revisions are likely, but the magnitude of those revisions has not been determined.

The types of benefits associated with the proposed integrated rule include improvements to air and water quality and reduced human health risks. The estimated reductions in HAP emissions exceed 120,000 tons per year. An estimated reduction in volatile organic compound emissions of 700,000 tons per year and a reduction in total reduced sulfur emissions of 300,000 tons per year are also projected to occur as a result of the proposed integrated rule. Projected reductions in specific toxic pollutant effluent discharges are approximately 2,800 tons per year; conventional pollutant reductions of over 200,000 tons per year are projected. Some categories of the benefits can be expressed in monetary terms; they are in the range of $160 million to $980 million.

Risks:

Two types of pollutants found in pulp and paper wastestreams, dioxin and furan, are of particular concern due to their carcinogenic risk and their toxicity to aquatic life. Reducing the discharge and emission of these and other toxic pollutants reduces the exposure risks to human health and the environment.

EPA

117. NATIONAL 49-STATE LOW-EMISSION VEHICLES PROGRAM

Priority:

Economically Significant

Legal Authority:

Clean Air Act secs 202 and 301(a)

CFR Citation:

None

Legal Deadline:

None

Abstract:

This rulemaking is a voluntary emissions standards program applicable to manufacturers of light-duty vehicles and trucks beginning in model year 1997. This program would apply only to those manufacturers that chose to opt into the program. This program is designed to be an alternative national program that provides emissions reductions equivalent to the Northeast Ozone Transport Commission's (OTC's) low-emission vehicle (LEV) program.

Statement of Need:

If agreement is reached between the OTC states and the auto makers on a voluntary 49-State LEV program, this rulemaking will establish the regulations for the LEV program. Under these regulations, auto makers would be able to volunteer to comply with more stringent tailpipe standards for cars and trucks (light-duty). Once an auto maker opted into the program, EPA would enforce the standards in the same manner as any other federal motor vehicle pollution control requirement. EPA is proposing that this program would relieve the 13 states in the Northeastern part of the country (OTR) of the December, 1994, regulatory obligation to adopt their own motor vehicle programs. This rulemaking also harmonizes Federal and California motor vehicle standards and test procedures to enable auto makers to design and test vehicles to one set of standards nationwide.

Alternatives:

Under the CAA, EPA is prohibited from adopting more stringent auto tailpipe standards prior to fiscal year 2004. The OTC petitioned the Environmental Protection Agency (EPA) in 1994 and was granted approval to adopt the California Low-Emission Vehicle Program in the OTR. This rulemaking would establish a voluntary LEV program in 49 states.

Anticipated Costs and Benefits:

The annualized costs of the OTC LEV Program will be roughly $400 million. The National LEV program created in this rulemaking is expected to have an annual cost of $1.1 billion. The OTC program would only apply to 2 million vehicles sold in the OTR. The National LEV program would apply to all new vehicles sold in 49 States comprising a vehicle fleet of 12.5 million vehicles sold annually. On a per car basis, EPA expects vehicle price to increase $100. The National LEV program will provide air pollution reductions throughout the country. There are currently 38 ozone nonattainment areas outside the OTR and CA with a combined population of approximately 45 million that will benefit from this voluntary national program.

Risks:

Motor vehicles are a significant cause of smog because of emissions of volatile organic compounds (VOC) and nitrogen oxide (NOx). EPA has projected that, without the California LEV in the OTR, highway vehicles will account for roughly 38 percent of NOx and 22 percent of VOC emissions in 2005. EPA currently estimates that VOC emissions should be reduced by roughly 95 tons per day and NOx emissions by approximately 195 tons per day as a result of the National LEV program.

EPA

118. CONTROL OF NITROGEN OXIDE AND PARTICULATE EMISSIONS FROM HEAVY-DUTY ENGINES

Priority:

Other Significant

Legal Authority:

Clean Air Act secs 202(a), 211(c), 213(a), 301(a)

CFR Citation:

None

Legal Deadline:

None

Abstract:

The primary focus of this action will be on the potential for reduced nitrogen oxide and particulate emissions from mobile sources, particularly diesel engines and fuels. Nitrogen oxides are a significant contributor to urban ozone pollution (smog), acid rain, and particulate pollution. Particulates, including those emitted directly and "secondary" particulates formed in the atmosphere, have been associated with increased death and illness rates as well as impaired visibility. In addition, this action also will investigate the potential for reducing ozone hydrocarbon emissions from mobile sources, particularly from diesel engines and fuels.

The advance notice of proposed rulemaking is intended to notify the public of the Agency's intent to investigate the feasibility of reducing emissions of nitrogen oxides and particulates from mobile sources. It is also intended to solicit involvement and input from a broad cross-section of the public, including potentially affected industries, States, regional air management organizations, public health and environmental protection interest groups, and the general public.

Statement of Need:

Ozone pollution poses a serious threat to the health and well-being of millions of Americans and a large burden to the U.S. economy. Many ozone nonattainment areas face great difficulties in reaching and maintaining attainment of the ozone health-based air quality standards in the years ahead. Recognizing this challenge, States, local governments, and others have called on the Environmental Protection Agency (EPA) to promulgate additional national measures to reduce nitrogen oxide (NOx) and hydrocarbons in order to protect the public from the serious health effects of ozone pollution. The control of particulate matter emissions from heavy-duty engines is also a priority for these stakeholders.

Alternatives:

EPA will consider alternatives for this rule as part of the response to the advance notice of proposed rulemaking (ANPRM).

Risks:

Oxides of nitrogen comprise a family of highly reactive gaseous compounds that contribute to air pollution in both urban and rural environments. NOx is directly harmful to human health and the environment, contributes to particulate pollution, and plays a critical role in the formation of atmospheric ozone. Based on studies of human populations exposed to high concentrations of particles and laboratory studies of animals and humans, there are major human health concerns associated with PM. These include deleterious effects on breathing and respiratory systems, aggravation of existing respiratory and cardiovascular disease, alterations in the body's defense systems against foreign materials, damage to lung tissue, carcinogenesis, and premature death.

EPA

119. NONROAD SPARK-IGNITION ENGINES AT OR BELOW 19 KILOWATTS (25 HORSEPOWER)(PHASE 2)

Priority:

Other Significant

Legal Authority:

42 USC 7547/CAA 213

CFR Citation:

40 CFR 90

Legal Deadline:

NPRM, Judicial, April 30, 1995. Final, Statutory, November 15, 1992. Final, Judicial, April 30, 1997.

Abstract:

This action will establish the second phase of emissions standards for new nonroad spark-ignition engines at or below 19 kilowatts (25 horsepower), as required by section 213(a)(3) of the Clean Air Act as Amended. The Environmental Protection Agency (EPA) is developing the second phase of small-engine regulations through a negotiated rulemaking, with representation by engine manufacturers, equipment manufacturers, emissions control manufacturers, equipment dealers, environment and public health interests, and State air programs.

The affected engines are used in lawn, garden, and utility equipment, such as lawnmowers, string trimmers, chain saws, and small pumps and generators. The first phase was established July 3, 1995 (60 FR 34582), effective for the 1997 model year, and was very similar to the tier 1 small-engine regulations developed by California for the same engines. Regulated pollutants are hydrocarbons, carbon monoxide, and oxides of nitrogen.

Statement of Need:

Nonroad engines contribute significantly to total ozone precursor and CO emissions in areas that have failed to attain the National ambient air quality standards (NAAQS) for ozone and CO. Requirements for emissions reductions will help many areas achieve the NAAQS. The second phase will include additional controls not achievable in the timeframe of the first phase, which are necessary for continued attainment of NAAQS.

Alternatives:

Regulation of this category of engines was split into two phases on the recommendation of the regulated industry, in order to obtain some early reductions quickly while providing sufficient lead-time to develop and implement an appropriate second phase. The regulatory negotiation committee was convened for the second phase to ensure that all possible options for achieving appropriate emissions reductions from this sector were considered.

Anticipated Costs and Benefits:

The regulatory negotiation committee is developing the rule, including setting of emissions standards levels, based on a cost/benefit analysis that considers cost per ton of emissions reduced as well as cost per engine. Until that process is complete, the specific costs and benefits are unknown. The benefits of phase 1 were a 32 percent reduction in hydrocarbons and a 7 percent reduction in carbon monoxide from these engines, at a cost of $266 per ton of hydrocarbons reduced.

Risks:

Over 89 million small engines contribute to unhealthy ozone and carbon monoxide levels in nearly 100 cities across the country. An estimated 6.8 million tons of air pollution are generated from lawn and garden equipment each year. Carbon monoxide is an odorless, colorless poisonous gas. Hydrocarbons and oxides of nitrogen contribute to the formation of ground-level ozone, which is a noxious pollutant that impairs lung functioning and is a key ingredient in smog.

EPA

FINAL RULE STAGE

120. • PESTICIDES; SELF-CERTIFICATION

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

7 USC 136 to 136y

CFR Citation:

40 CFR 152

Legal Deadline:

None

Abstract:

The Environmental Protection Agency (EPA) is evaluating self-certification as a possible approach to reinventing the registration process for pesticides. The goal of this effort is to simplify, speed up, and increase the efficiency of the registration process while maintaining protection to human health and the environment.

Statement of Need:

EPA registers pesticides for sale and use in the United States under the Federal, Insecticide, Fungicide, and Rodenticide Act (FIFRA). EPA has issued rules, notices, and guidance which specify how applicants may obtain approval for registration of pesticide products.

Against a backdrop of declining resources and a continuous workload of pesticide applications, EPA is examining many possible ways of reinventing the registration process to handle applications faster, more efficiently, and with fewer resources. One of these approaches is "self-certification," a concept in which a registrant may certify that a registration application (or part of it) complies with Agency requirements and may then obtain EPA approval for the registration after an abbreviated review or no review at all. EPA has several projects that are exploring the possible use of self-certification in different ways.

First, EPA has reinvented the process by which registrants may accomplish amendment of products by notification or nonnotification. The revised process allows a registrant to certify that an application for amendment meets EPA's criteria as a low-risk amendment. This revised process is described in PR Notice 95-2 (May 31, 1995). To formally implement this type of self-certification, EPA is revising existing rules (40 CFR 152.44 and 152.46) on notifications and nonnotifications.

Second, self-certification of acute toxicity and product chemistry data is being considered as a means of reducing the number of studies reviewed by EPA in connection with registration applications. While being done as two separate projects (acute toxicity and product chemistry), these efforts are being closely coordinated to assure consistency. One or more PR Notices will be drafted and made available for public comment before any final decisions are made in this area.

Third, possible options for self-certification of new products similar or identical to those already registered are being developed and evaluated. A draft issue paper will be made available for public comment before any final decisions are made about this kind of self-certification.

Alternatives:

Various alternatives to self-certification are being considered by EPA for reinventing or improving the registration process, including, but not limited to, sharing acute toxicity data reviews with the California Department of Pesticide Regulation, issuing guidance for acceptable acute toxicity data, exempting certain active ingredients from registration, developing computer software to standardize precautionary labeling, publishing a manual describing all labeling requirements, automating certain documents, piloting electronic labeling, making labeling policy documents publicly available, and developing internal guidance on how to process "fast track" registrations.

Anticipated Costs and Benefits:

EPA does not intend to perform cost analyses on self-certification per se, but will qualitatively evaluate the potential costs and benefits of different kinds of self-certification.

Risks:

EPA will determine whether self-certification will help or hinder protection of human health and the environment. EPA will not adopt any self-certification measure which does the latter.

EPA

121. • SELECTED RULEMAKINGS FOR ABATING LEAD HAZARDS

Priority:

Economically Significant

Legal Authority:

15 USC 2683; PL 102-550

CFR Citation:

40 CFR 745

Legal Deadline:

Final, Statutory, April 28, 1994. Other, Statutory, October 28, 1994.

Final Statutory, April 28, 1994 (Sections 403, 402, 404) Final Statutory, October 28, 1994 (Sections 406, 1018)

Abstract:

The Residential Lead-Based Hazard Reduction Act of 1992 requires EPA to promulgate regulations that establish standards for determining hazards associated with lead-based paint, lead-contaminated soil, and lead-contaminated dust. EPA is to (a)identify the paint conditions and lead levels in dust and soil that would result in adverse human health effects (on July 14, 1994, EPA issued guidance on section 403 to provide preliminary information while a proposal is being developed); (b) promulgate regulations (section 402) governing lead-based paint activities to ensure that individuals engaged in such activities are properly trained, that training programs are accredited, and that contractors engaged in such activities are certified (in addition, EPA must promulgate a Model State program (section 404) which may be adopted by any State which seeks to administer and enforce a State Program); (c) promulgate regulations (section 406) requiring renovators to provide a lead hazard information brochure (developed separately by EPA) to clients before beginning work; (d) promulgate, with HUD, regulations (Section 1018) that require the following before the sale or lease of pre-1978 housing: disclosure of lead-based paint hazards, provisions of a lead-paint information brochure to the prospective buyer or renter, and for buyers, and the opportunity to conduct a lead risk assessment or inspection.

Statement of Need:

Childhood lead poisoning is a pervasive problem in the United States, with 1.7 million young children (8.9%) having more than 10 ug/dl of lead in their blood. Center for Disease Control's level of concern. Elevated blood-lead levels can lead to reduced intelligence and neurobehavioral problems in young children, as well as causing other adverse health effects in children and adults. Although there have been dramatic declines in blood-lead levels due to reductions of lead in paint, gasoline, and food sources, remaining paint in older houses remains the significant source of childhood lead poisoning. These rules are designed to reduce exposure to that source in a targeted and sensible manner.

Alternatives:

Alternatives to each of the mandated activities will be analyzed. However, in many cases (particularly regulations written under Sections 406 and 1018) the statute is very prescriptive. Under

VOL
60
SS
2
28
NO
28
995
UMI

Section 403, the alternatives being considered include: (a) tiered standards; (b) integrated standards vs. independent standards; and (c) the possible acceptance of a usage factor in determining hazards.

Anticipated Costs and Benefits:

For rules promulgated under sections 402, 404, 406, and 1018, cost estimates have been provided with the proposed rule, and will be available with the final rule. For Section 403, costs will still need to be estimated in the draft Regulatory Impact Analysis for the proposed rule. Since benefits depend on private sector implementation of certain lead hazard abatement activities which are not mandated by any of these rules, benefits will be difficult to quantify.

Risks:

These rules are aimed at reducing the prevalence and severity of lead poisoning, particularly in children.

EPA

122. • POLYCHLORINATED BIPHENYLS (PCBS) DISPOSAL AMENDMENTS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

15 USC 2605(e)/TSCA 6(e)

CFR Citation:

40 CFR 761

Legal Deadline:

None

Abstract:

This rulemaking will make over 50 modifications, additions, and deletions to the existing PCB management program under the Toxic Substances Control Act (TSCA). A notice of proposed rulemaking was published on December 6, 1994 and covered the manufacture, processing, distribution in commerce (including export), use (including import), disposal, and marking of PCBs.

Statement of Need:

This rulemaking is the first comprehensive review of the PCB regulations in the 17-year history of the program. The Agency has become aware of a number of instances where the existing regulations do not allow for activities which do not pose an unreasonable risk of injury to health and the environment or where they require unreasonable, unrealistic, or non-cost-effective solutions to PCB problems.

Summary of the Legal Basis:

TSCA section 6(e) bans the manufacture, processing, distribution in commerce and use (except in a totally enclosed manner) of PCBs. It also directs EPA to establish standards for disposal and marking of PCBs. However, section 6(e) allows the EPA to modify these bans, through rulemaking, where it finds no unreasonable risk of injury to health and the environment.

Alternatives:

On December 6, 1994, EPA proposed a number of alternatives to the existing statutory bans in section 6(e). The proposal also included new options and standards for disposal (including remediation) of PCBs.

Anticipated Costs and Benefits:

The EPA projects significant cost savings from authorizations for existing uses and the disposal of large-volume wastes such PCB-contaminated environmental media. In addition, the relaxation of certain administrative requirements should increase the speed of remediation of contaminated sites and accelerate the removal from use of PCBs. EPA projects minimal implementation costs and is reviewing comments which highlight areas for additional cost savings over the proposal.

Risks:

The EPA estimates that millions of tons of PCB-contaminated environmental media will be remediated under this rule, thus preventing large quantities of this long-lived, bioaccumulating chemical from entering the food chain.

123. EFFLUENT GUIDELINES AND STANDARDS FOR THE METAL PRODUCTS AND MACHINERY CATEGORY, PHASE I

Priority:

Economically Significant

Legal Authority:

33 USC 1311/CWA 301; 33 USC 1314/CWA 304; 33 USC 1316/CWA 306; 33 USC 1317/CWA 307; 33 USC 1361/CWA 501

CFR Citation:

40 CFR 438

Legal Deadline:

NPRM, Judicial, March 31, 1995. Final, Judicial, September 30, 1996.

Dates contained in Consent Decree (NRDC v. Reilly)

Abstract:

The Environmental Protection Agency (EPA) is developing effluent limitation guidelines for facilities that generate wastewater while processing metal parts; metal products; and machinery, including manufacture, assembly, rebuilding, repair, and maintenance. The phase I regulation will cover seven industrial groups: aircraft, aerospace, hardware, ordnance, stationary industrial equipment, mobile industrial equipment, and electronic equipment. This regulation is performance-based and does not specify a method of compliance.

Statement of Need:

Discharges of wastewater from industrial facilities contain pollutants that may cause deleterious effects on surface waters and adverse impacts on human health and aquatic life. Discharges from metal products and machinery (MP&M) facilities contain priority and nonconventional metals, organics and conventional pollutants. Many of these pollutants are human carcinogens, human systemic toxicants, aquatic life toxicants, or all of the above. MP&M facilities discharge wastewater directly to surface waters of the United States or indirectly to surface waters via sewer systems and publicly owned treatment works (POTWs) and contribute to the pollution of surface waters and POTW sludges.

Summary of the Legal Basis:

The Clean Water Act requires the Environmental Protection Agency (EPA) to establish national technology-based standards to control or eliminate the discharge of pollutants into surface water and to POTWs. This proposed regulation is required under a 1992 consent decree with the Natural Resources Defense Council and must be developed according to the schedule in that decree.

Alternatives:

EPA's proposed rule described three major treatment alternatives the Agency had considered in developing its recommended approach. The three alternatives included: (a) end-of-pipe treatment controls, (b) end-of-pipe controls plus in-process controls, and (c) end-of-pipe treatment (e.g., reverse osmosis, ion exchange). The Agency proposed the second alternative with an exemption for low-flow indirect discharges of process wastewater (i.e., those discharging less than one million gallons per year to publicly owned treatment works) as its recommended approach.

Anticipated Costs and Benefits:

At the time of proposal, the MP&M Phase I Guidelines were estimated to impose a total capital cost for direct and indirect dischargers of $414 million and an estimated annualized cost of $161 million. Total monetized benefits were estimated to range from $70 million to $207 million (in 1994 dollars). The proposed MP&M phase I guidelines were estimated to result in a reduction of almost a million pounds of toxic pollutants discharged by the industry each year, thereby reducing violations of water quality standards (which were bodies across the country). The proposed limits were also estimated to reduce the metals content of municipal sludge, thereby allowing approximately 184 additional POTWs to make beneficial use of 439,000 dry metric tons of sewage sludge annually by land applying the sludge rather than incinerating or landfilling it. The expected cost savings for sewage sludge disposal is estimated to range from $39 million to $86 million (in 1994 dollars). Final cost and benefits will be determined once EPA completes its review of the public comments on the proposed rule and makes decisions on the final rule.

Risks:

EPA estimates that the proposed limitations would eliminate 2.7 cancer cases per year (from a baseline of about 11.1 cases estimated at the current discharge level); lower risk indicator for systemic, noncancer risks of illness; and lessen excursions of health-based water quality toxic effect levels.

EPA

124. LAND DISPOSAL RESTRICTIONS—PHASE IV: TREATMENT STANDARDS FOR CERTAIN MINERAL PROCESSING WASTES; TC METALS; NEWLY LISTED WASTES FROM WOOD PRESERVING AND DYES AND PIGMENTS

Priority:

Economically Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 6905, 6912(a), 6921, 6924

CFR Citation:

40 CFR 268

Legal Deadline:

Final, Judicial, June 1996.

Abstract:

The Hazardous and Solid Waste Amendments of 1984 require the Environmental Protection Agency (EPA) to promulgate regulations establishing treatment standards that must be met before hazardous waste may be disposed of on land. The proposed

rulemaking establishes treatment standards for certain characteristic mineral processing wastes, wood preserving wastes, and TC metals. It also addresses issues arising from a September 25, 1992 decision of the U.S. Court of Appeals in *Chemical Waste Management* v. *EPA*, 976 F. 2d (D.C. Cir. 1992) on the equivalency of treatment in wastewater treatment systems regulated under the Clean Water Act to treatment of wastes under the Resource Conservation and Recovery Act (RCRA).

Statement of Need:

Land disposal of hazardous wastes can result in the contamination of groundwater and surface water and the emission of hazardous constituents to the air. Studies have indicated that these hazardous constituents can cause adverse human health and environmental effects. In addition, land disposal of untreated hazardous wastes can have significant economic effects, as demonstrated in the high costs of cleaning up past land disposal sites.

As a result of these problems, Congress, in section 3004 of RCRA, mandated that land disposal of hazardous waste is prohibited, unless the waste is treated to minimize threats to human health and the environment. In the phase IV final rule, EPA is targeting the potential risks of leaks and air emissions from surface impoundments that are part of wastewater treatment systems. Primary treatment surface impoundments and other surface impoundments that precede the biological treatment surface impoundment may pose a particular risk that untreated organic constituents could leak to groundwater. There is also a chance that hazardous constituents could be emitted into the air from an uncovered surface impoundment, thus this risk will also be addressed. In addition, EPA is satisfying its statutory mandate to promulgate treatment standards for wood preserving, toxicity characteristic metal, and mineral processing hazardous wastes.

Summary of the Legal Basis:

Portions of the rule are subject to a consent decree that requires promulgation of final treatment standards for wood preserving and toxicity characteristic metal wastes, and hazardous mineral processing wastes.

Alternatives:

In a final rule issued on May 8, 1990, EPA allowed certain hazardous wastes to be diluted rather than treated to meet the land disposal restrictions (LDR) treatment standards when they were managed in surface impoundments regulated by the Clean Water Act (CWA). This approach was taken in order to harmonize the requirements of RCRA and CWA. EPA was sued on the 1990 final rule (*Chemical Waste Management, Inc. et al. (CWM)* v. *EPA)T1. In CWM* v. *EPA*, the court held that these diluted wastes may be placed in a surface impoundment only if the underlying hazardous constituents in the waste are treated to the same extent as they would be under RCRA, such that threats to human health and the environment are minimized. As a direct result of the court decision, EPA entered into a settlement agreement which required EPA to examine whether treatment in a CWA (and CWA-equivalent) wastewater treatment surface impoundment is equivalent to treatment under RCRA LDR requirements. The Agency examined edquivalency under the two programs by looking at the potential for cross-media transfers of hazardous constituents in CWA and CWA-equivalent surface impoundments in the Phase IV proposal. It will be necessary to identify the Agency's final approach in the Phase IV final rule.

The Phase IV final rule will finalize EPA's decision on three proposed options to address the issue of whether EPA should establish RCRA controls for releases of hazardous constituents through air emissions, leaks to groundwater, and sludges from CWA and CWA-equivalent wastewater treatment surface impoundments. The proposal neutrally presented two options for addressing potential cross-media transfers. The first option was to rely on existing Clean Air Act (CAA) provisions to address air emissions, and on State programs and the RCRA industrial nonhazardous waste control mechanisms to address leaks and sludges. The second option was to rely on existing controls, but also establish LDR regulations to fill the gaps that were identified in existing regulations. As compliance alternatives for this option, EPA proposed a de minimis exclusion, and an approach for giving credit for pollution prevention activities that reduced the mass loadings of hazardous wastes to the environment. A third option, presented for completeness but believed to be inappropriate and costly, was to require that facilities comply with LDR treatment standards before placing their wastes in the wastewater treatment surface impoundments. If LDR standards were met before land disposal in the surface impoundment, then the issue of equivalency would be moot.

Futhermore, under RCRA, the Agency was instructed to promulgate treatment standards for a waste within six months of the Agency determining that it is a hazardous waste. The Agency missed this deadline in a number of cases and was sued. The Phase IV final rule is subject to a consent decree that requires the establishment of treatment standards for wood preserving and toxicity characteristic metal wastes, and for hazardous mineral processing wastes. The treatment standards for hazardous mineral processing wastes will be proposed in a supplemental rule to be issued in December, 1995.

Treatment standards for wood preserving and toxicity characteristic metal wastes, as well as for hazardous mineral processing wastes, are based upon the performance of best demonstrated available technologies (BDAT). Section 3004(m) of RCRA requires that the treatment standards ensure substantial reductions in hazardous waste toxicity and mobility, such that threats to human health and the environment arising form subsequent land disposal are minimized. Variances from these treatment standards may be granted if a petitioner can show EPA that the waste is different from the waste EPA used to set the treatment standard or that the treatment is unavailable on a waste. In addition, if treatment is unavailable on a nationwide basis, or on a case-by-case basis, EPA may postpone the effective date of the treatment standards for up to four years.

Anticipated Costs and Benefits:

The Agency's analysis of the cost of addressing cross-media transfers indicates that under Option 1, no impacts would occur because the Agency proposed to defer to other regulations. For Option 2, annual compliance costs to facilities would range from an estimated $10 to $65 million. Estimated annual compliance costs to facilities under Option 3 would range from $200 to $300 million.

The Agency estimates annual incremental compliance costs of treating wood preserving wastes to be $9.5 million. Costs to treat metal toxicity characteristic wastes to comply with the revised standards are expected to be minimal.

EPA estimates that cancer risks from leaks to groundwater at wastewater treatment systems range up to one in one thousand. In one-fifth of samples with volatile organic constituents at the point of generation, concentrations exceeded the risk-based regulatory threshold established in the RCRA Subpart CC rule to control air emissions.

Risks:

Please see the previous section titled "Anticipated Costs and Benefits" for a discussion on risks.

Additional Information:

SAN No. 3366.

Reinventing Government: The options that were proposed for addressing cross-media transfers would encourage pollution prevention by allowing facilities to comply by reducing mass loadings of toxics to the environment through source reduction from wastestreams not directly at issue. An exemption from the options was proposed for de minimis levels of waste. Importantly, EPA seeks to preserve its partnership with States and Tribes by embracing their programs that control the cross-media transfer problems at issue. EPA also took the common-sense approach of crafting its options for cross-media transfers to fulfill its obligations and protect environmental resources without undue disruption to waste treatment systems that are already adequately protective of the environment. Additionally, the rule will focus on environmental risk by isolating for regulation those waste management scenarios that pose risks rather than imposing controls across the board. The Agency built in maximum flexibility so that those complying with the requirements can choose the most cost-effective means of limiting toxic releases or for treating wastes to meet LDR treatment standards. Furthermore, the Agency is mindful of the multi-media context of environmental problems and has designed the proposed rule to defer to existing federal programs to avoid duplication of regulation. Furthermore, this rule will reduce the paperwork burden on the regulated community by revising a number of the LDR program's administrative requirements. Other regulatory changes will eliminate outdated regulations and clarify areas of the regulations that are confusing.

125. LAND DISPOSAL RESTRICTIONS—PHASE III: DECHARACTERIZED WASTEWATERS, CARBAMATE WASTES, AND SPENT ALUMINUM POTLINERS

Priority:

Economically Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 6905, 6912(a), 6921, 6924

CFR Citation:

40 CFR 268

Legal Deadline:

Final, Judicial, January 1996.

Abstract:

The Environmental Protection Agency (EPA) will be proposing rules addressing a rule pursuant to the September 25, 1992, decision of the U.S. Court of Appeals in *Chemical Waste Management* v. *EPA*, 976 F. 2d (D.C. Cir. 1992). The underlying rule at issue was signed on May 8, 1990, and published on June 1, 1990 (55 FR 22520). The phase III proposal will establish treatment standards for formerly characteristic wastes primarily managed in land-based wastewater treatment systems whose ultimate discharge is regulated under the Clean Water Act. Treatment standards will also be established for newly listed carbamates and organobromine wastes. The phase IV proposal will address whether land-based wastewater systems provide treatment that is equivalent to that conducted under the Resource Conservation and Recovery Act (RCRA) land disposal restrictions (LDR) program. Treatment standards will also be established for wood preserving and mineral-processing wastes.

Statement of Need:

Land disposal of hazardous wastes can result in the contamination of groundwater and surface water. Studies have indicated that these hazardous constituents can cause adverse human health and environmental effects. In addition, land disposal of untreated hazardous wastes can have significant economic effects, as demonstrated in the high costs of cleaning up past land disposal sites.

As a result of these problems, Congress, in section 3004 of RCRA, mandated that land disposal of hazardous waste is prohibited, unless threats to human health and the environment are minimized. In the phase III final rule, EPA is targeting the potential risks of discharges from surface impoundments that are part of wastewater treatment systems. Biological treatment surface impoundments may not treat all underlying hazardous constituents in RCRA characteristic wastes (that are diluted to remove the hazardous characteristic) to the same extent as those constituents would be treated using other technologies to achieve LDR treatment standards. In addition, characteristic wastes are often diluted and injected into deep wells, without actually being treated to minimize the potential threat of underlying hazardous constituents in that waste. These risks will be addressed by establishing LDR treatment standards that apply at the point of discharge from the impoundment or into an underground injection well (i.e., at "end-of-pipe"). In addition, EPA is promulgating treatment standards for carbamate wastes and spent aluminum potliners.

Summary of the Legal Basis:

The end-of-pipe treatment standards are subject to a consent decree that mandates that this rule be finalized by January, 1996.

Alternatives:

In a final rule issued on May 8, 1990, EPA allowed certain hazardous wastes to be diluted rather than treated to meet the LDR treatment standards when they were managed in surface impoundments regulated by the Clean Water Act (CWA). This approach was taken in order to harmonize the requirements of RCRA and CWA. EPA was sued on the 1990 final rule (*Chemical Waste Management, Inc. et*

al. (CWM) v. *EPA*). In *CWM* v. *EPA*, the court held that these diluted wastes may be placed in a surface impoundment only if the underlying hazardous constituents in the waste are treated to the same extent as they would be under RCRA, in such a way that threats to human health and the environment are minimized. As a direct result of the court decision, EPA entered into a settlement agreement which required EPA to establish treatment standards for any underlying hazardous constituents reasonably expected to be present in characteristic (i.e., ignitable, corrosive, reactive, or toxic) hazardous wastes that are diluted to remove the hazardous characteristic, that must be met at the point the waste is discharged to the water or the land, or injected into a deep well.

The phase III final rule will introduce two new LDR compliance options for deep injection wells: a de minimis exclusion for very small-volume hazardous waste streams that are mixed with other nonhazardous waste streams; and a pollution prevention option that allows facilities to reduce the mass loadings of underlying hazardous constituents to the same extent as they would be reduced by meeting the LDR treatment standards.

Furthermore, under RCRA, the Agency was instructed to promulgate treatment standards for a waste within 6 months of the Agency determining that it is a hazardous waste. The Agency missed this deadline in a number of cases. The phase III rule will promulgate treatment standards for two "newly listed" categories of hazardous wastes: wastes from carbamate production, and spent aluminum potliners.

All of the treatment standards in the phase III rule are based upon the performance of best demonstrated available technologies (BDAT). Section 3004(m) of RCRA requires that the treatment standards ensure substantial reductions in hazardous waste toxicity and mobility, in such a way that threats to human health and the environment arising form subsequent land disposal are minimized. Variances from these treatment standards may be granted if a petitioner can show EPA that the waste is different from the waste EPA used to set the treatment standard or that the treatment is inappropriate for the waste. In addition, if treatment is unavailable on a nationwide basis, or on a case-by-case basis, EPA may postpone the effective date of the treatment standards for up to 4 years.

Anticipated Costs and Benefits:

The Agency's analysis of the estimated one-time cost of establishing end-of-pipe treatment standards for characteristic wastes that are diluted and placed in treatment surface impundment is $0.9 - $2.9 million. The estimated cost for treating characteristic hazardous wastes that are diluted and injected into UIC wells is $9.2 - $13.2 million for on-site treatment and $486.5 - $805.3 million for off-site treatment. The estimated annual cost for treating carbamate wastes and spent aluminum potliners is $11.9 - $47.3 million.

Benefit estimates for surface impoundments include loadings reductions between 36 and 407 tons/year for direct discharges, and between 1,490 and 24,391 tons/year for indirect discharges. In addition, cancer risks for two constituents, aniline and acrylamide will be reduced. EPA estimates that cancer risks from leaks to groundwater from deep injection wells are below regulatory concern. It is estimated that between 100,000 and 118,000 tons of spent aluminum potliners are generated annually. Improper management of these wastes has caused many serious past damage incidents. However, data are limited with regard to current management practices and risk levels. Because the quantity of waste is very small, benefits for newly listed carbamate wastes are expected to be minimal.

Risks:

Please see the previous section titled "Anticipated Costs and Benefits" for a discussion on risks.

Reinventing Government: The phase III rule would encourage pollution prevention by allowing facilities to comply by reducing mass loadings of toxics to the environment through source reduction from wastestreams not directly at issue. An exemption was proposed for de minimis levels of waste. Importantly, EPA seeks to avoid duplicative regulations by deferring in all cases to limits established in a wastewater treatment system's CWA NPDES or pretreatment permit. LDR treatment standards would only apply in cases where the underlying upcoming EPA regulation that is currently underway. In this way, EPA is taking the common-sense approach to fulfill its obligations and protect environmental resources without undue disruption to waste treatment systems that are already adequately protective of the environment. The Agency built in maximum flexibility so that those complying with the requirements can choose the most cost-effective means of treating wastes to meet LDR treatment standards.

Furthermore, this rule will reduce the paperwork burden on the regulated community by creating minimal new recordkeeping requirements for wastewater treatment surface impoundments, and by revising some of the LDR programs's existing administrative requirements. Other regulatory changes will clarify existing areas of the regulations that are confusing.

EPA

126. COMPLIANCE ASSURANCE MONITORING PROGRAM (PREVIOUSLY ENHANCED MONITORING PROGRAM)

Priority:

Economically Significant

Legal Authority:

Clean Air Act Amendments of 1990, sections 114(a)(3), 503(b),; 504(b)

CFR Citation:

40 CFR 64; 40 CFR 70

Legal Deadline:

NPRM, Judicial, September 30, 1993. Final, Statutory, November 1992. Final, Judicial, July 1, 1996.

Abstract:

This action is required by the 1990 Clean Air Act (the Act) Amendments to assure better compliance with existing rules. This rule will require major stationary sources who must obtain permits under title V of the Act to conduct monitoring that provides reasonable assurance of ongoing compliance of the significant emission units with applicable requirements. Affected sources will use the monitoring data in conjunction with other compliance-related data to certify compliance with emission standards and other permit conditions.

Statement of Need:

The Clean Air Act Amendments of 1990 require major stationary sources to provide ongoing monitoring and periodic certification of compliance. Current compliance data based on initial or periodic performance testing, provide only "snapshots" of the compliance status of stationary sources. Current minimal operation and maintenance monitoring of control technoloy performance, if applied, provides little assurance of continued good pollution control and little incentive for the source owner or operator to maintain or improve performance. The compliance assistance monitoring (CAM) rule would require owners or operators of emission sources to increase awareness of the operational status of pollution control technology and to act on discrepancies in that operation to reduce emissions. Certification of compliance would be based on a combination of compliance testing or other compliance data and demonstration of continued good control technology performance and appropriate and timely corrective action.

Alternatives:

The CAM program is designed to assure ongoing compliance with requirements under the Act. If owners or operators are already required to determine continuous compliance with emission limitations or standards, that satisfies the purpose of CAM and no additional assurance of compliance is necessary. If these circumstances do not exist, CAM would use a two-pronged approach to assure compliance. First, CAM would require that owners or operations have reasonable information available to them that can indicate potential problems in emission control performance. Second, CAM would require that owners or operators act on that information in a timely fashion to avoid (if preventable) or reduce (if not preventable) emission control problems that could result in excess emissions. This type of monitoring does not need to be so rigorous as to exactly determine or predict emission levels, but rather should be sufficient to allow for reasonable optimization of the method used by a source to achieve ongoing compliance with emission limitations or standards under the Act.

This approach is consistent with President Clinton's regulatory reform initiatives and EPA's Common Sense Initiative in that it focuses on preventing pollution rather than imposing additional command-and-control regulations on regulated sources. This represents a significant change in Agency direction for implementation of of the monitoring and compliance certification requirements in titles V and VII of the Act. The goal of CAM is to provide a reasonable assurance of compliance; rather than a direct connection between monitoring and certification, CAM allows for an indirect, symbiotic relationship between these two methods of assuring compliance. The result of this change will be to reduce the emphasis on assuring compliance through the threat of enforcement. Instead, CAM emphasizes assuring compliance by placing the burden on regulated sources to monitor their performance and take proactive steps to minimize emission exceedances.

Anticipated Costs and Benefits:

In keeping with Executive Order 12866, EPA will prepare a detailed regulatory impact analysis (RIA) that will provide costs and benefits associated with the CAM rule.

EPA believes that the adoption of CAM can result in tangible benefits for a facility. Although a self-monitoring program may not always be justified purely on the basis of economic benefit to a source, self-monitoring can, in some situations, reduce operating costs. For example, monitoring data can be used to increase combustion efficiency in an industrial boiler or to increase capture and reuse of solvents at a coating plant. The CAM approach will also alert owners or operators that potential control device problems may exist. The owner or operator can use this information to target control devices for routine maintenance and repair, and reduce the potential for costly breakdowns.

The Agency also believes that the CAM approach will result in tangible benefits to the general public health and welfare. A primary benefit of CAM will be a reduction in overall emissions through increased compliance with the requirements of the Act. The key elements of CAM that will provide these reductions are (a) the emphasis on monitoring that alerts owners or operators to deteriorating control conditions and (b) the requirement that steps be taken to correct those conditions. This approach emphasizes minimizing emissions by avoiding or remedying as quickly as possible situations that may involve emissions in excess of applicable requirements. In addition to the direct environmental benefit of decreased emissions, increased compliance rates will also achieve a corollary economic benefit. As a general matter, increased compliance rates with existing rules will lower the long-term overall cost of air pollution control by decreasing the need for additional regulations to obtain necessary emission reductions, especially for nonattainment areas.

Risks:

Compliance Assurance Monitoring will apply to over 50,000 emission units nationally. The establishment of CAM requirements is estimated to impact about 97 percent of the emissions of carbon monoxide, nitrogen oxide, particulate matter, sulfur dioxide, and volatile organic compounds, as well as certain hazardous air pollutants such as benzene and mercury; exact reductions which will be obtained are yet to be determined. The CAM provisions will apply to existing Clean Air Act standards only; new regulations will incorporate continuous compliance monitoring provisions. As these new rules are developed, pollution reduction will be achieved beyond those obtained through CAM.

127. NAAQS: SULFUR DIOXIDE (REVIEW)

Priority:

Economically Significant

Legal Authority:

42 USC 7409/CAA 109

CFR Citation:

40 CFR 50.4; 40 CFR 50.5

Legal Deadline:

NPRM, Judicial, November 1, 1994. Final, Judicial, April 15, 1996.

Abstract:

On November 15, 1994, the Environmental Protection Agency (EPA) published a notice announcing a proposed decision not to revise the existing 24-hour and annual primary standards. In that notice EPA sought public comment on the possible need to adopt additional regulatory measures to address short-term peak sulfur dioxide exposure and thereby further reduce the health risk to asthmatic individuals.

On March 7, 1995, EPA published the proposed requirements for implementation plans and ambient air quality surveillance for sulfur dioxide. The action proposes implementation strategies for reducing short-term high concentrations of sulfur dioxide emissions in the ambient air.

Statement of Need:

Brief exposures to elevated concentrations of sulfur dioxide causes bronchoconstriction, sometimes accompanied by symptoms (coughing, wheezing, and shortness of breath), in mild to moderate asthmatic individuals. The existing sulfur dioxide National Ambient Air Quality Standard (NAAQS) provides a substantial protection against short-term peak sulfur dioxide levels. At issue is whether additional measures are needed to further reduce the health risk to asthmatic individuals. The EPA is presently assessing the public comments on the November 1994 proposal as well as the related implementation and air quality surveillance requirements and will announce a final decision on April 15, 1996.

Alternatives:

The November 15, 1994, proposal notice sought public comment on three alternatives to further reduce the public health risk to asthmatic individuals posed by short-term peak sulfur dioxide exposures. These included: (a) a new 5-minute NAAQS; (b) a new program under section 303 of the Act; and (c) a targeted monitoring program to ensure sources likely to cause or contribute to high 5-minute peaks are in attainment with the existing standard.

Anticipated Costs and Benefits:

A draft regulatory impact analysis was completed and made available for public comment at the time of proposal.

Risks:

Exposure analyses were completed and made for public comment at the time of proposal. These analyses indicate from the national perspective that the likelihood of exposure to high 5-minute sulfur dioxide concentrations is very low. Asthmatic individuals in the vicinity of certain sources or source categories, however, may be at higher risk of exposure than the population as a whole.

128. MEDICAL WASTE INCINERATORS (MWI)

Priority:

Economically Significant

Legal Authority:

Clean Air Act of 1990, section 129

CFR Citation:

40 CFR 60

Legal Deadline:

NPRM, Judicial, February 1995. Final, Statutory, November 1992. Final, Judicial, April 1996.

Abstract:

The Environmental Protection Agency (EPA) is developing new source performance standards (NSPS) for new MWIs and emission guidelines (EG) for existing MWIs under sections 111 and 129 of the Clean Air Act. The NSPS are to reflect the maximum degree of reduction in emissions that is achievable for new units. The EG may be less stringent than the standards for new units. States must submit plans for implementing and enforcing the guidelines. Section 129 requires that emission limits be established for particulate matter, sulfur dioxide, hydrogen chloride, oxides of nitrogen, carbon monoxide, lead, cadmium, mercury, dioxins, and dibenzofurans. These standards are being developed under EPA's integrated combustion strategy, whereby EPA will regulate various forms of combustion under a coordinated plan. Two other elements of this strategy, the emission standards for municipal waste combustion and hazardous waste combustion, are summarized elsewhere in this Regulatory Plan.

EPA is working intensively with MWI owners and operators, as well as with other stakeholders, to assure that this rule is based on the best understanding of the industry, and that it affords the flexibility to achieve the necessary emission reductions in the most sensible, cost-effective ways, including the transfer of wastes to larger, more efficient regional facilities.

Statement of Need:

The medical waste incinerator rules will establish emission limits for dioxins, particulate matter, carbon monoxide, cadmium, lead, mercury, sulfuric acid, hydrochloric acid, and nitrogen oxide. These rules will establish emission limits that will reflect maximum achievable control technology (MACT), as defined by section 129, to reduce emissions of the above pollutants.

Alternatives:

The Clean Air Act specifies that the emission guidelines and the new source performance standards be based on MACT, and that MACT for existing sources can be no less stringent than the average emission limitations achieved by the best-performing 12 percent of units; and for new sources, can be no less stringent than the best-performing similar source. All control technologies for each pollutant as stringent as the floor or more stringent have been analyzed during the development of the standard.

Anticipated Costs and Benefits:

The annualized cost of the proposed standards for new incinerators will be in the range of $75 million to $215 million. The annualized cost of implementing the proposed guidelines for existing incinerators will be in the range of $350 million to $1.2 billion. The combined proposed standards and guidelines will result in reductions of dioxin emissions by more than 99 percent, as will reductions in the 90 percent to 98 percent range for particulate matter, cadmium, lead, mercury, hydrogen chloride, and carbon monoxide.

Risks:

Medical waste incinerators are among the larger sources of dioxin emissions in the country. Because of the adverse effects of dioxin emissions on the public health and ecosystems, it is one of the Agency's highest priorities to reduce the exposure to dioxin emissions.

EPA

129. NSPS: MUNICIPAL WASTE COMBUSTION—PHASE II AND PHASE III, INDUSTRIAL-COMMERCIAL WASTE INCINERATORS, AND OTHER SOLID WASTE INCINERATORS

Priority:

Economically Significant

Legal Authority:

42 USC 4111/Clean Air Act Amendments of 1990, section 129

CFR Citation:

40 CFR 60

Legal Deadline:

NPRM, Statutory, November 1991, for Phase II/Large MWCs.

NPRM, Statutory, November 1992, for Phase III/Small MWCs.

NPRM, Judicial, September 1, 1994, for Municpal Waste Combustors (MWC's).

Final, Judicial, September 1, 1995, for Municipal Waste Combustors (MWC's), Extension request for 10/ 31/95.

NPRM, Judicial, March 1, 1996, for Industrial-Commercial Waste Incinerators (ICWI).

Final, Judicial, March 1, 1997, for Industrial-Commercial WasteIncinerators (ICWI).

Abstract:

The Clean Air Act Amendments of 1990 direct the Environmental Protection Agency (EPA) to set standards of performance and emission guidelines for new and existing municipal waste combustors under Sections 111 and 129; to base these standards and guidelines on maximum achievable control technology; and to include emission limits for particulate matter, sulfur dioxide, hydrogen chloride, oxides of nitrogen, carbon monoxide, mercury, lead, cadmium, and dioxins and dibenzofurans. The standards for both large and small municipal waste combustors have been combined into one set of standards. The industrial-commercial waste incinerator standard and other solid waste incinerator standards will be managed as separate projects and separate standards will be developed. These standards are being developed under EPA's integrated combustion strategy, whereby EPA will regulate various forms of combustion under a coordinated plan. Two other elements of this strategy, the emission standards for medical waste and hazardous waste combustion, are summarized elsewhere in this Regulatory Plan.

Statement of Need:

The municipal waste combustor rules will establish emission limits for dioxins, particulate matter, cadmium, lead, mercury, SO2, HC1, and NOx. These rules will require maximum achievable control technology (MACT) as defined by section 129 to be installed on all applicable facilities to reduce emissions of the above pollutants.

Alternatives:

The Clean Air Act specifies that the emission guidelines and the new source performance standards be based on MACT and that MACT for existing sources can be no less stringent than the average emission limitations achieved by the best-performing 12 percent of units and/or new sources can be no less stringent than the average emission limitations achieved by the best-performing similar source. The EPA has reviewed all alternatives analyzed to assure they are no less stringent than the MACT "floor."

For the industrial-commercial waste incinerator standard and other solid waste incinerator standards on control alternatives have not been developed or analyzed at this time, and the potential cost and benefits are unknown. It is anticipated that the same type of controls used under the municipal waste combustor standard will be evaluated for industrial-commercial waste incinerators and other solid waste incinerators.

Anticipated Costs and Benefits:

The annualized cost for the new source performance standards for new municipal waste combustors will be less than $43 million. The annualized cost for the emission guidelines for existing municipal waste combustors will be less than $445 million. Dioxin, particulate matter, cadmium, and lead emissions will be reduced by more than 99 percent. Mercury emissions will be reduced by 85 percent, sulfuric acid and hydrochloric acid emissions by 95 percent, and nitrogen oxide (NOx) emissions by 45 percent. The quantified benefits associated with the rule and the guidelines are in excess of $266 million per year, but the benefit assessment is incomplete at this time. In particular, the current benefit estimate does not include benefits for the control of dioxin, mercury, lead, cadmium, NOx, or carbon monoxide. No evaluation of these pollutants is possible at this time.

For the industrial-commercial waste incinerator standard and the other solid

waste incinerator standard, no control alternatives have been developed or analyzed at this time, and the potential cost is unknown. It is anticipated that the same type of controls used for the municipal waste combustor standard will be evaluated for industrial-commercial and other solid waste incinerator standards.

Risks:

Municipal waste combustors are among the larger sources of dioxin emissions in the country. Because of the adverse effects of dioxin emissions on the public health and ecosystems, it is one of the Agency's highest priorities to minimize public exposure to dioxin.

EPA

130. OPEN-MARKET TRADING RULE FOR OZONE PRECURSORS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

Clean Air Act, sections 182 and 187

CFR Citation:

40 CFR 51

Legal Deadline:

None

Abstract:

The Environmental Protection Agency (EPA) will issue a final policy and model rule for open-market trading of ozone smog precursors (volatile organic compounds and oxides of nitrogen) that will provide more flexibility than ever before for companies to trade emission credits without prior State or Federal approval. After issuance by EPA, any State that adopts an identical rule will receive automatic EPA approval of its rule. Once the rule is in the State implementation plan (SIP), companies could engage in emissions trades without prior regulatory approval as long as accountability is ensured in accordance with the rule. The intended benefits of an active market in emissions trading are compliance with the ozone standard at far less cost and an increased incentive to develop innovative emission-reduction technologies.

Statement of Need:

In the last 25 years great progress has been made toward achieving healthy air quality, yet more than 100 million people still live in areas that do not meet the ozone health standard. Continued reductions in ozone precursor emissions are important to protect public health, but additional emission reductions are increasingly more costly to obtain. Emissions trading is one way to lower the overall cost of achieving additional reductions. Historically, the volume of emissions trading under EPA's existing trading policies has been low, suggesting high transaction costs associated with the delays of trade-by-trade government review. Additionally, there have been significant problems of quality control, reducing the environmental effectiveness of the program. EPA's policy on open-market emissions trading is intended to establish a trading program that minimizes transaction costs and harnesses the power of the marketplace to enhance quality control.

Alternatives:

The EPA endorses several forms of emissions trading, including interfacility and intrafacility emissions bubbling under the 1986 Emissions Trading Policy Statement, and emissions budget programs which cap areawide emissions from major emitters. The open-market program is yet another form of emissions trading that can reduce the overall cost of compliance with the ozone standard.

Anticipated Costs and Benefits:

Market-based emissions trading programs allow for greater and/or faster reductions in emissions, lower the cost of pollution control, reduce the adverse impacts of regulation on industry and consumer prices, lower the human health consequences, and improve the environment by achieving early reductions, and provide incentives to develop lower-costs pollution control methods. The actual benefits of open-market trading programs depend on a number of variables, including the number of States that adopt such programs and the number of sources that participate. Estimates of costs savings from established emissions-trading programs such as the nationwide acid rain trading program, the RECLAIM program in the Los Angeles area, and the lead phasedown range from nearly 20 to over 40 percent.

Risks:

Not applicable.

EPA

131. REVIEW OF THE FEDERAL TEST PROCEDURE FOR EMISSIONS FROM MOTOR VEHICLES AND MOTOR VEHICLE ENGINES

Priority:

Economically Significant

Legal Authority:

PL 101-549, Sec 208

CFR Citation:

40 CFR 86

Legal Deadline:

NPRM, Judicial, January 31, 1995. Final, Statutory, May 15, 1992. Final, Judicial, April 30, 1996. Other, Judicial, May 15, 1993.

Original statutory deadline (5/15/92) is from 11/90 Clean Air Act Amendments. Other Judicial date: per U.S. District Court Consent Decree, EPA issued a preliminary technical report on 5/15/93.

Abstract:

Section 206(h) of the Clean Air Act requires the Environmental Protection Agengy (EPA) to "review and revise as necessary" the regulations governing the Federal Test Procedure (FTP) to "insure that vehicles are tested under circumstances which reflect the actual current driving conditions under which motor vehicles are used, including conditions relating to fuel, temperature, acceleration, and altitude." The driving behavior used for the FTP was adopted over 20 years ago, and accumulated research suggests that it no longer adequately represents overall vehicle emission control performance under current driving conditions.

This action revises the FTP used to design all Federal emissions test methods, as well as all federally approved methods of estimating and projecting emissions from automobiles. This revision will advance the Agency's strategic aim of using better science and better data by assuring that automobiles can be accurately tested for compliance with Federal standards, and it will also enable EPA and others to obtain accurate emission inventories and projections to assist in planning for attainment of national air quality standards.

Statement of Need:

Extensive surveys of current driving behavior conducted by the EPA indicate significant difference between actual driving behavior and the current FTP. New test cycles determined from the driving behavior surveys were used to compare emissions predicted by the FTP with emissions that occur in actual driving. The test results support the need to control emissions at high speeds, acceleration, and during air conditioner operation, modes that are not adequately controlled with the current test procedures.

Summary of the Legal Basis:

EPA is under court order to revise the FTP.

Alternatives:

The Clean Air Act specifies that the test procedures reflect actual driving conditions. Extensive research indicates that the existing procedures are severely deficient in the areas of high speeds, high accelerations, and air conditioning operation. The most appropriate method of controlling emissions during these conditions have been analyzed during the development of this rulemaking.

Anticipated Costs and Benefits:

The per vehicle cost to comply with the test procedure revisions is expected to be well under $10 and the annualized cost less than $100 million. Overall hydrocarbon emissions from light-duty vehicles and trucks are expected to be reduced by about 6 percent, carbon monoxide emission by about 18 percent, and NOx emissions by about 12 percent. On a national basis, the cost of reducing non-methane hydrocarbon and NOx emissions is expected to be about $200 per ton.

Risks:

The risks addressed by this action are those associated with not attaining the National Ambient Air Quality Standards for ozone, carbon monoxide, nitrogen oxides, and particulates. These risks have been extensively detailed as part of the individual rulemakings setting these national standards. Achievement and maintenance of attainment of the standards depend in part on accurate knowledge of the emissions characteristics of sources, including automobiles. This action will increase the accuracy of such knowledge by incorporating the latest techniques of emission measurement.

EPA

132. RISK MANAGEMENT PROGRAM FOR CHEMICAL ACCIDENTAL RELEASE PREVENTION

Priority:

Economically Significant

Legal Authority:

PL 101-549; Clean Air Act Section 112(r)

CFR Citation:

40 CFR 68

Legal Deadline:

Final, Statutory, November 15, 1993. Other, Judicial, March 29, 1996.

Court Decree - Settlement Agreement

Abstract:

Section 112(r)(7) of the Clean Air Act (CAA), as amended, required the Environmental Protection Agency (EPA) to promulgate by November 15, 1993, reasonable regulations and appropriate guidance to provide for prevention and detection of accidental releases of chemicals and for response to such releases. The regulations shall require the owner or operator of stationary sources at which a regulated substance is present to prepare and implement a risk management plan (RMP) that must include a hazard assessment that evaluates the potential effects of an accidental release of any regulated substance and must also include a five-year accident release history. The RMP must document a prevention program and document a response program that provides specific actions to be taken to protect human health and the environment in response to a release. The RMPs must be registered with EPA and must be submitted to the State in which the facility is located and to any local agency that has responsibility for planning for or responding to chemical accidents. EPA must establish a system for auditing the RMPs to ensure that plans are periodically updated.

EPA published a notice of proposed rulemaking on October 20, 1993. In

reviewing close to 1,000 comments received, the Agency recognized the need for a supplemental notice to clarify some of the issues raised by commenters and seek additional public comments on several of the issues. The supplemental notice was signed by the Administrator on February 28, 1995. The deadline for the final RMP rule is March 29, 1996, following which, regulated sources will have three years to comply with the RMP requirements.

EPA promulgated a list of substances and thresholds on January 30, 1994 (59 FR 4478), which determines which facilities must comply with the accident prevention regulations. The regulated universe includes small businesses and state/local/and tribal governments that have more than a threshold quantity of a regulated substance. In order to minimize the impact on smaller sources, EPA is planning to develop model RMPs for industry sectors that utilize similar equipment and handle a single chemical. To further reduce the burden on medium and smaller sources, EPA is planning to develop "lookup tables" for at least the most ubiquitous chemicals that facilities could use in the evaluation of their offsite consequence analysis based on worst-case scenarios.

Model RMPs and "lookup tables" will also ease the burden on State and local agencies responsible for implementing the program and who will review the adequacy and quality of the RMP.

Statement of Need:

Existing Federal regulations addressing the potential for catastrophic events related to chemical substances are focused on emergency preparedness and response. Specifically, the Emergency Planning and Community Right-to-Know Act (EPCRA) established the structure at the State and local levels to deal with emergency planning and response to chemical accidents. Several other laws and programs at the Federal level dealt with emergency response to chemical accidents: the Clean Water Act and the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) created the National Oil and Hazardous Substance Pollution Contingency Plan (NCP). The NCP sets up the Federal Government's emergency response structure and procedures for responding to chemical accidents. The accidental-release prevention provisions under the CAA recognize the need for integrating emergency preparedness and response with activities to prevent accidental releases from occurring in the first place.

The proposed rule for the prevention and detection program, including RMPs for accidental-release prevention, required industry to develop an integrated, holistic approach to managing the risk posed by the presence and use of regulated substances. In the development of its risk management program, EPA has also been coordinating with the Occupational Safety and Health Administration (OSHA). EPA's proposed RMP rule adopts and builds on process safety management elements included in OSHA's chemical process safety standard required under section 304 of the CAA amendments of 1990. (OSHA published a notice of proposed rulemaking (NPRM) on July 17, 1990, 55 FR 29150, and a final rule on February 24, 1992, 57 FR 6316.) These elements include process information, process hazard analysis, standard operating procedures, training, prestartup reviews, mechanical integrity, management of change, accident investigation, safety audits, and emergency response.

Summary of the Legal Basis:

The legal basis for this rulemaking is summarized in the "Abstract" section.

Alternatives:

EPA developed its proposed rule after an extensive information-gathering effort. Three States--California, New Jersey, and Delaware--have risk-management plan requirements under State laws. EPA met with officials in all three States and held interviews with seven facilities in these States. EPA then held eight focus groups, five with facilities and three with implementing agencies, in the three States to solicit their opinions on existing and proposed regulations. Finally, EPA held a 2-day roundtable seminar associated with the risk management planning requirements. State officials, trade associations, labor unions, environmentalists, and organizations of public officials participated in the discussions.

EPA evaluated two options for the risk management program: Program Option 1, the proposed rule, included the statutorily mandated elements (hazard assessment, registration, emergency response program, and risk management plan) plus the mandated prevention program that adopted OSHA's process safety management standard. Program Option 2, based on the New Jersey risk management program, includes all listed elements but requires a greater level of documentation and more detailed requirements for many elements.

Anticipated Costs and Benefits:

Because, from an economic perspective, the RMP regulations and the list of regulated substances are inseparable, EPA prepared a regulatory impact analysis (RIA) that combines the two requirements. As indicated in the previous section, the RIA evaluated two options for the risk management program. Because the two program options cover the same elements with the only difference between the two the level of detail, it was not possible to develop separate estimates of the benefits for the two program options based on data available. Consequently, only one set of benefits estimates was developed.

EPA's proposed option is list 2 in Program Option 1, which is estimated to have an initial cost of $503 million and quantifiable annual benefits of $890 million. The proposed rule is expected to result in other, nonquantifiable benefits as well. By reducing the likelihood of accidental releases and the likelihood that any release will be catastrophic, the rule should reduce facility operating costs which may result in greater output, higher wages, and lower costs for the output. The rule will also encourage facilities to reduce the quantity of hazardous substances stored onsite and to shift to less toxic chemicals, reducing the risk to both workers and the public. Finally, the information provided to the public through the mandated RMP will be useful to both the public and governments at all levels.

BILLING CODE 6560-50-F

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION (EEOC)

Statement of Regulatory Priorities

The Equal Employment Opportunity Commission (EEOC) enforces six statutes prohibiting discrimination in employment. Title VII of the Civil Rights Act of 1964, as amended, prohibits employment discrimination on the basis of race, color, sex, religion or national origin. The Equal Pay Act of 1963, as amended, prohibits the payment of different wages to women and men working in the same establishment, performing equal work that requires equal skill, effort, and responsibility under similar working conditions, unless the pay differential is based on factor(s) other than sex. The Age Discrimination in Employment Act of 1967, as amended (ADEA), prohibits employment discrimination on the basis of age against people age 40 and older. Title I of the Americans with Disabilities Act of 1990, as amended (ADA), prohibits employment discrimination against qualified individuals with disabilities. Sections 501 and 505 of the Rehabilitation Act of 1973, as amended, prohibit Federal agencies from discrimination in employment against qualified individuals with disabilities and require agencies to accommodate the special needs of persons with disabilities. The Government Employee Rights Act of 1991 extends protections against employment discrimination to certain employees who were not previously covered.

The mission of the agency is to ensure equality of opportunity by vigorously enforcing Federal legislation prohibiting discrimination in employment. Enforcement is accomplished through investigation, conciliation, alternative methods of dispute resolution, litigation, coordination, and regulation, as well as by education, policy research, and technical assistance. In pursuing its mission of eradicating discrimination in the workplace, the Commission intends that its enforcement be certain and predictable, and that its remedies be preventive and remedial in scope.

One important step toward these ends is to make sure that employees, employers, and union representatives understand their rights and obligations under the Federal laws prohibiting employment discrimination. In accordance with the President's national regulatory principles, EEOC develops regulations necessary to inform employees and employers of their rights and obligations under the statutes it enforces. EEOC further educates the public on an ongoing and proactive basis, through interpretive guidelines, policy documents, management directives, and other public guidance programs.

EEOC is currently considering several significant actions of a regulatory nature, which would be published for public comment. The Commission is considering issuing guidelines on the requirements of title I of the ADA in the context of employer provided health insurance. Clear and comprehensive guidelines will reduce confusion and uncertainty on the part of insurers, employers, and individuals with disabilities as to the application of the ADA to various health insurance provisions and practices. In addition to helping employers understand the scope of their nondiscrimination responsibilities and ensuring that individuals with disabilities are protected from prohibited discrimination, these guidelines will provide a source of guidance for the courts, thus helping to ensure uniform enforcement of the ADA.

The Commission is also considering issuing regulatory guidance on title II of the Older Workers Benefit Protection Act of 1990, which amended the ADEA to permit knowing and voluntary unsupervised waivers of rights and claims arising under the Act. Representatives of both the employer and employee communities have strongly demonstrated their interest in the issuance of additional guidance in this area. As part of the development of a regulation on waivers under the ADEA, the Commission is planning to engage in a regulatory negotiation to seek to obtain a consensus recommendation to the Commission.

Finally, the Commission is presently reviewing its position on apprenticeship programs under the ADEA. The current interpretive guideline holds that age limitations for entry into bona fide apprenticeship programs are not affected by the ADEA. Due to changing circumstances in the work force and structural changes in the workplace, the Commission is reviewing its interpretation to determine whether it is required by the language of the statute and to assess whether it represents sound policy under today's conditions.

(Consistent with section 4(c) of Executive Order 12866, this statement was reviewed and approved by the Chairman of the agency. The statement has not been reviewed or approved by the other members of the Commission.)

EEOC

PROPOSED RULE STAGE

133. GUIDELINES ON THE APPLICATION OF THE AMERICANS WITH DISABILITIES ACT OF 1990 TO EMPLOYER PROVIDED HEALTH INSURANCE

Priority:

Other Significant

Legal Authority:

42 USC 12111 et seq

CFR Citation:

29 CFR 1631

Legal Deadline:

None

Abstract:

The Commission proposes to issue guidelines to explain how the Americans with Disabilities Act (ADA) applies to employer provided health insurance plans. The guidelines will reexamine the issues addressed in the Commission's "Interim Enforcement Guidance on the Application of the ADA to Disability-Based Distinctions in Employer Provided Health Insurance," issued on June 8, 1993. The guidelines will also address a number of issues that were not addressed in either the Interim Enforcement Guidance or in the Commission regulations implementing title I of the ADA, including the ADA's application to corporate "wellness" programs. The proposed guidelines will be published for public comment. After consideration of the comments, the Commission will issue final guidelines.

Statement of Need:

Title I of the ADA prohibits employers with 15 or more employees from discriminating on the basis of disability in the provision of fringe benefits, including employer provided health insurance. Title V of the ADA, as applied to title I, permits employers, insurers, and plan administrators to continue to establish or observe the terms of health insurance plans, engage in risk-based underwriting, and/or use risk assessment, risk classification, or other traditional insurance practices, so long as these practices are not used as a subterfuge to evade the purposes of the ADA, 42 USC 12201(c).

Neither the statute nor its legislative history defines the term "subterfuge" or explains the application of that term to specific insurance practices or provisions. This has given rise to confusion and uncertainty on the part of insurers, employers, and individuals with disabilities, as to the requirements of the ADA in the context of employer provided health insurance. The guidelines are necessary to alleviate this confusion and uncertainty, thereby reducing potential employment discrimination and/or litigation that is based upon a misunderstanding of the law.

Summary of the Legal Basis:

The legal basis of authority for these guidelines is set forth above in Legal Authority. No aspect of this regulatory action is required by statute or court order.

Alternatives:

After careful consideration, the Commission has determined that the issuance of these guidelines is the most efficient and effective way to clarify the application of the ADA to employer provided health insurance, and to ensure uniform enforcement of the ADA in this area.

Anticipated Costs and Benefits:

Clear and comprehensive guidelines will reduce confusion and uncertainty on the part of insurers, employers, and individuals with disabilities as to the application of the ADA to various health insurance provisions and practices. This will help ensure that individuals with disabilities are protected from prohibited discrimination, and that employers understand the scope of their nondiscrimination responsibilities under the law. These guidelines will also assist courts confronting these issues to ensure uniform enforcement of the ADA.

Risks:

In the absence of these guidelines, confusion and uncertainty with respect to the application of the ADA to various health insurance provisions and practices may result in prohibited employment discrimination against individuals with disabilities. Such confusion and uncertainty may also result in unnecessary apprehension on the part of employers as to the legality of actions they may take to better manage and contain escalating health care costs.

EEOC

134. REGULATIONS INTERPRETING TITLE II OF THE OLDER WORKERS BENEFIT PROTECTION ACT OF 1990 (OWBPA)

Priority:

Other Significant

Legal Authority:

29 USC 628

CFR Citation:

29 CFR 1625

Legal Deadline:

None

Abstract:

The Age Discrimination in Employment Act of 1967 (ADEA) was amended in 1990 by OWBPA. Title II of OWBPA sets forth the statutory requirements for a valid waiver of rights under the ADEA.

Regulations under title II would provide guidance on implementing OWBPA's requirements for unsupervised ADEA waivers. As part of the development of this regulation, the Commission will engage in a regulatory negotiation on waivers of rights and claims under the ADEA.

Statement of Need:

In 1990, Congress amended the ADEA to permit knowing and voluntary unsupervised waivers of rights and claims arising under the Act. In 1992, the Commission published a notice in the **Federal Register** seeking public comment on various ADEA issues, including the topic of waiver agreements. In response to the notice the Commission received numerous detailed comments on the waivers provisions which demonstrated a need for regulatory guidance. Over the ensuing years, representatives of employer and employee communities have expressed a continuing interest in receiving such guidance. Waiver agreements are widely used in the workplace, particularly when employers find it necessary to reduce the size of the workforce. Employees who sign waiver agreements are bargaining away important Federal rights in return for some form of consideration. Employers are offering additional benefits, sometimes quite substantial, in exchange for employee agreements to forgo potential recovery in age discrimination lawsuits. Both sides have a substantial stake in this area of the law and would benefit from regulatory guidance.

Summary of the Legal Basis:

Section 9 of the ADEA authorizes the Commission to issue such rules and regulations as it may consider necessary or appropriate for carrying out the Act. Moreover, regulatory negotiation is authorized by the Negotiated Rulemaking Act of 1990, and is consistent with the President's goal of involving stakeholders in the regulatory process.

Alternatives:

Th objective of a regulatory negotiation is to seek to obtain a consensus recommendation to the Commission. Thus, the process itself will involve consideration of various alternatives with the affected parties agreeing upon proposed regulatory positions that best serve the public interest.

Anticipated Costs and Benefits:

Clear regulatory guidance for the use of waiver agreements should lead to increased voluntary resolution of potential employment disputes, which in turn will reduce the possibility of protracted and costly litigation. At the same time, providing clear regulatory guidance on what constitutes a valid waiver agreement will ensure that persons enter into such agreements only in a knowing and voluntary manner. It is not anticipated that any costs will arise from issuing regulatory guidance.

Risks:

Regulatory guidance for drafting and implementing valid waiver agreements will lessen the risk that persons might waive important Federal civil rights in an unknowing or involuntary manner. The Commission has a substantial interest in addressing this risk. The ADEA is intended to implement the

strong public interest in attaining a workplace free of age discrimination. Individual employees serving as private attorneys general are an integral part of the ADEA enforcement scheme crafted by Congress. Thus, it is of critical import that persons who may choose to relinquish their Federal civil rights do so voluntarily and with full knowledge. Moreover, other Federal civil rights laws enforced by the Commission, for example Title VII, envision an important role for aggrieved individuals as private attorneys general. Insofar as waiver agreements may be used under statutes other than the ADEA, clear guidance will also lessen the risk of abuse in those areas.

EEOC

135. INTERPRETATION RELATING TO APPRENTICESHIP PROGRAMS UNDER THE AGE DISCRIMINATION IN EMPLOYMENT ACT (ADEA)

Priority:

Other Significant

Legal Authority:

29 USC 628

CFR Citation:

29 CFR 1625.13

Legal Deadline:

None

Abstract:

The current interpretive regulation at 29 CFR 1625.13 is being reconsidered to determine if any revision or modification is appropriate.

Statement of Need:

The Age Discrimination in Employment Act is intended, in part, to promote the employment of older workers based on ability rather than age, and to assist employers and workers in meeting problems arising from the impact of age on employment. As the agency charged with ADEA enforcement responsibility, the Commission has the authority to undertake research with a view to reducing barriers to the employment of older persons. It also has the authority to review periodically its interpretive regulations in light of applicable law and policy. The existing Commission interpretation holds that age limitations for entry into bona fide apprenticeship programs are not affected by the Act. Due to changing circumstances in the workforce and structural changes in the workplace, the Commission has decided to review its interpretation to determine whether it is required by the language of the Act and to assess the policy considerations involved, that is, to determine whether the interpretation implements sound policy under present-day conditions.

Summary of the Legal Basis:

Section 9 of the ADEA and 5 U.S.C. 301 authorize the Commission to issue such rules and regulations as it may consider necessary or appropriate for carrying out the Act. Moreover, an agency charged with furtherance of the public interest is not bound to a rigid adherence to prior positions. Columbia Broadcasting System v. FCC, 454 F.2d 1018, 1026 (D.C. Cir. 1971).

Alternatives:

The Commission is seeking public comment for the purpose of assessing the soundness of the present interpretation as a matter of both law and policy. Thus, at the conclusion of the process, the Commission could decide to retain the present interpretation, rescind the present interpretation, or rescind and replace the present interpretation.

Anticipated Costs and Benefits:

As noted above, one possible course of action would be for EEOC to change its interpretation to state that the ADEA applies to apprenticeship programs. Anticipated benefits from such a change would be a potential increase in training and employment opportunities for persons age 40 and older, an increase in the number of skilled workers, a more efficient and competitive business sector, an enlarged tax base, and a reduction in the cost of various social programs tied to unemployment. The anticipated costs of the change are minimal. However, it has been argued that the change will increase the costs of running apprenticeship programs due to older apprentices leaving the workforce before program sponsors realize sufficient returns on their training investment. It has been further argued that this increase in costs will result in the discontinuation of some apprenticeship programs and in an overall reduction in the number of apprenticeship opportunities. The Commission will carefully assess such arguments after receiving public comment.

Risks:

Under the ADEA, an employer who acts in good faith, in conformity with, and in reliance on any written interpretation of the Commission is insulated from liability. Although a reassessment is entirely a matter of agency discretion, the risk of not conducting a reassessment is that the present interpretation could unduly limit opportunities for job mobility and/or for persons to reenter the workforce.

BILLING CODE 6570-06-F

GENERAL SERVICES ADMINISTRATION (GSA)

Statement of Regulatory Priorities

The General Services Administration (GSA) establishes policy for and provides economical and efficient management of Government property and records, including construction and operation of buildings; procurement and distribution of supplies; utilization and disposal of property; transportation, traffic, and communications management; and management of the Governmentwide automatic data processing resources program.

GSA's regulatory priorities for 1995 continue to reflect the President's commitment to reform the regulatory process.

GSA will change the Federal Information Resources Management Regulation policies on delegations of procurement authority from GSA for the acquisition of Federal information processing (FIP) resources. The change will establish $100 million as the regulatory threshold for agency acquisitions of FIP resources—a continuation of GSA's trend to place greater authority in the hands of operating agencies. The higher threshold will allow agencies to assume greater responsibility for their acquisitions, while allowing GSA to focus on larger, more complex acquisitions.

Federal Property Management Regulations, Temporary Regulation D-76, Assignment and Utilization of Space, will be codified in the Code of Federal Regulations. This permanent Governmentwide regulation will improve the space delivery process for Federal customer agencies by making the process more efficient, more timely, and better able to deliver quality space that supports customer-agency needs.

The General Services Administration Acquisition Regulation (GSAR) will be changed to implement Section 1555 of the Federal Acquisition Streamlining Act of 1994, which deals with cooperative purchasing. The change will provide for use of GSA's Federal Supply Schedules upon request from a State or local government, the government of an Indian tribe, or the Commonwealth of Puerto Rico. The ability of small governmental entities to order from the Federal Supply Schedules holds out the potential for significant cost savings for these organizations.

Also indicative of the agency's resolution to develop a regulatory system that improves the agency's mission to provide products and services quickly and economically, are GSA's continuing efforts to revise the entire GSAR.

GSA will continue to monitor and review regulations and use regulatory direction only when it offers the most effective means of carrying out GSA's mission and responsibilities.

GSA

PROPOSED RULE STAGE

136. REISSUANCE OF THE GENERAL SERVICES ADMINISTRATION ACQUISITION REGULATION (GSAR)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

40 USC 486(c)

CFR Citation:

48 CFR 501; 48 CFR 502; 48 CFR 503; 48 CFR 504; 48 CFR 505; 48 CFR 506; 48 CFR 507; 48 CFR 508; 48 CFR 509; 48 CFR 510; 48 CFR 511; 48 CFR 512; 48 CFR 513; 48 CFR 514; 48 CFR 515; ...

Legal Deadline:

None

Abstract:

The General Services Administration (GSA) proposes to revise and reissue chapter 5, 48 CFR, in its entirety. The reissuance will represent the culmination of the Total Quality Management project to review GSA's acquisition regulation/directive system.

Statement of Need:

GSA plans to publish a proposal to revise the entire GSAR. The proposal will redefine the objectives of the procurement system and its regulatory base, establish very narrow standards for the scope and nature of the regulation, eliminate provisions that impede productivity or unnecessarily increase administrative costs, reduce rigid rules in favor of guiding principles, delegate authority and accountability to the lowest level consistent with competency, and reduce the overall volume of the regulation by at least 50 percent. After consideration of public comments, the entire regulation will be issued in final form.

Alternatives:

Alternatives considered include an approach that would continue to include nonregulatory internal guidance in the GSAR rather than putting the internal guidance in a separate internal directive to be distributed to contracting personnel within the agency.

Anticipated Costs and Benefits:

Issuance of the final regulation will facilitate GSA's ability to operate in a competitive environment by enabling GSA contracting offices to deliver services in a more timely, efficient, and cost-effective manner. A specific dollar savings cannot be calculated.

GSA

137. FEDERAL SUPPLY SCHEDULE CONTRACTS—COOPERATIVE PURCHASING

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will

revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

40 USC 486(c)

CFR Citation:

48 CFR 510; 48 CFR 532; 48 CFR 538; 48 CFR 552

Legal Deadline:

None

Abstract:

The General Services Administration (GSA) proposes to make changes to the General Services Administration Acquisition Regulation (GSAR) that would implement Section 1555 of the Federal Acquisition Streamlining Act of 1994 (PL 103-355) which deals with cooperative purchasing.

Statement of Need:

Section 1555 amends subsection (b) of section 201 of the Federal Property and Administrative Services Act of 1949 (40 USC 481) to authorize the Administrator of General Services to provide for use of Federal Supply Schedules of the GSA upon request from a State or local government, the government of an Indian tribe, or the Commonwealth of Puerto Rico.

GSA plans to publish a proposal to add Subpart 538.70 to provide the policies and procedures for cooperative purchasing and to add to or revise the prescription for use of, or text of several solicitation provisions and contract clauses in other parts of the regulation, including Parts 510, 532, and 552, in order to accommodate use of the schedule contracts by State, local, and Indian tribal governments, and the Commonwealth of Puerto Rico. After consideration of public comments, the regulation will be issued in final form.

Alternatives:

Alternatives were considered regarding different aspects of the proposed change. With respect to the process for identifying entities eligible to use GSA sources of supply including Federal Supply Schedules, GSA considered and rejected the idea of using a contract clause to provide a blanket authorization to eligible entities, with provisions for governmental entities to provide evidence to support their eligibility at the request of schedule contractors. The idea was rejected for several reasons. First, it placed a greater burden on both contractors and eligible governmental entities. Instead of a one-time application to GSA, governmental entities would be required to provide evidence of eligibility with virtually every order placed against schedule contracts. In addition, schedule contractors would be unable to gauge the level of interest on the part of State, local, and Indian tribal governments in participating in the schedule contracts. In addition, every contractor would be faced with determining whether the evidence of eligibility provided by governmental entities was adequate. In addition, such an approach limits GSA's ability to control the program in order to ensure that service to executive agencies of the Federal Government is maintained. Instead, a one-time application process was determined to be the best approach. The proposal also encourages electronic submission (rather than paper copies) of the application form, as that is deemed the most cost-effective mechanism. The list of entities authorized to use GSA sources of supply will also be available electronically for use by schedule contractors.

Some consideration was given to requiring Federal Supply Schedule contractors to accept orders from State and local governments, Indian tribes, and the Commonwealth of Puerto Rico, but that approach was ultimately rejected. The foremost consideration of GSA in implementing cooperative purchasing is to ensure that the Federal Supply Schedule Program continues to be an efficient and cost-effective acquisition mechanism for executive agencies of the Federal Government, and it was felt that mandating contractor participation in cooperative purchasing could, in some instances, negatively impact the program. For that reason, it was decided to allow contractors to decide individually whether they want to open their contracts to cooperative purchasing, or to allow them not to do so. Similarly, GSA will look at each schedule and make a case-by-case determination that the schedule should be opened for ordering by State and local governments, Indian tribes, and the Commonwealth of Puerto Rico. This will allow GSA to exclude individual or classes of schedules from the program.

To militate against the potential adverse impact on dealers/ distributors, the proposal also provides for schedule contractors to maintain their dealer/distributor networks by allowing for their participation in the performance of schedule contracts.

Anticipated Costs and Benefits:

The Federal Acquisition Streamlining Act of 1994 authorizes the Administrator of GSA to require the authorized non-Federal users of the Federal Supply Schedules to reimburse GSA for any administrative costs for using the schedules. GSA is in the process of concerting the Federal Supply Schedule Program, which is currently funded through congressional appropriations, to an industrially funded operation. Non-Federal users will be assessed the same user charge as Federal users. Schedule contract prices will be included in the administrative fee.

Federal Supply Schedule contracts are negotiated as volume purchase agreements, with generally favorable pricing. The ability of small governmental entities to order from the Federal Supply Schedules holds out the potential for significant cost savings for those organizations.

GSA

FINAL RULE STAGE

138. IMPLEMENTATION OF FEDERAL ACQUISITION STREAMLINING ACT

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

40 USC 486(c)

CFR Citation:

48 CFR ch 5

Legal Deadline:

Final, Statutory, October 1, 1995.

Abstract:

The Federal Acquisition Streamlining Act of 1994 (PL 103-355) was enacted October 13, 1995. The Act made major changes in the laws that impact the Federal procurement process in order to streamline procedures. Primarily implementation of the Act was affected at the Federal Acquisition Regulation (FAR) level. However, the Act contains certain GSA-unique provisions which require implementation in the GSA Acquisition Regulation (GSAR). In addition, other changes in the GSAR were needed to conform agency regulation to Governmentwide regulations that were revised to implement the Act.

Statement of Need:

Certain provisions in PL 103-355 apply to GSA only and have been or will be implemented in the GSAR. For example, the authorization for GSA to establish simplified procedures for small leases of real property (see RIN 3090-AF67) and the provision in section 1555 on cooperative purchasing (see RIN 3090-AF68) which allows GSA to open Federal Supply Schedule contracts for use by State, local and Indian tribal governments and the Commonwealth of Puerto Rico. As a result of changes in the FAR, GSA also needs to revise the GSAR to conform to the FAR as revised to implement the Federal Acquisition Streamlining Act of 1994. (See RINs 3090-AF76, AF80, AF85, AF86 and AF87).

Summary of the Legal Basis:

PL 103-355

Alternatives:

Alternatives are outlined in the individual regulatory items.

Anticipated Costs and Benefits:

The rules issued implementing the Federal Acquisition Streamlining Act of 1994 facilitate GSA's ability to operate in a competitive environment by enabling GSA contracting offices to deliver services in a more timely, efficient, and cost-effective manner. A specific dollar savings cannot be calculated.

Risks:

Cannot be established at this time.

GSA

139. AMENDMENT OF THE FIRMR PROVISIONS TO MODIFY REQUIREMENTS FOR OBTAINING DELEGATIONS OF PROCUREMENT AUTHORITY

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

40 USC 486(c); 40 USC 751(f)

CFR Citation:

41 CFR 201

Legal Deadline:

None

Abstract:

Users of the Federal Information Resources Management Regulation (FIRMR) have mentioned some confusion regarding the interpretations of provisions regarding delegation of procurement authority thresholds. Specific concerns involve the applicability of the thresholds to certain General Services Administration (GSA) programs. This rule addresses these issues by establishing new delegations thresholds for all agencies and clarifying which GSA programs do not require delegations of procurement authority.

Statement of Need:

The FIRMR currently contains regulatory thresholds that are inconsistent with Governmentwide specific agency thresholds granted by GSA. This rule will correct this inconsistency.

Summary of the Legal Basis:

GSA has statutory authority and responsibility for issuing Governmentwide guidance and regulations to ensure economy and efficiency in the acquisition, management, and use of Federal information processing (FIP) resources.

Alternatives:

GSA examined FIRMR provisions dealing with delegations thresholds to determine their adequacy. GSA also reviewed agency acquisition actions to determine the impact of FIRMR provisions. Based on the results of this review, GSA wrote to each agency in July 1995 delegating them procurement authority for FIP resources of $100,000,000. This supplement to FIRMR Interim Rule 2 of October 1994 was developed to codify $100,000,000 as the regulatory threshold for FIP resources, to be consistent with GSA's July 1995 action.

Anticipated Costs and Benefits:

The proposed amendment should streamline the acquisition process by clarifying FIRMR regulatory provisions. It was based on adequate information garnered from review and analysis of FIRMR provisions and their impact on agency procurement requests. The amendment will not have any effect on the economy.

Risks:

None

GSA

140. FEDERAL PROPERTY MANAGEMENT REGULATIONS PART 101-17, ASSIGNMENT AND UTILIZATION OF SPACE

Priority:

Other Significant

Legal Authority:

40 USC 481; 40 USC 601; 7 USC 1924; 40 USC 490; 40 USC 531; 42 USC 3601; 42 USC 4321; 42 USC 4201; EO 12072; EO 12411; EO 12512; PL 100-678

CFR Citation:

41 CFR 101-17

Legal Deadline:

None

Abstract:

Federal Property Management Regulation Temporary Regulation D-76, Part 101-17, Assignment and Utilization of Space, was published in August 1991. It is intended that this regulation will become permanent. Its purpose is to improve space delivery process for Federal agencies by making the process more efficient, more timely, and better able to deliver quality space that supports agency mission needs. The regulation does the following: implements a new space-assignment process that emphasizes client service; establishes a new comprehensive move policy that clarifies roles and responsibilities; revises the General Services Administration (GSA) location policy to be more responsive to agency mission needs; revises the standard alterations which agencies receive upon an initial move, to recognize modern office needs; and revises the space classification definitions to eliminate ambiguity. These changes will result in a more efficient space delivery process and improve the overall efficiency of Government operations.

Statement of Need:

The purpose of this regulation is to improve the space delivery process for Federal customer agencies by making the process more efficient, more timely, and better able to deliver quality space that supports customer agencies' mission needs.

Summary of the Legal Basis:

GSA has statutory authority and responsibility for issuing Governmentwide guidance and regulations to ensure economy and efficiency in the assignment and utilization of space for its customer agencies.

Alternatives:

GSA examined the Federal Property Management Regulations (FPMR) provisions dealing with assignment and utilization of space to its customer agencies. In order to remove ambiguity, GSA also examined the new space assignment process that emphasizes customer service; the new comprehensive move policy that clarifies roles and responsibilities; a more user-friendly location policy that is more responsive to customer agencies' mission needs; the level of standard level alterations that agencies receive upon initial move and also in recognition of modern office needs; and space classification standards. Based upon the results of this review, GSA determined that it was in the best interest of the Government to issue revised Governmentwide guidance and regulations to ensure economy and efficiency in the space delivery process to our customer agencies, and to improve the overall efficiency of Government operations.

Anticipated Costs and Benefits:

The proposed regulation should improve the space delivery process for Federal customer agencies by making the process more efficient, more timely, and better able to deliver quality space that supports customer agencies' needs; thereby improving the overall efficiency of Government operations. The regulation was based on adequate information gathered from review and analysis of FPMR provisions and their impact on customer agencies' space requests. The proposed regulation will not have any major impact on the economy.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (NASA)

Statement of Regulatory Priorities

The National Aeronautics and Space Administration (NASA) was established by the National Aeronautics and Space Act of 1958. The purpose of NASA is to carry out the aeronautical and space activities of the United States. In order to carry out this purpose, NASA is authorized to conduct research for the solution of problems of flight within and outside the Earth's atmosphere; to develop, construct, test, and operate aeronautical and space vehicles for research purposes; to operate a space transportation system including the space shuttle, upper stages, space station, and related equipment; and to perform such other activities as may be required for the exploration of space. The term "aeronautical and space vehicles" means aircraft, missiles, satellites, and other space vehicles, together with related equipment, devices, components, and parts. NASA conducts activities required for the exploration of space with manned and unmanned vehicles and arranges for the most effective utilization of the scientific and engineering resources of the United States with other nations engaged in aeronautical and space activities for peaceful purposes.

NASA's mission, as documented in its Strategic Plan dated February 1995, is to explore, use, and enable the development of space for human enterprise; advance scientific knowledge and understanding of the Earth, the solar system, and the universe and use the environment of space for research; and research, develop, verify, and transfer advanced aeronautics, space, and related technologies.

The following are narrative descriptions of the most important regulations being planned for publication in the**Federal Register** during fiscal year 1996.

NASA is testing the MidRange Procurement Procedure (48 CFR Part 1871) from July 1, 1993, to June 30, 1997. This simplified procedure covers procurements between $25,000 and $500,000 in annual value. The test started at Marshall Space Flight Center and has been expanded to cover other NASA Centers. The test uses best value selection and seeks to reduce the time it takes to award contracts. NASA plans to permanently adopt features of the test which have been successful.

The Federal Acquisition Regulation (FAR), 48 CFR chapter 1, contains procurement regulations that apply to NASA and other Federal agencies. NASA implements and supplements FAR requirements through the NASA FAR Supplement, 48 CFR chapter 18. Consistent with recommendations of the National Performance Review (NPR), NASA is revising the NASA FAR Supplement in order to simplify, shorten, and clarify the regulation while delegating more responsibility.

NASA is working on technical amendments to refine and clarify the contractual cross-waiver of liability in NASA agreements involving launch services.

BILLING CODE 7510-01-F

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION (NARA)

Statement of Regulatory Priorities

The National Archives and Records Administration (NARA) promulgates (a) regulations directed to other Federal agencies regarding adequate and proper documentation of the policies and transactions of the Federal Government and for ensuring proper records disposition, and (b) regulations directed to the public relating to access to and use of the historically valuable archives, donated historical materials, Nixon Presidential materials, and Presidential records in the National Archives, regional archives, Presidential libraries, and Presidential Materials Projects operated by NARA. NARA also promulgates regulations relating to the National Historical Publications and Records Commission (NHPRC) grant programs.

NARA's regulatory priorities for fiscal year 1996 will be the clarification and updating of records-management regulations concerning Federal agency recordkeeping requirements, electronic records, and audiovisual records; and the completion of the rulemaking process for the NHPRC grant program regulations.

NARA records-management regulations must provide agencies with the guidance they need to fulfill their statutory obligation to make and preserve records containing adequate and proper documentation of the agency's business. This guidance must be reviewed and updated periodically to reflect changing information technology and recordkeeping practices in agencies. NARA has determined that existing regulations on personal papers and on the removal of nonrecord and personal materials do not provide sufficient protection against improper removal of Federal records from agency control. NARA plans to expand guidance on personal papers and add a requirement for agencies to protect against the removal of Federal records by issuing written procedures for the removal of nonrecord and personal materials. NARA also sees a need to revise regulations on records creation and maintenance to emphasize their applicability to electronic records.

During fiscal year 1995, NARA began the rulemaking process to update records management regulations to provide broader coverage of audiovisual materials created by agencies today. The rule will address formats not covered in the current regulations and will help agencies to ensure that audiovisual records are properly preserved. NARA also is undertaking a revision of its records-management regulations on transfer of electronic records to the National Archives to address optical media. The agency plans to complete both rulemakings in fiscal year 1996.

NARA plans no significant rulemakings in the area of public use of archival records and materials in NARA research rooms in fiscal year 1996.

NARA

PROPOSED RULE STAGE

---

141. STANDARDS FOR AGENCY RECORDKEEPING REQUIREMENTS—RECORDS, NONRECORD MATERIALS, AND PERSONAL PAPERS

Priority:

Other Significant

Legal Authority:

44 USC 2904; 44 USC 2905; 44 USC 3101; 44 USC 3102; 44 USC 3301; 44 USC 3314

CFR Citation:

36 CFR 1222

Legal Deadline:

None

Abstract:

This revision of the regulation expands the guidance on personal papers and adds a requirement for agencies to protect against the removal of Federal records by issuing written procedures for the removal of nonrecord and personal materials. It also adds a requirement that agencies document the removal of nonrecord and personal materials and certify that no Federal records were taken. Finally, this revision provides more explicit guidance on records in electronic form.

Statement of Need:

This regulation is needed to ensure that Federal records are not improperly removed from agency custody by departing officials and that agencies fully recognize the applicability of records management requirements to records in electronic form.

Summary of the Legal Basis:

This regulation reflects the legal requirements for agencies to create and maintain adequate and proper documentation, to correctly identify documentation that meets the definition of *Federal record*, and to prevent the unauthorized destruction or removal of Federal records. The National Archives and Records Administration (NARA) is required by law to issue standards and guidelines to Federal agencies regarding adequate and proper documentation of the policies and transactions of the Federal Government and for ensuring proper records disposition. The Archivist of the United States is also statutorily responsible for establishing standards for the selective retention of records of continuing value. This regulation reflects the statutory requirements and responsibilities by providing guidance on applying the legal definition of Federal records to materials created on any media including electronic, distinguishing records from nonrecord materials, identifying and maintaining personal papers, and ensuring that appropriate documentation is provided by contractors.

Alternatives:

An alternative to this regulatory change would be to state in the regulations only the statutory requirements for creation of adequate and proper documentation without regard to their applicability to electronic records and without strengthening the requirements for protection against removal of records. NARA plans to issue a records management guide on recordkeeping requirements that contains interpretation and guidance on implementing the statutory requirements and regulations; this guidance could be expanded to include provisions that would be deleted from the regulation under this approach. This alternative, however, would reduce the effectiveness of the regulation since the applicability of the regulations to electronic records and the methods for implementing statutory requirements would be contained in nonmandatory guidance.

Anticipated Costs and Benefits:

The only new costs associated with compliance with the regulation would be in Federal agency staff resources to implement the requirement to review nonrecord and personal materials that individuals wish to remove from their agency and to certify that Federal records are not included. Agencies could choose to implement the requirement by prohibiting the removal of any documentary materials, at little or no cost, or by various levels of review, where the costs would depend on the size of the agency and the number of individuals likely to request permission to remove materials. We are unable to quantify the costs at this time, but will ask agencies to estimate their costs in the notice of proposed rulemaking. The benefits that will accrue from adherence to this regulation are also not easily quantifiable; they include creation and protection of Federal records that may be needed for accountability, audit and inspection, continuity, and protection of the rights of the Government and of individuals directly affected by Government actions.

Risks:

Failure to follow these regulations could result in an inability to account for the expenditure of funds, lack of documentation of significant decisions that could have serious or wide-ranging affects on the public, lack of evidence of wrongdoing, resources wasted in "reinventing the wheel," failure to acquire useful documentation created under contract, inefficient operation of Government programs resulting from burdensome searches for needed information, and lack of documentation for future research.

OFFICE OF PERSONNEL MANAGEMENT (OPM)

Statement of Regulatory Priorities

The Office of Personnel Management's (OPM's) priorities for the coming year will center on human resource management reforms that will enable the Federal Government to meet the challenges of downsizing, increased use of technology, delayering, decentralization, improved labor-management relationships, and other changes that are reinventing the Federal work force.

The passage of the Federal Human Resource Management Reinvention Act of 1995 is central to OPM's plans for reform. Many of its provisions will increase the opportunities for Federal agencies to use broadbanding, more demonstration projects, and performance-based pay plans, such as team incentives and goal-sharing. All of these tools are needed to lead Federal human resource management into the 21st century.

Pending passage of this legislation, OPM is using its regulatory authority whenever possible to achieve these goals.

Under its new performance management regulations, agencies may design programs that use from two ("pass/fail") to five rating levels. The new rules also encourage agencies to evaluate employees, when appropriate, on "team performances" and to consider factors other than individual ratings to grant monetary awards.

OPM expects to produce final regulations implementing provisions of the Family and Medical Leave Act of 1993. These regulations, reflecting the Administration's goal of a family-friendly workplace, will ensure that all employees are fairly treated when they need time off for medical or family needs.

OPM will continue to improve its existing human resource management systems in order to attract and keep the best possible talent, to promote fairness and diversity, and to create a government that works better and costs less.

OPM

FINAL RULE STAGE

142. • FAMILY AND MEDICAL LEAVE

Priority:

Other Significant

Legal Authority:

5 USC 6387

CFR Citation:

5 CFR 630(l)

Legal Deadline:

None

Abstract:

Sections 6381 through 6387 of Title 5, United States Code as added by Title II of the Family and Medical Leave Act of 1993 (FMLA), Public Law 103-3, Feb. 5, 1993, provide certain Federal employees a total of 12 administrative work weeks of unpaid leave during any 12-month period for: the birth of a child and care of the newborn; placement of a child with the employee for adoption or foster care; care of an employee's spouse, son, daughter, or parent with a serious health condition; or the serious health condition of the employee that makes the employee unable to perform the essential functions of his or her position.

Statement of Need:

This regulation establishes a clear and uniform Federal policy that ensures that all Federal employees are treated fairly and equitably when they need time off for medical problems or family needs.

Summary of the Legal Basis:

Sections 6381 through 6387 of Title 5, United States Code, as added by Title II of the Family and Medical Leave Act of 1993, (FMLA), Public Law 103-3, February 5, 1993, provide certain Federal employees with a total of 12 administrative workweeks of unpaid leave for certain medical and other family related matters. Section 6387 requires the Office of Personnel Management to prescribe regulations for the administration of the FMLA.

PENSION BENEFIT GUARANTY CORPORATION (PBGC)

Statement of Regulatory Priorities

PBGC Insurance Programs

The Pension Benefit Guaranty Corporation (PBGC) administers two insurance programs under title IV of the Employee Retirement Income Security Act of 1974, as amended (ERISA): a single-employer plan termination insurance program and a multiemployer plan insolvency insurance program.

Under the single-employer insurance program, the PBGC has two primary roles. First, when a plan with insufficient assets to pay guaranteed benefits terminates, PBGC pays participants and beneficiaries their guaranteed benefits and any unfunded nonguaranteed benefits that are payable based on recoveries from employers. Second, PBGC is responsible for providing plan sponsors and plan administrators with guidance in complying with title IV's termination rules and procedures and for administering the plan termination process (a process that all terminating single-employer plans covered by title IV must go through). To finance itself, the PBGC is also responsible for collecting premiums paid by covered pension plans and employer liability amounts arising from the termination of plans without sufficient assets to pay all plan benefits.

In order to carry out these functions, the PBGC must issue regulations interpreting a number of complicated statutory provisions. The areas covered include implementation of the termination process, establishment of procedures for the payment of premiums, and assessment and collection of employer liability.

Under the Multiemployer Insurance Program, as revised by the Multiemployer Pension Plan Amendments Act of 1980 (MPPAA), PBGC has a more limited role than under the Single-Employer Program. The primary purpose of MPPAA was to strengthen and foster the continuation of multiemployer pension plans by ensuring that employers could not avoid their obligation to share in the funding of plan benefits by withdrawing from participation in a multiemployer plan. To this end, MPPAA imposed withdrawal liability on an employer for either a partial or complete withdrawal from a plan. An employer's withdrawal liability is generally based on its allocable share of the plan's unfunded vested benefits. This liability is calculated, assessed, and collected by the multiemployer plan. Disputes arising from the assessment of liability are to be resolved first through arbitration and then, if necessary, through the courts.

PBGC's insurance function under MPPAA is limited to the provision of financial assistance (in the form of a repayable loan) to a plan that does not have sufficient assets to pay benefits currently due at the guaranteed level. Under MPPAA, guaranteed benefits are generally less than a participant's full benefit under the plan, Plan insolvency necessitating PBGC financial assistance occurs infrequently.

The multiemployer regulations fall into several general categories: (a) rules relieving potential administrative burdens imposed by the statute on multiemployer plans; (b) rules waiving or reducing employer withdrawal liability in certain limited circumstances; and (c) rules authorizing multiemployer plans to adopt their own rules in lieu of following certain of the statutory rules.

Regulatory Objectives and Priorities

PBGC regulatory objectives and priorities are developed in the context of the statutory purposes of title IV of ERISA: (a) to encourage the continuation and maintenance of voluntary private pension plans, (b) to provide for the timely and uninterrupted payment of pension benefits to participants and beneficiaries, and (c) to maintain the premiums that support the insurance programs at the lowest possible levels consistent with carrying out the PBGC's statutory obligations (ERISA section 4002(a)).

In the context of its regulatory program, the PBGC implements its statutory purposes by developing regulations that are designed (a) to assure the security of the pension benefits of workers, retirees, and beneficiaries, (b) to improve services to participants through more responsive benefit payment policies and accelerated determinations of final benefits, (c) to ensure that the several statutory provisions designed to minimize losses for participants in the event of plan termination are fully and effectively implemented and enforced, (d) to facilitate the collection of monies owed to plans and to the PBGC, while keeping the related costs as low as possible and (e) to simplify the termination process for plans as much as possible.

Legislative Initiatives

In order to assure that the PBGC can accomplish its statutory purposes, the Secretary of Labor established an interagency task force in March 1993. The task force, which was made up of representatives of PBGC; the Departments of Labor, the Treasury, and Commerce; the Office of Management and Budget; and the National Economic Council, took a comprehensive look at PBGC insurance. Based on the recommendations of the task force, the Administration sent to the Congress the Retirement Protection Act of 1993 (H.R. 3396, introduced October 28, 1993, and S. 1780, introduced November 23, 1993). On December 8, 1994, the Retirement Protection Act of 1994 was enacted.

The Retirement Protection Act (a) accelerates the funding of underfunded single-employer pension plans, (b) phases out the cap on the variable rate portion of the premium paid to PBGC by underfunded single-employer plans, (c) provides PBGC better tools to prevent employers from escaping their plan funding obligations through corporate transactions, (d) provides better information to participants in underfunded plans on plan funding status and PBGC guarantees, and (e) helps assure that workers do not lose pensions because they have lost contact with a terminating pension plan covered by PBGC.

Pursuant to the President's Executive Order 12866 of September 30, 1993, "Regulatory Planning and Review," and the "Regulatory Reform Initiative" contained in the President's memoranda of March 4, 1995, and April 21, 1995, the PBGC has reviewed all of its regulations and identified regulatory provisions that can be simplified or eliminated. The PBGC will be amending its regulations to make these changes. The PBGC will also renumber its regulations to follow the statutory numbering scheme, which will make the regulations much easier to use. In addition to these regulatory changes, the PBGC is working with the Department of Labor and the Internal Revenue Service to simplify the Annual Report (Form 5500) filing requirements for pension plans, as part of the President's June 1995 initiative, "Simplifying Pensions."

The PBGC's regulatory plan for October 1, 1995, to September 30, 1996, consists of one significant regulatory action.

PBGC

PROPOSED RULE STAGE

143. CALCULATION AND PAYMENT OF UNFUNDED NONGUARANTEED BENEFITS

Priority:

Other Significant

Legal Authority:

29 USC 1302(b)(3); 29 USC 1322(c)

CFR Citation:

29 CFR 2623; 29 CFR 2627

Legal Deadline:

None

Abstract:

The Pension Protection Act of 1987 repealed ERISA sections 4049 and 4062(c). Those provisions established new employer liability to plan participants and beneficiaries in the event of a distress termination or involuntary termination by the PBGC of a plan without sufficient assets to pay all benefit commitments; the section 4049 trust was the vehicle for collecting and distributing these liability amounts. This system proved flawed in several respects.

In the Pension Protection Act, Congress created a new scheme by which to channel employer liability recoveries to plan participants and beneficiaries (amended ERISA section 4022(c)). Under new section 4022(c), participants no longer have a direct claim for employer liability. Instead, the PBGC's claim covers both its shortfall (unfunded guaranteed benefits) and participants' losses (unfunded nonguaranteed benefits (UNBs)). In turn, the PBGC is to pay a portion of its employer liability recovery to pay UNBs to participants and beneficiaries.

Section 4022(c) contains several ambiguities and also leaves to the PBGC the development of specific rules and procedures to make this system work. Thus, a regulation is needed to implement these statutory provisions.

Statement of Need:

Section 4022(c) contains several ambiguities and also leaves to the PBGC the development of specific rules and procedures necessary to make this system work. Thus, a new regulation is needed to implement these statutory provisions.

Summary of the Legal Basis:

The PBGC has the authority to issue rules and regulations necessary to carry out the purposes of title IV of ERISA.

Alternatives:

The statute provides that the amounts of UNBs that the PBGC will pay under terminated plans be based upon the amounts that the PBGC recovers on its statutory claims for employer liability against the sponsors of those plans and the other trades or businesses under common control with the plan sponsors. However, the statute does not prescribe when the PBGC is to perform its valuation of its recovery with respect to a plan. There are two competing objectives: (1) prompt payment to participants of their UNBs and (2) precise calculation of benefit entitlements. The PBGC could promote prompt payment at the expense of precision of calculation by valuing recoveries whenever the PBGC is otherwise ready to calculate benefits under a plan. On the other hand, the PBGC could promote precision of calculation at the expense of prompt payment by deferring valuation until the collection process is finished, even if that means delaying benefit calculations.

Anticipated Costs and Benefits:

Because of the complexities involved, it may take a long time for the PBGC to determine what its recovery will be. In addition, it may be difficult to value a recovery in cases where the PBGC receives assets other than cash or readily marketable securities. Thus, the accuracy of the PBGC's computation of the amounts payable to participants would be enhanced by waiting longer to make that computation. However, long delays are not generally in the best interest of plan participants. The regulation will attempt to balance adequacy of precision in benefit determinations, avoidance of increased administrative costs, and timely payment of benefits.

Risks:

Not applicable.

BILLING CODE 7708-01-F

RAILROAD RETIREMENT BOARD (RRB)

Statement of Regulatory Priorities

The Railroad Retirement Board administers a retirement program for railroad workers and their families under the Railroad Retirement Act of 1974 and an unemployment and sickness benefit program for railroad workers under the Railroad Unemployment Insurance Act. Regulations issued by the Railroad Retirement Board under these two statutes and certain Governmentwide statutes are contained in chapter II of title 20 of the Code of Federal Regulations.

The Board has been involved in a multiyear project to review, revise, and update its regulations. During this project, the Board has published final rules amending nearly all of its regulations. In addition, there are several regulations actively under consideration by the Board at this time. The Board's short-term plan is to publish final regulations to complete the total review and revision project undertaken previously.

The regulations issued by the Railroad Retirement Board are virtually all interpretive rather than legislative in nature. These regulations are designed to be informative and to assist the agency's constituents understand the benefit systems administered by the Board. In promulgating regulations, the agency is mindful of the burdens that may be imposed on the public and crafts its regulations in such a way as to impose the least possible burden on the public. In addition, through regulation, the Board makes every effort to simplify and streamline administration of the programs it administers. We believe that the Board's regulatory review program is consistent with the priorities and objectives of the Administration.

RRB

PROPOSED RULE STAGE

144. • FINALITY OF DECISIONS REGARDING RAILROAD RETIREMENT ANNUITIES

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

45 USC 231f(b)(5)

CFR Citation:

20 CFR 261

Legal Deadline:

None

Abstract:

This new part explains when the Board will reopen a claim for benefits under the Railroad Retirement Act.

Statement of Need:

The rules governing finality are presently contained in Board Orders which are not readily available to the public. The Board Order regarding finality of decisions provides that finality of certain decisions is based on a number of factors; adjudication based on these factors is difficult to administer. Also the Board Order does not contain any time limits on reopening.

Summary of the Legal Basis:

The general authority for issuance of regulations under the Railroad Retirement Act is provided for in section 7(b)(5) of the Act (45 USC 231f(b)(5)).

Alternatives:

None.

Anticipated Costs and Benefits:

There will be no additional costs or burdens imposed by this regulation over and above those imposed by the statute or existing regulation.

Risks:

None.

BILLING CODE 7905-01-F

SMALL BUSINESS ADMINISTRATION (SBA)

Statement of Regulatory Priorities

Regulatory Streamlining

The Small Business Administration (SBA) has, over the last 2 years, made a concerted effort to serve its constituency better by eliminating regulations that no longer make sense, by reducing paperwork requirements, and by streamlining internal procedures. This Regulatory Plan is intended to highlight that ongoing initiative. The Plan responds to President Clinton's mandate that regulations be effective, consistent, sensible, and understandable.

President Clinton directed the Small Business Administration in his memorandum of March 4, 1995, to complete a page-by-page, line-by-line review of all of its existing regulations to determine which might be revised or eliminated. SBA conducted that review in part through Grassroots Regulatory Partnership Meetings held throughout the country between April 10 and April 27. These meetings brought together more than 250 small business owners, contractors, lenders, loan recipients, State agencies, Service Core of Retired Executives (SCORE) volunteers, SBA employees, and others to discuss how SBA programs can be made more efficient, less burdensome, and more "user-friendly."

As a result of the review, SBA proposes to reinvent 100 percent of the current SBA-specific regulations by December 31, 1995. SBA believes it can significantly clarify and streamline its regulations and thereby conserve resources, improve procedures, and serve its customers more effectively.

The 1995 version of title 13 CFR consists of 38 parts totalling 700 pages devoted to SBA regulations. SBA has determined it can eliminate 14 parts entirely, thereby deleting 64 pages of regulations. SBA also can substantively reinvent or consolidate another 22 parts, resulting in the elimination of 291 more pages. The remaining two parts, with 45 pages, will remain unchanged, only because they are uniform rules applying to all executive branch agencies. SBA will, therefore, reinvent all of its agency-specific regulations, eliminating a total of 355 pages, or 51 percent, of regulatory text. In addition, SBA will eliminate its entire supplement to the Federal Acquisition Regulation, 48 CFR 2209. As indicated above, SBA will complete this entire regulatory reform effort by December 31, 1995.

Significant Initiatives

Although the entire regulatory streamlining effort deserves attention in SBA's Regulatory Plan, certain of the initiatives are extremely significant. In this regard, SBA will make major changes to 13 CFR 101, which sets forth rules for administration of the Agency. Part 101 will be updated to reflect changes in the Agency's current organization, function, and lines of authority. SBA will eliminate unnecessary portions of the current organizational structure in its revision of part 101 and state new delegations of authority that have been altered by reorganization and the creation of new programs. Other administrative regulations—parts 133 and 135—will be consolidated with part 101. SBA expects to eliminate 40 percent of the regulatory text from part 101 and reinvent the remaining portion.

SBA will consolidate its business loan program and development company program regulations, presently contained in 13 CFR parts 108, 116, 120, 122, and 131. SBA will place all its business loan and development company regulations in one part to provide a more user-friendly format. In the process, SBA will eliminate duplication and outdated sections of the current regulations, deleting multiple pages of regulatory text. These changes will save time and resources for all people involved with SBA loan programs, including employees and our small business partners.

In this regard, part 120 of SBA's regulations has heretofore described various eligibility and administrative aspects of SBA's business loan program; part 122 has concentrated primarily on describing the application process and special purpose loan programs. Part 131 has delineated the loan moratorium program, and part 116 has detailed various policies of general application. The revised part 120 will consolidate all of these parts and eliminate duplication as appropriate. Presently 13 CFR part 108 governs administration of SBA's Development Company (504) program, which is intended to provide financing of a sort not available from the business loan program to small businesses interested in financing fixed assets. The 504 program uses public/private partnerships to make loans available for acquisition of land, buildings, machinery, and equipment. Certified Development Companies (CDCs), sponsored by private interests or by State or local governments, are SBA's partner in this process.

SBA will incorporate present part 108 into new part 120. In addition to substantially reducing the length of the present part 108, important substantive changes will be made. For example, the new regulation will promote better and more uniform performance by CDCs through competition. The regulation will allow existing CDCs with demonstrated experience and expertise to expand into areas of operation that are not being adequately serviced. Several additional changes will be made to simplify the regulations governing CDCs, and the consolidation of those regulations into part 120 will provide the public with a single place to look for all the regulations governing SBA's business financing programs.

SBA

PROPOSED RULE STAGE

---

146. AMENDMENTS TO ADMINISTRATION REGULATIONS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

15 USC 634(b)(6)

CFR Citation:

13 CFR 101

Legal Deadline:

None

Abstract:

These proposed amendments to 13 CFR part 101 update the rules for the administration of the Agency.

Statement of Need:

On March 4, 1995, President Clinton issued a memorandum to Federal agencies directing them to simplify their regulations and eliminate those that are unnecessary. This proposed rule would reorganize part 101, which governs the Small Business Administration's (SBA's) internal administrative procedures, into four subparts and remove portions of the existing regulations. Present parts 133 and 135 will be revised, updated, and consolidated with part 101.

Summary of the Legal Basis:

Not required by statute or court order.

Alternatives:

The revisions proposed amend administrative procedures in SBA's existing regulations.

Anticipated Costs and Benefits:

This rulemaking deals with SBA's internal administrative procedures. Its promulgation creates no cost to the Government or small businesses.

Risks:

This regulation addresses no risks to the public health and safety or to the environment.

Timetable:

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

15 USC 636; 15 USC 697

CFR Citation:

13 CFR 108; 13 CFR 120; 13 CFR 122

Legal Deadline:

None

Abstract:

This rulemaking is designed to facilitate access by the small business community to information about SBA's business loan program and development company loan program. No costs to the government or the small businesses are associated with its promulgation. However, benefits from improving access to SBA loan programs will accrue to the general economy through the creation of jobs and increased tax revenues.

Statement of Need:

In response to President Clinton's regulatory reform initiative, this proposed rule will consolidate into one Part of SBA's regulations its business loan program and development company program regulations. In the process, SBA will eliminate duplication and outdated sections of the current regulations, deleting multiple pages of regulatory text. These changes will save time and resources for all people involved with SBA loan programs, including employees and SBA's small business partners.

Summary of the Legal Basis:

Not required by statute or court order.

Alternatives:

This rulemaking consolidates and streamline SBA's existing regulations.

Anticipated Costs and Benefits:

This rulemaking is designed to facilitate access by the small business community to information about SBA's business loan program and development company loan program. No costs to the Government or the small businesses associated with its promulgation will result. However, benefits from imporoving access to SBA loan programs will accrue to the general economy through the creation of jobs and increased tax revenues.

Risks:

This regulation addresses no risks to the public health and safety or the environment.

BILLING CODE 8025-01-F

SOCIAL SECURITY ADMINISTRATION (SSA)

Statement of Regulatory Priorities

The Social Security Administration (SSA) administers the retirement, survivors, and disability insurance programs under title II of the Social Security Act (the Act), and the supplemental security income (SSI) program under title XVI of the Act. For the most part, SSA's regulations do not impose burdens on the private sector or on State or local governments. Its regulations codify the requirements for entitlement to benefits under its programs.

SSAs five entries for The Regulatory Plan represent areas of major importance in benefit program administration. The first entry, Revised Medical Criteria for Determination of Disability; Musculoskeletal System, furthers the agency priority to improve our disability determination procedures. Musculoskeletal listings of impairments will be updated to make them consistent with the latest advances in medicine. Updated listings will facilitate making the correct disability determination as quickly and efficiently as possible.

Effective stewardship of social security programs requires mechanisms to assure that benefits are used to meet the needs of beneficiaries who are not able to manage their own benefits due to legal incompetence or medical infirmity. The law requires that benefits be paid to a representative payee on behalf of the beneficiary in such circumstances. Two of SSA's regulatory plan entries, Representative Payment Reforms and Representative Payment Provisions for Individuals Based on Drug Addiction and Alcoholism, carry out recent legislative provisions to assure program integrity through payment to representative payees.

In response to the Reinventing Government initiative to create a Federal Government that works better and costs less, SSA lists two regulatory initiatives. Cycling Payment of Social Security Benefits for future beneficiaries is designed to pay social security benefits on several payment dates each month instead of making all the payments on the same date, as is current practice. The current use of one payment date creates a workload spike each month for SSA, for other Federal agencies, for financial institutions, and other businesses that participate in or depend on issuance of social security benefits. It has become exceedingly difficult for customers to access SSA services on or around "check day." Spreading the issuance of benefit payments throughout the month and reducing workload spikes for SSA and others will result in better service to our customers. As a result, customers will have better access to SSA personnel and services in field facilities and through use of SSA's national 800 number teleservice network. Current beneficiaries can expect to continue to receive their benefit payments on the third of each month. The additional payment dates will be assigned to new beneficiaries as their benefit awards are processed.

The second entry related to a Reinventing Government initiative is Provide "One-Stop" Service to Aliens Applying for Social Security Cards. The goal of this initiative is to coordinate services to customers who, under current procedures, must deal with multiple Federal agencies to establish their status as alien residents of the United States. The proposed regulatory authcrity would support a pilot project with INS whereby it would transmit data to SSA electronically so that SSA can issue social security numbers to certain resident aliens.

Consistent with the President's Regulatory Reinvention Initiative, SSA is working diligently to improve program benefit regulations and to develop partnerships with large segments of the community of stakeholders interested in Social Security programs. The partnerships are expected to contribute to the successful development of SSA regulatory plan entries.

SSA

PROPOSED RULE STAGE

148. FEDERAL OASDI AND SSI FOR THE AGED, BLIND, AND DISABLED; REPRESENTATIVE PAYMENT PROVISIONS FOR INDIVIDUALS DISABLED BASED ON DRUG ADDICTION OR ALCOHOLISM (507P)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

PL 103-296, sec 201; 42 USC 405; 42 USC 1302; 42 USC 1383

CFR Citation:

20 CFR 404.2001; 20 CFR 404.2010; 20 CFR 404.2021; 20 CFR 404.2040; 20 CFR 404.2040a; 20 CFR 404.2053; 20 CFR 416.621; 20 CFR 416.640; 20 CFR 416.640a; 20 CFR 416.655

Legal Deadline:

None

Abstract:

We propose to revise our regulations to extend the representative payee requirement, which now applies only to recipients of supplemental security income (SSI) benefit payments, to Social Security disability insurance (DI) beneficiaries whose drug addiction or alcoholism is material to a finding of disability.

Statement of Need:

These regulations are needed to implement the representative payment requirements of the Social Security Independence and Program Improvements Act of 1994.

Summary of the Legal Basis:

Section 2 of P.L. 103-296 extends the representative payee requirement, which now applies only to supplemental security income recipients, to Social Security disability insurance beneficiaries.

Alternatives:

None

Anticipated Costs and Benefits:

Effective stewardship of SSA programs requires mechanisms to assure that benefits are used to meet the needs of beneficiaries who are not able to manage their own benefits due to legal incompetence or medical infirmity. As part of the Social Security Improvements Act of 1994 Congress determined that individuals who receive social security disability insurance benefits whose drug addiction or alcoholism is material to the finding of disability must have representative payees. Preliminary estimates are that these regulations will have no effect on SSA program costs. Any administrative costs are part of legislative implementation and further our program integrity efforts.

Risks:

Since basically all these regulations do is implement the statute, we see no risks associated with them.

149. • CYCLING PAYMENT OF SOCIAL SECURITY BENEFITS (558P)

Priority:

Economically Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 405(a); 42 USC 407; 42 USC 902(a)(5); 42 USC 401(j); 42 USC 405(b); 42 USC 405(d) to 405(h); 42 USC 421(d); 42 USC 405(i); 42 USC 909

CFR Citation:

20 CFR 404.1805; 20 CFR 404.903

Legal Deadline:

None

Abstract:

This Reinventing Government initiative would result in staggered payment to new beneficiaries over a number of payment dates throughout the month to eliminate workload spikes and allow the Social Security Administration to provide better customer service without adding staff. Current beneficiaries and all Supplemental Security Income recipients will be unaffected by these regulatory changes.

Statement of Need:

This regulation is necessary to implement a Reinventing Government initiative.

Summary of the Legal Basis:

These changes are not required by statute or court order.

Alternatives:

None

Anticipated Costs and Benefits:

Payment cycling is proposed as both an immediate and long-term strategy to help the Agency improve service and better manage its resources. By leveling workloads, it will allow the public better access to SSA's field office and toll-free 800 number services. While the proposed change in payment patterns may result in some incidental savings from management and operational efficiencies, cycling is not expected to produce significant workyear savings. Cycling will benefit the business and banking communities in that they will be better able to utilize their resources throughout the month to serve their customers. Cycling will reduce the risk to the Federal government, the financial community, and to beneficiaries by reducing the volume of financial transactions passing through the payment system at any one time in the month.

Risks:

This change in payment cycling, which will affect new beneficiaries who file claims, should pose no risks to our claimant population.

150. • PROVIDE "ONE-STOP" SERVICE FOR ALIENS APPLYING FOR SOCIAL SECURITY CARDS (569P)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 405; 42 USC 1383

CFR Citation:

Not yet determined

Legal Deadline:

None

Abstract:

Aliens will apply for Social Security cards at the same time they complete Immigration and Naturalization Services (INS) paperwork. Currently, alien applicants are required to furnish almost the same information to both SSA and INS. This one-stop service will reduce the potential for issuing Social Security cards based on fraudulent INS documents, and will result in efficiencies for the Government.

Statement of Need:

This regulation is necessary to implement a Reinventing Government initiative.

Summary of the Legal Basis:

These changes are not required by statute or court order.

Alternatives:

Not yet determined

Anticipated Costs and Benefits:

While the full impact of this change has not yet been determined, it is expected to reduce fraud based on false INS documents and to result in efficiencies for the Government of approximately $18 million over 5 years.

Risks:

At this time we have not identified any risks associated with the proposal.

SSA

FINAL RULE STAGE

151. OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE PROGRAM; REVISED MEDICAL CRITERIA FOR DETERMINATION OF DISABILITY; MUSCULOSKELETAL SYSTEM (143F)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 902(a)(5); 42 USC 405; 42 USC 1383

CFR Citation:

20 CFR 404.1500ff, appendix 1

Legal Deadline:

None

Abstract:

Sections 1.00 and 101.00 of Appendix 1 to the disability regulations at 20 CFR 404.1501 through 404.1599 describe those musculoskeletal impairments which are considered severe enough to prevent a person from doing any gainful activity or age-appropriate activities. Comprehensive revisions to these sections are proposed to ensure that the medical evaluation criteria are up to date and consistent with the latest advances in medicine. The SSI program incorporates by reference and uses the same medical criteria as the old-age, survivors, and disability insurance program.

Statement of Need:

These regulations are necessary to update the musculoskeletal listing to reflect advances in medical knowledge, treatment, and methods of evaluating musculoskeletal impairments.

Summary of the Legal Basis:

Administrative--not required by statute or court order.

Alternatives:

None--Medical advances require that this listing be updated.

Anticipated Costs and Benefits:

These final regulations will have negligible program and administrative cost impact because, despite changes in terminology and emphasis, the proposed musculoskeletal system listings describe a level of severity comparable to the level of severity contained in the current listings.

Risks:

Since all this regulation will do is update the medical listing, we see no risks associated with these changes.

Abstract:

Effective stewardship at SSA programs requires mechanisms to assure that benefits are used to meet the needs of beneficiaries who are not able to manage their own benefits due to legal incompetence or medical infirmity. Congress determined that improvements to the representative payment procedures were needed to assure program integrity as part of P.L. 101-508. Any costs associated with these regulations are reflected in the President's budget as part of legislative in implementation. They are required to further our program integrity efforts.

Statement of Need:

These regulations, which reflect certain provisions of PL 101-508, modify existing representative payee procedures by requiring the Social Security Administration to do a more extensive investigation of representative payee applicants; generally limiting to 1 month the deferral or suspension of direct payment of benefits pending selection of a payee; providing stricter standards in determining the fitness of representative payee applicants to manage benefit payments on behalf of beneficiaries; requiring SSA to repay to the beneficiary or an alternate payee, an amount equal to any misused funds resulting from SSA's negligent failure to investigate or monitor a representative payee; and requiring SSA to compile and maintain a centralized file of certain beneficiary and payee information.

These regulations are needed to reflect certain provisions of PL 101-508 (OBRA '90). Sections 205(a), 1102, and 1631(d of the Act give the Commissioners broad power to make rules and carry out these provisions.

Summary of the Legal Basis:

These regulations implement section 5105 of Public Law 101-508.

COMMODITY FUTURES TRADING COMMISSION (CFTC)

Statement of Regulatory Priorities

The regulatory objectives of the Commodity Futures Trading Commission are to ensure that the commodity futures and option markets remain competitive and respond to underlying supply and demand factors by detecting and preventing threats of price manipulation, abusive trading practices, fraud, and other market disruptions, safeguarding the financial soundness of those markets, and providing for appropriate customer protection of those who trade on those markets. Futures markets that are free of manipulation and other anticompetitive forces can most effectively perform their vital economic functions of price discovery and risk transfer. To these ends, the Commission's objectives include protection of customer funds, ensuring the financial integrity of regulated intermediaries, and protection of customers from abusive trade practices.

CFTC

PROPOSED RULE STAGE

153. PROHIBITION ON VOTING BY INTERESTED MEMBERS

Priority:

Other Significant

Legal Authority:

7 USC 7a(17)

CFR Citation:

17 CFR 1.67

Legal Deadline:

None

Abstract:

The regulation will implement the provisions of section 217 of the Futures Trading Practices Act of 1992, which require contract markets to adopt rules to avoid conflicts of interest in deliberations and voting by members of the governing board and disciplinary and other oversight committees. The rulemaking will define the relationships between a named party in interest and a member of the governing board or committee that would require abstention from deliberations and voting. The rulemaking will also provide guidelines on situations that would require a member to abstain from voting on a significant action because of a substantial financial interest in the outcome of the vote, based on positions held personally or at an affiliated firm, as well as on other matters addressed by the statute. The action potentially impacts the selection and composition of contract market governing boards and committees.

Statement of Need:

The regulation will implement the provisions of section 217 of the Futures Trading Practices Act of 1992, which require contract markets to adopt rules to avoid conflicts of interest in deliberations and voting by members of the governing board and disciplinary and other oversight committees. The rulemaking will define the relationships between a named party in interest and a member of the governing board or committee that would require abstention from deliberations and voting. The rulemaking also will provide guidelines on situations that would require a member to abstain from voting on a significant action because of a substantial financial interest in the outcome of the vote, based on positions held personally or at an affiliated firm, as well as on other matters addressed by the statute. The action potentially impacts the selection and composition of contract market governing boards and committees. This rulemaking will further the regulatory objective of oversight of contract markets so as to assure that the markets remain open, competitive, and efficient.

Alternatives:

These rules are required by statutory mandate set forth in the Futures Trading Practices Act of 1992. The Commission intends to pursue this rulemaking to achieve rules that will fulfill this statutory mandate in a cost-effective manner.

Anticipated Costs and Benefits:

As a financial regulator, the Commission is acutely aware of the costs of regulation. Throughout its history, the Commission has taken into account the costs of its proposed regulations in order to ensure that the benefits of its regulations outweigh the costs. To date, we know of no Commission regulation that adversely affected small entities as defined under the Regulatory Flexibility Act, 5 U.S.C. 601-611 (1988).

CFTC

FINAL RULE STAGE

154. RISK ASSESSMENT FOR HOLDING COMPANY SYSTEMS

Priority:

Other Significant

Legal Authority:

7 USC 6f(c)

CFR Citation:

17 CFR 1.14; 17 CFR 1.15

Legal Deadline:

None

Abstract:

On December 21, 1994, the Commission adopted, as phase 1 of the risk assessment rulemaking, final rules with respect to maintenance and filing of organizational charts, risk management policies, procedures and systems, and consolidated and consolidating financial statements. It also proposed "trigger" event reporting in the event of a 20 percent decline in a futures commission merchant's (FCM's) adjusted net capital. The Commission deferred action on the balance of the proposed rules, which related to reporting of position data and other data concerning FCM affiliates. With respect to the second phase of the rulemaking process, the Commission's staff will continue to work with other financial regulators, particularly the Securities and Exchange Commission, to design a reporting framework that is harmonized across regulatory structures and, to the extent possible, reflective

VOL
60
ISS
2
28
NO
28
995
UMI

of a consensus as to which data are most meaningful to regulators and can be provided without undue burden.

Statement of Need:

These rules, authorized by Congress in section 229 of the Futures Trading Practices Act of 1992, Public Law 102-546, 106 Stat. 3590 (1992), are intended to enhance the Commission's financial surveillance program by providing the Commission with access to information concerning the activities of affiliates of registered FCMs whose activities are reasonably likely to have a material impact on the financial or operational condition of the FCM. These adopted rules require registered FCMs to maintain certain records concerning the financial activities of such material affiliates, to file certain information with the Commission on an annual basis, and to provide additional information to the Commission upon the occurrence of specified events. The records required to be maintained and the information required to be filed routinely include an organizational chart, risk management policies, and consolidated and consolidating financial statements. In addition, notice of a 20 percent decline in an FCM's adjusted net capital is required. Proposals related to securities and commodity position data, financial instrument holdings, information regarding positions of affiliates carried by FCM's, as well as certain other "trigger" events for reporting purposes have been deferred.

The Commission views these rules as necessary to fulfill its objectives of protecting customer funds and ensuring the financial integrity of regulated intermediaries. The rules are intended to enhance the safeguards of customer funds by providing the Commission with increased access to material information concerning the operations of affiliates of the FCM whose activities may expose the FCM to financial or operational risks. The new statutory authority under which these rules were adopted recognizes that, as illustrated by the experience of the CFTC and other regulators with several recent failures of regulated brokerage firms, the operations of regulated FCMs may be materially affected by, and only understood in conjunction with, the activities of affiliated entities, many of which may be unregulated. Concomitantly, the effectiveness of ongoing financial oversight programs may depend upon access to information concerning risks to the FCM created by affiliate activity, and the efficacy of regulatory responses to financial problems at the regulated entity may be enhanced by access to information concerning relevant affiliate activity.

Alternatives:

The proposals provide alternative filing options for an FCM that is also a securities broker-dealer, or that is part of a holding company with affiliates subject to the oversight of a Federal banking agency, State insurance commission, or a foreign regulator with which the Commission has an information-sharing agreement to avoid duplicative reporting burdens. The staff has also consulted extensively with other financial regulators, and continues to do so, to explore the extent to which they may share with the Commission on a confidential basis relevant risk assessment information concerning entities subject to their supervision so as to reduce duplicative requirements.

Anticipated Costs and Benefits:

As a financial regulator, the Commission is acutely aware of the costs of regulation. Throughout its history, the Commission has taken into account the costs of its proposed regulations in order to ensure that the benefits of its regulations outweigh the costs. To date, we know of no Commission regulation that adversely affected small entities as defined under the Regulatory Flexibility Act, 5 USC 601-611 (1988).

BILLING CODE 6351-01-F

CONSUMER PRODUCT SAFETY COMMISSION (CPSC)

Statement of Regulatory Priorities

The U.S. Consumer Product Safety Commission is charged with protecting the public from unreasonable risks of death and injury associated with consumer products. To achieve this goal, the Commission:

- Participates in the development or revision of voluntary product safety standards;
- Develops mandatory product safety standards when other, less restrictive efforts are inadequate to address a safety hazard;
- Obtains repair, replacement, or refund of the purchase price for defective products which present a substantial product hazard; or
- Develops information and education campaigns about the safety of consumer products.

When deciding which of these approaches to take in any specific case, the Commission gathers the best available data about the nature and extent of the hazard presented by the product. The Commission then analyzes this information to determine the best way to reduce the hazard in each case.

The Commission's rules require the Commission to consider, among other factors, the following criteria when deciding the level of priority for any particular project:

- Frequency and severity of injury;
- Causality of injury;
- Chronic illness and future injuries;
- Cost and benefit of Commission action;
- Unforeseen nature of the risk;
- Vulnerability of the population at risk; and
- Probability of exposure to the hazard.

Additionally, if the Commission proposes a mandatory safety standard to address a risk of injury associated with a particular product, the Commission is generally required to develop the least burdensome requirements that adequately protect the public.

The Commission's statutory authority requires it to rely on voluntary standards rather than mandatory standards whenever a voluntary standard is likely to result in the elimination or adequate reduction of the risk of injury and whenever it is likely that there will be substantial compliance with the voluntary standard. As a result, much of the Commission's work involves cooperative efforts with other participants in the voluntary standard-setting process rather than the promulgation of mandatory standards.

In fiscal year 1996, the Commission's significant rulemaking activities will involve development of options to address risks of fire associated with upholstered furniture ignited by small, open-flame sources, and development of performance requirements for bicycle helmets as directed by the Children's Bicycle Helmet Safety Act of 1994. These projects are described in detail below.

Both of these rulemaking proceedings in the Commission's 1996 regulatory plan are related to protection of vulnerable populations. Upholstered furniture fires kill and injure children, the elderly, and families and individuals with lower incomes disproportionately to the representation of these persons in the population. Children younger than 10 years old are more likely to suffer head injuries in accidents associated with bicycles. The Commission's proposed standard for bicycle helmets, which Congress directed the Commission to develop, includes a requirement to prevent the helmet from coming off the rider's head and other provisions that are specifically applicable to the safety of helmets intended for children.

The emphasis on these two rulemaking activities in the Commission's 1996 regulatory plan is consistent with the Commission's statutory mandate and its criteria for setting priorities. Additionally, the Commission's 1996 regulatory plan supports the President's goal to reduce the costs of health care by preventing injuries to those individuals who are among the most likely to be injured in accidents associated with the use of consumer products.

CPSC

PROPOSED RULE STAGE

155. FLAMMABILITY STANDARD FOR UPHOLSTERED FURNITURE

Priority:

Economically Significant

Legal Authority:

15 USC 1293 Flammable Fabrics Act

CFR Citation:

16 CFR 1640

Legal Deadline:

None

Abstract:

On June 15, 1994, the Commission published an advance notice of proposed rulemaking (ANPRM) to begin a proceeding for development of a flammability standard for upholstered furniture. The ANPRM announced that the regulatory alternatives under consideration include issuance of a mandatory standard to address risks of death, injury, and property damage from fires associated with ignition of upholstered furniture by small open-flame sources. (Fire hazards associated with ignition of upholstered furniture by cigarettes or large open-flame sources are outside the scope of this proceeding.) The Commission staff is now conducting a field study, product testing, and other technical research to determine whether it is advisable to develop a proposed standard to address ignition of upholstered furniture by small open-flame sources. The staff is preparing a briefing package for consideration by Commissioners of the agency which they will use in deciding whether to publish a proposed standard.

Statement of Need:

In 1992, approximately 650 deaths, more than 1,700 injuries, and $200 million in property damage resulted from upholstered furniture fires in the United States.

The estimated societal cost of upholstered furniture fires in 1992 was about $3.6 billion, including about $500 million attributable to open-flame fires and $2.6 billion attributable to smoking-related fires.

Although fires involving upholstered furniture ignited by smoking materials accounted for the majority of these losses, a significant portion involves upholstered furniture ignited by open-flame sources and is not addressed by any national standard or voluntary program. Many of these fires are ignited by small open-flame sources, such as lighters or matches.

Summary of the Legal Basis:

Section 4 of the Flammable Fabrics Act (FFA) (15 USC 1193) authorizes the Commission to issue a flammability standard or other regulation for a product of interior furnishing if the Commission determines that such a standard is "needed to adequately protect the public against unreasonable risk of the occurrence of fire leading to death or personal injury, or significant property damage." No aspect of the Commission's regulatory

VOL
60
SS
2
28
NO
28
995
UMI

proceeding is required by statute or court order.

The Commission's regulatory proceeding could lead to several results, one of which could be a mandatory standard requiring that upholstered furniture sold in the United States meet mandatory labeling requirements, or resist ignition from open-flame sources, or meet other performance criteria under test conditions specified in the standard.

Alternatives:

1. Continued deferral to the existing industry voluntary standard addressing only cigarette ignition of upholstered furniture and no standard at all addressing open-flame ignition.

2. Continued deferral to the existing industry voluntary standard addressing cigarette ignition of upholstered furniture and development of a voluntary standard to address small open-flame ignition.

3. Development of mandatory labeling requirements to address small open-flame ignition.

Anticipated Costs and Benefits:

The estimated annual cost of imposing a mandatory standard to address open-flame ignition of upholstered furniture will depend upon the test requirements imposed by the standard and the steps manufacturers must take to meet those requirements. Because the societal cost of fires involving upholstered furniture ignited by open-flame sources is about $500 million each year, the benefits of a mandatory standard to address the risk of open-flame ignition of upholstered furniture could be very significant, even if all such fires were not prevented.

Risks:

The estimated total cost to society from all residential fires associated with upholstered furniture is $3.6 billion. Societal costs associated with upholstered furniture fires are among the highest associated with any product subject to the Commission's authority. A voluntary or mandatory standard may have the potential to reduce significantly that portion of societal costs resulting from upholstered furniture fires ignited by small open-flame sources.

156. SAFETY STANDARD FOR BICYCLE HELMETS

Priority:

Other Significant

Legal Authority:

5 USC 553 Administrative Procedure Act

CFR Citation:

16 CFR 1203

Legal Deadline:

NPRM, Statutory, August 15, 1994.

Abstract:

The Children's Bicycle Helmet Safety Act of 1994 directs the Commission to begin a proceeding to issue a safety standard for bicycle helmets. That legislation also directs the Commission to designate appropriate existing standards for bicycle helmets as interim safety standards.

On August 15, 1994, the Commission published a notice of proposed rulemaking to begin a proceeding for issuance of a safety standard for bicycle helmets. The proposed standard includes impact-attenuation requirements, and other requirements derived from existing voluntary standards for bicycle helmets. The proposed standard also contains requirements to prevent helmets from coming off the rider's head during an accident, and other provisions specifically applicable to helmets intended for children.

In March 1995, the Commission designated the following standards as interim safety standards for bicycle helmets: (1) American National Standards Institute (ANSI) standard Z90.4-1984, Protective Headgear for Bicyclists; (2) ASTM standards F 1447-93 or F 1447-94, Standard Specification for Protective Headgear Used in Bicycling, incorporating the relevant provisions of ASTM F 1446-93 or F 1446-94, Standard Test Methods for Evaluating the Performance Characteristics of Protective Headgear, respectively; (3) Canadian Standard Association standard Cycling Helmets, CAN/CSA-D113.2-M89; (4) Snell Memorial Foundation (Snell) 1990 Standard for Protective Headgear for Use in Bicycling (designation B-90); (5) Snell 1990 Standard for Protective Headgear for Use in Bicycling, including March 9, 1994 Supplement (designation B-90S); (6) Snell 1994 Standard for Protective Headgear for Use in Non-Motorized Sports (designation N-94); (7) Snell 1995 Standard for Protective Headgear for Use With Bicycles B-95. Bicycle helmets manufactured after March 16, 1995, must conform with the requirements of one of these interim standards until the Commission issues a final standard for bicycle helmets.

The staff has revised the proposed standard. In October 1995, the Commission is expected to decide whether to publish a final standard based on the 1994 proposal or to revise and republish a proposed standard for additional public comment.

Statement of Need:

The Commission estimates that on average, one-half million injuries associated with bicycles are treated in hospital emergency rooms each year in the United States. Additionally, about 1,000 fatalities associated with bicycles occur each year, according to the National Safety Council. A study of bicycle use and hazard patterns conducted by the Commission in 1993 indicated that almost one-third of the injuries associated with bicycles involved the head. Information available to the Commission indicates that in recent years, almost two-thirds of all deaths associated with bicycles involved head injuries.

Younger children are particularly at risk of head injury. The Commission's study showed that one-half of the injuries to children younger than 10 years of age associated with bicycles involved the head, whereas the head was involved in only about one-fifth of the bicycle injuries to older children.

Summary of the Legal Basis:

The Children's Bicycle Helmet Safety Act of 1994 (section 205 of P. L. 103-267, 108 Stat. 722, June 16, 1994) directs the Commission to begin a proceeding under provisions of section 553 of the Administrative Procedure Act (5 USC 553) to develop a standard for bicycle helmets. That legislation provides further that the standard shall include a provision to protect against the risk of a helmet coming off a rider's head and provisions to address risks of injury to children associated with riding bicycles.

The bicycle-helmet legislation also requires that bicycle helmets manufactured after March 15, 1995, must conform to one of three voluntary standards specified by that legislation or to "any other standard that the Commission determines is appropriate" until the Commission issues a final safety standard for bicycle helmets. On March 23, 1995, the Commission published a notice in the **Federal Register** to designate and codify the following standards as interim safety standards for bicycle helmets: (1) American National Standards Institute (ANSI) standard Z90.4-1984, Protective Headgear for Bicyclists; (2) ASTM (formerly American Society for Testing and Materials) standards F 1447-93 or F 1447-94, Standard Specification for Protective Headgear Used in Bicycling, incorporating the relevant provisions of ASTM F 1446-93 or ASTM F 1446-94, Standard Test Methods for Equipment and Procedures Used in Evaluating the Performance Characteristics of Protective Headgear, respectively; (3) Canadian Standards Association standard, Cycling Helmets (CAN/CSA-D113.2-M89; (4) Snell Memorial Foundation (Snell) 1990 Standard for Protective Headgear for Use in Bicycling (designation B-90); (5) Snell 1990 Standard for Protective Headgear for Use in Bicycling, including March 9, 1994 Supplement (designation B-90S); (6) Snell 1994 Standard for Protective Headgear for Use in Non-Motorized Sports (designation N-94); (7) Snell 1995 Standard for Protective Headgear for Use With Bicycles, B-95.

Alternatives:

The Children's Bicycle Helmet Safety Act requires the Commission to review the requirements of the interim standards and to establish a final mandatory standard based on those requirements. Accordingly, the Commission cannot consider deferring to an existing voluntary standard or developing a new voluntary standard.

In the **Federal Register** of August 15, 1994, the Commission published a proposed safety standard for bicycle helmets. The proposed standard included an impact protection test, chin strap strength and effectiveness tests, and construction and labeling requirements. In October 1995, the Commission will decide whether to issue a final standard based on the 1994 proposal or revise and republish a proposed standard for additional public comment.

Anticipated Costs and Benefits:

After the final standard becomes effective, helmet manufacturers may incur costs to redesign helmets to meet the requirements of the standard. However, costs of redesign would be amortized over the course of production and are expected to be negligible on a per-unit basis. Costs of testing to support certificates of compliance with the final standard are not expected to increase because the vast majority of helmet manufacturers now use third-party certification programs for conformance to one of the interim standards. Similarly, most helmet manufacturers currently label their products. If manufacturers are given sufficient lead time for any changes to labels required by the final standard, any additional costs associated with labeling required by the final standard are expected to be insignificant.

The anticipated benefits of the standard are helmets, which if worn properly are less likely to come off the head in an accident; helmets which provide adequate coverage of critical areas of the head; and helmets which provide protection more suitable to younger children. These benefits could lead to a reduction in the number of deaths and serious head injuries from accidents associated with bicycles. Consumer confusion over differing standards would also be reduced by the creation of a single, uniform standard for bicycle helmets.

Risks:

Information available to the Commission indicates that several hundred thousand head injuries each year are associated with bicycles, and that more than 650 deaths each year result from those head injuries. Many of those deaths and injuries are to children younger than 10 years of age. The standard could prevent a portion of those deaths and injuries.

FEDERAL COMMUNICATIONS COMMISSION (FCC)

Statement of Regulatory Priorities

The Federal Communications Commission (FCC) is an independent Federal regulatory agency. Established by the Communications Act of 1934 (47 U.S.C. 151 et seq.), it was created to regulate interstate and foreign communications by radio and wire, in order to make available throughout the United States the provision of rapid, efficient, nationwide and worldwide wire and radio communications at reasonable rates.

The FCC encourages continuing economic growth by paving the way for continuing advances in telecommunications. It does this by:

- Promoting competition in all communications markets, on all five lanes of the information superhighway—broadcast, cable, telephone, wireless, and satellite; and
- Defining and pursuing the public interest in telecommunications, particularly with the goal of delivering advanced communications services to all Americans.

These responsibilities, in an explosively expanding sector of the economy, have significantly increased the Commission's workload. In addition to responding to the rapid growth and attendant public interest in this sector, Congress passed 21 separate pieces of legislation from 1985 to 1994 that significantly added to the Commission's responsibilities.

The FCC is already setting out forward-looking rules of the road that are blueprints for opening up competition. For example, the FCC needs to establish standards for open network access to make sure that dominant providers do not use their technological infrastructures as bottlenecks to deny entry to others. The FCC also needs to assure that dominant telecommunications providers do not use their revenues to cross-subsidize their entry into other service markets. The FCC's rules are encouraging emerging competitors, such as telephone companies competing against cable companies in video distribution and cable companies competing against telephone companies in local telephony. Writing these rules of the road has become a significant portion of the FCC's increasing workload.

Further, the FCC is promoting competition by facilitating the introduction of new services. For example, the FCC has:

- Created rules that foster a competitive market in low-earth-orbit satellite communications services, so that American industry will build the first privately owned global satellite systems that can provide mobile voice and data communications;
- Introduced increased local telephone competition by setting rules for expanded interconnection to competitive access providers; and
- Generated potential competition in multichannel video services through vigorous application of the program access rules, by issuing the ground rules and approving applications for video dialtone systems and by devising new procedures to expedite wireless cable licenses.

One noteworthy example of new solutions is the FCC's auctions of the electromagnetic spectrum. With the support of Congress in the 1993 Budget Act, FCC has begun authorizing new services and promoting competition by auctioning the airwaves. These auctions, which got underway just over a year ago, have to date raised more than $9 billion for the Treasury. This amount is nearly 50 times the FCC budget request for fiscal year 1997.

As important as revenues are, auctions are also a faster, more efficient, and fairer way to allocate the public airwaves. The auctions permit the market, rather than bureaucrats and lobbyists, to determine who gets valuable wireless licenses. Moreover, the auctions will jump-start the competition for advanced wireless telephone and data services.

The promotion of competition will stimulate tens of billions of dollars in investment and create hundreds of thousands of jobs throughout the country. FCC auctions authorizing personal communications services will provide new competition to the cellular telephone business.

The FCC carries out the public interest in telecommunications as dictated by Federal law and interpreted by FCC rules. The FCC's public-interest responsibilities include, for example: (a) setting aside radio spectrum for public safety agencies and establishing and overseeing the Emergency Broadcast System (now called the Emergency Alert System); (b) ensuring that radio and television broadcasting are based on a network of local outlets that meet local needs; (c) ensuring a place for children's programming on broadcast television; (d) cooperating with the States to ensure that affordable phone service is provided to rural, elderly, and low-income populations; and (e) optimizing use of the public airwaves, free of interference.

Eliminating and Improving Regulations

The President's March 4, 1995, Regulatory Reinvention Initiative directs Executive Branch agencies to focus on four tasks as part of the Administration's overall regulatory reform initiative. The Commission supports this effort. It is committed to a program of continually reviewing its regulations. FCC has eliminated numerous regulations and streamlined many others. In so doing, it has sought to ensure that those regulation that are kept, and new ones that are adopted, further the development of procompetitive markets and new services, to the benefit of American consumers.

FCC ongoing reviews ensure that its rules are current, accurate, and useful to the public and that they minimize reporting burdens on regulated industries. In addition, the review program ensures the cleanup of any old rules and resolves any conflicts or overlaps with other rules. Regulatory reviews resulting in a decision to revise, eliminate, or otherwise change a current regulation are generally conducted under the notice-and-comment provisions of the Administrative Procedure Act, which provide for appropriate input from the public, regulated entities, and other interested parties.

In addition, earlier this year the then Special Counsel for Reinventing Government completed an extensive review of current FCC regulations. The Counsel's report, "Creating a Federal Communications Commission for the Information Age," recommended over 70 legislative and administrative actions that would streamline FCC processes, reduce the regulatory burden on the public, and promote full competition in the telecommunications industry.

In May 1995, the Commission submitted to Congress a package of 37 recommendations for legislative changes that would streamline or deregulate Commission functions.

Rewarding Results

The Commission is committed to the development and implementation of agency performance measures as required by the Government Performance and Results Act (GPRA), Public Law 103-62. The GPRA requires agencies to:

- Develop, with assistance from the public and stakeholders, a comprehensive mission statement and strategic plan;
- Establish objective, quantifiable, and measurable goals using quality and effectiveness indicators to measure citizen satisfaction;
- Identify output performance indicators;
- Develop annual performance plans;
- Measure actual performance against long-term goals and annual performance plans; and
- Make performance plans and actual performance results a matter of public record, submit an Annual Program Performance Report to the President and Congress, and make managers more accountable.

Similarly, Executive Order 12862 "Setting Customer Service Standards" requires agencies to:

- Establish a benchmark of "the best in the business" and use this to set long-term goals;
- Survey customers to determine the kind and quality of services desired;
- Survey customers to determine the desired level of performance;
- Measure results against expected performance and against "the best in the business"; and
- Post customer service standards for public inspection.

The FCC enlisted the services of a contractor to conduct workshops with our Customer Service Standards Task Force and our Quality Council to identify primary FCC customer groups and to develop standards that address customer concerns. These workshops produced customer service standards for our Bureaus and Offices that will:

- Identify the customers who are, or should be, served by the agency;
- Provide customers with choices in the sources of service and the means of delivery;
- Set service standards that address the needs of our customers;
- Assist our Bureaus and Offices in refining these service standards and publish brochures for our customers describing these standards; and
- Monitor customer service over time.

These standards will be utilized as performance measures and linked to performance plans developed for the GPRA. By using quality and effectiveness indicators to measure the public's satisfaction with our services, we intend to establish a benchmark of "the best in the business" for customer satisfaction.

The FCC is also voluntarily participating in the GPRA Program Performance Pilot Project to gain valuable insight into the performance measurement process, and hopefully assist the Administration in setting appropriate general guidelines for agency implementations of the GPRA. As a pilot agency, the FCC has developed and submitted to the Office of Management and Budget (OMB) its fiscal year 1994, 1995, and 1996 Program Performance Plans covering the Land Mobile Radio application processing function of the Wireless Telecommunications Bureau and the Equipment Authorization program of the Office of Engineering and Technology. Most recently, the FCC has completed and submitted its FY 1994 Program Performance Report which details how well it succeeded in meeting established targets.

Personnel Performance

The FCC has evaluated its internal personnel performance measures to determine if it needs to eliminate those based on process or punishment. Based on this review, no FCC positions appear to have performance standards of the type identified as "process-and-punishment"-oriented.

The FCC has established a Performance Management Task Force, consisting of supervisors, managers, human resources staff, and union representatives. This task force developed a survey to obtain employee views on improving the current performance appraisal system. The task force is coordinating its efforts with the Office of Personnel Management.

Creating Grassroots Partnerships

Historically, the FCC has sought feedback on proposed changes to its rules and regulations under the notice and comment provisions of the Administrative Procedures Act. It has also sought customer participation in the development of critical technological standards having an impact on America's competitive position in the international telecommunications market. A recent and ongoing example of this effort is the Advisory Committee on Advanced Television Service. Other advisory committees are created to assist the agency in developing reasonable, equitable, and enforceable regulations. A recent example of this type of advisory committee is the Public Safety Wireless Committee, formed in partnership with the Department of Commerce's National Telecommunications Information Administration.

The FCC has always sought the input of industry and government experts at the grassroots level, for example, through attending various industry conventions and meetings. In the past 18 months, the FCC has increased its efforts to foster grassroots partnerships to a level never undertaken in the past. Examples of efforts at outreach programs include the following, which represent only a small portion of the more than 400 other meetings with industry representatives and the public that the FCC Commissioners and senior staff plan to attend this year:

- Senior FCC management officials held several meetings during April and May of this year with radio, television, and cable broadcasters and representatives of the common carrier and land mobile industries to discuss subjects of current concern to them. These meetings were held in Washington, DC; Las Vegas, Nevada; Denver, Colorado; and Dallas, Texas.
- FCC's Common Carrier Bureau has held several meetings with regulatees to elicit information on how to improve internal regulatory processes. A majority of the recommendations resulting from these meetings focused on improving the timeliness and dissemination of agency decisions and documents by making them available to our customers in electronic format. The agency currently has several projects to provide access to FCC records via the Internet and electronic bulletin boards, and it is incorporating the public's suggestions into these initiatives.
- Commission staff also participated in numerous panels on current and future issues in wireless communications. Industry concerns with auctions and spectrum availability were among the topics of general discussion at the panels. The FCC is currently reviewing the recommendations received at these panel discussions and fora.

Negotiated Rulemakings

To support the Administration's efforts to promote consensual rulemakings, the Commission has identified 20 upcoming conventional rulemakings which we believe should be considered for conversion to negotiated rulemakings. The identified rulemakings comprise subjects from all areas of regulation within the FCC.

Certain prospective rulemakings, such as Cable Home Wiring and Spectrum Needs for Public Safety, represent areas of interest to the general public. Other rulemakings are in areas of FCC rules which are of interest to consumers of particular services and the regulated

industries involved. Among these latter rulemakings are the Part 24 Personal Communications Services Rewrite, and Regulatory Symmetry for Cellular and Broadband Personal Communications Services.

The FCC also has used a more informal approach to consensual rulemaking in completing work on numerous rulemaking proceedings. An example is its proposed FY 1995 Regulatory Fee Schedule. The Omnibus Budget Reconciliation Act of 1993 (P.L. 103-66) requires the agency to collect annual regulatory fees. To ensure that the fee program was fair and equitable for all payees, the FCC employed a contractor to conduct "Focus Group" discussions with several of the licensees and others to determine whether there were alternative fee development methodologies to those proposed in the Commission's Notice of Proposed Rulemaking. The comments, concerns, and suggestions obtained from these focus group discussions were incorporated into the Commission's final Report and Order.

BILLING CODE 6712-01-F

FEDERAL HOUSING FINANCE BOARD (FHFB)

Statement of Regulatory Priorities

The Federal Housing Finance Board (Finance Board) is an independent agency that is statutorily charged with regulating the Federal Home Loan Bank (FHLBank) System. The FHLBank System is a Government-sponsored enterprise consisting of 12 regional "wholesale" FHLBanks that provide advances (loans) to member financial institutions for the purpose of housing finance. The Finance Board is required to prepare the following Regulatory Plan pursuant to section 4 of Executive Order 12866.

In June 1995 the Finance Board achieved a quorum for the first time in 17 months, thereby enabling it to begin moving forward on several pending and planned regulatory initiatives. The Finance Board's three major regulatory priorities for 1996 are: to ensure that the FHLBanks operate in a financially safe and sound manner; to ensure that they carry our their housing finance mission; and to reduce the regulatory burden on the FHLBanks by determining those governance authorities currently exercised by the Finance Board that may be more appropriately exercised by the FHLBanks. Within these major priorities, the Finance Board has a number of 1995-96 priority projects, three of which are expected to result in significant regulatory actions (as defined in E.O.12866) in 1996.

FHLBank Safety And Soundness Priority

The Finance Board's highest priority is to continue to ensure the safety and soundness of the FHLBank System. This priority entails the ongoing examination and supervision of the 12 FHLBanks and the FHLBank System's funding agent, the Office of Finance, and all matters relating to safety and soundness. While none of the projects within this priority is expected to result in a significant regulatory action in 1996, the following interrelated matters are the most important components of this top priority for the agency:

1. The execution of the Finance Board-adopted annual strategic plan for onsite examination of the 12 FHLBanks, the Office of Finance, and the Financing Corporation;

2. The development and adoption by the Finance Board of the agency's examination manual, which will articulate the policies and procedures to be followed by examiners in conducting examinations; and

3. A comprehensive review of the Financial Management Policy governing investments and other nonadvance financial activities of the FHLBank System.

FHLBank Housing Finance Mission Priority

The second major Finance Board regulatory priority is to continue to ensure that the FHLBanks carry out their housing finance mission. There are two significant regulatory actions through which the Finance Board intends to further this priority in fiscal year 1996: (a) the amendment of the Finance Board's existing Affordable Housing Program (AHP) regulation and (b) the possible adoption of a new regulation or guidelines governing the FHLBanks' Community Investment Program (CIP). These two initiatives are described below (RINs 3069-AA28 and 3069-AA05).

The Finance Board also intends to implement this priority by amending its existing Community Support Requirements (Community Support) regulation to establish specific community support standards applicable to credit union and insurance company members. The Federal Home Loan Bank Act (Bank Act) requires the Finance Board to adopt a regulation establishing standards of "community investment or service" that member institutions must meet in order to maintain continued access to long-term advances.

Under the existing Community Support regulation, the primary standard for evaluating the adequacy of a member's community support activities is the evaluation of the member's compliance with the Community Reinvestment Act of 1977 (CRA), as evidenced by the CRA rating assigned to the member by its Federal banking regulator. However, since the CRA does not apply to credit unions and insurance companies, these institutions do not receive CRA ratings. The amendment to the Community Support regulation is intended to address this issue. The Finance Board does not expect the amendment of the Community Support regulation to constitute a significant regulatory action.

FHLBank Corporate Governance Priority

The Finance Board's third major priority for fiscal year1996 is to devolve to the FHLBanks, to the extent permitted by current law, decisionmaking authority regarding corporate governance and business oversight issues, thereby reducing regulatory burden on the FHLBanks and permitting the Finance Board to focus upon its core safety and soundness, regulatory, and supervisory functions.

Throughout the remainder of 1995 and in 1996, the Finance Board will address a number of specific governance and oversight issues and implement those changes it believes are appropriate and that can be carried out without statutory change. Primary among these efforts will be the promulgation of a proposed and, eventually, a final rule amending the Finance Board's regulation on members of the FHLBanks System. This initiative is discussed below (RIN 3069-AA41). The Finance Board also intends to promulgate a proposed and, eventually, a final rule amending its regulation on the organization of the FHLBanks to transfer from the Finance Board to the boards of directors of the FHLBanks final authority to establish rates of pay for FHLBank officers and employees. This anticipated regulatory change will not amount to a significant regulatory action.

In addition to its regulatory and policy actions, the Finance Board will be cooperating with Congress as it attempts to develop comprehensive FHLBank System reform legislation aimed largely at further devolving corporate governance authority to the FHLBanks beyond what is possible under the current statutory scheme.

The Finance Board's corporate governance priority promotes the goals of the President's National Performance Review in two ways. First, it will "cut red tape" by reducing the number and extent of regulations that control the FHLBanks' business decisions. Second, it will "put customers first" by allowing the FHLBanks more flexibility in carrying out the purpose for which they were created: to channel money from Wall Street to individual housing lenders all across America.

FHFB

PROPOSED RULE STAGE

---

157. AFFORDABLE HOUSING PROGRAM

Priority:

Economically Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

12 USC 1422b(a)(1); 12 USC 1430(j)

CFR Citation:

12 CFR 960

Legal Deadline:

None

Abstract:

The Federal Housing Finance Board (Finance Board) issued a proposed rule revising its regulation governing the Affordable Housing Program (AHP) in order to simplify and clarify the AHP's requirements for the Federal Home Loan Banks (FHLBanks) and their members.

Statement of Need:

The Finance Board is revising its AHP Regulation in order to address operational issues that have arisen during the 5 years the program has been in existence. The proposed AHP amendments will help enhance the AHP's compatibility with various State and Federal housing programs that provide funds in conjunction with AHP funds. In addition, the amendments would make the AHP more responsive to local low-income housing needs in each of the 12 FHLBank districts and increase efficiency in administration of the program.

Summary of the Legal Basis:

Section 10(j) of the Federal Home Loan Bank Act requires the Finance Board to promulgate regulations governing the AHP. See 12 U.S.C. 1430(j).

Alternatives:

During the development of the proposed AHP amendments, the Finance Board considered various alternative approaches to dealing with the operational issues that have arisen over the 5 years of the AHP's existence. In addition, the Finance Board will consider all alternatives suggested by the public during the notice-and-comment process. The Finance Board expects to address these alternatives in its final AHP regulation.

Anticipated Costs and Benefits:

At this time, it is not possible to quantify the expected costs and benefits of the revised AHP regulation. In general, the Finance Board expects the revised AHP regulation to reduce the FHLBanks' administrative costs of operating the AHP.

Risks:

The revised AHP regulation does not address issues of financial risk to the FHLBanks. The advances made by the FHLBanks through the AHP, like all FHLBank advances, are governed by the Finance Board's Advances regulation, which addresses the safety and soundness issues involved in making advances. Since advances made through the AHP are overcollateralized, there is a low magnitude of risk of loss to the FHLBanks in making such advances.

FHFB

158. • MEMBERS OF THE FEDERAL HOME LOAN BANKS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

12 USC 1422a; 12 USC 1422b; 12 USC 1424; 12 USC 1426; 12 USC 1442

CFR Citation:

12 CFR 933

Legal Deadline:

None

Abstract:

The Finance Board proposes to amend its regulation on members of the Banks to allow the 12 Federal Home Loan Banks, rather than the Finance Board, to approve applications for Bank membership.

Statement of Need:

The proposed rule would permit the FHLBanks, rather than the Finance Board, to approve applications for FHLBank membership. It would require the FHLBanks to apply most of the tests and criteria for membership currently used by the Finance Board in approving applications. The regulation, as amended, would further the Finance Board's policy to devolve to the FHLBanks as many functions of corporate governance as are practicable under the current statutory scheme.

Summary of the Legal Basis:

Section 4 of the Bank Act sets forth eligibility criteria for membership in FHLBanks, but does not require expressly that the Finance Board approve individual applications for membership. (See 12 USC 1424.) Section 2B(a)(1) of the Bank Act authorizes the Finance Board to promulgate regulations necessary to carry out the provisions of the Bank Act (see 1422b(a)(1)), including those necessary to fulfill the Finance Board's duties to ensure the safety and soundness of the FHLBank system (see 1424a(3)(A)), and to ensure that the FHLBanks carry out their housing finance mission (see 1422a(3)(B)(i)). Therefore, the Finance Board has the statutory power both to devolve to the FHLBanks approval authority regarding membership applications and to establish regulatory guidelines to govern the FHLBanks' exercise of such authority.

Alternatives:

In deciding whether to amend its regulation on members of the FHLBanks, the Finance Board considered the possibility of retaining final approval authority over FHLBank membership applications. However, the Finance Board determined that such a course would continue to cause unnecessary delay in the processing of membership applications and would maintain a layer of bureaucracy in the application process that is not necessary to ensure the safety and soundness of the FHLBank System or to ensure that the FHLBanks are carrying out their housing finance mission.

Anticipated Costs and Benefits:

The regulation on members of the FHLBanks, as amended, would not impose any additional costs on either the Finance Board, the FHLBanks, or potential FHLBank members and would render benefits to each. Applicants for membership would continue to submit application materials, but would do so pursuant to streamlined procedures. FHLBanks would continue to review membership applications, as they do currently, but would not need to prepare the materials for Finance Board review. With the elimination of the membership application review function, Finance Board staffing levels could be reduced, or staff time could be devoted to other priorities. Ultimately, this would benefit the FHLBanks, which fund Finance Board operations through the payment of annual assessments.

Risks:

The only risk to which the amendment of the regulation on members of the FHLBank System applies is the financial risk assumed by FHLBanks in accepting financial institutions as members. The amended regulation would minimize this risk by requiring that the FHLBanks apply the same safety and soundness guidelines in assessing membership applications that are applied now by the Finance Board.

FHFB

FINAL RULE STAGE

---

159. COMMUNITY INVESTMENT PROGRAM

Priority:

Economically Significant

Legal Authority:

12 USC 1422a; 12 USC 1422b; 12 USC 1430(i)

CFR Citation:

12 CFR 961

Legal Deadline:

None

Abstract:

Section 10(i) of the Bank Act requires the FHLBanks to establish a community investment program (CIP) to make advances to FHLBank members to finance community-oriented mortgage lending. The Finance Board is contemplating proposing a regulation or developing guidelines that would address operational aspects of the CIP.

Statement of Need:

The CIP has operated for 5 years without any clarifying regulations. During this time, operational issues have arisen. A regulation or guidelines may be necessary to address these issues in order to establish a more specific framework for the operation of the CIP.

Summary of the Legal Basis:

Section 2B(a)(1) of the Bank Act authorizes the Federal Housing Finance Board (Finance Board) to promulgate regulations necessary to carry out the provisions of the Act.(See 12 U.S.C. 1422b(a)(1).) Section 10(i) of the Bank Act requires the FHLBanks to establish a CIP, pursuant to the general statutory criteria set forth in section 10(i).

Alternatives:

Because consideration of additional CIP guidance is in a very preliminary stage, including the issue of whether such guidance will be established by regulation or by guidelines, the Finance Board has not yet analyzed the alternative approaches to the issues expected to be addressed in this initiative.

Anticipated Costs and Benefits:

Because the Finance Board has not yet analyzed the alternative approaches to the issues expected to be addressed in the CIP regulation or guidelines, the Finance Board is not yet able to identify the expected costs and benefits of any such CIP regulation or guidelines.

Risks:

The CIP regulation or guidelines will not address issues of financial risk to the FHLBanks. The advances made by the FHLBanks through the CIP, like all FHLBank advances, are governed by the Finance Board's Advances regulation, which addresses the safety and soundness issues involved in making advances. Since advances made through the CIP are overcollateralized, there is a low magnitude of risk of loss to the FHLBanks in making such advances.

BILLING CODE 6725-01-F

FEDERAL MARITIME COMMISSION (FMC)

Statement of Regulatory Priorities.

The Federal Maritime Commission's regulatory objectives are guided by the agency's basic mission. The Commission's mission is to be able to take the actions necessary to ensure that the shipping statutes it administers operate as effectively as possible to provide an efficient, economic, and nondiscriminatory ocean transportation system, in an environment free of unfair foreign maritime trade practices. Commission regulations are designed to implement each of the various statutes the agency administers in a manner consistent with this mission and in a way that minimizes regulatory costs, fosters economic efficiencies, and promotes international harmony.

Proposed legislation pending in Congress could alter significantly the regulatory scheme regarding ocean commerce. This same legislation could also affect the continued existence of the Commission. The Commission will be monitoring this legislation closely, as it obviously would affect the agency's regulatory planning and priorities, and depending on the effective date(s) of its provisions, could require regulatory action during the coming year. Until any such legislation is enacted and an implementation schedule is determinable, the principal objective or priority of the agency's current regulatory plan will be to continue to assess its major existing regulations for continuing need, effectiveness, burden on the regulated industry, fairness, and clarity. The Commission has under review, inter alia, regulations regarding passenger vessel operator financial responsibility, co-loading arrangements between non-vessel-operating common carriers, possible guidelines for Commission review of substantially anticompetitive agreements between common carriers by water in foreign commerce, and requirements for the filing of service contracts.

Review of the above-mentioned passenger vessel financial responsibility regulations represents an important regulatory action and serves as an example of the Commission's objective to regulate fairly and effectively while imposing a minimum burden on the regulated entities, following the principles stated by the President in Executive Order 12866. Passenger vessel financial responsibility regulations are issued pursuant to the provisions of Public Law 89-777, 46 U.S.C. app. 817e and 817d. These regulations set forth the procedures whereby owners or operators of vessels having berth or stateroom accommodations for 50 or more passengers and embarking at U.S. ports shall establish their financial responsibility to indemnify passengers for nonperformance of transportation to which they would be entitled and to meet any liability which may be incurred for death or injury to passengers or other persons on voyages to or from U.S. ports. The Commission's review of its current regulations in this area is for the purpose of assuring that the Commission's requirements provide adequate coverage for passenger vessel customers in regard to performance and casualty, while not imposing an undue burden or cost on the passenger vessel industry.

FMC

FINAL RULE STAGE

---

160. FINANCIAL RESPONSIBILITY REQUIREMENTS FOR NONPERFORMANCE OF TRANSPORTATION AND INQUIRY INTO ALTERNATIVE FORMS (DOCKET NOS. 94-06 AND 94-21)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

5 USC 552 to 553; PL 89-777 (46 USC app 817e); 46 USC app 841a; 46 USC app 1716

CFR Citation:

46 CFR 540.5; 46 CFR 540.9

Legal Deadline:

None

Abstract:

Action would amend financial responsibility requirements regarding nonperformance by passenger vessel operators by eliminating the $15 million unearned passenger revenue ceiling and revising the existing sliding scale for coverage. Comment also is sought on an alternative sliding scale. Action also would remove self-insurance as an option for coverage. This action has been held in abeyance pending a Notice of Inquiry into alternative methods of establishing financial responsibility.

Statement of Need:

The Federal Maritime Commission (FMC) administers section 3, Public Law 89-777, 46 USC app. 817e. Section 3 requires certain passenger vessel operators (PVOs) to establish financial responsibility for nonperformance of transportation. (Section 3 provides in pertinent part: "(a) No person in the United States shall arrange, offer, advertise, or provide passage on a vessel having berth or stateroom accommodations for fifty or more passengers and which is to embark passengers at United States ports without there first having been filed with the Federal Maritime Commission such information as the Commission may deem necessary to establish the financial responsibility of the person arranging, offering, advertising, or providing such transportation, or, in lieu thereof, a copy of a bond or other security, in such form as the Commission, by rule or regulation, may require and accept, for indemnification of passengers for nonperformance of the transportation.") The Commission's regulations implementing section 3, contained in 46 CFR 540, Subpart A, generally provide that a PVO may evidence its financial responsibility by one or more of the following methods: a guaranty, escrow arrangement, surety bond, insurance or self-insurance. The amount required must equal 110 percent of the PVO's highest unearned passenger revenue (UPR) over a 2-year period. (UPR is defined under 46 CFR 540.2(i) as: ". . . that passenger revenue received for water transportation and all other accommodations, services, and facilities relating thereto not yet performed.") The maximum coverage amount currently required is $15 million, subject to a sliding scale.

The Commission monitors activity of PVOs subject to Public Law 89-777 and by rule requires semiannual UPR reports. Additionally, the Commission periodically surveys PVOs' future U.S. cruise schedules and fare structures. Developments since the Commission's actions in Dockets Nos. 92-19 (Revision of Financial Responsibility Requirements for Non-Performance of Transportation (57 FR 51887, September 14, 1992)) and 92-50 (Financial Responsibility Requirements for Nonperformance of Transportation: Revision of Self-insurance Qualification Standards, Final Rule (57 FR 62749, December 31, 1992)) prompted the Commission to reconsider existing UPR coverage requirements with regard to the sliding scale, the ceiling, and self-insurance. One development concerns the involuntary bankruptcy of a cruise line. Another is the extent to which some PVOs' UPR now exceeds the current $15 million ceiling, leaving an estimated $700 million in passengers' deposits and prepaid fares without coverage. Further, with regard to self-insuring PVOs that are not State or Federal entities, the Commission is concerned that sufficient funds may not be available to indemnify passengers for nonperformance of transportation.

To narrow the coverage gap which has emerged, the Commission has proposed to remove the current ceiling, and to revise the sliding scale to require coverage for 110 percent of unearned passenger revenue up to $25 million per operator, and coverage of 90 percent for amounts exceeding $25 million.

The Commission also proposed to reconsider section 3 self-insurance for passenger vessel operators that are not State or Federal entities. Presently, only net worth at 110 percent of the highest unearned passenger revenue over the past 2 years must be maintained. In the event of a default, other interests with potentially superior claims on a passenger vessel operator's assets--such as a vessel's crew, shipyards, provisioners, and mortgage holders--could leave insufficient funds available to fully indemnify passengers for deposits and prepaid fares. Even if the Commission were to reinstate its former requirement for both net worth and working capital, the Commission is concerned that there still might be insufficient assets readily available to fully indemnify the traveling public. These concerns do not, however, appear to militate against accepting State or Federal entities as self-insurers.

While the proposed rule would discontinue self-insurance for commercial entities, it would afford a 1-year transitional period for commercial operators who are presently self-insured, at the end of which they would be required to provide other evidence of financial responsibility.

Industry-wide, for the approximately $1 billion in current UPR, the Commission's staff has estimated that the proposed rule would increase coverage from the current $300 million to $850 million.

It is important to note that the proposed rule only relates to passenger revenue which has not yet been earned by the involved PVO. The changes set forth in the Proposed Rule were deemed necessary to ensure that cruise passengers are adequately protected in the event of nonperformance of transportation.

Summary of the Legal Basis:

This proposal is made pursuant to section 3 of Public Law 89-777, which requires certain PVOs to establish financial responsibility for nonperformance of transportation.

Alternatives:

The proposed rule requested comments on an alternative approach of requiring 110 percent coverage for up to $25 million in UPR per operator; coverage of 75 percent for UPR between $25 million and $50 million per operator; and 50 percent coverage for UPR over $50 million per operator. The Commission also invited the PVO industry and other interested parties to suggest alternative proposals to ensure adequate financial responsibility coverage for UPR subject to section 3. Twelve comments generally critical of the proposed rule were received.

To ensure full consideration of other approaches potentially more acceptable to the industry, the Commission placed the Proposed Rule in abeyance pending an Inquiry into the viability of other approaches, Docket No. 94-21, Inquiry into Alternative Forms of Financial Responsibility for Nonperformance of Transportation (59 FR 52133, October 26, 1994) (1994 Inquiry). Two such approaches are set forth in the 1994 Inquiry. The first is the concept of voluntary associations; the second is retained but strengthened self-insurance requirements.

Anticipated Costs and Benefits:

The proposed rule represents a significant Commission action. It may not, however, ultimately be within the ambit of a "significant regulatory action" as defined under section 3(f) of Executive Order 12866. The proposed rule will probably not have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. The net effect of the rule would be to require an additional $700 million in financial responsibility coverage, which should not cost $100 million in today's financial markets. Moreover, inasmuch as the Commission is the sole administrator of the involved section of the underlying statute (section 3 of Public Law 89-777), the proposed rule would appear unlikely to create any inconsistency or other interference with an action taken or planned by another agency. In addition, the proposed rule would not appear to have any budgetary impact whatsoever on entitlements, grants, user fees, or loan programs or on the rights and obligations of recipients thereof. Finally, the proposed rule does not appear to raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in Executive Order 12866.

As background, the Commission undertook this rulemaking proposal as a consequence of its concern that some PVOs' UPR now greatly exceeds the current $15 million ceiling--in some instances by a factor of several times the current ceiling, leaving some $700 million in UPR without section 3 coverage. Under the Proposed Rule, every dollar in additional coverage obtained by a PVO will result in an additional dollar's protection to the traveling public. Ultimately, the proposed rule would reduce the exposure of the traveling public's deposits and prepaid fares to loss by 80 percent--from the current level of approximately $700 million to $138 million--with a corresponding reduction in uncovered UPR from 70 percent to 14 percent. The alternative proposal would reduce this exposure by 62 percent--from $700 million to $268 million--with a corresponding reduction in uncovered UPR from 70 percent to approximately 27 percent.

Risks:

Docket No. 94-06 does not involve risk reduction efforts involving health, public safety, or environmental concerns. The proposal does, however, contemplate a substantial reduction in potential risk exposure for passengers' deposits and prepaid fares for unperformed transportation.

FEDERAL TRADE COMMISSION (FTC)

Statement of Regulatory Priorities

Regulatory Priorities

The Federal Trade Commission is an independent agency charged with protecting consumers and businesses from unfair, deceptive, and anticompetitive practices.

Although the agency pursues its mandate primarily through case-by-case enforcement of the Federal Trade Commission Act and other statutes, regulation is an important complement to this law enforcement effort, particularly with respect to consumer protection matters. Commission regulations generally are intended to ensure that consumers receive the information necessary to evaluate competing products and make informed purchasing decisions.

The Commission's regulatory efforts for 1995 encompassed a consideration of new regulations, modification of existing regulations, and elimination of unneeded regulations. With respect to new regulations, the Commission implemented a new rule pursuant to the Telemarketing and Consumer Fraud and Abuse Prevention Act. The Act directed the Commission to issue a rule prohibiting deceptive and abusive telemarketing acts and practices within 365 days from the date of enactment of the Act. On August 16, 1995, the Commission issued a final rule that prohibits telemarketers from misrepresenting the cost, quantity, and other aspects of offered goods or services and allows the FTC to target deceptive and abusive practices. This proceeding generated considerable interest because of the large number of companies that conduct business by means of telemarketing and because of the Rule's potential effect on their methods of doing business. The Rule becomes effective on December 31, 1995.

In the Energy Policy Act of 1992 (EPA 92), Congress directed the Commission to establish uniform labeling requirements, if practicable, for alternative fuels (i.e., automotive fuels other than gasoline and diesel, such as compressed natural gas and electricity) and for vehicles that use alternative fuels. The Commission issued a final rule on May 19, 1995 (60 FR 26926) that requires disclosure of "appropriate" cost and benefit information for nonliquid alternative fuels and alternative-fueled vehicles to enable consumers to make reasonable purchasing choices and comparisons. The labeling requirements for nonliquid alternative fuels became effective on August 21, 1995, and the labeling requirements for alternative-fueled vehicles become effective on November 20, 1995.

With respect to rule modifications, the Commission sought comment regarding possible amendments to its Care Labeling Rule (59 FR 30733 June 15, 1994). The rule requires manufacturers and importers of textile wearing apparel to attach care labels to garments (for example, "dry clean only"). The rule currently requires the instructions to be in words, but allows symbols to be used in addition to words. The FTC sought comment on the desirability of using symbols in lieu of words. Symbols could make care instructions more understandable to non-English-speaking consumers, and thus not only better serve a significant minority of American consumers, but also foster trade with Mexico and Canada, consistent with the goals of the North American Free Trade Agreement. The comment period expired on October 15, 1994, and staff's recommendation to the Commission is expected in the fall of 1995.

The FTC is also committed to eliminating unnecessary rules and regulations. To this end, the Commission is seeking information regarding the costs and benefits of various trade regulation rules and voluntary industry guides. (See 60 FR 6463, February 2, 1995). This assessment is part of the Commission's ongoing program to review all of its rules and guides at least once every 10 years to determine their effectiveness, impact, and cost, and to assess whether they should be retained, modified, or repealed. As part of this ongoing program, the Commission has issued advance notices of proposed rulemaking (ANPRMs) proposing to rescind: the Sleeping Bag Rule, Part 400; the Binocular Rule, Part 402; the Tablecloth Rule, Part 404; the Glass Fiber Curtain Rule, Part 413; the Frosted Cocktail Glass Rule, Part 417; and the Extension Ladder Rule, Part 418. See 60 FR 27240-27245 (May 21, 1995). In connection with these rules, the Commission approved notices of proposed rulemaking (NPRMs) and gave advance notice of the NPRMs to Congress as required by Section 18 of the Federal Trade Commission Act. The Commission also approved an ANPRM to commence a proceeding to rescind the Leather Belt Rule, Part 405, and forwarded it to Congress as well.

In the past year, the FTC also repealed six voluntary industry guides. See 60 FR 37334 (July 20, 1995), announcing repeal of the Mill Guides; 60 FR 40262-40265 (August 8, 1995), announcing repeal of the Mail Order Insurance, Debt Collection Deception, and Free Film Guides; 60 FR 40267 (August 8, 1995), announcing repeal of the Beauty/Barber Equipment Guides; and 60 FR 40453 (August 9, 1995), announcing repeal of the Wig Guides. The Commission voted to repeal the Shoe, Ladies' Handbag, and Luggage Guides, and to propose a consolidated guide to cover these items as well as leather belts. The Commission also revised one interpretation and repealed various other interpretations published in 16 CFR Part 14. See 60 FR 40231 (August 15, 1995).

With regard to both content and process, the FTC's ongoing and proposed regulatory actions are compatible with the President's priorities. Substantively, the actions under consideration inform and protect consumers and reduce the regulatory burdens on business. In addition, the Commission's effort under EPA 92 serves to promote environmental protection and conservation of energy resources. The Commission's 10-year program for reviewing its existing regulations and guides is also consistent with President Clinton's National Regulatory Reinvention Initiative, which, among other things, urges agencies to eliminate obsolete or unnecessary regulations. The Commission's review program corresponds as well to section 5(a) of Executive Order 12866 (58 FR 51735, September 30, 1993), which directs Executive branch agencies to develop a plan to reevaluate periodically all of their significant, existing regulations.

Procedurally, the Commission also continues to focus substantial attention on aspects of the regulatory process that Executive Order 12866 seeks to promote: identifying and weighing the costs and benefits of proposed actions and possible alternative actions, and receiving the broadest practicable array of comments from affected consumers, businesses, and the public at large. In sum, therefore, the Federal Trade Commission's regulatory actions are aimed at efficiently and fairly promoting the ability of "private markets to protect or improve the health and safety of the public, the environment, or the well-being of the American people." (Executive Order 12866, sec. I.)

Regulatory Actions

The Commission has no actions that constitute "significant regulatory actions" under the definition in Executive Order 12866. Two of the three actions in Part II of the 1994 Regulatory Plan have concluded and are referenced in the Commission's October 1995 entry in the Unified Agenda of Federal Regulations. The third action, expected to conclude in 1995, is also referenced in the October Agenda.

BILLING CODE 5750-01-F

NUCLEAR REGULATORY COMMISSION (NRC)

Statement of Regulatory Priorities

Under the authority of the Atomic Energy Act of 1954, as amended, and the Energy Reorganization Act of 1974, as amended, the Nuclear Regulatory Commission (NRC) regulates the processing and utilization of source, byproduct, and special nuclear material. The NRC's regulatory mission is to ensure that civilian uses of nuclear materials and facilities are carried out with proper regard for the protection of public health and safety, the environment, and national security. The NRC regulates the operation of nuclear power plants and fuel cycle plants; the safeguarding of nuclear materials from theft and sabotage; the safe transportation of nuclear materials; the decommissioning and return to safe use of licensed facilities that are no longer in operation; and the medical, industrial, and research applications of nuclear material.

The NRC's regulatory priorities for the next fiscal year are to ensure that:

1. Nuclear power plants and other licensed facilities are operated safely and that licensees are adequately prepared to respond to accidents;

2. The basic principles and criteria that would allow decommissioned lands and structures to be released for unrestricted use are codified; and

3. Evolutionary and advanced reactor designs may be reviewed and licensed effectively and efficiently.

The NRC is addressing its regulatory initiatives in a manner that is consistent with the President's regulatory philosophy. The NRC routinely conducts comprehensive regulatory analyses that examine the costs and benefits of contemplated regulations as part of its regulatory process. The NRC has been aggressive and innovative in expanding the scope of public and industry participation in its most significant rulemakings. For example, the NRC has conducted several public workshops and established an electronic bulletin board to facilitate participation in the rulemaking to establish radiological criteria for decommissioning. The NRC has also developed internal procedures and programs to ensure that only necessary requirements are imposed on its licensees and to review existing regulations to determine whether the requirements imposed are still necessary.

NRC

PROPOSED RULE STAGE

161. STEAM GENERATOR TUBE INTEGRITY

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 2201; 42 USC 5841

CFR Citation:

10 CFR 50

Legal Deadline:

None

Abstract:

The Nuclear Regulatory Commission (NRC) plans to develop a rule pertaining to steam generator tube integrity. The objective of the rule would be to maintain adequate assurance of steam generator tube integrity while allowing a more appropriate approach to steam generator surveillance and maintenance activities at nuclear power plants. Steam generator degradation is a significant issue affecting current pressurized water reactors.

Statement of Need:

The NRC plans to develop a rule pertaining to steam generator tube integrity (i.e., maintaining an extremely low overall probability of steam generator tube leakage that could result in core damage or exceeding allowable offsite doses). The proposed rule would allow a more flexible approach to maintaining steam generator tube integrity through a balance of preventative, inspection and repair, and mitigative measures that reflect current industry-wide operating experience. The regulatory action is intended to:

1. Improve the scope and methods for inspecting steam generator tubing;

2. Provide incentives to continue to improve inspection methods;

3. Develop plugging/repair criteria based on the most appropriate nondestructive parameters, thereby improving enforceability of the criteria and eliminating unnecessary conservatism; and

4. Reflect appropriate considerations of related systems issues.

Operating experience indicates that the current regulatory requirements need to be more stringent in some areas while in other areas they are overly conservative. To date this situation has been dealt with on a plant specific basis, when necessary. However, a generic approach to dealing with steam generator issues is necessary to effectively update inspection and repair criteria.

Summary of the Legal Basis:

The NRC is authorized to promulgate new rules. The new rule that will be developed on steam generator integrity will be in accordance with the provisions of 10 CFR Part 50.109 on backfitting.

Alternatives:

The primary alternative would be to continue with resource intensive plant-specific ad hoc licensing in the area of ensuring adequate steam generator tube integrity. Public comments provided in response to the advance notice of proposed rulemaking indicate agreement on the part of industry that rulemaking is the preferred regulatory means for addressing this issue.

Anticipated Costs and Benefits:

The regulatory action would result in a decrease in costs in some areas (e.g., steam generator tube repair costs, avoidance/delay of steam generator replacement costs), and an increase in cost in other areas (e.g., inspection costs). The regulatory action may also result in a decrease in personnel exposure. Since the proposed rule is intended to be performance based, a major benefit would be in providing a more flexible and cost-effective regulatory program pertaining to maintaining steam generator tube integrity.

Risks:

The regulatory action will result in increases in safety margins.

NRC

162. • REPORTING RELIABILITY AND AVAILABILITY INFORMATION FOR RISK-SIGNIFICANT SYSTEMS AND EQUIPMENT

Priority:

Other Significant

Legal Authority:

42 USC 2201; 42 USC 5841

CFR Citation:

10 CFR 050

Legal Deadline:

None

Abstract:

The proposed rule would amend the Nuclear Regulatory Commission's (NRCs) regulations to require that licensees for commercial nuclear power reactors report summary reliability and availability data for risk-significant systems and equipment to the NRC. The proposed rule would also require licensees to maintain onsite, and to make available for NRC inspection, records and documentation that provide the basis for the summary data reported to the NRC. This proposed rule is necessary to improve public health and safety, to reduce economic burden by focusing NRC and licensee attention on the most risk-significant issues, and to support generic and plant-specific regulatory actions. The proposed rule would substantially improve licensee implementation of the evaluation and goal setting aspects required by the maintenance rule and NRC's oversight of licensee's implementation of the maintenance rule.

Statement of Need:

The NRC plans to amend its regulations to require that licensees for commercial nuclear power reactors report summary reliability and availability data for risk-significant systems and equipment to the NRC. The NRC also plans to require licensees to maintain onsite, and to make available for NRC inspection, records and documentation that provide the basis for the summary data reported to the NRC. This action is necessary to substantially improve: (1) licensees' implementation of the NRC's maintenance rule, (2) the NRC's oversight of maintenance rule implementation, and (3) the NRC's ability to make risk-effective regulatory decisions. The NRC is authorized to promulgate new rules. This action will enhance both efficiency and protection of public health and safety.

Alternatives:

One alternative would be to continue the status-quo. Other alternatives include: (1) direct collection of data by NRC inspectors and (2) voluntary submittal of data by licensees.

Anticipated Costs and Benefits:

The regulatory action would increase costs for collection, reporting, and processing of reliability and availability data. These increased costs would be outweighed by substantial savings as a result of improving implementation and oversight of the NRC's maintenance rule and moving towards risk-based regulation and attendant regulatory relief.

Risks:

The regulatory action is expected to help reduce overall risk by improving implementation and oversight of the NRC's maintenance rule and helping to focus NRC and industry attention on the most risk-significant aspects of power plant operation.

NRC

163. • REVISION OF FEE SCHEDULES; 100% FEE RECOVERY, FY 1996

Priority:

Economically Significant

Legal Authority:

42 USC 2201; 42 USC 5841

CFR Citation:

10 CFR 170; 10 CFR 171

Legal Deadline:

Final, Statutory, September 30, 1996.

Omnibus Budget Reconciliation Act of 1990

Abstract:

This proposed rule would amend the Nuclear Regulatory Commission's (NRCs) regulations regarding the licensing, inspection, and annual fees charged to NRC licensees and applicants for an NRC license. The amendments are necessary to recover approximately 100 percent of the NRC budget authority for fiscal year 1996 less the amounts appropriated from the Nuclear Waste Fund. The Omnibus Budget Reconciliation Act of 1990 (OBRA-90) requires that the NRC accomplish the 100 percent recovery through the assessment of fees.

Statement of Need:

This rulemaking will amend the licensing, inspection, and annual fees charged to NRC licensees and applicants for an NRC license. The amendments are necessary to recover approximately 100 percent of the NRC budget authority for fiscal year 1996 less the amounts appropriated from the Nuclear Waste Fund. The Omnibus Budget Reconciliation Act of 1990 (OBRA-90) requires that the NRC accomplish the 100-percent recovery through the assessment of fees. The NRC assesses two types of fees to recover its budget authority. License and inspection fees are assessed under the authority of the Independent Offices Appropriation Act to recover the costs of providing individually identifiable services to specific applicants and licensees (10 CFR part 170). OBRA-90 requires that the NRC recover the full cost to the NRC of all identifiable regulatory service that each applicant or licensee receives. The NRC recovers generic and other regulatory costs not recovered through 10 CFR Part 170 fees through the assessment of annual fees under the authority of OBRA-90 (10 CFR Part 171). Annual fee charges are consistent with the guidance in the Conference Committee Report on OBRA-90 that the NRC assess the annual charge under the principle that licensees who require the greatest expenditure of the agency's resources should pay the greatest annual fee.

Summary of the Legal Basis:

The Omnibus Budget Reconciliation Act requires that the NRC recover approximately 100 percent of its budget authority, less the amount appropriated for the Nuclear Waste Fund, for fiscal years 1991 through 1998. The Act requires that the fees for fiscal year 1996 must be collected by September 30, 1996. Therefore, the final rule is to become effective by August 1, 1996.

Alternatives:

Because this action is mandated by statute and the fees must be assessed through rulemaking, the NRC did not consider alternatives to this action.

Anticipated Costs and Benefits:

The cost to NRC licensees is the NRC fiscal year 1996 budget authority less the amount appropriated from the Nuclear Waste Fund. The dollar amount is not yet determined but is expected to be in a range close to $503.8 million.

Risks:

Not applicable.

Abstract:

The proposed rule would amend the Commission's regulations to codify the basic principles and radiological criteria that would allow decommissioned lands and structures to be released for unrestricted public use. In the final rule entitled, "General Requirements for Decommissioning Nuclear Facilities" (June 27, 1988; 53 FR 24018), the need and urgency for guidance with respect to residual contamination criteria were expressed. At that time, it was anticipated that an interagency working group organized by the Environmental Protection Agency (EPA) would develop necessary Federal guidance. However, in the absence of significant progress by the interagency working group, the Commission has directed that the NRC expedite rulemaking because the requirements, once final, will provide licensees with an incentive to complete site decommissioning.

The proposed rule would establish basic radiological criteria for release of lands and structures. Measurables, in the form of surface and volume radioactive concentrations and site radioactivity inventory values, would be provided in supporting regulatory guidance. These combined activities should benefit the public, industry, and the NRC, providing a risk-based framework upon which decommissioning activities and license terminations can be accomplished. The framework will ensure adequate protection of public health and safety and identify residual radioactivity criteria upon which licensees can confidently develop reasonable and responsible decommissioning plans.

Statement of Need:

The Nuclear Regulatory Commission (NRC) is proposing to amend 10 CFR 20 of its regulations to provide specific radiological criteria for the decommissioning of soils and structures. The proposed criteria would apply to the decommissioning of all facilities licensed under 10 CFR Parts 30, 40, 50, 60, 61, 70, and 72, as well as other facilities subject to the Commission's jurisdiction under the Atomic Energy Act and the Energy Reorganization Act. The NRC would apply these criteria in determining the adequacy of remediation of residual radioactivity resulting from the possession or use of source, byproduct, and special nuclear material. The proposed rule is intended to provide a clear and consistent regulatory basis for determining the extent to which lands and structures must be remediated before a site can be considered decommissioned.

The NRC has developed the basis for the residual contamination levels in light of changes in basic radiation protection standards, improvements in remediation and radiation detection technologies, decommissioning experience obtained during the past 15 years, and comments received from public workshops held as part of this rulemaking effort. This rulemaking has been closely coordinated with the EPA from both a policy standpoint and for the technical underpinnings. The EPA was a key participant in the rulemaking workshops conducted for the rulemaking. EPA is preparing a parallel rulemaking. In addition, under the framework of a Memorandum of Understanding (MOU) between NRC and EPA, EPA will make a determination that the NRC rulemaking provides a sufficient level of protection for public health and safety and for the environment. This coordination will minimize the expenditure of Federal resources, provide a consistent regulatory approach for all facilities, and avoid a duplication of effort or overlapping regulations.

Summary of the Legal Basis:

This proposed rule is being developed under the authority of the Atomic Energy Act of 1954, as amended.

Alternatives:

The NRC presently allows decommissioning on a site-specific basis using existing guidance. The NRC could continue to allow decommissioning to proceed on a case-by-case basis. However, the NRC believes that codifying radiological criteria for decommissioning would provide a more effective method of and a broadly understood set of standards to be used in protecting public health and the environment at decommissioned sites.

Anticipated Costs and Benefits:

The proposed rule would establish a clear and consistent regulatory basis for determining the extent to which lands and structures must be remediated before a site can be decommissioned. The Commission believes that inclusion

of criteria in the regulations will result in more efficient and consistent licensing actions related to the numerous and frequently complex site decontamination and decommissioning activities anticipated in the future. Therefore, the proposed rule would use NRC and licensee resources more efficiently, be applied consistently to all types of licenses, create a predictable basis for decommissioning planning, and eliminate the protracted delays in decommissioning because licensees wait for generic regulatory criteria before proceeding with decommissioning of their facilities. The proposed rule would, for the most part, codify existing regulatory practice. It is not expected to result in any significant additional cost to the industry, the government, or the public. In fact, efficiencies produced by codifying and stabilizing regulatory practice in this area should result in an overall reduction in costs associated with decommissioning nuclear facilities. It is not possible to quantify the extent of these cost reductions at this time.

Risks:

This rulemaking would ensure that decommissioning will be carried out without undue impact on public and occupational health and safety and the environment. The proposed rule ensures a stable framework to accomplish decommissioning and achieves a stable level of costs for risks averted. The proposed amendments enhance the existing regulatory framework by providing a clear and consistent regulatory basis for determining the extent to which lands and structures must be remediated before a site can be decommissioned. The Commission believes that inclusion of radiological criteria in the regulations will result in more efficient and consistent licensing actions related to the numerous and frequently complex site decontamination and decommissioning activities anticipated in the future and reduce the risk to public health and the environment.

NRC

165. DESIGN CERTIFICATION FOR ADVANCED BOILING WATER REACTOR (ABWR)

Priority:

Other Significant

Legal Authority:

42 USC 2201; 42 USC 5841

CFR Citation:

10 CFR 052

Legal Deadline:

None

Abstract:

The proposed rule would revise the Nuclear Regulatory Commission's (NRCs) regulations by certifying the U.S. Advanced Boiling Water Reactor (ABWR) standard design in accordance with the requirements of Part 52. If a standard design is certified, then an applicant for a combined license that references the certified design will be assured of receiving an approval for the portion of the plant that was approved in the certification rulemaking. This amendment references the design control document (DCD) and sets forth the process for changing information in the DCD. GE Nuclear Engineering is currently preparing the DCD for ABWR design, which will contain the design information that will be certified by the rule and approved by the rule (so-called Tier 1 and 2 information). The NRC is reviewing two applications for standard design certifications for two evolutionary nuclear power plant designs pursuant to Part 52 (see "Design Certification for System 80" (RIN 3150-AF15).

Statement of Need:

The NRC has reviewed and approved two applications for design certification for evolutionary standard light-water reactor designs under the Commission's regulations in 10 CFR 52. The applicants for these design certifications are GE Nuclear Energy and Asea Brown Boveri-Combustion Engineering for the ABWR and System 80+ standard designs. The NRC has published two proposed rules which when published as final rules will provide design certification for these two designs by referencing the design information in separate appendices to Part 52. The Commission's certification of approved standard designs is necessary to provide for the early resolution of licensing issues and a more predictable licensing process. Ideally, a future applicant will reference a certified design in an application for a combined license to construct and operate a nuclear power plant. Design certification by rulemaking is accomplished pursuant to Commission regulations set out in 10 CFR 52 under the authority of the Atomic Energy Act of 1954, as amended. The Energy Policy Act of 1992, signed into law on October 24, 1992, largely codifies the Commission's regulations in 10 CFR 52. The Commission believes that standardization of plant designs will enhance the safety and reliability of future nuclear power plants while requiring fewer resources in their safety reviews.

Alternatives:

The Commission's regulations in 10 CFR part 52, subpart B, provide for design certification of standard nuclear power plant designs through rulemaking. Design certification is a procedural mechanism to effect the early resolution of licensing issues and encourage the use of standardized designs. These regulations were promulgated, in part, to provide a stable and predictable process for the licensing of future nuclear power plants. There is no alternative to rulemaking for the certification of a particular design.

Anticipated Costs and Benefits:

It may not be possible to quantify the costs and benefits of these rulemakings. Much depends on the extent to which the industry pursues standardization. However, if the industry finds in its interest to proceed with the development of nuclear power, there is every reason to expect that the safety and economic benefits of standardization will far outweigh the up-front costs of design and Commission certification.

Risks:

The standards used in the review of design certification applications are, in general, the same standards in effect for current nuclear power plants. However, standardization of plant designs will enhance the safety and reliability of future nuclear power plants while requiring fewer resources in their safety reviews.

Semiannual Regulatory Agenda, October 1995

AGENCY: Office of the Secretary, USDA.

ACTION: Semiannual regulatory agenda.

SUMMARY: This agenda provides summary descriptions of significant and not-significant regulations being developed in agencies of the U.S. Department of Agriculture (USDA) in conformance with Executive Order 12866 "Regulatory Planning and Review." The agenda also describes regulations affecting small entities as required by section 602 of the Regulatory Flexibility Act, Public Law 96-354.

USDA has attempted to list all regulations and regulatory reviews pending at the time of publication except for minor and routine or repetitive actions, but some may have been inadvertently missed. There is no legal significance to the omission of an item from this listing. Also, the dates shown for the steps of each action are estimated and are not commitments to act on or by the date shown.

FOR FURTHER INFORMATION CONTACT: For further information on any specific entry shown in this agenda, please contact the person listed for that action. Requests for copies of the agenda should include a self-addressed, stamped envelope and be directed to: Regulatory Agenda, OBPA, Office of the Secretary, Room 118-E, Jamie Whitten Building, U.S. Department of Agriculture, Washington, DC 20250, (202) 720-1272.

SUPPLEMENTARY INFORMATION: For this edition of USDA's regulatory agenda, the most important significant regulatory actions are included in The Regulatory Plan, which appears in Part II of this issue of the **Federal Register**. The Regulatory Plan entries are listed in the Table of Contents below and are denoted by a bracketed bold reference, which directs the reader to the appropriate Sequence Number in Part II.

Dated: October 6, 1995.

Marvin J. Shapiro,

Chief, Legislative, Regulatory, and Automated Systems Division.

Proposed Rule Stage

167. STANDARDS FOR PRODUCTS PRODUCED FOLLOWING ORGANIC PRODUCTION, PROCESSING AND HANDLING METHODS

Priority: Other Significant

Legal Authority: PL 101-624, sec 2101 to 2123; 7 USC 6501 to 6522

CFR Citation: None

Legal Deadline: NPRM, Statutory, May 28, 1992. Final, Statutory, October 1, 1993. Other, Statutory, May 28, 1991. The Organic Foods Production Act calls for the Secretary to appoint the National Organic Standards Board 180 days after enactment and convene it within 60 days thereafter.

Abstract: The Organic Foods Production Act of 1990 (OFPA) states that the Secretary shall establish an organic certification program for producers and handlers of agricultural products that have been produced using organic methods. The OFPA provides for three proposed actions by the Department of Agriculture: (a) the accreditation of State and private certifying agents for the Secretary, which includes provision for the collection of reasonable fees from producers, certifying agents, and handlers who participate in the program; (b) the establishment of a national list of natural substances prohibited, and synthetic substances allowed in organic production and handling; and (c) the development of national standards and procedures to be used in organic production, processing and handling, with the requirement that any product labeled as organically produced will have to be certified once the program is implemented (except for producers with less than $5,000 gross sales). The OFPA also calls for establishment of a National Organic Standards Board (NOSB), notices of meetings, and notices of hearings for standards for livestock products.

180. AMENDMENTS TO CCC DEBT SETTLEMENT REGULATIONS REGARDING WAIVER OF RESTRICTION ON PROGRAM ELIGIBILITY AND COLLECTION OF JUDGMENTS BY ADMINISTRATIVE OFFSET

Priority: Other Significant

Legal Authority: 28 USC 3201; 15 USC 714b; 15 USC 714c

CFR Citation: None

Legal Deadline: None

Abstract: This action is needed to allow for the waiver of restrictions on program eligibility, as authorized by the Federal Debt Collection Procedures Act of 1990 (the Act), and to facilitate the collection of judgements by administrative offset. The Act provides that debtors who have judgement liens against their property for a debt owed to the United States are not eligible to receive grants or loans made by the United States until the debt is paid in full or otherwise satisfied. However, the Act also permits agencies to waive this restriction. In addition, the Commodity Credit Corporation is authorized to collect debts for other Federal agencies by administrative offset upon receipt of (1) a qualified offset request, (2) a Notice of Levy, or (3) a request or approval by the Department of Justice. This action would authorize ASCS to collect judgements in favor of the United States by administrative offset. This action will result in increased collection of debts owed to the Government.

181. • END-USE CERTIFICATE PROGRAM—PROVIDING NOTIFICATION OF ORIGIN TO BUYERS

Priority: Other Significant

Legal Authority: 19 USC 3391(f)

CFR Citation: 07 CFR 782

Legal Deadline: None

Abstract: This action will amend the regulations for end-use certificates for wheat imported from Canada to incorporate language that will require importers to immediately advise subsequent buyers that the wheat being purchased originated in Canada and must be stored separately from U.S.-origin wheat until the wheat is loaded onto a conveyance for direct delivery to an end-user or foreign country. This is necessary to prevent the resale of such grain before the end user, exporter, or subsequent buyer is informed of its origin. This lack of notification has resulted in Canadian wheat being resold before the buyer was informed that it was of Canadian origin and thus subject to these regulations. There will be no cost to the Government.

182. IMPLEMENTATION PROCEDURES FOR HIGHLY ERODIBLE LAND AND WETLANDS CONSERVATION PROVISIONS OF THE FOOD SECURITY ACT

Priority: Other Significant

Legal Authority: PL 101-624; PL 99-198

CFR Citation: 7 CFR 1940

Legal Deadline: None

Abstract: Subtitle B and subtitle C of title XII of the Food Security Act of 1985, Public Law 99-198, established requirements for the conservation of Wetlands and Highly Erodible Lands. These requirements were subsequently amended by the Food Agriculture Conservation and Trade Act of 1990, Public Law 101-624. The amendments, among other changes, would allow in some cases for graduated payment reductions rather than a complete loss of USDA program benefits to producers who contribute to excess soil erosion or wetlands conversion. Rural Housing and Community Development Service, Rural Business and Community Development Service, Rural Utilities Service and Consolidate Farm Service Agency proposes to revise existing regulations to reflect the amendments required by Public Law 101-624. In addition, the regulation will be reorganized and supplemented to improve understanding and ease of implementation.

184. • AMENDMENT TO THE TOBACCO REGULATIONS REGARDING NESTED TOBACCO

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1445

CFR Citation: 07 CFR 1464.7(b)(1)

Legal Deadline: None

Abstract: "Nested" tobacco is lower-grade tobacco included in a quantity of higher-grade tobacco that is delivered for price support at the higher grade. The current regulations provide that a producer is ineligible if the producer "knowingly" delivered nested tobacco. This action will remove the word "knowingly" from the regulations because it is very difficult to enforce, and will expand County Committees' authority to make determinations regarding refunds and/or penalties that producers might be subject to if nested tobacco is found in the marketings from a farm.

185. • NATIONAL AVERAGE LOAN RATES FOR 1996-CROP QUOTA AND ADDITIONAL PEANUTS AND MINIMUM COMMODITY CREDIT CORPORATION (CCC) EXPORT- EDIBLE SALES PRICE FOR ADDITIONAL PEANUTS

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1445c-3

CFR Citation: 07 CFR 1421; 07 CFR 1446

Legal Deadline: Final, Statutory, February 15, 1996.
for price support levels only

Abstract: This action is needed to implement the peanut price support program, as required by statute. The price support levels provide a domestic price floor for quota and additional peanuts. The price support level for quota peanuts is set by statutory formula to be equal to last year's level plus any increase in production costs, but may increase by no more than 5 percent above the previous year. The support level for additional peanuts must be set at a level that ensures that CCC incurs no losses from the price support program. The minimum export-edible sales price is set at the Secretary's discretion, and has been set at $400 per ton for each of the previous 8 years. The Peanut Program, which also includes the poundage quota program, will result in a net realized loss of about $87 million.

186. • 1996-CROP PEANUTS NATIONAL POUNDAGE QUOTA

Priority: Other Significant

Legal Authority: 7 USC 1358-1

CFR Citation: 07 CFR 729

Legal Deadline: Final, Statutory, December 15, 1995.

USDA—CFSA

Proposed Rule Stage

Abstract: The objective of the peanut quota is to balance supply with demand at a level that will assure stable supplies for domestic use and assure producers a stable income. This action is required by statute, which provides a formula for computing the national quota, based on the Secretary's estimate of the amount of peanuts required for domestic food, seed, and related uses for the 1996 marketing year, and may not be less than 1.35 million tons. The 1996 marketing year is from August 1, 1996 through July 31, 1997. The Peanut Program, which also includes the price support program and export policies, will result in a net realized loss of about $87 million.

Final Rule Stage

187. AMENDMENT TO THE HIGHLY ERODIBLE LAND AND WETLANDS CONSERVATION PROGRAM REGULATIONS—PERSON DETERMINATIONS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will eliminate existing text in the CFR.

Legal Authority: 16 USC 3801; 16 USC 3811; 16 USC 3812; 16 USC 3821-23; The Food Security Act of 1985, sec 1201, as amended

CFR Citation: 7 CFR 12

Legal Deadline: None

Abstract: The objective of this action is to set a standard for a more consistent "person" determination by using an attribution method for determining benefits that shall be denied persons who are associated with the actual violators of the highly erodible land (HEL) and wetland conservation provisions. The current affiliated person rule for HEL and wetlands is difficult to administer because a strict interpretation of the rules could result in a chain of affiliated persons, all of whom would be ineligible for USDA benefits, when in fact many of the affiliated persons did not play a part in the violation. This action will provide a more equitable and understandable method for imposing sanctions on conservation compliance violations. No costs are expected as a result of this action.

188. AMENDMENTS TO THE WETLANDS REGULATIONS REGARDING ABANDONED ACREAGE AND DRAINAGE BY DRAINAGE DISTRICTS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 16 USC 3801; 16 USC 3821-23

CFR Citation: 7 CFR 12

Legal Deadline: None

Abstract: This action is necessary to enhance the flexibility of wetlands regulations for producers without imposing any significant cost on the Government or decreasing protection of wetlands. The determinations are 1) Allow any area used for production of any crop or for long term rotation to not be considered an "abandoned" wetland, and 2) allow areas drained by a drainage district to be planted to forage crops and harvested by mechanical means. The "abandonment" determination will remove an incentive to keep land in intensive production. The drainage determination will allow production on a small number of acres that otherwise would not likely be farmed. The total acreage involved will likely be less than 50,000 acres, and no impacts on prices are expected. Producers' income could increase by up to $2.5 million per year by the end of ten years through increased efficiency. No cost to Government is expected.

189. FARMER PROGRAMS GUARANTEED INTEREST ASSISTANCE PROGRAM

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1980 subpart A; 7 CFR 1980 subpart B; 7 CFR 1980 subpart D; 7 CFR 1980 subpart E; 7 CFR 1980 subpart G

Legal Deadline: None

Abstract: This regulation will provide for a government subsidy to lenders for interest rates for guaranteed Farmer Programs loans so the borrower will be paying interest rates for guaranteed loans that are similar to insured loans. This should provide an incentive for using the guaranteed loan program. The potential cost to the Government will be reduced as the Government will only pay a lender up to 90 percent of the losses on loans and only part of the interest rate rather than loaning a borrower the full amount of the loan and paying an investor the full cost of the Government borrowing the money for an insured loan. The benefit is that the borrower will be paying an interest rate for guaranteed loans that is comparable to that for insured loans.

Legal Deadline: None

Abstract: Provisions of the Food, Agriculture, Conservation and Trade Act of 1990, as they affect the Farmers Home Administration's Farmer Programs, plus relevant provisions of the Omnibus Budget Reconciliation Act of 1990. In addition, the Agricultural Credit Act of 1992 provided that in extraordinary circumstances, the State Director could extend the 60-day time period for submitting an application for Farmer Programs Loan Servicing (RIN 0575-AB42, published as an interim rule, March 23, 1993, 58 FR 15417). RIN 0575-AB42 will be combined into RIN 0575-AA91; and one final rule will be published.

193. IMPLEMENTATION OF CERTIFIED LENDER PROGRAM

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1987; 42 USC 1480; 5 USC 301; PL 102-554

CFR Citation: 7 CFR 1980 subpart A; 7 CFR 1980 subpart B

Legal Deadline: Final, Statutory, October 1, 1993. Other, Statutory, April 28, 1993.
Sec 23 of Pub. L. 102-554, requires that interim regulations be published by April 28, 1993, and final regulations published by October 1, 1993.

Abstract: Lenders participating in the Guaranteed Loan Program have cited the excessive amount of paperwork and time required to apply for and receive approval on guaranteed loans as a deterrent to participation in the program. The Agency assembled a Guaranteed Overview Task Force to identify specific forms and regulations that could be eliminated or revised without increasing the risk to the Government. Fewer forms and a streamlined process will reduce operating costs for both the Consolidated Farm Service Agency and lenders. Regulations were being drafted when a law was passed requiring a Certified Lender Program, along with a simplified application process for guaranteed loans of $50,000 or less.

Timetable:

Action	Date	FR Cite
Interim Final Rule	06/24/93	58 FR 34302
Final Action	10/00/95

195. REMOVAL OF THE PROHIBITION AGAINST CHARGING INTEREST ON INTEREST ON GUARANTEED LOANS

Priority: Other Significant

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1980 subpart A; 7 CFR 1980 subpart B

Legal Deadline: None

Abstract: Lenders participating in the Guaranteed Loan Program have been reluctant to restructure the loans of delinquent guaranteed borrowers because of restrictive regulatory requirements. The Consolidated Farm Service Agency (CFSA) requires lenders to set aside the accrued interest portion of loans that are being restructured. Interest is only accrued on the outstanding principal. This practice is contrary to standard industry practice. Lenders normally capitalize the outstanding interest portion of the loan and reschedule or reamortize the payments based on the new principal amount. CFSA's restriction on capitalizing interest reduces the lender's return on the guaranteed loans. Also, the unique treatment of guaranteed loans requires additional bookkeeping efforts. There will be no substantial additional cost or savings with this change.

197. DISASTER ASSISTANCE

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1989; 5 USC 301; 42 USC 1980

CFR Citation: 7 CFR 1945 subpart A

Legal Deadline: None

Abstract: This action will amend the regulations to improve and expedite the disaster designation process that will make emergency loan (EM) assistance available in a more expeditious manner in declared/designated disaster areas to assist family farmers whose operations have sustained qualifying losses as a result of a major or natural disaster, and who wish to apply for such loan assistance. The regulation would also continue to be out of date with the current policy of basing countywide production losses on a major single enterprise only, in lieu of requiring a determination of countywide production losses in all crops. To change the regulation will bring the designation process in line with the current policy of eliminating the requirement for determining a 30 percent countywide reduction in the normal year's dollar value of all crops in a county(ies). This action will update and improve the process of current policy if there is a 30 percent or greater countywide reduction in the normal year's dollar value of a single enterprise (single crop), which is considered a major enterprise or crop in the county, or a determination that extenuating circumstances exist and warrant a designation under the Secretary of Agriculture's discretionary authority. This change will permit CFSA to automatically gather information for consideration of the Secretary's discretionary authority, and allow the Secretary to expeditiously designate the affected counties and make EM loans available to eligible family farmers.

198. • AMENDMENT TO CONSERVATION PROGRAM FIELD REGULATIONS REGARDING JURISDICTION

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 6932

CFR Citation: 07 CFR 780

Legal Deadline: None

Abstract: The Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994 (the Act) change the appeals procedures applicable to producers affected by Natural Resources Conservation Service (NRCS) determinations on the conservation programs authorized by Title XII of the Food Security Act of 1985. The Act provides that CFSA shall have initial jurisdiction over administrative appeals resulting from an adverse determination, including those involving technical determinations by NRCS. Producers will no longer appeal separately to NRCS. The Act requires CFSA to issue a rule with the concurrence of NRCS establishing procedures for review by NRCS of the technical determinations involved. Technical criteria used by NRCS shall be used by CFSA as the basis for any decisions regarding technical determinations. If no review is requested, NRCS technical determinations shall be the technical basis for decisions rendered by county or area committees. No additional cost to USDA. Producers may save some money by being able to avoid the costs of separate appeals.

202. • 1996-CROP MARKETING QUOTAS AND PRICE SUPPORT LEVELS FOR SIX KINDS OF TOBACCO

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1312

CFR Citation: 07 CFR 723; 07 CFR 1464

Legal Deadline: Final, Statutory, March 1, 1996.
for marketing quotas.

Abstract: Marketing quotas/acreage allotments and price support are required by statute for these types of tobacco: fire-cured (Type 21), fire-cured (types 22-23), dark air-cured (types 35-36), Virginia sun-cured (type 37), cigar filler (type 46) and cigar filler and binder (types 42-44 and 53-55). Quotas and allotments are determined by statutory formula to balance supply with demand to assure stable supplies for domestic and export use. Marketing quotas are implemented if approved by producers in referenda. Producers approved quotas for the 1996 crops of fire-cured (types 21-23), dark air-cured (types 35-36), and sun-cured (type 37) in March, 1994 and March, 1995. Referenda for the other types are scheduled for March, 1996. Producers of these types have historically voted in favor of quotas. Price support levels are set by statutory formula. The Secretary may reduce the level at the request of producer associations, and may limit increases to 65 percent of the formula increase. Gross loan outlays of $3 million in FY 1997 will be offset by loan redemptions and no-net-cost assessments in FY 1997 and subsequent years for a net cost of 0.

203. • 1996-CROP MARKETING QUOTA AND PRICE SUPPORT LEVEL FOR BURLEY TOBACCO

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1314; 7 USC 1445

CFR Citation: 07 CFR 723; 07 CFR 1464

USDA—CFSA

Final Rule Stage

Legal Deadline: Final, Statutory, February 1, 1996.
for marketing quotas.

Abstract: The burley tobacco marketing quota and price support are required by statute. Their purpose is to balance supply with demand at levels assuring stable supplies for domestic and export use at prices considered sufficient for producers. The national quota is based on cigarette manufacturers' intentions, 3-year average exports, loan stocks adjustment, and a discretionary adjustment of plus or minus 3 percent. The quota may not be less than 90 percent of the previous year's quota except the limit may be waived if producer association inventories will likely exceed 150 percent of the reserve stock level. The price support level is based on a formula that averages market prices (2/3 weight) and a cost index (1/3 weight), plus discretion to limit any increase to 65 percent of the formula increase. Marketing quotas were approved by producers in a referendum in February, 1995. Gross loan outlays of $40 million in FY 1997 will be offset by loan repayments and no-net-cost assessments in Fy 1997 and subsequent years for a net cost of 0.

232. • AMENDMENT TO TOBACCO MARKETING QUOTA REGULATIONS REGARDING THE EFFECTIVE DATE FOR THE DOMESTIC MARKETING ASSESSMENT

Priority: Other Significant

Legal Authority: PL 103-465

CFR Citation: 07 CFR 723

Legal Deadline: None

Abstract: The Uruguay Round Agreements Act (the Act) provides that the tobacco Domestic Marketing Assessment shall be effective only for Calendar Year 1994, beginning on the effective date of the Presidential proclamation, authorized under section 421 of the Act, establishing a tariff-rate quota pursuant to Article XXVIII of the GATT 1947 or the GATT 1994 with respect to tobacco. This action will amend the regulations to provide the new effective date, conditional on the Presidential proclamation. No Government outlay is expected.

233. • EXTENSION OF MATURING 1994 AND SUBSEQUENT CROP YEAR WHEAT AND FEED GRAIN PRICE SUPPORT LOANS

Priority: Other Significant

Legal Authority: 7 USC 1421 et seq

CFR Citation: 07 CFR 1421

Legal Deadline: None

Abstract: This action is needed to amend the price support provisions to allow producers with maturing wheat, corn, grain sorghum, barley, oat, and rye loans to extend such loans beyond the specified maturity date, whenever conditions, as determined by the Secretary, warrant loan extensions. No direct outlays are expected.

234. • TECHNICAL CORRECTIONS TO WHEAT, FEED GRAIN, COTTON, AND RICE PROGRAM REGULATIONS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1421 et seq

CFR Citation: 07 CFR 718; 07 CFR 1413; 07 CFR 1414; 07 CFR 1415; 07 CFR 1416

Legal Deadline: None

Abstract: This action will amend the regulations as follows: 1) Set forth policy changes for acreage measurement and tolerance. Producers will not be required to destroy excess acreage except when the measured acreage exceeds tolerance. Tolerance on crops and land uses with measurement service after planting, and administrative variance will no longer apply. 2) Add one county each in Kansas and North Dakota and three counties each in Nebraska and Ohio as eligible to participate in the Options Pilot Program. 3) Revise the Voluntary Production Limitation Program regulations to provide that the sum of the planted acreage for all enrolled wheat and feed grains shall not exceed the sum of the enrolled wheat and feed grain Crop Acreage Bases (CAB's) on the farm plus any decrease in the Acreage Conservation Reserve (ACR) requirement for the same crop's CAB under the 1995 Acreage Reduction Program (ARP). The base for comparison shall be the ACR requirement for the same program crop's CAB for the 1994 ARP. 4) Clarify certain provisions in the regulations. The cost to Government will be insignificant.

235. • AMENDMENTS TO THE DISASTER PAYMENT PROGRAM REGULATIONS FOR 1990 AND SUBSEQUENT CROPS

Priority: Economically Significant

Legal Authority: 7 USC 142 (note); PL 103-75; PL 103-230; PL 103-211

CFR Citation: 07 CFR 1477

Legal Deadline: None

Abstract: This action will amend the regulations to provide: 1) Disaster payments for 1993, 1994, and 1995 papaya that would have been harvested if the papaya plants had not been destroyed by Hurricanes Andrew or Iniki, or Typhoon Omar; 2) Disaster payments for 1993 losses of trees, shrubs, and nursery crops; 3) Regulations for the 1994 Disaster Program, covering losses resulting from natural disaster for the 1994 crop year provisions for 1993 crop losses will be updated to apply to apply to 1994 disaster losses; 4) Technical changes required by Departmental reorganization; 5) Disaster relief for aquaculture losses, except ornamental fish (as defined); 6) County committee consideration of harvesting expenses for program and nonprogram crops; 7) Disaster payments for 1994 through 1996 orchard crop losses due to freezing conditions from January 1, 1994 through March 31, 1994 if FCIC insurance was not available for affected producers. Expected cost to the Government will be from $750 million to $1 billion.

236. • PERMIT CFSA TO SELL OR ASSIGN FARM LOAN MORTGAGES AND NOTES

Priority: Economically Significant

Legal Authority: 7 USC 1989

CFR Citation: 07 CFR 1962; 07 CFR 1965

Legal Deadline: None

Abstract: The CFSA is proposing to amend its regulations to establish a procedure for the sale and assignment of farmer program notes and mortgages. This will assist the Agency in resolving loan accounts with greater dispatch and less loss to the Government. Borrowers can benefit by receiving more generous repayment terms from the purchaser/assignee than the Agency is authorized to provide.

270. • 1995-1996 MARKETING YEAR PENALTY RATES FOR ALL KINDS OF TOBACCO SUBJECT TO QUOTAS

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1314

CFR Citation: None

Legal Deadline: None

Abstract: This notice announces the penalty rates for all kinds of tobacco for the 1995-96 marketing year. Legislation provides that the penalty shall be 75 percent of the previous year's average marketing price. Tobacco producers, operators, and dealers need to be informed of the penalty rate prior to the beginning of the marketing year. The penalty acts as a deterrent for violators of tobacco program regulations.

272. IMPORTATION OF FRUITS AND VEGETABLES

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 150dd; 7 USC 150ee; 7 USC 150ff; 7 USC 151 to 167; 7 USC 450; 21 USC 136; 21 USC 136a

CFR Citation: 7 CFR 319.56

Legal Deadline: None

Abstract: The Department regulates the importation of fruits and vegetables into the United States to prevent the introduction of plant pests, including insects and diseases. A review of the Department's fruits and vegetables import regulations indicates the need for a complete revision to make the regulations more effective and to increase compliance with them.

273. CYCLICAL REVIEW OF 9 CFR PART 92, PHASE II

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1622; 19 USC 1306; 21 USC 102 to 105; 21 USC 111; 21 USC 114a; 21 USC 134a to 134d; 21 USC 134f; 21 USC 135; 21 USC 136; 21 USC 136a; 31 USC 9701

CFR Citation: 9 CFR 92

Legal Deadline: None

Abstract: The Department is reviewing the regulations in 9 CFR part 92, which, among other things, govern the importation into the United States of certain animals and poultry, and certain animal and poultry products. This is in compliance with Executive Order 12866 and Departmental Regulation 1512-1, which requires agencies to periodically review regulations.

The Department is conducting this Cyclical Review in phases. Phase I, effective August 2, 1990, reorganized the regulations. The Department is now starting Phase II. Subpart F (Dogs) of 9 CFR Part 92 has been reviewed and a notice of proposed rulemaking will be published. Reviews of the other subparts will follow. If the Department determines those regulations should be changed, notices of proposed rulemaking will be published.

274. ADDITION OF CERVIDAE TO THE REGULATIONS CONCERNING TUBERCULOSIS IN LIVESTOCK

Priority: Substantive, Nonsignificant

Legal Authority: 21 USC 105; 21 USC 111 to 113; 21 USC 114; 21 USC 114a; 21 USC 115 to 117; 21 USC 120 to 121; 21 USC 134b; 21 USC 134f

CFR Citation: 9 CFR 77; 9 CFR 91

Legal Deadline: None

Abstract: Bovine tuberculosis is a contagious, infectious, and communicable disease affecting cattle, bison, and other species, including humans. The spread of bovine tuberculosis in the United States could have serious consequences for the United States cattle and bison industries, as well as for human health. Currently, the regulations concerning control and eradication programs for bovine tuberculosis in livestock only regulate cattle, bison, and swine. Recent outbreaks in the United States of bovine tuberculosis in semi-domesticated herds of cervidae (such as deer and elk) have made apparent the need to also regulate these animals in order to prevent the spread of bovine tuberculosis.

275. ADVANCE NOTICE OF PROPOSED REVISION OF THE FEDERAL SEED ACT REGULATIONS FOR IMPORTED SEED

Priority: Substantive, Nonsignificant

Reinvegting Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1581 to 1611

CFR Citation: 7 CFR 201

Legal Deadline: None

Abstract: On October 1, 1982, the Agricultural Marketing Service transferred to the Animal and Plant Health Inspection Service responsibility for administering Title III of the Federal Seed Act (FSA), which pertains to regulation of foreign commerce in seeds. Shortly afterwards, in 1983, the FSA was amended and the inspection requirements for imported seeds were considerably lessened. However, regulations under the FSA (7 CFR 201.101 to 201.230) have not been revised to reflect either the 1982 transfer of regulatory authority or the 1983 statutory amendments. Therefore, we are considering revising FSA regulations to reflect these changes. We are also considering revising FSA regulations to update or delete obsolete sections, including taxonomies of listed weeds, and simplifying inspection requirements for seed imports from Canada. We will solicit comments from the public on the current regulations and any current revisions. We have already amended the FSA regulations to update the list of prohibited weed seeds to include the seeds of all listed Federal noxious weeds. The remaining planned revisions and updates will follow.

276. DEFINITION OF "BIOLOGICAL PRODUCTS" AND "GUIDELINES"

Priority: Other Significant

Legal Authority: 21 USC 151 to 159

CFR Citation: 9 CFR 101

Legal Deadline: None

Abstract: The proposed rule would update the definitions of "biological products" and "guidelines" to reflect current usage. The definition of biological products has not been amended since 1973. APHIS has received a citizen's petition from producers of veterinary biological products to update this definition to accommodate advances in scientific knowledge and to reflect current usage. Similarly, a definition of guidelines is necessary to describe the purpose of such documents as veterinary biologics memoranda, licensing considerations, and notices.

The proposal would provide guidance to producers who are making a choice to seek regulatory approval from the Food and Drug Administration for a product intended for use as an animal drug (e.g. antibiotics, hormones, feed supplements, etc.) or from APHIS for a product intended for use as a veterinary biological product (e.g. vaccines, adjuvants, immunomodulators, and diagnostics). Submission to the appropriate Federal agency would depend upon the intended use of the product for which regulatory approval is sought.

277. USER FEES, VETERINARY DIAGNOSTICS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or

USDA—APHIS — **Proposed Rule Stage**

duplication, or streamline requirements.

Legal Authority: 7 USC 1622; 19 USC 1306; 21 USC 102 to 105; 21 USC 111; 21 USC 114; 21 USC 114a; 21 USC 134a to 134d; 21 USC 134f; 21 USC 135; 21 USC 136; 21 USC 136a

CFR Citation: 9 CFR 130

Legal Deadline: None

Abstract: The Animal and Plant Health Inspection Service (APHIS) is proposing to revise current fees for cost increases or decreases in the user fee program and to propose additional fees for goods and services which APHIS provides. The purpose is to more accurately provide for full-cost recovery of Agency activities. Fees being revised include: user fees at APHIS's animal import centers and user fees at the National Veterinary Services Laboratories (NVSL) (including the labs at the Foreign Animal Diseases Diagnostic Laboratory (FADDL)) to account for cost increases and decreases. Fees being proposed include: user fees at APHIS's animal import center and user fees for hourly services, for tests and reagents which currently do not have user fees and for other miscellaneous goods and services at NVSL and FADDL.

278. IMPORTATION OF ANIMALS AND ANIMAL PRODUCTS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 147a; 7 USC 150ee; 7 USC 161 to 162; 7 USC 450; 7 USC 1622; 19 USC 1306; 21 USC 102 to 105; 21 USC 111; 21 USC 114a; 21 USC 134a to 134d; 21 USC 134f; 21 USC 135; 21 USC 136; 21 USC 136a; 31 USC 9701; ...

CFR Citation: 9 CFR 92; 9 CFR 93; 9 CFR 94; 9 CFR 95; 9 CFR 96; 9 CFR 98

Legal Deadline: None

Abstract: APHIS would amend the animal and animal product importation regulations that currently identify entire countries as those that are either free of certain diseases or those in which the diseases exist. The proposed change would allow for regionalization of countries--i.e., disease classification of parts of a country, an entire country, or groups of countries. The rule change would also recognize levels of disease risk in regions. Although APHIS anticipates expanding these proposed provisions to apply to the importation of all regulated animals and animal products, at this time the rule changes would apply to ruminants and swine, and their products.

279. • GENETICALLY ENGINEERED ORGANISMS; SIMPLIFICATION OF REQUIREMENTS AND PROCEDURES

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 150aa to 150jj; 7 USC 151 to 167; 7 USC 1622n

CFR Citation: 7 CFR 340

Legal Deadline: None

Abstract: The introduction of regulated articles is required to be conducted under permit or under notification procedures acknowledged by APHIS. The latter procedures require that the regulated article meet certain eligibility criteria and performance standards. Field data reports are required to be submitted to APHIS after completion of a field test. The effect would be to simplify procedures for the introduction of certain genetically engineered organisms, requirements for certain determinations of nonregulated status, and procedures for the reporting of field tests under notification. It would allow most genetically engineered plants that are considered regulated articles to be introducted under notification procedures.

280. EXOTIC NEWCASTLE DISEASE IN ALL BIRDS AND POULTRY; PSITTACOSIS AND ORNITHOSIS IN POULTRY

Priority: Other Significant

Legal Authority: 21 USC 111 to 113; 21 USC 115; 21 USC 117; 21 USC 120; 21 USC 123 to 126; 21 USC 134a; 21 USC 134b; 21 USC 134f

CFR Citation: 9 CFR 82

Legal Deadline: None

Abstract: Exotic Newcastle Disease (also known as viscerotropic velogenic Newcastle disease and as VVND) and psittacosis or ornithosis (now generally referred to as chlamydiosis) are communicable diseases of birds and poultry. The spread of these diseases in the United States could have serious consequences for the United States poultry industry. A review of the Department's regulations to prevent the interstate spread of these diseases indicates the need for a complete revision to make the regulations more effective and to increase compliance with them.

281. EXPORT CERTIFICATION

Priority: Routine and Frequent

Legal Authority: 7 USC 147a; 7 USC 2260; 21 USC 136; 21 USC 136a; 49 USC 1741

CFR Citation: 7 CFR 353; 7 CFR 354

Legal Deadline: None

Abstract: The Department is proposing to revise the "Phytosanitary Export Certification" regulations, which concern inspection and certification of plants and plant products offered for export. The proposed rule would facilitate the phytosanitary certification of American agricultural products by ensuring that a sufficient number of qualified individuals are available to carry out Federal certification activities and by implementing new certification systems in conjunction with existing phytosanitary certification. Revising the regulations would make them easier to understand, thereby increasing compliance and the effectiveness of the regulations.

282. ANIMAL WELFARE—STANDARDS FOR MARINE MAMMALS

Priority: Other Significant

Legal Authority: 7 USC 2131 to 2159

CFR Citation: 9 CFR 3

Legal Deadline: None

Abstract: The Department regulates the treatment of certain marine mammals under the Animal Welfare Act. The present standards for treatment of these animals have been in effect for over 10 years. During this time, advances have been made and new information has been developed with regard to the housing and care of marine mammals. The Department has given notice of its review of the present standards to determine what revisions or additions might be necessary, and has requested comments on appropriate specific standards for treatment of marine mammals. The Department is conducting negotiated rulemaking and developing proposed changes to the regulations.

283. USER FEES—COMMERCIAL AIRCRAFT AND VESSELS; PHYTOSANITARY CERTIFICATES

Priority: Other Significant

Legal Authority: 7 USC 2260; 21 USC 136 to 136a; 49 USC 1741

CFR Citation: 7 CFR 354.3

Legal Deadline: None

Abstract: APHIS is amending the user fee regulations by lowering the fees charged for certain agricultural quarantine and inspection services we provide in connection with the arrival of international commercial aircraft at ports in the customs territory of the United States. APHIS would also amend the user fee regulations by raising the fees charged for export certification of plants and plant products. We have determined, based on a review of our user fees, that the fees must be adjusted to reflect the actual cost of providing these services. In addition, we are amending the user fee regulations to clarify the exemption for certain vessels which sail only between the United States and Canada.

298. SMALL BUSINESS INNOVATION RESEARCH PROGRAM ADMINISTRATIVE PROVISIONS

Priority: Substantive, Nonsignificant

Legal Authority: 15 USC 638

CFR Citation: 7 CFR 3403

Legal Deadline: None

Abstract: We propose to amend the Administrative Provisions of the Small Business Innovation Research (SBIR) Program to incorporate compliance with the National Environmental Policy Act (NEPA) and changes to conform with the January 1993 issue of the SBIR Policy Directive. These changes include rewording and/or adding additional wording to further explain existing definitions and new requirements as well as the inclusion of new definitions and new requirements including the Documentation of Multiple Phase II awards. We propose to publish the SBIR Administrative Provisions as one document. This would be a practical and economical way to serve the public as well as offer one updated reference document for easy access.

304. COMMUNITY PROGRAMS GUARANTEED LOANS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1980 subpart I

Legal Deadline: None

Abstract: To amend subject regulation which will provide more comprehensive guidance to applicants, landers, and agency staff regarding financial assistance for essential guaranteed community facilities loans. Justification: These regulatory changes are necessary to streamline and reduce the burden on the public. These changes will also expand the use of the Community Facilities (CF) guarantee program by providing the ability to guarantee tax- exempt loans, permitting investment bankers to be lenders, and (in general) make the program more accessible to rural lenders. Finally, these changes will reflect our new Agency structure under USDA's reorganization.

305. PLANNING AND PERFORMING CONSTRUCTION AND OTHER DEVELOPMENT AND RELATED CONSTRUCTION SEISMIC SAFETY

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 7701 et seq; PL 95-124; EO 12699

CFR Citation: 7 CFR 1924 subpart A; 7 CFR 1942 subpart A; 7 CFR 1942 subpart C; 7 CFR 1948 subpart C; 7 CFR 1980 subpart E; 7 CFR 1980 subpart G; 7 CFR 1944

Legal Deadline: Final, Statutory, September 15, 1994. Other, Statutory, February 28, 1995.
Executive Order 12699 requires agencies to plan and initiate by February 1, 1993, measures to assure appropriate consideration of Seismic Safety.

Abstract: The Earthquake Hazards Reduction Act of 1977 (PL 95-124, 42 USC 7701 et seq) was passed to reduce the risk of personal injury and property damage from earthquakes through the establishment and maintenance of an effective earthquake hazards reduction program. Executive Order 12699 (EO) "Seismic Safety of Federal and Federally Assisted or Regulated New Building construction" requires all Federal agencies to ensure that new federally assisted buildings are designed and constructed in accord with appropriate seismic design and construction standards. Each agency is responsible for issuing or amending its regulations or procedures, planning for implementation through its own budget process, and regularly reviewing its regulations and procedures. The impact on National economic growth is considered to be negligible. For the typical Rural Housing and Community Development Service, Rural Business and Community Development Service, Rural Utilities Service, and Consolidate Farm Service Agency funded new building the additional cost associated with this requirement (1 to 2 percent of the total construction cost) is expected to be well worth the benefits gained.

306. RURAL RENTAL AND RURAL COOPERATIVE HOUSING LOAN POLICIES, PROCEDURES, AND AUTHORIZATIONS - POINT SCORE SYSTEM TO PRIORITIZE RURAL RENTAL HOUSING LOANS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 42 USC 1489

CFR Citation: 7 CFR 1944 subpart E

Legal Deadline: None

Abstract: This Regulatory action revises the point system used to prioritize rural rental housing loan requests by reducing the number of points for proposals located 20 or more miles from an urban area, by awarding points for communities with a need for rental units for larger families, by awarding points for proposals that preapplication and maket analysis requirements to require less detailed information at the preliminary eligibility and feasibility stage.

Proposed Rule Stage

307. • ESCROW OF TAXES AND INSURANCE AND CHANGING AGENCY PROCESSES AND TECHNIQUES TO CONFORM WITH THE PRIVATE SECTOR

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 301; 7 USC 1989; 42 USC 1480; 31 USC 3700

CFR Citation: 7 CFR 1806; 7 CFR 1900; 7 CFR 1944; 7 CFR 1951; 7 CFR 1955; 7 CFR 1956; 7 CFR 1965

Legal Deadline: None

Abstract: Rural Housing and Community Development Service (RHCDS) has purchased a state-of-the-art dedicated loan origination servicing system (DLOSS) which includes escrow capability. To conform to this new system, RHCDS proposes to make further amendments to the regulations to allow the agency to provide escrow services to Single Family Housing borrowers which follow industry standards. In addition, the agency proposes to amends it regulations to conform to processes and techniques currently being utilized by the private sector.

RIN: 0575–AB99

308. • REQUIRE ALL SINGLE-FAMILY HOUSING BORROWERS AND NONPROGRAM BORROWERS WHO HAVE PURCHASED SINGLE-FAMILY RESIDENCE TO PAY ONE-TIME TAX SERVICE FEE

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 301; 7 USC 1989; 42 USC 1480

CFR Citation: 7 CFR 1944; 7 CFR 1951; 7 CFR 1965

Legal Deadline: None

Abstract: Rural Housing and Community Development Service (RHCDS) has purchased a state-of-the-art dedicated loan origination/ servicing system (DLOSS) which includes escrow capability. It is common industry practice to use a tax service and pass the cost of the service onto the borrower. A tax service will ensure taxes are paid timely and are based on accurate information. All SFH and NP borrowers who are purchasing a single family residence will be required to pay a one-time tax service fee, to be collected at loan closing. In addition, all existing SFH and NP borrowers will be required to pay this fee. The fee will be consistent with industry standards.

309. RECAPTURE OF SECTION 502, RURAL HOUSING SUBSIDY

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1951 subpart I

Legal Deadline: None

Abstract: The Rural Housing and Community Development Services proposes to revise the regulation for the recapture of subsidy granted on Section 502 rural housing loans. This action will simplify and automate the calculation process in conjunction with the purchase of a modern commercial off-the-shelf loan servicing system with escrow capability.

Legal Deadline: None

Abstract: OMB Circular A-129 dated November 25, 1988, recommends that the processing of applications for Federal direct loans be suspended and require private lenders to suspend processing of loan guarantee applications when an applicant is found to be delinquent on a Federal debt. The Federal Debt Collections Procedures Act of 1990 also requires that credit be denied if an outstanding judgment lien obtained by the United States in a Federal Court (other than the United States Tax Court), which has been recorded, is found.

313. 1927-B REAL ESTATE TITLE CLEARANCE AND LOAN CLOSING

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1480; 5 USC 301

CFR Citation: 7 CFR 1927 subpart B; 7 CFR 2.23; 7 CFR 2.70

Legal Deadline: None

Abstract: Attorney and title companies close Rural Housing and Community Development Service (RHCDS) and Consolidated Farm Service Agency (CFSA) loans, provide title clearances, and disburses RHCDS/CFSA loan funds. In order to protect the security of the Government in the execution of these functions, RHCDS/CFSA requires them to have in full force and effect, an acceptable liability insurance policy for errors and omissions, deductible and appropriate level of fidelity coverage in the amount prescribed by RHCDS/CFSA. If the attorney or the title company wishes to close RHCDS/CFSA loans and has a larger deductible or lower insurance liability coverage, the State Director has to obtain authorization or exception from the National Office. The process is cumbersome and requires a great amount of paperwork and time. The use of Title Insurance is encouraged to be required by State Directors. This would eliminate the need for liability insurance bond coverage, and provide better protection for the government.

314. ENVIRONMENTAL PROGRAM

Priority: Other Significant

Legal Authority: PL 91-190

CFR Citation: 7 CFR 1940

Legal Deadline: None

Abstract: Section 1940.311 of FmHA Instruction 1940-G, Environmental Program, describes certain utility systems which meet the criteria for environmental review using the format for a Class I environmental assessment. There has been some confusion as to what constitutes a "substantial increase" in withdrawal or discharge, and there has also been some confusion as to what criteria should be used when calculating a 50,000 gallon per day withdrawal from surface or groundwater. It is expected that the effect of this action will be to eliminate this unnecessary confusion, and reduce documentation and paperwork on the part of Rural Housing and Community Development Service, Rural Business and Community Development Service, and Rural Utilities Service, employees in the preparation and review of Class I environmental assessments based on these sections.

323. • ENVIRONMENTAL PROGRAM STREAMLINE ENVIRONMENTAL PROCESS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: PL 96-510; PL 94-580; PL 94-469; PL 92-500

CFR Citation: 40 CFR 300; 40 CFR 260; 40 CFR 700; 40 CFR 400

Legal Deadline: None

Abstract: The objective of this action is to substantially revise the existing environmental regulation and to implement changes to streamline the environmental process for the Rural Economic and Community Development (RECD) services, also to include any changes necessitated by amendments to various environmental laws, executive orders, and regulations applicable to RECD services, to clarify wording, correct inconsistencies and where applicable, to delete obsolete material and update references in other program regulations. This revision represents an important contribution to the Department's efforts to streamline its operations and realize more efficient use of staff time. The current regulation applies to all programs formerly belonging to the Farmers Home Administration (FmHA) and to the Rural Development Administration (RDA). This proposed revision is being done on behalf of RECD and will address only those programs which were transferred by FmHA and RDA to the 3 RECD agencies: Rural Utilities Service (RUS), Rural Housing and Community Development Service (RHCDS), and Rural Business and Cooperative Development Service (RBCDS). This revision will eventually be assigned a new number and title on behalf of RECD and its three agencies. There are a number of Federal environmental statutes which govern the management of hazardous substances, materials and wastes. At the present time, RHCDS, RBCDS, RUS and Consolidated Farm Service Agency (CFSA)do not have implementing regulations for these Federal statutes. The development of implementation procedures for managing hazardous substances is necessary to insure consistency in compliance with Federal, as well as State, environmental statutes, and to develop appropriate "due diligence" policies to minimize the Agency's liability with regard to environmental cleanups of hazardous waste in loan processing/servicing and property management activities. RHCDS, RBCDS, RUS, and CFSA have approximately 3,500 inventory properties. RHCDS, RBCDS, RUS, and CFSA cannot be certain how many of these inventory properties will require hazardous waste cleanup prior to sale.

324. • PROVIDE INFORMATION REGARDING LEASE WRITE-OFF AND ANNUAL LEASE STATEMENTS

Priority: Other Significant

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301; 31 USC 3711

CFR Citation: 7 CFR 1955 subpart B

Legal Deadline: None

Abstract: To ensure that lease information is reported properly in agency records, it is necessary to provide field offices on when it is appropriate to process write-offs of leases of acquired property and subsequently report these write-offs to the Internal Revenue Service. No such guidance currently exists. These changes will also reference a new annual statement of lease account which will provide current lease balances and summarize transactions applied to the lessee's account during the calendar. It will also assist the lessee in tracking lease operating expenses for income tax purposes.

326. • DECISION TO LIQUIDATE

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1989; 42 USC 1480; 5 USC 301; PL 100-387; PL 101-82

CFR Citation: 7 CFR 1980

Legal Deadline: None

Abstract: The Agency proposes to amend its regulations and appropriate Lenders Agreement, Form FmHA 449-35, to clarify the circumstances and to establish a timeframe under which the decision to liquidate will be made. The intended effect is to provide three independent criteria to serve as the basis for determining when the decision to liquidate should occur. The anticipated benefit will be that liquidate will occur more uniformly when the three criteria are met. This will provide more guidance to the lender regarding how to proceed when all other worker situations have been exhausted.

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1506(l)

CFR Citation: 7 CFR 457

Legal Deadline: None

Abstract: The Federal Crop Insurance Corporation hereby proposes regulations for provisions to insure peanuts. The provisions will be used in conjunction with the common crop insurance policy which contains standard terms and conditions common to most crops. The intended effect of this action is to provide automatic coverage for late and prevented planting as well as make other minor policy changes to better meet the needs of the insured. This rule proposes to remove the peanut endorsements which are currently a "stand-alone" policy located in part 425 and part 401.141 of the General Crop Insurance provisions and move them under part 457, Common Crop Insurance provisions.

335. COMMON CROP INSURANCE REGULATIONS; NORTHERN POTATO CROP INSURANCE PROVISIONS

Priority: Routine and Frequent

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1506(l)

CFR Citation: 7 CFR 457

Legal Deadline: None

Abstract: The Federal Crop Insurance Corporation hereby proposes regulations for provisions to insure Northern potatoes. The provision will be used in conjunction with the Common Crop Insurance policy which contains standard terms and conditions common to most crops. The intended effect of this action is to provide automatic coverage for late and prevented planting as well as make minor policy changes to better meet the needs of the insured. This rule proposes to remove the potato policy which is currently a "stand-alone" policy located in part 422 and move it under part 457, Common Crop Insurance provisions. A separate rule proposes provisions for central-southern potatoes.

337. COMMON CROP INSURANCE REGULATIONS; CANNING AND PROCESSING TOMATO CROP INSURANCE PROVISIONS

Priority: Routine and Frequent

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1506(l)

CFR Citation: 7 CFR 457

Legal Deadline: None

Abstract: The Federal Crop Insurance Corporation hereby proposes regulations for provisions to insure canning and processing tomatoes. The provisions will be used in conjunction with the Common Crop Insurance Policy which contains standard terms and conditions common to most crops. The intended effect of this action is to provide automatic coverage for late and prevented planting as well as make other minor policy changes to better meet the needs of the insured. This rule proposes to remove the Canning and Processing tomato policy which currently is located at Part 401.114 under the general Crop Insurance Regulations and move under part 457; Common Crop Insurance Regulations.

338. COMMON CROP INSURANCE REGULATIONS; FRESH MARKET TOMATO (GUARANTEED PRODUCTION) CROP INSURANCE PROVISIONS

Priority: Routine and Frequent

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1506(l)

CFR Citation: 7 CFR 457

Legal Deadline: None

Abstract: The Federal Crop Insurance Corporation hereby proposes regulations for provisions to insure fresh market tomatoes (guaranteed production plan). The provisions will be used in conjunction with the common crop insurance policy which contains standard terms and conditions common to most crops. The intended effect of this action is to provide automatic coverage for late and prevented planting as well as make other minor policy changes to better meet the needs of the insured. This rule proposes to remove the fresh market tomato (guaranteed production plan) policy which currently is a "stand-alone" policy located at part 454 and move it under part 457, common crop insurance regulations.

340. GENERAL ADMINISTRATIVE REGULATIONS; SUBPART D; APPLICATION FOR CROP INSURANCE

Priority: Other Significant

Legal Authority: 7 USC 1506(l)

CFR Citation: 7 CFR 400, subpart D

Legal Deadline: None

Abstract: The Federal Crop Insurance Corporation amends the General Administrative Regulations by revising the "Collection of Information and Data (Privacy Act)" statement found on the general crop insurance application. The proposed amendments to the statement include defining "substantial beneficial interest" as those persons whose interest in the policyholder is in excess of 10 percent. Other minor changes have been made to more fully comply with provisions of the Privacy Act.

341. GENERAL ADMINISTRATIVE REGULATIONS; SUBPART U; INELIGIBLE FILE - CROP INSURANCE INELIGIBILITY

Priority: Other Significant

Legal Authority: 7 USC 1506(l)

CFR Citation: 7 CFR 400

Legal Deadline: None

Abstract: This rule proposes to establish a new subpart that describes the Corporation's intention to compile a list of those persons who have been found ineligible for participation in the Federal Crop Insurance Program because of various violations committed when either insured or reinsured by FCIC. Violations include nonpayment of premium, delinquent debt owed to FCIC, fraud misrepresentation, FCIC debarment or suspension, ineligibility determinations resulting from formal or informal administrative proceedings or from court rulings, or those arising from settlement agreements, as well as other violations of program regulations. Violations may also be declared because of violations of the conservation compliance or controlled substance provisions of the Food Security Act of 1985, as amended by the Food, Agriculture, Conservation and Trade Act of 1990. The rule also proposes to preclude a person from receiving any benefits for the applicable crop year if it is determined that a person has knowingly adopted a scheme to obtain a catastrophic or noninsured benefit under the Federal Crop Insurance Reform Act of 1994 to which the person was not entitled.

344. GROUP RISK PLAN CROP INSURANCE PROVISIONS; PART 407

Priority: Other Significant

Legal Authority: 7 USC 1506(l)

CFR Citation: 7 CFR 407

Legal Deadline: None

Abstract: The Federal Crop Insurance Corporation (FCIC) hereby proposes to issue provisions which will outline a new risk management tool to be known as the Group Risk Plan of Insurance (GRP). This plan will insure against the widespread loss of production of certain crops in a county and is intended primarily for use by those farmers whose yields tend to follow the county average yield. GRP pays only when the average yield of the entire county drops below the expected county yield for the insured crop set by the FCIC. Payment is based on the percentage of county or area wide loss below the insured's trigger yield. Specific GRP Crop Insurance Provisions will be proposed for cotton, wheat, barley, corn, grain, sorghum, soybeans, forage production, and peanuts.

345. GENERAL ADMINISTRATIVE REGULATIONS; SUBPART S; REGULATIONS FOR INSURANCE COVERAGE BY WRITTEN AGREEMENT

Priority: Other Significant

Legal Authority: 7 USC 1506(l)

CFR Citation: 7 CFR 400, subpart S

Legal Deadline: None

Abstract: The Federal Crop Insurance Corporation (FCIC) hereby proposes regulations to allow insurance coverage by written agreement for crops in counties which have no actuarial table. Currently, FCIC provides insurance by written agreement for only program crops. By providing insurance by written agreement, FCIC will provide a risk management tool to a broader base of producers.

347. GENERAL ADMINISTRATIVE REGULATIONS; ACTUAL PRODUCTION HISTORY COVERAGE PROGRAM; TRANSITIONAL YIELDS FOR PRODUCERS OF FEED OR FORAGE

Priority: Other Significant

Legal Authority: 7 USC 1506(l)

CFR Citation: 7 CFR 400

Legal Deadline: None

Abstract: This rule proposes to provide a two-year authority for the Corporation to offer a transitional yield of 80 percent for producers of feed or forage for on-farm use in a livestock, dairy, or poultry operation. This transitional yield rate shall be available to the producer for the first year of the production history subsequent to the enactment of the Federal Crop Act. Thereafter, the actual production history and assigned yield provisions of the Act shall apply.

389. STATEMENT OF GENERAL POLICY UNDER THE PACKERS AND STOCKYARD ACT: CARE AND HANDLING OF LIVESTOCK

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 204; 7 USC 228

CFR Citation: 9 CFR 203.20

Legal Deadline: None

Abstract: Due to concerns regarding the care and handling of livestock, the Agency initiated a program to review the services, facilities, and procedures for receiving and handling livestock at all stockyards. Over 1,400 stockyards were reviewed and problems in the care and handling of livestock were found to exist at some stockyards. As a result of these reviews, the Agency proposes to issue guidelines in the form of a statement of general policy on the care and handling of livestock at stockyards.

390. FEES FOR OFFICIAL INSPECTION AND WEIGHING SERVICES

Priority: Other Significant

Legal Authority: 7 USC 71 et seq

CFR Citation: 7 CFR 800.71

Legal Deadline: None

Abstract: The Federal Grain Inspection Service (FGIS) proposes to increase its fees on average by 3.7 percent for Official Inspection and Weighing Services performed in the United States under the United States Grain Standards Act (USGSA), as amended. The USGSA provides for establishment of fees which are to cover the costs for performance of these official services. FGIS's current fee does not generate sufficient revenue to cover any of the approved FY 1992 3.7 percent federal employee raise.

397. • NOTICE OF NEW PRIVACY ACT SYSTEM OF RECORDS - FOOD STAMP RETAILER INFORMATION

Priority: Substantive, Nonsignificant

Legal Authority: PL 93-579

CFR Citation: None

Legal Deadline: None

Abstract: This notice proposes to create a new Privacy Act system of records entitled "Food Stamp Retailer Information." This will enable FCS to share personal information with other Federal agencies pertaining to store owners currently participating in the Food Stamp Program, as well as those store owners who have previously participated in the program. Some of the identifying information which will be shared with other Federal agencies are the names and home addresses of owners, owners' Social Security Numbers, and dates of birth. (95-020)

DEPARTMENT OF AGRICULTURE (USDA) — **Proposed Rule Stage**

Food and Consumer Service (FCS)

398. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC): FOOD DELIVERY SYSTEMS

Regulatory Plan: This entry is Seq. No. 2 in Part II of this issue of the Federal Register.

RIN: 0584–AA80

399. FOOD STAMP PROGRAM: EMERGENCY ASSISTANCE FOR VICTIMS OF DISASTERS

Priority: Other Significant

Legal Authority: 7 USC 2013 (b); 7 USC 2014 (h)

CFR Citation: 7 CFR 271; 7 CFR 272; 7 CFR 273; 7 CFR 274; 7 CFR 280

Legal Deadline: None

Abstract: This rule would define special eligibility and issuance procedures during disasters. The rule addresses the eligibility and issuance of food stamps by the Food Stamp Program during a disaster. (86-029)

400. SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC): PART 246.10, FOOD PACKAGE III, PARTICIPANTS WITH CERTAIN MEDICAL CONDITIONS

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: None

Abstract: WIC Food Package III will be revised to: clarify the types of serious medical conditions warranting its use; slightly increase the maximum monthly allowance of authorized WIC formulas; define the types and forms of authorized WIC formulas; make available additional foods currently authorized in other WIC food packages, when not medically contraindicated; and specify requirements for issuing this food package.

Need for Action:

The proposed rule responds to numerous requests over the years from WIC participants, State and local agencies, health professionals and members of Congress and to a recommendation from the National Advisory Council on Maternal, Infant and Fetal Nutrition that the Department improve the design of this food package. The proposed changes in WIC Food Package III are intended to better accommodate the special dietary needs of the most nutritionally needy and medically vulnerable subgroup of WIC participants. Those who would qualify to receive this food package would be classified under the highest nutritional risk priorities of WIC participant categories. (89-505)

401. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC): MISCELLANEOUS PROVISIONS

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: None

Abstract: This proposed rule responds to a variety of program concerns, most of which have been expressed by WIC State agencies. The proposal strengthens the provision of services to participants in the areas of eligibility determination and nutrition education and increases State agency flexibility regarding the sharing of participant information with other programs.

Several minor clarifications and technical corrections are also made. Principal provisions include: (1) mandatory minimum content requirements for nutrition education participant contacts; and (2) additional flexibility for State agencies to share participant information with related programs. (89-515)

406. FOOD STAMP PROGRAM: 1995 QUALITY CONTROL TECHNICAL AMENDMENTS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing

Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 2011 to 2032

CFR Citation: 7 CFR 271.2; 7 CFR 275.3; 7 CFR 275.10; 7 CFR 275.11; 7 CFR 275.12; 7 CFR 275.13; 7 CFR 275.23

Legal Deadline: None

Abstract: The Food and Consumer Service is proposing technical changes to the Food Stamp Program's Quality Control System which will reduce the workload on State agencies and improve the efficiency of the quality control system. The proposed changes would: (1) permit State agencies to reduce their sample sizes; (2) clarify the minimum size of the Federal subsample; (3) clarify State sampling procedures; (4) change the formulas for calculating Federal subsample sizes; (5) clarify the process of conducting a quality control review of negative subsystem cases and add suspended cases, those cases that are certified for the Program but do not receive benefits, to the sample universe of cases that are reviewed under the negative subsystem; (6) change the error dollar tolerance level; (7) modify the requirements regarding a home visit in active quality control reviews; (8) provide a variance exclusion under certain circumstances for errors resulting from incorrect policy issued in written State agency policies or directives; (9) adjust the case completion standard; and (10) codify into regulations those circumstances under which Federal quality control findings or disposition for a case will be changed. 407. PROVISIONS OF COMPUTER MATCHING AND PRIVACY PROTECTION ACT OF 1988, AMENDMENTS OF 1990, AND IMPLEMENTATION OF THE DISQUALIFIED RECIPIENT SUBSYSTEM

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 552(a) Computer Matching and Privacy Protection Act; 7 USC 2015(b) Food Stamp Act

CFR Citation: 7 CFR 272; 7 CFR 273

Legal Deadline: None

Abstract: In accordance with the Computer Matching and Privacy Protection Act, PL 100-503, and the Computer Matching and Privacy Protection Amendments of 1990, PL 101-508, the Food Stamp Program must extend certain protections to persons whose benefits could be adversely affected by computer matches. These protections include independent verification of computer information, notification to the affected individual and provision of an opportunity to respond to the information before an adverse action becomes effective.

In addition, this proposed rule describes requirements for State agencies to report information on individuals disqualified from the program for intentional program violations to FCS and the related FCS computer matching program known as the Disqualified Recipient Subsystem (DRS). (89-010)

409. FOOD STAMP PROGRAM: ANTICIPATING INCOME AND REPORTING CHANGES

Priority: Other Significant

Legal Authority: 7 USC 2011 to 2032

CFR Citation: 7 CFR 273

Legal Deadline: None

Abstract: This rule proposes several revisions in Food Stamp Program reporting and budgeting requirements. The changes in prospective budgeting and change reporting rules are intended to improve procedures for anticipating the eligibility and benefits of households whose income fluctuates unpredictably. The proposed revisions would provide a more stable level of benefits for these households by requiring them to report a change in employment status rather than a change in the amount of earnings. The rule also would allow suspension, as opposed to termination, of

prospectively budgeted households that become ineligible for one month because of income fluctuations. (93-005)

410. CHILD AND ADULT CARE FOOD PROGRAM: ELIMINATION OF WHOLE COW'S MILK FROM THE INFANT MEAL PATTERN

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1751 to 1760; 42 USC 1779

CFR Citation: 7 CFR 210; 7 CFR 220; 7 CFR 226

Legal Deadline: None

Abstract: This action proposes two amendments that would affect meal pattern requirements for infants under the National School Lunch Program, School Breakfast Program, and Child and Adult Care Food Program, Parts 210, 220, and 226 respectively. USDA is issuing this proposal in response to new scientific evidence on infant nutrition. First, this rule would prohibit consumption of whole cow's milk for infants ages 8 months through 11 months. Studies have demonstrated that it is difficult for infants to consume a balanced diet, with adequate nutrients, when whole cow's milk replaces breast milk or iron-fortified formula. Given the nutritional and medical concerns about cow's milk, this action would require that breast milk or iron-fortified formula be served for an infant's entire first year. Second, the proposal would revise the meal pattern for infants from birth through age 3 months to indicate that either 4 to 6 fluid ounces of formula or 3 to 6 fluid ounces of breast milk could be served. The current meal pattern for this age requires a minimum serving of 4 fluid ounces, however data indicate that the average amount of breast milk intake per feeding may be less than 4 ounces. This revision is important to correct the impression among day care providers who refer to the infant meal pattern for guidance, that a minimum of 4 ounces of breast milk must be offered at all feedings to all breastfed infants from birth through 3 months of age. (95-005)

418. • AMENDMENT TO REMOVE FORMULATED GRAIN—FRUIT PRODUCT SECTION

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1773; 42 USC 1779

CFR Citation: 7 CFR 220 app A

Legal Deadline: None

Abstract: Formulated grain-fruit products are specially fortified pastry type products which are currently authorized for use in the School Breakfast Program (SBP) to meet one bread/bread alternate and the fruit/vegetable requirements of the meal pattern. Originally intended to increase participation in the SBP by comprising a reimbursable meal when served with milk, subsequent additions to the meal patterns have made this impossible. In addition, these products do not make favorable contributions to a healthy diet. There is a minimum of 22% fat in the product specification, and high sugar levels are also necessary to meet the calorie minimum and produce a palatable product. These products are also low in fiber. Interest in these products from the food industry is low; only a few companies have approved grain-fruit products. These companies could reformulate their existing products into lower fat, tastier products

415. • REMOVAL OF THE "CHEESE ALTERNATE PRODUCTS" REQUIREMENTS FROM THE NATIONAL SCHOOL LUNCH PROGRAM

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will eliminate existing text in the CFR.

Legal Authority: 42 USC 1751 to 1760; 42 USC 1779; 42 USC 1761; 42 USC 1762a

CFR Citation: 7 CFR 210.10 (k)(3)(i); 7 CFR 210.10a (d)(2)(i); 7 CFR 210 app A; 7 CFR 225.16 (f)(3)

Legal Deadline: None

Abstract: This rule seeks comment on the proposed elimination of requirements governing the use of "Cheese Alternate Products" in the National School Lunch Program. The removal of these requirements should enable cheese substitute manufacturers more freedom in the production of this type of product while maintaining program nutrition standards through reliance on existing Food and Drug Administration rules. 419. • CONSOLIDATION OF NATIONAL SCHOOL LUNCH PROGRAM AND SCHOOL BREAKFAST PROGRAM INTO COMPREHENSIVE SCHOOL MEAL PROGRAM

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: PL 103-448

CFR Citation: 7 CFR 210; 7 CFR 220

Legal Deadline: Final, Statutory, May 2, 1996.

Abstract: Sec. 301 of P.L. 103-448 required the consolidation of the school lunch program and the school breakfast program into a comprehensive school meal program. In establishing the comprehensive school meal program, (a) children who are eligible for free and reduced price benefits will continue to receive such benefits; (b) the meals will continue to meet the nutritional requirements of sec. 9(a)(1) of the National School Lunch Act (NSLA) and sec. 4(e)(1) of the Child Nutrition Act (CNA); and (c) breakfast and lunch payments will continue to meet the requirements of sec. 4 and 11 of the NSLA and sec. 4 of the CNA. This regulation will consolidate the two programs by making structural changes to the framework of 7 CFR Part 210 to accommodate the incorporation of the breakfast program and by removing repetitive and obsolete provisions. Further, 7 CFR Part 220 will be removed in its entirety. (95-013)

421. • MODIFICATION OF THE "VEGETABLE PROTEIN PRODUCTS" PORTION OF APPENDIX A OF 7 CFR PARTS 210, 225, AND 226

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1751 to 1760; 42 USC 1779; 42 USC 1761; 42 USC 1762a; 42 USC 1765; 42 USC 1766

CFR Citation: 7 CFR 210 app A; 7 CFR 210.10(k)(3)(i); 7 CFR 210.10a(d)(2)(i); 7 CFR 225 app A; 7 CFR 225.16(f)(3); 7 CFR 226 app A; 7 CFR 226.20(a)(2)(ii)(B); 7 CFR 226.20(a)(4)(ii)

Legal Deadline: None

Abstract: The usage level of vegetable protein products (VPP) is currently limited to a 30% substitution of meat, fish or poultry. A nutritional profile has been established which specifies fortification of certain nutrients as well as a protein quality requirement. This regulation could better serve the child nutrition programs if it is modified to allow an increased utilization of foods containing VPP. The food industry has requested that we allow 100% soy products to serve as meat alternates in the food based system, since there are no restrictions on their use under the nutrient based system. In addition, current fortification levels of iron and zinc established for the VPP used in the child nutrition programs were based on early dietary research. It is now believed that these levels may be excessive if the VPP is used at greater than a 30% level of substitution in the diet. The Department intends to propose a rule to modify the regulations governing the use of vegetable protein products in the child nutrition programs which will provide a consistent nutritional policy regardless of menu planning system used, and will remove confusing regulatory burdens from programs and industry. Proposed Rule Stage

422. • CHILD AND ADULT CARE FOOD PROGRAM: CHILD NUTRITION AND WIC REAUTHORIZATION ACT AMENDMENTS

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1758; 42 USC 1766

CFR Citation: 7 CFR 226

Legal Deadline: None

Abstract: This rule would propose changes to the CACFP required by CN and WIC Reauthorization Act of 1989 (P.L. 101-147) and the Healthy Meals for Healthy Americans Act of 1994 (P.L. 103-448) by: (1) providing administrative funds to family day care home sponsors for expansion into low-income rural areas; (2) reducing from 6 to 2 the required number of annual site monitoring reviews required of schools which operate OSH care centers; (3) permitting State agencies to allow 3-year applications from CACFP institutions; (4) granting income-eligible HS participants automatic CACFP eligibility without further application of eligibility determination; and (5) allowing the use of administrative funds to conduct outreach and recruitment to unlicensed day care homes. These revisions are intended to encourage Program participation in low-income and rural areas and reduce the level of administrative and financial burden at the Federal, State and local levels. Final Rule Stage

423. MISCELLANEOUS FARM BILL PROVISIONS RELATING TO THE AUTHORIZATION OF RETAIL FIRMS AND WHOLESALE FOOD CONCERNS

Priority: Other Significant

Legal Authority: 7 USC 2011 to 2031; PL 101-624

CFR Citation: 7 CFR 271; 7 CFR 272; 7 CFR 274; 7 CFR 278

Legal Deadline: Final, Statutory, October 1, 1991.
Effective 120 days from publication of implementing rules.

Abstract: This rule would implement three provisions of the 1990 Farm Bill (PL 101-624, 104 stat 3359) which revise the Food Stamp Act of 1977, as amended (7 USC 2011 et seq.). The first provision would amend the definition of "food" to include meals sold to the homeless program participants by restaurants approved by State agencies for this purpose. Such restaurants must contract with the State and must be authorized by the Food and Consumer Service to provide meals at concessional prices to homeless participants. The second provision would allow a periodic reauthorization of retail food stores and wholesale food concerns to participate in the Food Stamp Program. The third provision revises criteria for and limits the participation in the program of co-located wholesaler/retailer firms. (91-003)

Priority: Other Significant

Legal Authority: PL 101-147

CFR Citation: 7 CFR 210; 7 CFR 215; 7 CFR 220; 7 CFR 245

Legal Deadline: Final, Statutory, July 1, 1990.

Abstract: The Child Nutrition and WIC Reauthorization Act of 1989 made the agreement between the school and the State agency to operate the school nutrition programs a permanent

document to be amended as necessary. This law also authorized schools to certify children as eligible for free meals using information obtained directly from food stamp/AFDC offices attesting that these children are receiving food stamps or AFDC benefits. This rule implements these statutory provisions. (89-520)

428. FOOD STAMP PROGRAM: EXCESS SHELTER EXPENSE LIMIT AND STANDARD UTILITY ALLOWANCES

Priority: Economically Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 2011 to 2032; PL 103-66

CFR Citation: 7 CFR 273

Legal Deadline:
Final, Statutory, July 1, 1994, for first increase in excesshelter expense limit.
Other, Statutory, October 1, 1995, for second increase in excesshelter expense limit.
Other, Statutory, January 1, 1997, for removal of shelterexpense limit.

Abstract: This action proposes several changes in Food Stamp Program rules relating to the development and use of standard utility allowances. The changes are proposed to facilitate use of standard amounts rather than actual utility expenses in determining the benefits of food stamp households.

This rule also proposes to implement section 13912 of the Mickey Leland Childhood Hunger Relief Act which would increase and then eliminate the current limit on excess shelter expenses that may be deducted from household income. (93-006)

429. FOOD STAMP PROGRAM: SIMPLIFICATION OF PROGRAM RULES

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 2011 to 2032

CFR Citation: 7 CFR 273

Legal Deadline: None

Abstract: This action proposes several changes in Food Stamp Program rules relating to Social Security numbers, combined allotments, residency, excluded resources, contract income, self-employment expenses, certification periods, the notice of adverse action, recertification, and suspension under retrospective budgeting. The changes are being proposed as means to simplify regulatory requirements and to increase consistency with requirements of the Aid to Families with Dependent Children (AFDC) program. (93-006)

430. FOOD STAMP PROGRAM: PAYMENT OF CERTAIN ADMINISTRATIVE COSTS OF STATE AGENCIES

Priority: Other Significant

Legal Authority: 7 USC 2011 to 2032; PL 103-66, sec 13961

CFR Citation: 7 CFR 277

Legal Deadline: Other, Statutory, April 1, 1994.
The Act requires funding rate reduction effective 04/01/94.

Abstract: State agencies are reimbursed by FCS at standard or enhanced Federal reimbursement level for all allowable costs incurred in the State's operation of the Food Stamp Program. This proposed rule would reduce the Federal reimbursement rate for State agencies for fraud control, system development, and immigration status verification to the standard 50 percent rate. It would also limit the time period during which State agencies may file a claim for retroactive funding, and allows the cost of certifying aid to families with dependent children to be charged to the Food Stamp Program for purposes of Federal reimbursement. 432. FOOD STAMP PROGRAM: QUALITY CONTROL PROVISIONS OF THE MICKEY LELAND CHILDHOOD HUNGER RELIEF ACT

Priority: Other Significant

Legal Authority: PL 103-66, sec 13951

CFR Citation: 7 CFR 273; 7 CFR 275

Legal Deadline: None

Abstract: To implement quality control changes to the Food Stamp Act required by section 13951 of the Mickey Leland Childhood Hunger Relief Act in the following areas: 1) interest on quality control claims, 2) the formula for determining quality control claim amounts, 3) variance exclusion for the application of new regulations, 4) time frames for completion of the arbitration process, 5) time frames for determining final error rates, the national average payment error rate, and the amounts of payment claims against State agencies, 6) time frames for notifying State agencies of payment claims, 7) the addition of specific criteria for a determination that "good cause" exists for not imposing a payment claim, and 8) the transfer of authority to make "good cause" determinations from FNS to the Administrative Law Judges. These provisions are nondiscretionary and will not result in an annual effect on the economy of $100 million or more, or a major increase in costs or prices for consumers, individuals, industries, Federal, State or local government agencies, or geographical regions. 435. NATIONAL SCHOOL LUNCH, SPECIAL MILK, SCHOOL BREAKFAST, CHILD AND ADULT CARE FOOD AND SUMMER FOOD SERVICE PROGRAMS: PURCHASE OF FOOD PRODUCTS PRODUCED IN THE U.S

Priority: Substantive, Nonsignificant

Legal Authority: PL 101-237

CFR Citation: 7 CFR 210; 7 CFR 215; 7 CFR 220; 7 CFR 225; 7 CFR 226

Legal Deadline: None

Abstract: USDA has always encouraged the domestic consumption of nutritious agricultural products through the food assistance programs. However, PL 100-237, enacted January 8, 1988, requires recipient agencies participating in the Child Nutrition and Commodity Distribution Programs to purchase, whenever possible, only food products that are produced in the U.S. The statute allows exceptions to meet unusual or ethnic food preferences and further exempted Alaska, Hawaii, Guam, American Samoa, Puerto Rico, the Virgin Islands, and the Commonwealth of the Northern Mariana Islands. The statute allows for additional exemptions by the Secretary "for such other circumstances as the Secretary considers appropriate." FNS published an interim rule pertaining to Part 250, Food Donations, to implement this and other requirements on July 21, 1988. A final regulation was published July 22, 1993. This rule is only amending rules for food donations, not each of the affected programs. FNS intends to issue final rules to include statutory "Buy American" provisions in the regulations for the School Lunch, Milk, Breakfast, Child and Adult Care, and Summer Food Service Programs. Final, Statutory, October 1, 1992, PL 102-325 - Tribal LoanProgram.
Final, Statutory, August 1, 1993, PL 102-325 - Title IX Exclusion.

Abstract: This action finalizes provisions of P.L. 101-624 governing the treatment of educational assistance as excluded income or resources. It finalizes provisions of P.L. 102-325 which prohibits Federal educational assistance provided under Title IV or Part E of Title XIII of the Higher Education Act from being considered as income and resources for food stamp purposes. It finalizes provisions of P.L. 101-392 which prohibits counting certain educational assistance funded by the Perkins Act as income or resources when determining the eligibility and benefits of student households. It finalizes provisions of P.L. 102-237 which provide that educational monies are excluded from income when they are awarded to a person enrolled at a recognized institution of post-secondary education, at a school for the handicapped, in a vocational education program, or in a program that provides for completion of a secondary school diploma or obtaining the equivalent. Also, such monies are excluded from income to the extent that they do not exceed the amount used for or made available as an allowance determined by the school, institution, program, or other grantor, for tuition, mandatory fees (including the rental or purchase of any equipment, materials, and supplies related to the pursuit of the course of study involved), books, supplies, transportation, and other miscellaneous personal expenses (other than living expenses), of the student incidental to attending such school, institution, or program and to the extent the loans include any origination fees and insurance premiums. The provisions of the statutes become effective on the dates of the legal deadlines whether regulations have been published or not. (94-016)

438. FOOD STAMP PROGRAM AUTOMATED DATA PROCESSING EQUIPMENT AND SERVICES; REDUCTION IN REPORTING REQUIREMENTS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 2011 to 2032

CFR Citation: 7 CFR 277

Legal Deadline: None

Abstract: This rule proposes to increase the cost thresholds above which prior written Federal approval of State automated data processing (ADP) equipment and services acquisitions is required for Federal financial participation. The effect of the proposed changes would be a reduction in State reporting requirements. Additionally, a State request for funding would be deemed to have provisionally met the prior approval requirement if the Food and Consumer Service (FCS) does not approve, disapprove, or request additional information about the request within 60 days of the agency's letter to the State acknowledging its receipt. Finally, this rule proposes to eliminate the requirement that State agencies submit written information pertaining to the State biennial security reviews. States would be required to maintain copies of the report and pertinent supporting documentation for FCS review. (94-202)

CFR Citation: 7 CFR 250

Legal Deadline: None

Abstract: This final rule amends the Food Distribution Program regulations by giving the Food and Consumer Service authority to waive provisions contained in the Food Distribution Program regulations at 7 CFR part 250. This authority would be used to conduct, in one or more areas of the United States, demonstration projects designed to test program changes to determine whether the changes would improve the State processing of donated foods. 441. SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC): IMPLEMENTATION OF WIC MANDATES OF THE HEALTHY MEALS FOR HEALTHY AMERICANS ACT OF 1994

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1786

CFR Citation: 7 CFR 246

Legal Deadline: None

Abstract: This final rule implements the WIC-related reauthorization provisions mandated in Pub. L. 103-448, the Healthy Meals for Healthy Americans Act of 1994. All of the WIC-related provisions may be deemed nondiscretionary. These provisions include: counting the unborn child of an otherwise income-ineligible pregnant woman, allowing State agencies to deem income-eligible pregnant women presumptively eligible for a period not to exceed 60 days, an increase in the national breastfeeding promotion and support expenditure, and a requirement that Medicaid managed care providers be included in the programs to which WIC must make referrals. 442. • CHILD AND ADULT CARE FOOD PROGRAM: CHILD NUTRITION IMPROVEMENT AND OLDER AMERICAN ACT AMENDMENT

Priority: Substantive, Nonsignificant

Legal Authority: PL 101-147; PL 102-342; PL 102-375

CFR Citation: 7 CFR 226

Legal Deadline: None

Abstract: This interim rule implements changes required in the Child and Adult Care Food Program (CACFP) by the Child Nutrition and WIC Reauthorization Act of 1989 (P.L. 101-147), the Child Nutrition Improvement Act of 1992 (P.L. 102-342) and the Older Americans Act Amendments of 1992 (P.L. 102-375) by: (1) allowing the Governor of a State to designate a State administering agency for the adult day care component of the Program that is different from the State agency which administers the child care component; (2) changing the basis for making commodities available to State agencies; (3) permitting private for-profit child care centers to participate in CACFP if at least 25 percent of their enrolled children or 25 percent of their licensed capacity, whichever is less, are Title XX recipients; (4) allowing adult day care centers to participate in the CACFP if they provide day care services to qualified persons in a group setting outside their homes, or in a group living arrangement; and (5) making three specific technical adjustments in Program regulations. This interim rule also makes a discretionary change which allows households participating in the Food Distribution Program on Indian Reservations (FDPIR) to be categorically eligible as free meal recipients under the CACFP. These changes are intended to reduce the level of administrative burden at the Federal, State and local levels. (95-009)

443. • FAILURE TO COMPLY WITH FEDERAL, STATE, OR LOCAL WORK PROGRAM REQUIREMENTS

Priority: Other Significant

Legal Authority: 7 USC 2017(d) Food Stamp Act

CFR Citation: 7 CFR 271; 7 CFR 273

Legal Deadline: None

Abstract: This action proposes to amend Food Stamp Program regulations to prohibit an increase in food stamp benefits when a household's Federal, State or local welfare assistance payment decreases as a result of a penalty for failure to comply with a Federal, State or local welfare program requirement. The revision is necessary to more fully implement congressional intent that the Food Stamp Program should reinforce, not mitigate, another program's penalties. (95-012)

Priority: Substantive, Nonsignificant

Legal Authority: PL 98-369; PL 100-203; PL 100-485; PL 102-164

CFR Citation: 7 CFR 278.6

Legal Deadline: None

Abstract: This rule notifies the public that FCS will begin offsetting Federal income tax refunds in 1997 to collect delinquent debts against food stamp retailers. These debts represent monetary penalties which FCS assessed against retailers who have violated Food Stamp Program rules and regulations. The offset will be made from Federal income tax refunds payable to retailers who are on FCS' records as having delinquent debts. This rule implements authority granted by the Cash Management Improvements Act, as amended. (95-014)

Legal Deadline: None

Abstract: This action proposes to amend Food Stamp Program rules affecting Alaska, The Commonwealth of the Northern Mariana Islands, Puerto Rico, and demonstration projects. This action is one result of a comprehensive page by page review of all existing Food Stamp Program regulations which was conducted in response to the President's efforts to reform the Federal regulatory system. The changes will eliminate prescriptive detailed processes and empower States to set their own procedures for case management and customer service; eliminate outdated and redundant regulatory requirements; and emphasize recipient responsibility for applying and reporting their circumstances properly. 466. • FSIS AGENDA FOR CHANGE: REGULATORY REVIEW; FOOD STANDARDS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 21 USC 601 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 301 to 350; 9 CFR 381

Legal Deadline: None

Abstract: The Food Safety and Inspection Service (FSIS) is undertaking a comprehensive review of its regulatory procedures and requirements to determine which are still needed and which are to be reconsidered, streamlined, or eliminated. This review is an integral part of the FSIS initiative to improve the safety of meat and poultry products by modernizing the Agency's system of food safety regulations, and it carries out the President's directive, as part of the Reinvention of Government initiative, to conduct a page-by-page review of all FSIS regulations to identify candidates for repeal or reform. A thorough review of FSIS's regulations is needed to prepare for implementation of the recently proposed Hazard Analysis and Critical Control Points (HACCP) regulations and a new food safety strategy that will reduce reliance on command-and-control regulations and increase reliance on science-based preventive measures and performance standards to improve food safety. This review and any changes in FSIS regulations that are necessary to make them compatible with HACCP will be completed prior to implementation of HACCP.

470. USE OF TRISODIUM PHOSPHATE ON RAW, UNCHILLED POULTRY CARCASSES

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 21 USC 451 et seq

CFR Citation: 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the poultry products inspection regulations to permit the application of trisodium phosphate (TSP) on raw, unchilled poultry carcasses. TSP would be permitted as an antimicrobial agent on raw, unchilled poultry carcasses. Tests conducted by industry and FSIS have shown that the use of TSP reduces microbial populations on raw, unchilled poultry carcasses. This proposed rule is in response to a petition filed by Rhone-Poulenc, Inc., Cranbury, New Jersey.

471. NUTRITION LABELING; NEW PRODUCT CATEGORIES AND REFERENCE AMOUNTS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 21 USC 601 et seq; 21 USC 451 et seq

CFR Citation: 9 CFR 317; 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat and poultry products inspection regulations by adding three new product categories and reference amounts to the new product categories and reference amounts chart. FSIS has received requests through public comments and the labeling application process to add new product categories and reference amounts for "Beans with meat, plain or in sauce," "Appetizers," and "Major condiments." FSIS is also proposing to allow manufacturers of meal-type products packaged in volumes greater than one serving to be labeled as the fractional statement of the promoted serving size (e.g., 1/2 package, 1/4 package).

474. • CONTINUOUS CHILLING OF SPLIT TURKEY PORTIONS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 21 USC 451 et seq

CFR Citation: 9 CFR 381

Legal Deadline: None

Abstract: This proposed rule would amend the poultry products inspection regulations to permit the chilling of split turkey portions in a continuous chiller. Under the current regulations, turkey carcasses must be intact in one piece before they may be chilled in a continuous chiller. They may not be continuously chiller if they have been split into major portions unless the carcasses have been trimmed or otherwise salvaged. This amendment would permit establishments to intentionally split dressed turkey carcasses into major portions prior to being placed into a continuous chiller. Permitting the splitting of whole turkey carcasses into major portions prior to chilling would have several benefits. First, it would improve public safety by reducing the amount of time needed

USDA—FSIS

Proposed Rule Stage

to cool the whole carcasses. A decrease in the chilling time significantly diminishes the period that the carcass portion is in the "danger zone" for microbial growth. The process itself would not cause the product to become adulterated or unwholesome. Second, it would provide the inspector with easier access to the interior of the carcass. This in turn would allow for a better visual inspection of the cavity than is possible with a whole carcass. Finally, the separated portions of the carcass would be appropriately handled immediately after splitting. The white meat portion would immediately be chilled to the proper temperature for direct sale to consumers while the dark meat portion, which is usually processed, could be directly deboned and used in further processed cooked products. This rulemaking is being initiated in response to a petition received in November 1994.

475. • IDENTIFICATION OF THE ORIGIN OF SAUSAGE CASINGS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 21 USC 451 et seq; 21 USC 601 et seq

CFR Citation: 9 CFR 317; 9 CFR 381

Legal Deadline: None

Abstract: The Food Safety and Inspection Service has been petitioned by the State of Connecticut to amend the Federal meat inspection regulations to require that natural sausage casings be labeled as to their animal origin, i.e., species of livestock from which the casing is made. The regulation change is requested so that consumers may more easily select products on the basis of animal origin as needed to conform to religious or other dietary restrictions.

476. • GLYCERINE USED AS A HUMECTANT IN SHELF STABLE MEAT SNACKS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 317

Legal Deadline: None

Abstract: The Food Safety and Inspection Service (FSIS) is proposing to amend the Federal meat inspection regulations to permit the use of food grade glycerine as a humectant in shelf stable meat snacks. It is proposing that the glycerine be used at a level not to exceed 2 percent of the formulation weight of the product. This proposed rule is in response to a petition submitted by the American Association of Meat Processors (AAMP), Elizabethtown, Pennsylvania. As a humectant, glycerine controls moisture in meat products and, at the 2 percent level, it reduces the amount of water available for microbial growth to occur. This use is Generally Recognized as Safe (GRAS) by FDA.

477. REQUIREMENTS FOR FOREIGN COUNTRY IMPORT CERTIFICATION AND LIVE ANIMAL IMPORTATION

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: PL 99-198

CFR Citation: 9 CFR 327; 9 CFR 381

Legal Deadline: None

Abstract: This rule will respond to amendments to the Federal Meat Inspection Act by the Food Security Act of 1985. The amendments require that FSIS periodically certify residue control programs submitted by foreign countries desiring to export meat and poultry products to the United States. The amendments also provide the Secretary with the authority to issue an order prohibiting the importation of livestock for immediate slaughter that have been administered a drug or antibiotic banned for use in the United States.

480. USE OF SOY PROTEIN CONCENTRATE AND FOOD STARCH—MODIFIED AS BINDERS IN CURED PORK PRODUCTS

Priority: Routine and Frequent

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 318

Legal Deadline: None

Abstract: The Food Safety and Inspection Service (FSIS) plans to increase the permitted use level of food starch-modified and approve the use of soy protein concentrate in certain cured pork products. The technical effect of these substances when added to product is to reduce water purge (pumped brine) from the product. Both of these substances are listed in the Food and Drug Administration regulations as generally recognized as safe for use in foods in accordance with good manufacturing practice. The technical data and information supplied by the petitioners (Central Soya, Fort Wayne, IN, and the National Starch and Chemical Company, Bridgewater, NJ), have been received and it has been determined that the use of these substances is functional and suitable for the intended purpose. This rule only makes minor, technical changes to the chart of substances approved for use in meat products.

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 21 USC 601 et seq

CFR Citation: 9 CFR 318

Legal Deadline: None

Abstract: This proposed rule would amend the Federal meat inspection regulations to permit the use of potassium hydroxide as a hog scald agent. Potassium hydroxide is chemically similar to sodium hydroxide, another approved hog scald agent; however, potassium has been exchanged for the sodium. Potassium hydroxide is more soluble in water than other processing aids used in hog scald agents. As a result, hog scald agents formulated with other substances. Potassium hydroxide is affirmed as GRAS under 21 CFR 184.1631 and is approved for direct use in food as a pH control agent and processing aid. This rulemaking is being initiated in response to a petition received in March 1995. The petitioner wa s granted approval to use the process. The regulatory action is being delayed due to other priorities.

497. • REENTRY OF COTTON INTO THE UNITED STATES

Priority: Other

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will eliminate existing text in the CFR.

Legal Authority: PL 103-465

CFR Citation: 7 CFR 6.71 to 6.75

Legal Deadline: None

Abstract: The proposed rule would eliminate the requirement and procedures to obtain certificates from the Secretary of Agriculture in order to reenter U.S. cotton into the United States against an offsetting unsubsidized cotton export. This was a provision for ex-quota entry of U.S. cotton under certain circumstances because Section 22 provided for a zero quota on the reentry of cotton grown in the United States. As a result of the Uruguay Round Agreements, this provision has been eliminated from the Harmonized Tariff Schedule of the United States and the ban on the reentry of U.S. cotton has been replaced by a tariff-rate quota on cotton imported from any country.

498. • CALCULATION OF MARKET STABILIZATION PRICE

Priority: Other

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will eliminate existing text in the CFR.

Legal Authority: Presidential Proclamation 5002, 47 FR 54269

CFR Citation: 7 CFR 6.100 to 6.102

Legal Deadline: None

Abstract: The proposed rule would eliminate the requirement that the Secretary of Agriculture calculate and publish a market stabilization price for sugar to establish a basis for liquidated damages in the Sugar Re-export Programs. Since 1990, the MSP has not been used for any purpose in the re-export programs, and the Secretary has not published an MSP since 1989. The MSP was used for two separate regulatory functions since its inception, which are no longer used. Thus this CFR subpart can be deleted.

500. SECTION 22 IMPORT QUOTAS

Priority: Economically Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: EO 3019

CFR Citation: 7 CFR 6.20 to 6.34

Legal Deadline: Final, Statutory, January 1, 1995.

Abstract: Provides for quotas for certain dairy and other agricultural products to prevent material interference with the domestic price support program for these commodities. In the case of dairy products, controls are administered through a licensing procedure so that the quotas may be allocated in a fair and equitable manner among importers and users. A fee is charged for each license issued to recover the costs of administering the licensing system. Procedures used to implement section 22 import quotas will need to be revised as the Uruguay Round multilateral trade agreement is implemented.

501. CCC EXPORT CREDIT GUARANTEE PROGRAM (GSM-102) AND CCC INTERMEDIATE EXPORT CREDIT GUARANTEE PROGRAM (GSM-103)

Priority: Economically Significant

Legal Authority: 15 USC 714(b); 15 USC 714(f); 7 USC 5602; 7 USC 5622; 7 USC 5661; 7 USC 5663; 7 USC 5664; 7 USC 5676

CFR Citation: 7 CFR 1493

Legal Deadline: None

Abstract: The proposed Rule will amend regulations for CCC export credit guarantee programs by adding a new subpart D, supplier credit guarantee program. Subpart D will establish the terms and conditions by which U.S. exporters of U.S. agricultural commodities and products may obtain CCC credit guarantees for short term credits extended directly to foreign buyers

502. REGULATIONS GOVERNING THE FINANCING OF COMMERCIAL SALES OF AGRICULTURAL COMMODITIES (P.L. 480 TITLE I PROGRAM)

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1701 to 1705; 7 USC 1736 (a); 7 USC 1736 (c); 7 USC 5676; EO 12220

CFR Citation: 7 CFR 17

Legal Deadline: None

Abstract: The Final Rule clarifies the Interim Rule published 2/1/91 in response to the 1990 food, agriculture, conservation and trade act; it changes the basis for demurrage/despatch computations and payments, expands U.S. government access to records, and clarifies certain reporting requirements. This eliminates the potential for certain conflicts of interest under the P.L. 480, Tile I program, keeps program costs as low as possible, insures fair and equitable treatment to suppliers, and reflects USDA administrative reorganization

Final Rule Stage

503. • REGULATIONS GOVERNING THE FINANCING OF COMMERCIAL SALES OF AGRICULTURAL COMMODITIES (P.L. 480, TITLE I)

Priority: Other Significant

Legal Authority: 7 USC 1701 to 1705; 7 USC 1736a; 7 USC 1736c; 7 USC 5676; EO 1220

CFR Citation: 7 CFR 17

Legal Deadline: None

Abstract: The Public Law 480, Title I Financing Regulations specify the documents which the suppliers of commodities and of ocean transportation must present to the bank to receive payment. One of these is Form CCC-106, "Advice of Vessel Approval," issued by CCC, providing the written approval for each shipment and containing details of the ocean freight contract terms. This proposed rule would eliminate the requirement that the commodity supplier present this form to be paid, since the commodity supplier has no control over the ocean transportation. It would also shorten Appendices A and B of the regulations, which specify the basic contracting and documentary requirements for CCC to finance a wide variety of commodities. The proposed rule would eliminate from Appendices A and B the sections covering 15 commodities which have not been shipped for five years or more.

510. • REFORM OF EXPORT BONUS PROGRAM

Priority: Other Significant

Legal Authority: PL 103-465

CFR Citation: 7 CFR 1494; 7 CFR 1570

Legal Deadline: None

Abstract: The advance notice of proposed rulemaking requests comments on the commodity credit corporations export bonus programs. The EEP, DEIP, SOAP, and COAP options for reform of these export bonus programs are being considered as an effort to respond to the GATT Uruguay Round Agreement that established new mandates for USDA/CCC's export subsidy programs. additionally, programs more flexible in responding to changing world market conditions and serve to fulfill policy goals for increased administrative efficiency and lower program costs.

512. SMALL TRACTS ACT REGULATIONS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 521(c) to 521(i)

CFR Citation: 36 CFR 254, subpart C

Legal Deadline: None

Abstract: Implementation of the Agency's Small Tracts regulations has revealed an inadvertent inconsistency between the regulations at 36 CFR 254.35(f) and 254.41(a) and the legislative history of the Small Tracts Act of January 12, 1983. The regulations imply that the disposal of mineral fractions by sale can only be made in response to an application from an abutting landowner, thus discouraging the conveyance by sale to the public. The Act clearly authorizes sale of mineral fractions to the public through public sale, as well as individual applications, provided that certain conditions are met. The revisions will clarify the application of the Act to ensure that both individual applications and public sale are permissible means of disposing of qualifying tracts.

513. ISOLATED CABIN POLICY

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 477 to 482; 16 USC 551

CFR Citation: 36 CFR 251

Legal Deadline: None

Abstract: Agency policy is to terminate isolated cabin authorizations on National Forest System land that were constructed without advance authorization and subsequently authorized by special-use permit. These cabins are used for part- or full-time occupancy. These cabins differ from recreation residences which were established in tracts specific for this purpose and built with Agency approval and supervision. Isolated cabins originated in several ways, including encroachment and mining claims. They restrict management of the surrounding National Forest land and deprive the public the use and enjoyment of the land actually occupied and the surrounding area. The action proposed is to seek input from the public as to whether the present policy should be continued, or whether it should be revised so as to examine each isolated occupancy and determine whether, in the interest of fairness and equity, the cabin should be converted to a recreation residence. This proposal to revise current policy was originally included in proposed policy on recreation residences (RIN No. 0596-AB06).

514. SOLID WASTE DISPOSAL POLICY

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 497; 43 USC 931(c)

CFR Citation: 36 CFR 251

Legal Deadline: None

Abstract: A proposal for solid waste disposal sites currently authorized for use on National Forest System lands is being developed to reflect changes which have occurred as a result of the Resource and Conservation Recovery Act, the Comprehensive Environmental Response, Compensation, and Liability Act, and an increased knowledge of solid waste disposal. The proposal would prohibit the authorization of new sites and provide for the phase-out of existing sites. During the phase out period authorizations would be amended to provide resource protection. Adoption of this policy would reduce administrative costs associated with administration of solid waste disposal sites, and protect the resources of the National Forest System lands. The proposal would impact 110 sites currently authorized.

515. IRREVOCABLE LETTER OF CREDIT

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 472a; 16 USC 528 to 531; 16 USC 1600 et seq; 12 USC 1 et seq

CFR Citation: None

Legal Deadline: None

Abstract: In a 1987 court decision, a letter of credit issued in lieu of surety bond was found to be unenforceable because the person who signed the letter of credit did not have authority to do so and because the bank had violated State law in regard to limits of liability. To remedy this problem, the Forest Service is proposing to issue a requirement that the bank president certify as to the authority of the person signing the letter of credit and the conformance with State and Federal statutes. An automatic extension of the expiration date would also be required.

516. TIMBER SALE PERFORMANCE AND PAYMENT BOND FORM REVISION

Priority: Other Significant

Legal Authority: 31 USC 9301 to 9309; 31 USC 223 to 225

CFR Citation: None

Legal Deadline: None

Abstract: Following a period of high-priced timber sales bid prior to 1982, the Forest Service experienced a number of contract defaults on these sales. Subsequently, the Forest Service has had difficulty collecting from some sureties on the bonds guaranteeing performance on these sales. As part of a financial security initiative affecting future sales, the Forest Service is proposing to revise the payment and performance bonds to clarify surety's obligation in regard to what is being guaranteed, when payment is due in case of default, what additional charges will be assessed if payment is not made when due and when collection action may be suspended. Other alternatives include eliminating surety bonds as a form of security, reducing surety guarantee to mid-point and periodic payment and retention of current bond forms. Upon adoption, the final revised bond forms will be issued for use by Forest Service Contracting and Fiscal Officers for future timber sale contracts. The former title, Surety Bond Form Revision, has been modified to more accurately reflect the content of the proposed rule.

Proposed Rule Stage

natural resource and environmental legislation and clarify the rights, responsibilities, and obligations of the contracting parties. The proposed policies revised the timber sale contract forms, distribute liability and risk more equitably between the parties, bring the timber sale contract into conformance with standard business practices, and clarify the responsibilities of both parties. The proposed contract revision requires amendments to current regulations, specifically contract cancellation and extension of the contract to facilitate the urgent removal of timber from non-Federal land. Urgent removal of damaged timber requires the delay of other scheduled harvests in some situations so that damaged timber on non-Federal land can be harvested more rapidly. Also included as part of the proposal is a revision of the performance bond forms.

518. SPECIES SURPLUS TO DOMESTIC MANUFACTURING NEEDS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 620 et seq

CFR Citation: 36 CFR 223.200

Legal Deadline: None

Abstract: This proposed rule would amend 36 CFR 223.200, to list species proposed to be surplus to domestic manufacturing needs. This proposed rule would implement a portion of section 620a(b) of the Forest Resources Conservation and Shortage Relief Act of 1990 (16 USC 620 et seq). Section 620a(a) of the Act provides that no person who acquires unprocessed timber originating from Federal lands west of the 100th meridian in the contiguous 48 States may export such timber from the United States, or sell, trade, exchange or otherwise convey such timber from the United States, unless such timber has been determined under subsection (b) to be surplus to the needs of timber manufacturing facilities in the United States. Section 620a(b) of the Act provides that the prohibition contained in section (a) shall not apply to specific quantities of grades and species of unprocessed timber originating in Federal lands which the Secretary concerned determines through rulemaking to be surplus to domestic manufacturing needs.

519. RETENTION OF DOWNPAYMENT ON TIMBER SALE CONTRACTS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 472(a); 16 USC 618

CFR Citation: 36 CFR 223.49

Legal Deadline: None

Abstract: The Federal Timber Sale Contract Payment Modification Act directs the Forest Service to require purchasers to make downpayments and periodic payment on timber sales. The objective of these requirements is to discourage speculative bidding on National Forest System timber sales. This rule will identify the requirements to hold downpayments until the timber sale contract is substantially completed.

520. NATIONAL FOREST SYSTEM LAND AND RESOURCE MANAGEMENT PLANNING FOREST SERVICE MANUAL CHAPTER 1920

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1600 et seq

CFR Citation: None

Legal Deadline: None

Abstract: The proposed manual policy would incorporate all direction for land and resource management planning into one Forest Service Manual chapter (FSM 1920). The proposed policy would clarify how the revised land and resource management planning regulations at 36 CFR 219 will be implemented. The proposal will focus on implementing forest plans: monitoring, evaluating, amending, and revising forest plans; and clarifying the relationship between forest planning and project decisionmaking. (See entry for RIN 0596-AB20.)

521. USE OF FIXED ANCHORS FOR ROCK CLIMBING IN WILDERNESS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1121; 16 USC 1131 to 1136

CFR Citation: 36 CFR 261.16; 36 CFR 293.9

Legal Deadline: None

Abstract: The sport of rock climbing is often accomplished by using fixed, rather than removable, metal bolts and anchors. These bolts are considered permanent improvements when installed. These improvements may detract from the wilderness experience and are not compatible with management of the wilderness resource. The Forest Service proposes to reduce impacts on the wilderness resource by prohibiting all use of fixed anchors in the wilderness.

523. EXERCISE OF OUTSTANDING MINERAL RIGHTS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 478; 16 USC 1613; 30 USC 181; 30 USC 228; 43 USC 1740

CFR Citation: 36 CFR 228, subpart F

Legal Deadline: NPRM, Statutory, December 24, 1992.

Abstract: This subpart will set forth the rules by which the Forest Service will carry out its statutory responsibilities for the management of oil and gas operations involving outstanding mineral rights on National Forest System lands within the Allegheny National Forest. These rules will, as required by the energy bill, PL 102-486, identify that information an owner of outstanding mineral rights must submit to the Forest Service 60 days prior to beginning operations and how the Forest Service will review such information..

The Forest Service did not consider other alternatives because these regulations are mandated by law. Public costs are insignificant but public benefits could be substantial in that Forest Service and industry cooperation should be enhanced.

Abstract: Based on General Accounting Office Testimony Report Number T-RCED-92-58, 04/28/92, the Secretary of Agriculture agreed to reexamine the use of the Bureau of Labor Statistics unadjusted indices to determine whether wood product prices have shown a drastic decline. The Secretary of Agriculture indicated the Forest Service would develop and publish for comment a proposed rule to use an alternative method to determine whether wood prices have drastically declined and warrant granting of a Market-Related Contract Term Addition. The proposed rulemaking proposes minor changes in procedures to determine whether a drastic reduction in wood product prices has occurred.

USDA—FS

Proposed Rule Stage

Abstract: The Omnibus Reconciliation Act of 1993 authorizes the private sale of Golden Eagle Passports. The Act also directs that such sales will be subject to such terms and conditions as the Secretaries of Agriculture and Interior may jointly prescribe, including detailed guidelines for promotional advertising, compliance monitoring, and withholding the cost of sales not to exceed eight percent. The purpose of this regulation is to establish the terms and conditions for the private sale of Golden Eagle Passports.

526. APPEAL OF DECISIONS RELATING TO OCCUPANCY AND USE OF NATIONAL FOREST SYSTEM LANDS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 472; 16 USC 551

CFR Citation: 36 CFR 251, subpart C

Legal Deadline: None

Abstract: These proposed regulations are housekeeping amendments to 36 CFR Part 251, Subpart C, to correlate with regulations at 36 CFR Part 215 and with statutory direction. For example, changes to Part 251 would clarify the application of this rule to the issuance of permits for occupancy and use of National Forest System lands. After further consideration, the Agency does not intend to proceed with timber sale set aside regulations as stated in the previous regulatory agenda since the set aside revisions are not related to special use permits. When 36 CFR Part 251, Subpart C, regulations were promulgated in 1989, NEPA analysis and documentation was not consistently applied to issuance of permits or other authorizations. Now the issuance of permits and other authorization requires application of the NEPA process prior to issuance. In addition, since these regulations were implemented, Congress has passed the Appeal Reform Act. The proposed changes to Part 251, Subpart C, are needed to make this regulation consistent with regulations at 36 CFR Part 215. Specific proposed changes to 36 CFR Part 251 include removing the second level of appeal opportunity, deleting the discretionary review option, shortening timeframes for scheduling oral presentations, and changes to conform with 36 CFR Part 215, including consistent terminology and definitions as well as removal of the automatic stay on permit issuance prior to appeal resolution.

527. SALE AND DISPOSAL OF NATIONAL FOREST SYSTEM TIMBER; EXTENSION OF TIMBER SALE CONTRACTS TO PERMIT URGENT REMOVAL OF OTHER TIMBER

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 472a

CFR Citation: 36 CFR 223.50; 36 CFR 223.53

Legal Deadline: None

Abstract: This rule and policy change will provide for extension of National Forest System (NFS) timber sale contracts when such extension will permit the prompt removal and utilization of non-NFS owned timber damaged by catastrophic events. The change will define the responsibilities of the parties for requesting and approving such extensions and specify when such extension should be approved. This change will also allow for the use of scarce timber resources and the recovery of economic benefits from timber that might otherwise be lost because of contractual obligations to harvest undamaged timber.

528. DISPOSAL OF NATIONAL FOREST TIMBER: TIMBER SALE CONTRACT REVISIONS

Priority: Other Significant

Legal Authority: PL 94-588; 16 USC 472a; 16 USC 528; 15 USC 631

CFR Citation: 36 CFR 223, subpart B

Legal Deadline: None

Abstract: This proposed policy would revise the 2400-6 and the 2400-6T timber sale contracts currently used by the Forest Service to sell National Forest System timber. The proposed timber sale contracts, included as part of the proposed policy, would reflect recent court decisions and recent natural resource and environmental legislation and would clarify the rights, responsibilities, and obligations of the contracting parties. The proposed policy would address specific ambiguities and weaknesses in the current contract that have generated costly litigation in the past between the Government and the purchaser and would address the concerns regarding timber theft and log accountability.

CFR Citation: 36 CFR 222, subpart A

Legal Deadline: None

Abstract: This rule revises National Forest System rangeland management regulations to update direction for management of domestic livestock, to place greater emphasis on stewardship of the rangeland resources, to clarify the link between the livestock grazing permit and forest plans, and to clarify the rangeland management planning and decisionmaking process. The rule addresses the context in which plans and decisions regarding rangeland management are made to ensure compliance with the National Forest Management Act (16 U.S.C. 1601(i)) and the National Environmental Policy Act (NEPA).

531. HYDROPOWER APPLICATIONS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 551; 43 USC 1761

CFR Citation: 36 CFR 251.54; 36 CFR 251.57

Legal Deadline: None

Abstract: A revision of Agency procedures is needed to reduce confusion regarding the role of the Forest Service in permitting hydropower uses on National Forest System lands. The goal of the directives will be to establish procedures, compatible with the procedures of the Federal Energy Regulatory Commission (FERC), for obtaining various approvals and involvement of the Forest Service in a timely manner.

In addition, the directives will establish a fee system for hydropower uses as required by Title V, Section 501 of the Federal Land Policy and Management Act of 1976. A Notice of Proposed Policy was published 6/8/84 and comments were received. The proposed policy will take those comments into account.

Abstract: This rule sets forth Forest Service procedures and role in the regulation of Indian allotments on

USDA—FS

Final Rule Stage

National Forest System land. The Indian Allotment Act, as amended, authorizes the Secretary of the Interior to make allotments of National Forest System lands to Indians for homesteading and agricultural and grazing purposes. The Forest Service has relied upon USDI rules and procedures at 43 CFR 2533 to govern its involvement in Indian allotment cases. Litigation and a decision by the Interior Board of Land Appeals require the Forest Service to set forth its own regulations.

Legal Deadline: Final, Statutory, May 20, 1991.

Abstract: These rules are necessary to carry out the restrictions placed on the export of unprocessed timber from Federal lands and the restrictions on the direct and indirect purchasing of Federal logs to be used in substitution for the export of unprocessed timber originating from private lands. The rules are mandated by the Forest Resources Conservation and Shortage Relief Act of August 20, 1990. The Act calls for various rules to be issued. The agency anticipates several rulemakings to achieve implementation of the act.

536. STATE AND PRIVATE FORESTRY ASSISTANCE STEWARDSHIP INCENTIVE PROGRAM

Priority: Other Significant

Legal Authority: 16 USC 2101 et seq

CFR Citation: 36 CFR 230

Legal Deadline: None

Abstract: This final rule would incorporate any changes resulting from public comments on the interim rule published December 4, 1991. The interim rule established the interim procedures for administration of the Stewardship Incentive Program. The Program is intended to encourage private landowners, through cost-share assistance, to manage their forest lands for economic, environmental, and social benefits. Only two alternatives were considered in detail: (1) to implement the Program in accordance with 16 USC 2101, et seq, and (2) not to implement the Program, in which case there would be no accelerated program for multiple resource management on nonindustrial private forest lands. The overall effects of the Program over time will be environmentally beneficial by enhancing wetlands, wildlife habitat, forest health, forest productivity, and recreation. The Program will help meet future demand for commodity and noncommodity forest resources. There are no potential negative impacts anticipated for the Program.

CFR Citation: 36 CFR 251(b)

USDA—FS

Final Rule Stage

Legal Deadline: None

Abstract: The Forest Service proposes to amend the regulations governing the use and occupancy of National Forest System lands to minimize application expenses, streamline and make more efficient environmental analysis of special use proposals, provide the ability to use one-time payments for easements as presently used in the marketplace, limit certain liability requirements to amounts determined by a risk assessment, make certain definitions more explicit, and clarify direction on renewal of existing special use regulations. The intended effect is to reduce costs to proponents and the agency, expedite decisionmaking, and administer authorizations in a more "user friendly" manner by removing certain requirements deemed unnecessary and/or outdated. This rulemaking responds to goals identified in the National Performance Review Regulatory Reform effort.

538. SMITH RIVER NATIONAL RECREATION AREA

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 460bbb(6); 16 USC 478; 16 USC 551

CFR Citation: 36 CFR 292, subpart G

Legal Deadline: None

Abstract: This subpart will set forth the rules by which the Forest Service will carry out its statutory responsibilities for the management of mineral operations on National Forest System lands within the Smith River National Recreation Area, Six Rivers National Forest. These rules will, as required by the Smith River National Recreation Area Act (PL 102-612), promote and protect recreation opportunities but still allow for mineral operations to take place. The Forest Service did not consider other alternatives because these regulations are mandated by law. Public costs are insignificant, but the public benefits could be substantial in that Forest Service and industry cooperation should be enhanced.

539. OCCUPANCY AND USE OF DEVELOPED SITES AND AREAS OF CONCENTRATED PUBLIC USE

Priority: Other Significant

Legal Authority: 16 USC 551; 16 USC 472; 16 USC 4601 to 4606(a); 16 USC 1281(d); 16 USC 1246 (i); 16 USC 1133 (b); 31 USC 9701; PL 103-66

CFR Citation: 36 CFR 291

Legal Deadline: None

Abstract: The Omnibus Reconciliation Act of 1993 authorizes admission fees at National Recreation Areas, National Monuments, National Volcanic Monuments, National Scenic Areas, and no more than 21 areas of concentrated public use. Currently 36 CFR 291.9 does not reflect the new authority to charge fees at the 21 areas of concentrated public use. This final rule is a technical amendment to reflect this new authority. The admission fees are expected to return about five million dollars to the Treasury when fully implemented. Costs to collect the fees are estimated at $1.24 million annually. States and counties will receive 25 percent of the fee collections.

540. SKI AREA PERMIT FEE SYSTEM

Priority: Other Significant

Legal Authority: PL 99-522; 16 USC 497b

CFR Citation: 36 CFR 251.57

Legal Deadline: None

Abstract: The Forest Service proposes to revise existing procedures for determining permit fees for the use of National Forest System lands by ski areas. Permit fees for most ski areas operating on National Forest System lands are determined under the graduated rate fee system (GRFS). As applied to large ski areas, GRFS is complex and costly to administer, and has thus been the subject of several audits, administrative appeals, and lawsuits. Under the proposed policy, the Agency would determine permit fees by site-specific appraisal of the use of National Forest System land by ski areas.

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 301; 41 USC 701 et seq; EO 12549

CFR Citation: 7 CFR 3017

Legal Deadline: None

Abstract: USDA proposes to amend its regulations that implement Executive Order 12549, "Debarment and Suspension." E.O. 12549 required executive agencies and departments to issue by the Office of Management and Budget (OMB), to establish governmentwide debarment and suspension system by making appropriate modifications to the coverage of the regulations and clarifying the relationship of the regulations to other USDA procedures for establishing participant eligibility for specific programs.

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1989; 7 USC 1926

CFR Citation: 7 CFR 4284; 7 CFR 1951

Legal Deadline: None

Abstract: The Rural Business and Cooperative Development Service proposes this action to add a new regulation implementing a grant program to fund local technical assistance and planning activities in rural areas for the purpose of improving economic conditions in the areas. Grants will be available to public bodies and nonprofit organizations. This action is necessary to comply with P.L. 101-624. Grants may be used for technical assistance and training for small businesses, identifying and analyzing business opportunities in rural areas, establishing business support centers, conducting local or multi-county economic development planning, coordination of economic development activities, and leadership development training of local government officials.

Legal Deadline: Other, Statutory, May 28, 1991.
The Extension Service had $1 million for the program in its FY '93 budget and has funds for FY '94.

Abstract: This action will add a new regulation implementing a grant program to fund the establishment and operation of centers for rural technology or cooperative development. Grants will be available to public bodies and nonprofit organizations. This action is necessary to comply with PL 101-624. An aim of this program is to stimulate nonfederal participation in economic development activities and allow grant funds to reach a broad range of rural economic development efforts.

557. INTERMEDIARY RELENDING PROGRAM REWRITE

Priority: Other Significant

Legal Authority: 7 USC 1932 note; 5 USC 301

CFR Citation: 7 CFR 1948

Legal Deadline: None

Abstract: This regulatory package is an initiative to enhance the program through revisions based on experience with operation of the program. The primary changes under consideration include the following: (1) Provide clarifications as to which requirements apply only to Rural Business and Cooperative Development Service (RBCDS) Intermediary Relending Program (IRP) loan funds and which apply to everything in the IRP revolving funds, (2) Authorize State Offices to accept and process applications, (3) Clarify conditions under which an intermediary that does not have lending experience may qualify, (4) Provide that proposed intermediaries that are delinquent on a Federal debt are not eligible, (5) Authorize loans for refinancing, (6) Provide general guidelines for interest rates and terms of loan to ultimate recipients, (7) Provide that intermediaries may receive a series of subsequent loans of up to $1 million each and raise the ceiling on loans to an ultimate recipient to $250,000, (8) Provide for a reserve for bad debts, (9) Allow intermediaries to draw up to 25 percent of their loan at loan closing, (10) Revise application requirements to eliminate some items, provide more detail and provide for streamlined subsequent loan applications, (11) Adjust the priority point scoring system, (12) Provide guidelines for RBCDS concurrence in proposed loans to ultimate recipients.

558. • RURAL ECONOMIC DEVELOPMENT LOAN AND GRANT PROGRAM

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 940c

CFR Citation: 07 CFR 1703 subpart B

Legal Deadline: None

Abstract: The current provisions that govern grant fund disbursement that were published on March 14, 1994, and October 27, 1994, need to be revised to provide more flexibility to advance grant funds to electric and telephone borrowers (the "grantees"). The agency will review on a case-by-case basis the requirements for disbursement of funds and provide for the advance of funds on an appropriate basis. This rule will greatly improve the Agency's ability to advance grant funds in a manner that is in both the government and the grantee's best interest. The Agency and current grantees believe the changes should be made effective as soon as possible to avoid financial hardships for both the grantees and the ultimate recipients who will receive loans from the revolving loan funds.

574. LOAN DEFERMENTS FOR ENERGY RESOURCES CONSERVATION - ELECTRIC PROGRAM

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 901 et seq

CFR Citation: 7 CFR 1717, subpart L

Legal Deadline: None

Abstract: This regulation will codify and update the current Rural Utilities Service (RUS) policy implemented through an RUS bulletin which will be rescinded when this rule is published final. This action is necessary to permit a principal payment extension of monthly billed accounts for the purpose of Energy Resources Conservation (ERC) loans. The current ERC loan program implemented in 1980 allows for the extension of only quarterly principal payments. All RUS loans approved on or after September 1, 1982, require monthly repayments while those loans approved prior to that date required quarterly repayments. This new regulation will codify the current ERC loan program and will amend it to include monthly billed accounts. Most RUS loans have a repayment period of 3.5 years.

575. POWER REQUIREMENT STUDIES

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 901 to 950(b); PL 99-591

CFR Citation: 7 CFR 1710 E

Legal Deadline: None

Abstract: The Rural Utilities Service (RUS) is proposing to update its Power Requirements currently contained in Subpart E of 7 CFR part 1710, Pre-loan Policies and Procedures for Insured and Guaranteed Electric Loans. The updates to subpart E are needed to reflect the addition to 7 CFR 1710 of Subpart H, Loans for Demand Side Management, Energy Conservation Programs, and On-Grid and Off-Grid Renewable Energy Systems. Subpart H was required by the Rural Electrification Loan Restructuring Act of 1993. Other changes to Subpart E are intended to clarify the existing language without changing its overall intent.

576. • POLICY ON AUDITS OF RUS BORROWERS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 901 et seq; 7 USC 1921 et seq

CFR Citation: 7 CFR 1773

Legal Deadline: None

Abstract: This rule incorporates changes to the audit regulation necessitated by the 1994 revision of Government Auditing Standards issued by the Comptroller General of the United States effective January 1, 1995 and by Statement of Auditing Standards No. 74 issued by the Auditing Standards Board of the American Institute of Certified Public Accountants.

577. • STREAMLINING THE RURAL UTILITIES SERVICE'S WATER AND WASTE PROGRAM REGULATIONS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 1989; 16 USC 1005; 5 USC 301

CFR Citation: 7 CFR 1680; 7 CFR 1690

Legal Deadline: None

Abstract: RUS amends the regulations utilized to administer the Water and Waste disposal loan and grant programs. The rule will combine the water and waste loan and grant regulations into one regulation. Unnecessary and burdensome requirements for entities seeking financial assistance under the programs will be eliminated.

580. LONG-RANGE FINANCIAL FORECASTS OF ELECTRIC BORROWERS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 7 USC 901 to 950(b); PL 99-591

CFR Citation: 7 CFR 1710, subpart G

Legal Deadline: None

Abstract: The Rural Utilities Service (RUS) proposes to amend its pre-loan regulations for electric loans to clarify and revise the requirement that borrowers submit to RUS a long-range financial forecast as part of an application for a loan, loan guarantee, lien accommodation. This proposed rule is intended to strengthen credit practices and to assist borrowers in preparing, and RUS staff in reviewing loan applications.

582. COMMUNITY FACILITY LOANS - TIMBER-DEPENDENT COMMUNITIES

Priority: Substantive, Nonsignificant

Legal Authority: PL 103-427

CFR Citation: 7 CFR 1942 subpart A

Legal Deadline: None

Abstract: The revised regulations will implement Pub. L. 103-427, that ensures timber-dependent communities in the Pacific Northwest, adversely affected by the "Forest Plan for a Sustainable Economy and a Sustainable Environment," dated July 1993, qualify for certain rural development loans and grants. Pub. L. 103-427 temporarily expands population eligibility for certain development loans and grants for a limited number of rural communities in the Pacific Northwest.

Semiannual Agenda of Regulations

AGENCY: Office of the Secretary, Commerce.

ACTION: October 1995 regulatory agenda.

SUMMARY: In compliance with Executive Order (E.O.) 12866 entitled "Regulatory Planning and Review" and the Regulatory Flexibility Act (Pub. L. 96-354), the Department of Commerce, in April and October of each year, publishes in the **Federal Register** an agenda of regulations under development or review over the next 12 months. Rulemaking actions are grouped according to prerulemaking, proposed rules, final rules, and rulemaking actions completed since the April 1995 agenda. The purpose of the agenda is to provide information to the public on regulations currently under review, being proposed, or issued by the Department. The agenda is intended to facilitate comments and views by interested members of the public.

The Department's October 1995 regulatory agenda includes regulatory activities that are expected to be conducted during the period October 1, 1995, through September 30, 1996.

FOR FURTHER INFORMATION CONTACT:

Specific: For additional information about specific regulatory actions listed in the agenda, contact the individual identified as the contact person.

General: Comments or inquiries of a general nature about the agenda should be directed to Michael A. Levitt, Assistant General Counsel for Legislation and Regulation, U.S. Department of Commerce, Washington, DC 20230; telephone: 202-482-0846.

SUPPLEMENTARY INFORMATION: E.O. 12866 requires agencies to publish an agenda of those regulations that are under consideration pursuant to this order. By memorandum of August 2, 1995, the Office of Management and Budget (OMB) issued guidelines and procedures for the preparation and publication of the October 1995 Regulatory Plan and Unified Agenda of Federal Regulations. The Regulatory Flexibility Act, 5 U.S.C. 602(a), requires agencies to publish, in April and October of each year, a regulatory flexibility agenda which contains a brief description of the subject area of any rule which is likely to have a significant economic impact on a substantial number of small entities.

Reinventing Government

As part of the President's Regulatory Reform Initiative, the President directed agencies to conduct a page-by-page review of all regulations and eliminate or revise those that are outdated or otherwise in need of reform. The October 1995 agenda contains information on the Department's review of its regulations and identifies whether or not a current rule making is part of the Regulatory Reform and Reinventing Government effort. A number of regulations will be eliminated. Other regulations will be revised to reduce burden or duplication or to streamline the requirements.

Department of Commerce Regulatory Plan

For this edition of the Department of Commerce's agenda, the most important significant regulatory actions are included in The Regulatory Plan, which appears in Part II of this issue of the **Federal Register**. The Regulatory Plan entries are listed in the Table of Contents below and are denoted by a bracketed bold reference, which directs the reader to the appropriate Sequence Number in Part II.

Explanation of Information Contained in the Agenda

Within the Department, the Office of the Secretary and various operating units may issue regulations. Operating units, such as the Bureau of Export Administration, the International Trade Administration, the National Oceanic and Atmospheric Administration (NOAA), and the Patent and Trademark Office, issue the greatest share of the Department's regulations.

A large number of regulatory actions reported in the agenda deal with fishery management programs of NOAA's National Marine Fisheries Service (NMFS). To avoid repetition of programs and definitions, as well as to provide some understanding of the technical and institutional elements of the NMFS programs, a section on "Explanation of Information Contained in NMFS Regulatory Entries" is provided below.

Explanation of Information Contained in NMFS Regulatory Entries

The Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) (Act) governs the management of fisheries within the Exclusive Economic Zone (EEZ). The EEZ refers to those waters from the outer edge of the State boundaries, generally 3 nautical miles, to a distance of 200 nautical miles. Fishery Management Plans (FMPs) are to be prepared for fisheries which require conservation and management measures. Regulations implementing these FMPs regulate domestic fishing and foreign fishing where permitted. Foreign fishing can be conducted in a fishery for which there is no FMP only if a preliminary fishery management plan has been issued to govern that foreign fishing. Under the Act, eight Regional Fishery Management Councils (Councils) prepare FMPs or amendments to FMPs for fisheries within their respective areas. In the development of such plans or amendments and their implementing regulations, the Councils are required by law to conduct public hearings on the draft plans and to consider the use of alternative means of regulating.

The Council process for developing FMPs and amendments makes it difficult for NMFS to determine the significance and timing of some regulatory actions under consideration by the Councils at the time the semiannual regulatory agenda is published.

The DOC October 1995 regulatory agenda follows.

Dated: September 13, 1995.

Ginger Lew,

General Counsel.

DOC

Office of the Secretary—Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
610	Standards of Ethical Conduct—Department of Commerce Supplemental Regulations	0690-AA23

Office of the Secretary—Long-Term Actions

Sequence Number	Title	Regulation Identifier Number
611	Contract Clauses and Solicitation Provisions for the Commerce Automated Solicitation System	0690-AA08

Office of the Secretary—Completed Actions

Sequence Number	Title	Regulation Identifier Number

DEPARTMENT OF COMMERCE (DOC)
Office of the Secretary (OS)
Proposed Rule Stage

610. STANDARDS OF ETHICAL CONDUCT—DEPARTMENT OF COMMERCE SUPPLEMENTAL REGULATIONS

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 301; 5 USC 7301; 5 USC 7353; 5 USC app Ethics in Government Act; 26 USC 7214(b); EO 12674, 54 FR 15159, 3 CFR, 1989 Comp, p 215 as modified; EO 12831, 55 FR 42547, 3 CFR, 1990 Comp, p 306; 5 CFR 2635.105

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: The Department of Commerce with the concurrence of the Office of Government Ethics (OGE) proposes to issue supplemental standards of ethical conduct for the officers and employees of the Department. The proposed rule will supplement the Standards of Ethical Conduct for Employees of the Executive Branch issued by the Office of Government Ethics. 5 CFR part 2635.

The proposed rule is a necessary supplement to the standards issued by OGE because it addresses ethical issues unique to the Department. The proposed rule establishes regulations which: (1) define "Agency Designee" for purposes of the Standards of Conduct; (2) designate agency components for purposes of the gift and outside employment rules; (3) limit employees from acquiring or retaining conflicting financial interests; (4) provide rules for seeking advice concerning determinations of appearances of impropriety; and (5) establish rules for prior approval regarding outside employment and activities.

613. • BENCHMARK SURVEY OF SELECTED SERVICES TRANSACTIONS WITH UNAFFILIATED FOREIGN PERSONS

Priority: Substantive, Nonsignificant

Legal Authority: 22 USC 3101 to 3108 Int'l Investment & Trade in Svc. Survey Act

CFR Citation: 15 CFR 801

Legal Deadline: None

Abstract: This is the quinquennial benchmark survey of selected services transactions with unaffiliated foreign persons (BE-20), which will cover transactions in 1996. It is conducted comprehensive data on a variety of business and professional services, such as advertising; computer and data processing services; management, consulting and public relations; legal services; and telecommunications. The data are needed for compiling the balance of payments and national income and product accounts, and will be used to develop international trade policy and to support U.S. trade policy initiatives. The data will also be used in deriving universe estimates in conjunction with the annual survey of such services transactions that is conducted in nonbenchmark years. Consideration is being given to expanding the number of services covered by this benchmark survey compared with the prior (1991) benchmark.

614. ANNUAL SURVEY OF FINANCIAL SERVICES TRANSACTIONS BETWEEN U.S. FINANCIAL SERVICES PROVIDERS AND UNAFFILIATED FOREIGN PERSONS

Priority: Substantive, Nonsignificant

Legal Authority: 22 USC 3101 to 3108 Int'l Investment & Trade in Svcs Survey Act; 15 USC 4908 Omnibus Trade and Competitiveness Act of 1988

CFR Citation: 15 CFR 801

Legal Deadline: None

Abstract: This action will create a new rule pertaining to a new survey of cross-border financial services transactions by U.S. financial services providers or intermediaries with unaffiliated foreign persons. The survey will cover transactions of U.S. commercial and investment banks, underwriters, brokers and dealers, credit card companies, mutual and pension funds, and other financial services providers or intermediaries. The annual survey will update and extend estimates made from data collected on the 1994 BE-80 Benchmark Survey of Financial Services Transactions Between U.S. Financial Services Providers and Unaffiliated Foreign Persons.

617. UNIFORM ADMINISTRATIVE REQUIREMENT FOR GRANTS AND AGREEMENTS WITH INSTITUTIONS OF HIGHER EDUCATION, HOSPITALS, AND OTHER NONPROFITS AND COMMERCIAL ORGANIZATIONS

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 301

CFR Citation: 15 CFR 14

Legal Deadline: None

Abstract: On November 29, 1993, Office of Management and Budget (OMB) Circular A-110, "Uniform Administrative Requirements for Grants and Agreements, with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations" was published in the Federal Register (58 FR 62992). In the published revised circular, OMB specified as "required action" that Federal agencies responsible for awarding and administering grants and other agreements to recipients described therein, shall adopt the language of the Circular unless other provisions are required by Federal Statute or exceptions or deviations are approved by OMB. This interim final rule adopts the provisions of the Circular and its language to the maximum extent feasible with minor language changes made to make the language apply specifically to the DOC and its operating units. This rule also contains certain policies that have been DOC policy for many years that may differ from the language of Circular A-110, but are consistent with and further implement the intent of Circular A-110 with DOC.

618. • COST PRINCIPLES FOR STATE, LOCAL, AND INDIAN TRIBAL GOVERNMENTS

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 301

CFR Citation: 15 CFR 6

Legal Deadline: None

Abstract: On May 17, 1995, Office of Management and Budget (OMB) Circular A-87, "Cost Principles for State, Local, and Indian Tribal Governments," was published in the Federal Register (60 FR 26484). In the published revised circular, OMB specified as "required action" that agencies responsible for administering programs that involve cost reimbursement contracts, grants, and other agreements with governmental units shall issue codified regulations to implement the provisions of the circular and its attachments. This interim final rule adopts the provisions of Circular A-87 to the maximum extent feasible with minor language changes made to make the language apply specifically to the DOC and its operating units.

620. ANTIDUMPING AND COUNTERVAILING DUTY PROCEEDINGS; ADMINISTRATIVE PROTECTIVE ORDER PROCEDURES AND PROCEDURES FOR IMPOSING SANCTIONS FOR VIOLATION OF A PROTECTIVE ORDER

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 5 USC 301; 19 USC 1677f

CFR Citation: 19 CFR 351; 19 CFR 354

Legal Deadline: None

Abstract: The Department needs to enhance the administrative efficiency of its investigations of alleged violations of administrative protective orders (APOs) and of the process for imposing sanctions for violations, as well as the fairness of the procedures to all concerned parties. In addition, the Department needs to simplify and streamline the APO administrative process and reduce the administrative burdens on the ITA and trade practitioners. The Department is considering a variety of amendments to its existing regulations to achieve these goals. With respect to APO violations and sanctions, the Department is considering (1) expedited procedures for certain APO violations that are uncontested, inadvertent, and technical; (2) providing for warnings to be issued where a finding of a violation would lead to unjustifiably harsh sanctions; (3) where warranted, permitting the agency to dismiss a charge without prejudice without the appointment or approval of an administrative law judge; (4) providing for a sunset provision that is fairer to past violators and that eases the administrative burden; and (5) permitting a private reprimand as a sanction without requiring as a precondition that parties engage in settlement discussions. The Department expects to benefit from gains in administrative efficiency and fairness without incurring any additional costs.

622. • PROPOSED CHANGES IN PROCEDURES FOR INSULAR WATCH PROGRAM

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 19 USC 1202, note; PL 97-446 sec 110; PL 103-465, sec 602

CFR Citation: 15 CFR 303

Legal Deadline: None

Abstract: This action invites public comment on a proposal to amend the ITA regulations which govern duty-exemption allocations and duty-refund entitlements for watch producers in U.S. Insular possessions (the Virgin Islands, Guam, and American Samoa) and the Northern Mariana Islands. The proposed amendments would modify procedures for completion and use of the "Permit to Enter Watches and Watch Movements into the Customs Territory of the United States" (Form ITA-340); make the technical changes required by the passage of the Uruguay Round Agreements Act in 1994; eliminate the mid-year report (Form ITA-321P); change the percentage creditable toward the duty-refund of for non-91/5 watch and watch movement repairs and raise one of the percentages in the formula for calculating the duty-refund; remove reference to watches and watch movements which are only ineligible for duty-free treatment due to value-limit reasons from the percentage of non-91/5 wages creditable toward the duty-refund; raise the maximum value of components for watches; and make other necessary changes to consolidate and simplify the regulations.

623. DEFENSE PRIORITIES AND ALLOCATIONS SYSTEM (DPAS)

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 50 USC app 2061 et seq; 50 USC app 468; EO 12656; EO 12742; EO 12919

CFR Citation: 15 CFR 700

Legal Deadline: None

Abstract: The Defense Priorities and Allocations System (DPAS) implements the priorities and allocations authority of title I of the Defense Production Act of 1950, as amended, and the priorities authority of section 18 of the Selective Service Act of 1948. The DPAS was published as a final rule on July 30, 1984. Based on the findings and

DOC—BXA

Proposed Rule Stage

recommendations of an interagency sponsored study concerning the controlled materials program, and comments from both defense agency and industry users, this proposed rule would amend the DPAS to remove the controlled materials provisions and make certain revisions to its procedural requirements. These amendments will have no costs associated with them, would reduce the regulatory and information reporting burden on industry and make the DPAS more effective and efficient, would result in cost savings for defense contractors, would update certain other provisions to conform to statutory and jurisdictional changes, and would make the DPAS more compatible with current industry practices.

Bureau of Export Administration (BXA)

Final Rule Stage

625. REVISION OF FOREIGN BOYCOTT PROVISIONS OF EXPORT ADMINISTRATION REGULATIONS

Priority: Substantive, Nonsignificant

Legal Authority: 50 USC 1701 et seq; 50 USC app 2401 et seq; EO 12002; EO 12058; EO 12214; EO 12924; Notice of August 15, 1995, (60 FR 42767)

CFR Citation: 15 CFR 769

Legal Deadline: None

Abstract: The Department proposes to revise the foreign boycott provisions of the Export Administration Regulations. The revisions would clarify the application of: (1) the intent provision to the reporting requirement; (2) the jurisdictional requirements relating to the implementation of letters of credit; (3) the furnishing information prohibitions to information about the nationality of directors and about blacklisted persons; (4) the shipping requirement exception to refusals to use blacklisted vessels; and (5) the import and shipping document exception to information about the nationality of carriers and residence of manufacturers or suppliers. The revisions are intended to clarify areas of confusion. In addition, the proposal would remove many references and provisions dealing with effective dates and grace periods that are no longer applicable.

626. TRANSFER OF DUAL-USE ITEMS FROM U.S. MUNITIONS LIST TO THE COMMERCE CONTROL LIST

Priority: Other Significant

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7429; 10 USC 74301(e); 50 USC 1701 et seq; 22 USC 3201 et seq; 42 USC 2139(a); 43 USC 1354; 50 USC 2401 et seq; 46 USC 466(c); EO 12924; Notice of August 15, 1995 (60 FR 42767)

CFR Citation: 15 CFR 799.1

Legal Deadline: None

Abstract: The former COCOM Industrial List (IL) controls so-called dual-use items, which have both civil and military uses. There is not a direct correspondence between the IL and BXA's Commerce Control List (CCL) because some IL items are controlled by the State Department in the U.S. Munitions List. In his November 15, 1990, memorandum of disapproval of H.R. 4653, the President determined that, "By June 1, 1991, the United States will remove from the U.S. Munitions List all items contained on the COCOM dual-use list unless significant U.S. national security interests would be jeopardized." This rule will implement BXA controls through the CCL on those items removed from the U.S. Munitions List as a result of the President's decision.

630. EFFECT OF IMPORTED ARTICLES ON THE NATIONAL SECURITY

Priority: Substantive, Nonsignificant

Legal Authority: 19 USC 1862

CFR Citation: 15 CFR 705

Legal Deadline: None

Abstract: Section 232 of the Trade Expansion Act of 1962, as amended (19 USC 1862) provides for the investigation of imports of articles which threaten to impair the national security. The implementing regulation, "Effect of Imported Articles on the National Security" (15 CFR 705), prescribes procedures to be followed by the Department of Commerce to commence and conduct such an investigation. Because of recent amendments to the Act, this regulation must be revised to set forth requirements for additional action to be taken by the Secretary of Commerce upon commencing, conducting, and completing an investigation, and reporting the disposition of an investigation to the Congress, and by the President in making a determination to take action against the imports of the article.

631. EXPORTS OF SAMPLE SHIPMENTS IN MIXTURES CONTAINING PRECURSORS AND INTERMEDIATE CHEMICALS; REVISIONS TO AUSTRALIA GROUP MEMBERS

Priority: Substantive, Nonsignificant

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7429; 10 USC 7430(e); 50 USC 1710 et seq; 22 USC 3201 et seq; 42 USC 2139(a); 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466(c); EO 12924; Notice of August 15, 1995, (60 FR 42767)

CFR Citation: 15 CFR 773; 15 CFR 778; 15 CFR 799

Legal Deadline: None

Abstract: The Bureau of Export Administration (BXA) maintains the Commerce Control List (CCL), which appears in the Export Administration Regulations (EAR). This rule amends the CCL by revising Export Control Classification Number (ECCN) 1C60. This ECCN controls dual-use precursors and intermediate chemicals useful in the production of chemical warfare agents. In addition this rule makes an editorial correction by removing ECCN

1C64E for di-isopropylcarbodiimide (C.A.S. #693-13-0) and di-cyclohexocarbodiimide (C.A.S. #538-75-Q), which was inadvertently readmitted to the Commerce Control List. The changes made by this rule are based on recent discussions in the Australia Group (AG). Finally, this rule revises the list of countries eligible to receive Australia Group (AG) benefits under U.S. regulations to include the Czech Republic and remove Turkey.

The Bureau of Export Administration (BXA) maintains the Commerce Control List (CCL), as part of the Export Administration Regulations (EAR). The changes made by this rule are based on discussions in the Australia Group (AG) and suggested changes by industry. This rule amends the CCL by revising Export Control Classification Number (ECCN) 1C60 to clarify that this entry controls aqueous hydrofluoric acid. ECCN 1C60 controls dual-use precursors and intermediate chemicals useful in the production of chemical warfare agents and certain mixtures containing such chemicals. In addition, this rule adds Poland, Romania and the Slovak Republic to the list of Australia Group countries, thereby making them eligible for the license exception accorded AG members.

634. CLARIFICATION OF ENHANCED PROLIFERATION CONTROL INITIATIVE (EPCI) "CATCH-ALL" PROVISION AND VALIDATED LICENSE REQUIREMENTS

Priority: Other Significant

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7429; 10 USC 7430(e); 50 USC 1710 et seq; 22 USC 3201 et seq; 42 USC 2139(a); 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466(c); EO 11912; EO 12924; Notice of August 15, 1995, (60 FR 42767)

CFR Citation: 15 CFR 700 to 799

Legal Deadline: None

Abstract: This rule amends the Export Administration Regulations to clarify and make more effective provisions that require exporters and others to submit individual validated license applications if they "know" or are "informed" of certain proliferation activities. These changes are among those directed by the Trade Promotion Coordinating Committee, a 19-member interagency group chaired by the Secretary of Commerce. Specifically, this rule creates categories of items subject to the EPCI licensing requirements.

635. REVISION TO THE EAR; SUPPLEMENT NO. 2 TO PART 778

Priority: Substantive, Nonsignificant

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7429; 10 USC 7430(e); 50 USC 1710 et seq; 22 USC 3201 et seq; 42 USC 2139(a); 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466(c); EO 11912; EO 12058; EO 12924; Notice of August 15, 1995, (60 FR 42767)

CFR Citation: 15 CFR 700 to 799

Legal Deadline: None

Abstract: This rule amends the Export Administration Regulations list of countries that are party to the Nuclear Non-Proliferation Treaty and/or the Treaty for the Prohibition of Nuclear Weapons in Latin America (Treaty of Tlatelolco). In addition, this rule makes certain editorial clarifications and corrections, and adds material inadvertently omitted. This rule adds language in the exceptions section to clarify that General License GLV does not authorize commodities controlled for nuclear non-proliferation reasons; clarifies that General License GFW does not authorize commodities controlled for nuclear non-proliferation reasons; and clarifies that General License GCT does not authorize commodities controlled for nuclear non-proliferation reasons.

643. • REVISION TO THE EAR: ELAIN ACCEPTS CLASSIFICATION REQUEST

Priority: Substantive, Nonsignificant

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7429; 10 USC 7430(e); 50 USC 1710 et seq; 22 USC 3201 et seq; 42 USC 2139(a); 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466(c); EO 12924; Notice of August 15, 1995, (60 FR 42767)

CFR Citation: 15 CFR 700 to 799

Legal Deadline: None

Abstract: The Bureau of Export Administration (BXA) is currently on a road to automating all of the services that fall under the "license determination" umbrella. The services that fall under the umbrella of "license determinations" are: classification requests, jurisdiction requests, EXODUS (Custom Department) requests, Export Enforcement Certifications, and Advisory Opinions. The First step has been successfully accomplished; ELAIN has been successfully modified to accept classification requests. Any person or company that has already acquired a Personal Identification Number (PIN) and has been authorized by their company and the Department of Commerce to submit license applications via ELAIN, may immediately start submitting classification requests electronically.

644. • RENUMBERING OF EXPORT CONTROL CLASSIFICATION NUMBERS

Priority: Substantive, Nonsignificant

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7429; 10 USC 7430(e); 50 USC 1710 et seq; 22 USC 3201 et seq; 42 USC 2139(a); 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466(c); EO 12924; Notice of August 15, 1995, (60 FR 42767)

CFR Citation: 15 CFR 799

Legal Deadline: None

Abstract: The Bureau of Export Administration (BXA) is providing notice that it is considering renumbering the Export Control Classification Numbers (ECCN) found in the Commerce List of the Export Administration Regulations. These revisions would conform the numbering of the ECCNs with the numbering system used by the European Union.

648. • EXPORTS TO IRAN: IMPOSITION OF SANCTIONS

Priority: Other Significant

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7429; 10 USC 7430(e); 50 USC 1710 et seq; 22 USC 3201 et seq; 42 USC 2139(a); 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466(c); EO 12924; Notice of August 15, 1995, (60 FR 42767)

CFR Citation: 15 CFR 700 to 799

Legal Deadline: None

Abstract: This final rule amends the EAR to reflect the imposition of new economic sanctions on Iran as a result of the issuance of Executive Order 12959 on May 6, 1995, which gave licensing authority over all exports and certain reexports to the Department of the Treasury's Office of Foreign Assets Control. This rule also removes licensing policies and contract sanctity provisions, and revokes all outstanding validated licenses and written reexport authorizations for Iran.

649. • REVISION TO GENERAL LICENSE GCG (SHIPMENTS TO AGENCIES OF COOPERATING GOVERNMENTS)

Priority: Substantive, Nonsignificant

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7429; 10 USC 7430(e); 50 USC 1710 et seq; 22 USC 3201 et seq; 42 USC 2139(a); 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466(c); EO 12924; Notice of August 15, 1995, (60 FR 42767)

CFR Citation: 15 CFR 771

Legal Deadline: None

Abstract: The Bureau of Export Admistration (BXA) is amending the Export Administration Regulations (EAR) by revising General License GCG, which authorizes certain exports to agencies of cooperating governments. These revisions will bring General License GCG, which was originally intended to apply to exports of items controlled for national security reasons, into line with subsequent statutes and agreements dealing with proliferation and regional stability concerns.

650. • CHANGES TO THE COMMERCE CONTROL LIST TO ACCORD WITH THE NEW FORUM LIST

Priority: Substantive, Nonsignificant

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7429; 10 USC 7430(e); 50 USC 1710 et seq; 22 USC 3201 et seq; 42 USC 2139(a); 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466(c); EO 12924; Notice of August 15, 1995, (60 FR 42767)

CFR Citation: 15 CFR 700 to 799

Legal Deadline: None

Abstract: The United States and 28 allied countries are currently negotiating to establish a new regime to replace the Coordinating Committee for Multilateral Export Controls (COCOM) which dissolved on March 31, 1994. These allied countries are also working out new control lists to replace the old COCOM lists which remain in effect until the establishment of the new regime. The new lists and the new regime should be in place sometime in FY 1996. Commerce will need to make extensive changes in the Commerce Control List when the new dual-use control list of the new regime becomes effective.

Priority: Substantive, Nonsignificant

Legal Authority: 18 USC 2510 et seq; 30 USC 185; 42 USC 6212; 10 USC 7429; 10 USC 7430(e); 50 USC 1710 et seq; 22 USC 3201 et seq; 42 USC 2139(a); 43 USC 1354; 50 USC app 2401 et seq; 46 USC 466(c); EO 12924; Notice of August 15, 1995, (60 FR 42767)

CFR Citation: 15 CFR 700 to 799

Legal Deadline: None

Abstract: This regulation makes two editorial corrections to the Title 15 of the Code of Federal Regulations (CFR). First, this rule amends the General Software Note found in Supplement No. 2 to Part 799.1 of the FAR to correctly reflect that country Groups S and Z, Iran, and Syria are not eligible to receive exports of mass-marketed software under General License GTDU. This change was originally published in the Federal Register on September 14, 1992 (57 FR 41854), but inadvertently omitted from the CFR. Second, this rule removes interpretations Nos. 24, 25 and 26 from Supplement No. 1 to 799.1. BXA intended to remove these interpretations on July 15, 1992. However, due to a typographical error

DOC—BXA

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 642

Legal Deadline: None

Abstract: This notice announces that the Gulf of Mexico Fishery Management Council (Council) is considering management measures for a limited entry program for the Gulf of Mexico migratory group of king mackerel. Possible additional control participation or effort in the commercial and for-hire (charter and headboat) fisheries. A control date is intended to discourage new entry into the fishery based on economic speculation during the period required for the Councils to prepare an amendment to the Fishery Management Plan for Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic (FMP). An FMP Amendment and its implementing final rule are required to institute any major changes in the mackerel management program.

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will eliminate existing text in the CFR.

Legal Authority: 7 USC 1621 et seq

CFR Citation: 50 CFR 260

Legal Deadline: None

Abstract: NOAA Plans to change the way it delivers in-plant seafood inspections and related services under the Agricultural Marketing Act of 1946 (the Act). Currently, these services are provided by NOAA employees on a fee-for-service basis which enables NOAA to fully recover the service costs. NOAA is considering that some of these services would no longer be provided directly by NOAA employees, but rather be offered by private parties. NOAA plans to assure that privatized program conducted under Federal oversight will be the full equivalent of the current program.

667. SECRETARIAL AMENDMENT TO THE FMP FOR ATLANTIC SWORDFISH

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 630

Legal Deadline: NPRM. Statutory. Final, Statutory. Other, Statutory NPRM 15 days and final action 110 days after beginning of review.

DOC—NOAA

Proposed Rule Stage

Abstract: PL 101-627 (signed into law November 7, 1990) transferred full responsibility for the management of swordfish, including preparation of fishery management plans and amendments, from the regional fishery management councils to the Secretary of Commerce. The Secretary will prepare an amendment to the FMP for Atlantic swordfish that will reduce fishing mortality, prevent overfishing, rebuild an overexploited resource, and be consistent with conservation measures recommended by the International Commission for the Conservation of Atlantic Tunas. The existing FMP management measures remain in effect until superseded by Secretarial actions. Management measures to reduce overfishing may include a moratorium on issuance of new fishing permits or a limited entry system.

668. FISHERY MANAGEMENT PLAN FOR CORALS AND REEF-ASSOCIATED PLANTS AND INVERTEBRATES FOR PUERTO RICO AND THE U.S. VIRGIN ISLANDS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: Not yet determined

Legal Deadline: NPRM, Statutory. Final, Statutory. Other, Statutory. NPRM 15 days and final action 110 days after receipt from a regional fishery management council.

Abstract: The Fishery Management Plan (FMP) for Corals and Associated Plants and Invertebrates for Puerto Rico and the U.S. Virgin Islands will address the impacts of human activities on the condition of coral reefs in Federal waters off Puerto Rico and the U.S. Virgin Islands, and related habitats, and respond to the rapidly expanding fishery for aquarium species, especially in Puerto Rico. Specifically, the FMP would: (1) prohibit the harvest of stony corals, sea fans, gorgonians, and live rock, except for scientific research, education, and habitat restoration; (2) limit harvest of other invertebrates to dip nets and slurp guns, with certain exceptions; and (3) prohibit the use of chemicals and explosives.

670. AMENDMENT 5 TO THE FISHERY MANAGEMENT PLAN FOR ATLANTIC MACKEREL, SQUID, AND BUTTERFISH

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 655

Legal Deadline: NPRM, Statutory. Final, Statutory. Other, Statutory. NPRM 15 days and final action 110 days after receipt from the fishery management council.

Abstract: Amendment 5 would establish a moratorium on entry of vessels to the commercial fisheries for LOLIGO and ILLEX squid and for butterfish and would establish criteria for announcing a control date for Atlantic mackerel. It would specify new procedures for setting annual quotas including TALFF. Permits would be required for commercial vessels, party and charter boats, operators and dealers. It would establish logbook and/or reporting requirements for commercial vessels, party and charter boats, and dealers.

671. AMENDMENT 9 TO THE FMP FOR ATLANTIC SURF CLAM AND OCEAN QUAHOG

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 652

Legal Deadline: NPRM, Statutory. NPRM 15 days from date amendment review begins and council is sent copy for comments.

Abstract: This amendment would manage the fishery for mahogany clams (ocean quahogs) off a portion of the coast of Maine, in the EEZ.

673. REGULATORY AMENDMENT FOR RED GROUPER IN THE GULF OF MEXICO

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 641

Legal Deadline: None

Abstract: This regulatory amendment would decrease the minimum allowable size of red grouper for the commercial fishery from 20 to 18 inches for fish caught from the exclusive economic zone (EEZ) in the Gulf of Mexico. This action is based, in part, on the 1993 stock assessment for red grouper and would facilitate the commercial harvest of the entire 1995 shallow-water grouper quota (quota has not been fully caught in recent years), as established by the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). The regulatory amendment is prepared by the Gulf of Mexico Council and reviewed and implemented by NMFS under FMP framework procedures.

674. AMENDMENT 1 TO THE FMP FOR THE SCALLOP FISHERY OFF ALASKA

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 673

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days after receipt from the Region Fishery Management Council.

Abstract: This FMP amendment would authorize a scallop fishery in Federal waters off Alaska which federalizes certain state of Alaska management measures and establishes a moratorium on the entry of new vessels into the scallop fishery to control continued growth in fishing capacity.

678. AMENDMENT 8 TO THE FISHERY MANAGEMENT PLAN FOR COASTAL MIGRATORY PELAGIC RESOURCES OF THE GULF OF MEXICO AND SOUTH ATLANTIC

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 642

Legal Deadline: NPRM, Statutory. Final, Statutory.
NPRM 15 days and final action 110 days from receipt from a Regional Fishery Management Council.

Abstract: Amendment 8 management measures being considered include: permits for commercial mackerel dealers; a 3,000-lb. commercial daily trip limit for Atlantic group king mackerel; extending the cobia management area to include the exclusive economic zone (EEZ) from Virginia to New York; reestablishing the boundary separating Gulf and Atlantic groups of king mackerel; a daily commercial trip limit for cobia; at-sea vessel-to-vessel transfer of Atlantic group Spanish mackerel among commercial vessels in the EEZ off Florida; providing the South Atlantic Fishery Management Council with the authority to decide on the management measures (quotas, trip limits, etc.) for Gulf group king mackerel in the seasonal fishery (November-March) in the area off the Florida east coast; and dividing the hook-and-line commercial quota of Gulf group king mackerel in the Florida west coast subzone equitably between user groups.

Proposed Rule Stage

680. AMENDMENT 8 TO THE FISHERY MANAGEMENT PLAN FOR THE SNAPPER-GROUPER FISHERY OF THE SOUTH ATLANTIC

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 646

Legal Deadline: NPRM, Statutory. Final, Statutory. Other, Statutory. NPRM 15 days and final action 110 days from receipt from a Regional Fishery Management Council.

Abstract: Amendment 8 would establish a minimum size limit of 15 inches (tail length), a bag limit, and establish a commercial trip limit for red porgy; establish similar measures for vermillion snapper; increase the minimum size limit for black sea bass and establish a zone where the use of sea bass pots would be prohibited within 30 miles of shore from approximately Frying Pan Shoals, North Carolina to Cape Roman, South Carolina; and change in the minimum size limit and bag limit for greater amberjack. Other possible measures include: changing the overfishing definition; establishing a transit zone for possession of fish traps in the Key West, Florida area, and clarifying the use of bottom longlines in the south Atlantic.

681. AMENDMENTS 8, 11, AND 12 TO THE FISHERY MANAGEMENT PLAN FOR THE REEF FISH RESOURCES OF THE GULF OF MEXICO

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 641

Legal Deadline: NPRM, Statutory. Final, Statutory. Other, Statutory. NPRM 15 days and final action 110 days from receipt from a Regional Fishery Management Council.

Abstract: Amendment 8 would implement an individual transferable quota and/or license limitation system to control access to the Gulf of Mexico red snapper fishery; include an allocation of quota shares with an appeals process; and may include restrictions on commercial transactions among permitted dealers and commercial vessels for reef fish caught in the exclusive economic zone of the Gulf of Mexico. Amendment 11 would revise the annual framework procedure; limit certain reef fish transactions by permitted vessels and permitted dealers; allow transfer of reef fish permits and fish trap endorsements upon death or disability; allow a transfer of certain fish trap endorsements; implement a new reef fish permit moratorium until December 31, 2000; allow permit transfers to other persons with vessels by qualifying permitted vessels owners; and require charter vessel and headboat permits. Amendment 12 may modify the framework procedure; allow commercial hook-and-line harvest of reef fish by shrimp trawl vessels; revise the definition of bait; modify the provisions regarding personal consumption of reef fish at sea; re-specify reef fish transport documentation requirements; reduce red snapper bag limit to zero for permitted vessels when the commercial quota is filled; remove future red snapper size limit increases for the commercial sector; establish aggregate daily bag limits; revise amberjack size and bag limits; and increase gag and black grouper size limits.

682. REGULATORY AMENDMENT TO PROHIBIT USE OF OPEN ACCESS AND LIMITED ENTRY GEAR ON THE SAME TRIP FOR THE PACIFIC COAST GROUNDFISH FISHERY

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 663

Legal Deadline: None

Abstract: This rule would not allow a vessel to use both open access gear and limited entry gear on the same fishing trip. Allowing both gears on the same trip causes potential problems in enforcement and determination of which trip limits apply.

689. REGULATORY AMENDMENT TO IMPOSE RESTRICTIONS ON FISHING BLACK ROCKFISH OFF OREGON

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 663

Legal Deadline: None

Abstract: This regulatory action would impose trip limits and time/area closures on black rockfish fishing off the coast of Oregon in order to preserve declining stocks of black rockfish. Restrictions on harvest and areas fished would adversely affect fishermen in the short term, but these measures are designed to protect black rockfish and encourage the rebuilding of stocks in the long term. These measures will be developed by the State of Oregon and complement measures in state waters.

690. REGULATORY AMENDMENT FOR MANAGING PELAGIC FISHERIES BY U.S. VESSELS BEYOND EEZ THROUGHOUT PACIFIC

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 685

Legal Deadline: None

Abstract: This regulatory amendment would extend permit, reporting, and observer placement requirements on longline vessels of the U.S. that are fishing stocks in the management unit for the Fishery Management Plan for Pelagic Fisheries of the Western Pacific Region beyond the exclusive economic zone in the Pacific Ocean. The rule is necessary for comprehensive monitoring of all vessels fishing common stocks and possibly affecting the status of the shared stocks, other fishery interests, or protected resources so that the need for conservation and management measures can be determined.

705. FISHERY MANAGEMENT PLAN FOR BLACK SEA BASS NORTH OF CAPE HATTERAS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 637

DOC—NOAA

Proposed Rule Stage

Legal Deadline: NPRM, Statutory, November 15, 1994.

Abstract: The draft FMP has objectives to reduce fishing mortality to assure that overfishing does not occur, protect immature black sea bass to increase spawning stock biomass, and improve yield in the fisheries. Management measures contained in the draft FMP are designed to reduce exploitation rates in the fishery from the current amount of 41 percent to 14 percent by year 8 of the FMP. Measures include: (1) Minimum fish sizes and commercial gear regulations during the first two years of implementation, (2) a moratorium on entry to the commercial fishery, (3) permit requirements for commercial, party and charter boats and dealers; (4) operator permit requirements for commercial, party and charter boats; and (5) reporting requirements for commercial vessels, party and charter boats, and dealers.

706. REGULATORY AMENDMENT FOR MULTIPLE "A" PACIFIC GROUNDFISH LIMITED ENTRY PERMITS PER VESSEL

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 663

Legal Deadline: None

Abstract: This regulatory action would amend Pacific Coast groundfish regulations to allow multiple "A" limited entry permits per vessel. This effectively may be accomplished by attaching trip limits to the permits rather than to the vessels.

711. ENFORCEMENT OF PERMIT REQUIREMENTS AND OTHER PROVISIONS GOVERNING THE NORTHWESTERN HAWAIIAN ISLANDS BOTTOMFISH FISHERY

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 683

Legal Deadline: None

Abstract: This regulatory action will facilitate enforcement of regulations governing permit and permit reporting requirements in the NW Hawaiian Islands Bottomfish Fishery. The regulation prohibits bottomfish fishing in the Maui Zone without a permit and requires vessels to display their official numbers. A new requirement for dealers to make their records available for inspection will support existing state requirements.

712. AMENDMENT 9 TO THE FISHERY MANAGEMENT PLAN FOR THE SHRIMP FISHERY OF THE GULF OF MEXICO

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 658

Legal Deadline: None
NPRM 15 days and final action 110 days from receipt from Regional Fishery Management Council

Abstract: Amendment 9 would address the issue of the incidental catch (bycatch) of fish in shrimp trawls. Management measures being considered include: requiring the use of NMFS-approved bycatch reduction devices (BRDs)in the shrimp trawls in the exclusive economic zone (EEZ) of the Gulf of Mexico within the 110-fathom contour; requiring the use of NMFS-approved BRDs in shrimp trawls in specified areas of the Gulf of Mexico EEZ; criteria for NMFS approval of BRDs, including specifications for exclusion of bycatch and retention of shrimp; and seasonal and area restrictions to reduce bycatch.

713. STRIPED BASS REGULATIONS FOR THE EXCLUSIVE ECONOMIC ZONE (EEZ)

Priority: Substantive, Nonsignificant

Legal Authority: PL 103-206

CFR Citation: 50 CFR 656

Legal Deadline: None

Abstract: This action would change Federal striped bass regulations in the EEZ off the Atlantic Coast to support the Atlantic States Marine Fisheries Commission's Striped Bass Management Plan's Amendment 5.

Timetable:

Action	Date	FR Cite
NPRM	11/00/95	
NPRM Comment Period End	12/00/95	

Small Entities Affected: Undetermined

Government Levels Affected: Federal

Additional Information: ASMFC's Amendment 5 was completed on 3/95. This amendment relaxes State regulations restricting the take of striped bass in recognition of the recovery of striped bass stocks along the Atlantic coast. Federal action is anticipated to change the current Federal closure to striped bass fishing in the EEZ to regulation which will be less restrictive and more compatible with State regulations.

719. AMENDMENT 7 TO THE FISHERY MANAGEMENT PLAN FOR THE NORTHEAST MULTISPECIES FISHERIES

Priority: Economically Significant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 651

Legal Deadline: None

Abstract: Amendment 7 to the FMP is designed to implement measures that will reduce fishing mortality to a level as close as possible to zero for haddock, cod, and yellowtail flounder throughout the range of those fish stocks. The measures are expected to include seasonal area closures and total allowable catches for groundfish other than haddock, cod, and yellowtail flounder. This action is necessary to begin rebuilding of groundfish species which currently are at historically low levels of abundance.

720. AMENDMENT 8 TO THE FISHERY MANAGEMENT PLAN FOR THE SHRIMP FISHERY OF THE GULF OF MEXICO (FMP)

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 658

Legal Deadline: NPRM, Statutory. Final, Statutory. Other, Statutory. NPRM 15 days and final action 110 days after receipt from the Fishery Management Council.

Abstract: Amendment 8 proposes to establish a framework procedure authorizing the Director, Southeast Region, National Marine Fisheries Service, to set total allowable catch for royal red shrimp in the Gulf of Mexico exclusive economic zone, up to 130 percent of the current estimate of maximum sustainable yield (392,000 pound tails) for 2 consecutive years.

721. AMENDMENT 3 TO THE FISHERY MANAGEMENT PLAN FOR CORALS AND CORAL REEFS OF THE SOUTHERN ATLANTIC STATES

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 638

Legal Deadline: None

Abstract: Amendment 3 would establish permitting requirements for live rock aquaculture in the South Atlantic, regulate octocorals north of Florida, and prohibit anchoring of fishing vessels in the Oculina Bank Habitat Area of Particular Concern.

724. REGULATORY AMENDMENT REGARDING EXERCISE OF RIGHTS OF NORTHWEST TREATY INDIAN TRIBES TO HARVEST GROUNDFISH

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 663

Legal Deadline: None

Abstract: Regulations would establish the framework for affected Northwest Indian tribes to exercise their treaty rights to harvest groundfish, as officially recognized for the first time by the Federal Government in 1994. Most of the harvest takes place in the EEZ and is governed by the Pacific Coast Groundfish FMP. These regulations would be modeled on similar regulations for salmon and halibut, and would include relevant definitions and descriptions of the tribes' fishing areas.

725. FISHERY MANAGEMENT PLAN FOR THE GOLDEN CRAB FISHERY OFF THE SOUTH ATLANTIC REGION

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: This new Fishery Management Plan for the Golden Crab Fishery of the South Atlantic Region (FMP) would manage the golden crab fishery in the exclusive economic zone off the southern Atlantic states. Possible FMP measures include: Area and season restrictions on fishing; size limits; trap escape panel requirements and other gear use measures; prohibition on harvest of females; limits on the number of fishery participants; and vessel and dealer permitting and reporting requirements. The purpose of the FMP is to control the expansion of this fishery in a manner that protects the golden crab resource while allowing for collection of biological and fishery data required to better manage this resource/fishery. The South Atlantic Fishery Management Council, which is developing the FMP, is concerned about the possible entrance into the fishery of a large number of fishermen who have been displaced from New England and Alaska fisheries; the golden crab resource is considered particularly vulnerable to overfishing. The FMP may contain a controlled fishery access program based, in part, on a demonstrated history of past golden crab landings. The advance notice of proposed rulemaking announced the Council's consideration of a control date of 4/07/95, as a possible cutoff date for determining historical fishery participation.

728. • AMENDMENT 2 TO THE FISHERY MANAGEMENT PLAN FOR THE SHRIMP FISHERY OF THE SOUTH ATLANTIC

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 659

Legal Deadline: NPRM, Statutory.
Final, Statutory.
NPRM 15 days and final action 110 days after receipt from a Regional Fishery Management Council.

Abstract: Amendment 2 would add brown and pink shrimp to the Fishery Management Plan for the Shrimp Fishery of the South Atlantic. It would also address incidental catch of fish in shrimp trawls. Management measures being considered include: developing specific bycatch reduction measures for all penaeid shrimp fisheries in the South Atlantic exclusive economic zone (EEZ), including requiring the use of NMFS-improved bycatch reduction devices (BRDs) in all penaeid shrimp trawls in the South Atlantic EEZ, to reduce bycatch component of weakfish and Spanish mackerel fishing mortality by 50 percent. Area1 and seasonal restrictions may also be considered to reduce bycatch.

742. • AMENDMENT 9 TO THE WESTERN PACIFIC CRUSTACEAN FISHERY MANAGEMENT PLAN

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 681

Legal Deadline: None

Abstract: Amendment 9 to the Fishery Management Plan for Crustacean Fisheries of the Western Pacific Region would establish a new harvest limitation program for the lobster fishery in the Northwestern Hawaiian Islands. An annual harvest guideline would be set based on a constant harvest rate and a fixed and explicit risk of overfishing. All lobsters caught could be retained. Season and area closures, limited entry, and reporting requirements would be unchanged. Framework procedures for future regulatory changes would be set, including direct closure of the fishery by the Regional Director when he/she projects the harvest guideline will have been reached.

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 663

Legal Deadline: None

Abstract: This regulation would shift the opening of the large-scale, "regular season" for Pacific whiting from April 15 to May 15 north of 42deg N. lat. A month delay is expected to result in better quality fish (since, in April, some are still in poor condition after spawning in the winter), greater dispersion of whiting along the coast (they migrate from south to north during the fishing season, with larger fish migrating further north), and reduced bycatch of some species, particularly chinook salmon, if the fishery occurs as it did in 1995.

748. GENERAL PROVISIONS FOR DOMESTIC FISHERIES

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801-81 Magnuson Act

CFR Citation: 50 CFR 620

Legal Deadline: None

Abstract: The amendments to the Magnuson Act of November 14, 1990, added several new prohibitions such as the ban on large-scale driftnet fishing and the prohibition on assaulting observers. The regulations at 50 CFR 620 contain the prohibitions that apply generally to domestic fishing regulated under the Magnuson Act. The regulations must be amended to reflect the recent amendments to the Magnuson Act and to update and improve current language generally. The alternative would be to leave the regulatory language as it is now. This would be unacceptable because it would leave the regulation out of date and inconsistent with the current statutory language. The benefits would be to improve the current regulations and to clarify the scope of the new statutory language. There are no potential costs identified.

749. PRESCRIPTION OF FISHWAYS UNDER SECTION 18 OF THE FEDERAL POWER ACT

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 791a et seq

CFR Citation: 50 CFR 405 (New)

Legal Deadline: None

Abstract: The Department of the Interior and the Department of Commerce (Departments) seek advance comments on a proposed rule to implement the Departments' authority to prescribe fishways under section 18 of the Federal Power Act (FPA). The proposed rule is a procedural rule that identifies how the Departments would prescribe fishways included in Federal Energy Regulatory Commission licenses for hydropower facilities. It includes a definition of fishways that comports with the language of the National Energy Policy Act of 1992 (PL 102-496). The Departments' objectives are to codify agency practice as well as provide applicants with notice of the Departments' information needs and prescription procedures. This should eliminate unnecessary costs, confusion, and procedural burdens on hydropower project sponsors while protecting important fishery resources affected by hydropower projects.

The Departments are interested in advance comments on the proposed procedures and definitions. The no-action option will be used as a baseline for analysis. Benefits and costs of the proposal have not been quantified. However, the process of licensing hydropower facilities requires an economic and environmental analysis for each action.

750. SCREENING OF WATER DIVERSIONS TO PROTECT SACRAMENTO RIVER WINTER-RUN CHINOOK SALMON

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1533 et seq

CFR Citation: 50 CFR 227; 50 CFR 222

Legal Deadline: None

Abstract: NMFS is considering proposing regulations under the Endangered Species Act that would establish screening requirements for water diversions from the Sacramento River and Delta to protect a listed species, the winter-run chinook salmon. There are over 2,000 unscreened diversions along the River and Delta. NMFS is concerned that these unscreened diversions may cause substantial losses of juvenile salmon.

753. TAKING AND IMPORTING OF MARINE MAMMALS: TUNA PURSE SEINE VESSEL OBSERVER EXPENSES

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1361 et seq

CFR Citation: 50 CFR 216.24

Legal Deadline: None

Abstract: NMFS proposes to amend its regulations governing the reimbursement of tuna vessel owners for the cost of carrying NMFS observers (50 CFR 216.24(f)(4)). The regulations require that a U.S.-flag tuna purse seine vessel holding a certificate of inclusion under the general permit issued to the American Tunaboat Association carry an observer when assigned by the Director, Southwest Region, NMFS. The regulations currently require that NMFS reimburse vessel operators for all costs associated with carrying the observers. The proposed rule change would require that "the vessel owner shall incur all reasonable costs directly related to the quartering and maintaining of such observers on board such vessels."

759. PROPOSED RULE TO AUTHORIZE LETHAL TAKINGS OF MARINE MAMMALS BY STATE AUTHORITIES

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1361 et seq The Marine Mammal Protection Act

DOC—NOAA

Proposed Rule Stage

CFR Citation: 50 CFR 216

Legal Deadline: None

Abstract: Section 120 of the MMPA as amended in 1994 provides the Secretary the discretion to authorize the intentional lethal taking of individually identifiable pinnipeds which are having a significant negative impact on salmonids that are either 1) listed under the ESA, 2) approaching a threatened or endangered status, or 3) migrate through the Ballard Locks in Seattle. The process for determining whether to implement the authority commences with a State developing and submitting an application that provides a detailed description of the interaction problem. If warranted by scientific evidence, NMFS is to establish a Pinniped-Fishery Interaction Task Force to address the situation described in the application and publish a notice in the Federal Register requesting public comment on the application. Within 60 days after establishment, and after reviewing public comments in response to the Federal Register notice, the Pinniped-Fishery Interaction Task Force is to recommend approval or denial of the proposed intentional lethal taking along with recommendations on the proposed location, time, and method of such taking, criteria for evaluating the success of the action, and the duration of the recommendations. NMFS must either approve or deny the application.

760. FINAL RULE TO AMEND MARINE MAMMAL REGULATIONS TO AUTHORIZE INCIDENTAL TAKINGS OF MARINE MAMMALS BY HARASSMENT AS AUTHORIZED BY PUBLIC LAW 103-238

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 16 USC 1361 et seq The Marine Mammal Protection Act

CFR Citation: 50 CFR 228; 50 CFR 216

Legal Deadline: Final, Statutory, January 1, 1995.

Abstract: On April 30, 1994, the President signed Pub. L. 103-238, the Marine Mammal Protection Act Amendments of 1994. One part of this law amended section 101(a)(5) to establish an expedited process by which citizens of the United States, who engage in a specified activity (other than commercial fishing) within a specific geographic region, can apply for an authorization to incidentally take small numbers of marine mammals by harassment. The proposed rule, if implemented, would establish specific time limits for public notice and comment on any requests for authorization which would be granted under this rule; implement procedures for the establishment of scientific peer review groups to review an applicant's monitoring plan when the taking may affect the availability of a stock for subsistence uses; and limit authorizations to a period of 1 year.

761. PROPOSED DESIGNATION OF CRITICAL HABITAT FOR PUGET SOUND SALMON STOCKS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1531 et seq The Endangered Species Act

CFR Citation: 50 CFR 226

Legal Deadline: NPRM, Statutory, March 14, 1995. Final, Statutory, March 14, 1996.
Endangered Species Act section 4(b)(3)(D)(ii)

Abstract: NMFS will propose critical habitat for Puget Sound salmon stocks if the species is/are proposed for listing under the Endangered Species Act. These stocks include (1) Hood Canal summer chum salmon, (2) Elwha River pink salmon, (3) Lower Dungeness River pink salmon, (4) North Fork Nooksack River spring chinook salmon, (5) South Fork Nooksack River spring chinook salmon, (6) Dungeness River spring chinook salmon, (7) Baker River sockeye salmon, (8) Discovery Bay chum salmon, and (9) White River spring chinook salmon. Mud Bay/Eld Inlet chum salmon were petitioned for listing on April 4, 1994, so this stock will be included in this rule, if warranted.

771. RESTRICTING OR PROHIBITING ATTRACTING SHARKS IN THE MONTEREY BAY NATIONAL MARINE SANCTUARY

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1434(a)(5)

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: The Sanctuaries and Reserves Division (SRD) is issuing an ANPR to inform the public that it is considering restricting or prohibiting attracting sharks by chum or other means in the Monterey Bay National Marine Sanctuary, and to invite written comments, advice, and recommendations. This ANPR is an optional preliminary step to notice and comment rulemaking. If SRD determines to amend the regulations, SRD must follow the appropriate procedures of notice and comment rulemaking under the Administrative Procedure Act. Further, SRD will consult, as required by the National Marine Sanctuaries Act at 16 USC 1434(a)(5), with the Pacific Fishery Management Council before it issues any Sanctuary regulations "for fishing."

Any future restrictions or prohibitions SRD places on attracting sharks by the use of chum or other means would be to ensure that Sanctuary resources or qualities would not be adversely impacted and/or to avoid conflict among various users of the Sanctuary. This is consistent with the purposes of the sanctuary designation.

772. • ALLOWANCE OF SMALL-SCALE NON-INTRUSIVE JADE COLLECTING IN MONTEREY BAY NATIONAL MARINE SANCTUARY

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1434(a)(5)

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: The National Ocean Service, Sanctuaries and Reserve Division (SRD) is issuing an ANPRM to inform the public that it is considering allowing small-scale, non-intrusive jade collecting in the MBNMS, and to invite written comments, advice, and recommendations. Thare has been public interest in allowing jade collection in the MBNMS and this action will respond to and address those interests. If SRD determines to amend the regulations, it will issue a proposed rule with an additional 45-day comment period.

This action is considered not significant because the advance notice of proposed rulemaking simply presents an issue and course of action under consideration by SRD and requests comments from the public. This action will ensure that SRD takes into account all views on this issue. This action does not have an annual effect on the economy of $100 million or more, nor does it adversely effect in a material way the economy, environment, public health or safety.

775. LICENSING OF PRIVATE REMOTE-SENSING SPACE SYSTEMS

Priority: Other Significant

Legal Authority: 15 USC 5624; PL 102-555

CFR Citation: 15 CFR 960

Legal Deadline: None

Abstract: Pub. L. 102-555 amends the Land Remote Sensing Commercialization Act of 1984 to transfer the LANDSAT program from the Department of Commerce to a joint NASA/DOD office. However, title II retains the basic provisions of title IV of the previous act authorizing the Secretary of Commerce to license private operators of land remote-sensing space systems who are subject to U.S. jurisdiction. The Secretary is required to consult with the Secretaries of Defense and State, who are responsible for determining conditions to protect national security and foreign policy concerns, respectively. The recent Act removes a regulatory restriction which required operators to make the data available to all customers on the same terms and conditions.

NATIONAL MARINE FISHERIES SERVICE

778. REGULATORY AMENDMENT TO IMPLEMENT PERMIT, REPORTING, AND RECORDKEEPING AND OBSERVER REQUIREMENTS FOR PROCESSING VESSELS OVER 125 FEET AND THEIR CATCHER VESSELS; PACIFIC COAST GROUNDFISH

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 663

Legal Deadline: None

Abstract: Regulations would implement a comprehensive data collection and regulatory program for all processing vessels longer than 125 feet and for all harvesting vessels that deliver their catch to those vessels in the groundfish fishery off Washington, Oregon, and California. This program would consist of: (1) a requirement that processing vessels carry NMFS-certified observers; (2) a requirement for a mandatory Federal permit; (3) recordkeeping and reporting requirements; and (4) a definition for "fishing trip" for processing vessels over 125 feet in length for the purpose of applying trip landing and frequency limits.

781. COMBINED FRAMEWORK ADJUSTMENT—ADJUSTMENT 7 TO THE NORTHEAST MULTISPECIES FMP, ADJUSTMENT 3 TO THE ATLANTIC SEA SCALLOP FMP, AND ADJUSTMENT 1 TO THE AMERICAN LOBSTER FMP

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 649; 50 CFR 650; 50 CFR 651

Legal Deadline: None

Abstract: NMFS will issue this proposed rule to implement measures contained in Framework Adjustment 1 to the American Lobster Fishery Management Plan (FMP), Framework Adjustment 3 to the Atlantic Sea Scallop FMP, Framework Adjustment 7 to the Northeast Multispecies FMP, as submitted to NMFS by the New England Fishery Management Council, and which would revise a provision in each of the FMPs that requires all permit applicants to own a fishery vessel at the time they initially apply for a limited access permit. The intent of this rule is to acknowledge valid exceptions to the requirement and, subsequently, to remove an inequitable burden on those fishers entitled to the exceptions by providing them with an alternative mechanism for qualifying under the respective moratoriums.

783. NOTICE OF CHANGES IN THE MANAGEMENT REGIMES FOR ATLANTIC AND GULF GROUPS OF KING AND SPANISH MACKEREL FOR THE 1995-96 FISHING YEAR

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 642

Legal Deadline: None

Abstract: This rule would change the total allowable catch (TAC), establish commercial vessel trip limits, and reduce the recreational bag limit for atlantic group king mackerel; increase the TAC and allocations for Atlantic group Spanish mackerel; and change the commercial vessel trip limit for Gulf group king mackerel. These changes for the 1995-96 fishing year are being made in accordance with the framework procedures for adjusting management measures for the Fishery Management Plan for Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic.

784. WEAKFISH REGULATION FOR THE EXCLUSIVE ECONOMIC ZONE (EEZ)

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 5101 et seq

CFR Citation: 50 CFR 697

Legal Deadline: None

Abstract: This action would implement regulations in the EEZ off the Atlantic Coast to control the harvest of weakfish and support the implementation of a Coastal fisheries management plan for the species which was developed and implemented by the Atlantic States Marine Fisheries Commission.

Timetable:

Action	Date	FR Cite
NPRM	06/20/95	60 FR 32130
NPRM Comment Period End	08/15/95	
Final Action	11/00/95	
Final Action Effective	12/00/95	

Small Entities Affected: Undetermined

Government Levels Affected: Federal

Additional Information: The weakfish stock along the Atlantic Coast is in serious decline. State actions to reduce fishing on the species are being implemented through the Atlantic States Marine Fisheries Commission (ASMFC). Federal action is needed to support ASMFC since approximately 50% of the weakfish catch comes from Federal waters.

788. • INTERIM FINAL RULE ALLOWING RETENTION OF IFQ SPECIES IN SPECIFIED AREAS UNDER 50 CFR 676.16(D)

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 773 et seq; 16 USC 1801 et seq

CFR Citation: 50 CFR 676

Legal Deadline: None

Abstract: NMFS issued an interim rule to allow vessels subject to existing recordkeeping and observer coverage requirements to fish for Sablefish and Pacific Halibut in the Individual Fishing Quota Program in a regulatory area in which persons aboard the vessel hold IFQ, even when the amount of IFQ held for the area is less than the total amount of IFQ species on board the vessel. This action is necessary to allow persons who hold IFQ for more than one IFQ regulatory area to harvest IFQ species in those areas during the same fishing trip and is intended to facilitate more efficient harvesting by IFQ holders.

794. CIVIL PROCEDURE REGULATIONS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 to 1882; 16 USC 1531 to 1543; 16 USC 1361 to 1407; 16 USC 3371 to 3378; 16 USC 1431 to 1439; 16 USC 773 to 773k; 16 USC 951 to 961; 16 USC 1021 to 1032; 16 USC 3631 to 3644; 42 USC 9101 et seq; 30 USC 1401 et seq; 16 USC 971 to 971i; 16 USC 781 et seq; 16 USC 972 to 972b; 16 USC 916 to 916l; ...

CFR Citation: 15 CFR 904

Legal Deadline: None

Abstract: This rule will amend NOAA's regulations to make them consistent with a Federal District Court ruling on the Agency's consideration of a respondent's ability to pay when assessing a civil penalty. The amendment removes a provision which places the burden on the respondent to raise and prove inability to pay an assessed penalty when the statute involved requires NOAA to take ability to pay into account.

795. PERFORMANCE STANDARDS FOR TUNA VESSEL OPERATORS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1361 et seq

CFR Citation: 50 CFR 216

Legal Deadline: None

Abstract: NOAA has established a system of performance standards for operators of U.S.-flag tuna purse seine fishing vessels that catch yellowfin tuna associated with marine mammals in the eastern tropical Pacific Ocean.

796. FINAL RULE FOR REGULATIONS GENERIC TO PERMITS ISSUED UNDER SECTION 104 OF THE MMPA, AND FOR REGULATIONS SPECIFIC TO PERMITS ISSUED FOR SCIENTIFIC RESEARCH AND ENHANCEMENT PURPOSES

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1361 et seq, Marine Mammal Protection Act; 16 USC 1531 et seq, Endangered Species Act; 16 USC 1151 et seq, Fur Seal Act

CFR Citation: 50 CFR 216; 50 CFR 215; 50 CFR 222

Legal Deadline: None

Abstract: These proposed revisions would update and consolidate existing permit regulations and comments received on proposed regulations that have been promulgated for the taking, import, export, or conduct of an otherwise prohibited activity involving protected species (i.e., marine mammals and endangered or threatened species) for purposes of scientific research, and enhancement, photography, and public display under the Marine Mammal Protection Act, the Endangered Species Act, and the Fur Seal Act. In addition, this final rule establishes regulations specific to permits issued for bona fide scientific research and enhancement purposes only. These revisions would implement amendments to the Marine Mammal Protection Act enacted in 1988 and 1994, and clarify when a permit is required and the scope and extent of permit authority under these Acts. The final rule would specify generally applicable terms and conditions, which would clarify permit requirements and review procedures, and would amend the criteria for deciding whether to issue or deny permits, and revise administrative requirements and procedures, as well as those terms and conditions specific to permits for scientific research and enhancement. These revisions are intended to provide a comprehensive regulatory foundation for these special exception permits and to make administration of the NMFS permit program more efficient, consistent and predictable. The NMFS is proposing to consolidate permit regulations into a single part of title 50.

797. REGULATIONS GOVERNING THE TAKE OF DOLPHINS INCIDENTAL TO REMOVING OIL AND GAS PLATFORMS IN THE GULF OF MEXICO

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1371(a)(5); 16 USC 1361 et seq

CFR Citation: 50 CFR 228; 50 CFR 216

Legal Deadline: None

Abstract: NMFS has received an amended request from the American Petroleum Institute for the take of bottlenose and spotted dolphins incidental to the removal of oil and gas platforms in the Gulf of Mexico. This activity would be allowed under section 101(a)(5) of the Marine Mammal Protection Act if the Service makes certain findings and if regulations are issued that cover monitoring and reporting.

798. TAKING AND IMPORTING OF MARINE MAMMALS; DOLPHIN MORTALITY LIMITS DURING PURSE SEINE SETS ON MARINE MAMMALS IN THE EASTERN TROPICAL PACIFIC

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1361 et seq

CFR Citation: 50 CFR 216.24

Legal Deadline: None

Abstract: This interim final rule will amend the current performance standards in the MMPA regulations to ensure that U.S. vessels can be legally prevented from making sets on tuna associated with dolphins in the eastern tropical Pacific Ocean once the vessels' dolphin mortality limit is reached. This rule also implements portions of the International Dolphin Conservation Act of 1992.

799. TAKING AND IMPORTING OF MARINE MAMMALS; "DOLPHIN-SAFE" TUNA LABELING

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1361 et seq

CFR Citation: 50 CFR 216; 50 CFR 247

Legal Deadline: None

Abstract: This rule will finalize the interim final rule implementing the Dolphin Protection Consumer Information Act. The interim final rule: (1) identified fish and fish products subject to importation requirements mandated by the Marine Mammal Protection Act, as amended by the DPCIA; (2) specified the use and contents of a new NOAA form required to import into the United States certain fish and fish products potentially harvested with methods injurious to marine mammals; (3) required importers of certain fish and fish products harvested by nations that engage in high seas large-scale driftnet fishing to provide certification by a responsible government official of the harvesting nation that the items to be imported were not harvested with large-scale driftnets in certain areas of the high seas; and (4) regulated the use of labels suggesting that tuna products are "dolphin safe." This rule also implements portions of the High Seas Driftnet Fisheries Enforcement Act.

800. PROPOSED LIST OF FISHERIES AS AUTHORIZED BY PUBLIC LAW 103-238

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1361 et seq The Marine Mammal Protection Act

CFR Citation: 50 CFR 229

Legal Deadline: NPRM, Statutory, July 28, 1994. Final, Statutory, January 1, 1996.

Abstract: The Marine Mammal Protection Act Amendments of 1994 (Pub. L. 103-238) modified the scope for classification of commercial fisheries based upon their incidental take rate of marine mammals. The amended MMPA provides for the focus of incidental takings to be on the mortality and serious injury and less upon harassment takings. In addition, the MMPA now distinguishes between incidental and intentional takings during commercial fishing operations. As a result, NMFS is proposing to amend its List of Commercial Fisheries based upon the statutory modifications.

801. TAKING AND IMPORTING OF MARINE MAMMALS: PROPOSED RULE PROHIBITING U.S. CITIZENS FROM ENCIRCLING MARINE MAMMALS DURING TUNA FISHING OPERATIONS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1361 et seq

CFR Citation: 50 CFR 216.24

Legal Deadline: NPRM, Statutory, Final, Statutory, March 1, 1994.

Abstract: This rule proposes implementation of section 307 (a)(2) of the International Dolphin Conservation Act, which makes it unlawful for any person or vessel that is subject to the jurisdiction of the United States, intentionally to set a purse seine net or to encircle any marine mammal during any tuna fishing operation, with certain exceptions.

Final Rule Stage

802. FINAL RULE TO ESTABLISH GUIDELINES FOR NONLETHALLY DETERRING MARINE MAMMALS FROM ENDANGERING PERSONAL SAFETY OR DAMAGING PUBLIC OR PRIVATE PROPERTY

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1361 et seq The Marine Mammal Protection Act

CFR Citation: 50 CFR 216

Legal Deadline: Final, Statutory, January 1, 1995.

Abstract: On April 30, 1994, the President signed Pub. L. 103-238, the Marine Mammal Protection Act Amendments of 1994. One part of this law implemented a new section 101(a)(4) to authorize the nonlethal harassment takings by citizens of the United States to deter marine mammals from: (1) Damaging commercial fishing gear or catch; (2) damaging private property; (3) endangering public safety; or (4) damaging public property. The amendments require a list of guidelines for use in safely deterring marine mammals and provide for prohibiting certain deterrent measures that may have a significant adverse impact on marine mammals.

803. GENERAL AUTHORIZATION FOR SCIENTIFIC RESEARCH INVOLVING LEVEL B HARASSMENT

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1151 et seq Fur Seal Act; 16 USC 1631 et seq Marine Mammal Protection Act

CFR Citation: 50 CFR 215; 50 CFR 216

Legal Deadline: Final, Statutory, August 30, 1994.

Abstract: This interim final rule is required by the 1994 amendments to the Marine Mammal Protection Act. These regulations establish a general authorization for bona fide scientific research on non-endangered and non-threatened marine mammals that may result in harassment with only the potential to disturb. Inclusion under the general authorization is achieved by letter of intent to the National Marine Fisheries Service and a letter of confirmation from the Service.

826. • SEA TURTLE CONSERVATION; RESTRICTION APPLICABLE TO SHRIMP TRAWL EXCLUDER DEVICES RESTRICTIONS

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1531 et seq; 16 USC 772a et seq

CFR Citation: 50 CFR 217; 50 CFR 227

Abstract: This rule proposes to amend the regulations requiring the use of Turtle Excluder Devices (TEDs) to reduce the incidental capture and mortality of endangered and threatened sea turtles in bottom trawl fisheries. The proposed rule would provide measures to reduce the likelihood of sea turtle entanglement and capture in approved soft TEDs as follows: restrict the use of soft TEDs to certain types of trawl nets; require that approved soft TEDs only be installed by certified net shops or individuals; and eliminate the Parrish soft TED as an approved soft TED. This rule is necessary to protect sea turtles by modifying the soft TEDs certification process and eliminating problems with soft TEDs.

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 673

Legal Deadline: None

Abstract: NMFS issued regulations to implement a Fishery Management Plan for the scallop fishery off Alaska. The only management measure authorized under the FMP is an interim closure of Federal waters off Alaska to fishing for scallops. Federal waters will remain closed for up to 1 year or until a superseding Federal Management regime is implemented, whichever is earlier. This rule will expire on August 28, 1996.

852. • REGULATORY AMENDMENT TO EXEMPT CRAB CATCHERS' VESSELS FROM 1995 FEE ASSESSMENT UNDER THE NORTH PACIFIC FISHERY RESEARCH PLAN

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 677

Legal Deadline: None

Abstract: NMFS issues a rule to exempt certain crab catcher vessels from the 1995 fee-collection program authorized pursuant to the North Pacific Fisheries Research Plan. This exemption responds to a request from the State of Alaska to conform the Research Plan to a recent change in its crab observer coverage requirements for catcher vessels participating in the Dutch Harbor and ADAK area King Crab fisheries and will avoid a "double payment" by the affected vessels of both research plan fees and costs of the state required observer coverage.

855. • CONSIDERATION OF A CONTROL DATE FOR THE GULF OF MEXICO STONE CRAB FISHERY

Priority: Substantive, Nonsignificant

Legal Authority: 16 USC 1801 et seq

CFR Citation: 50 CFR 654

Legal Deadline: None

Abstract: The Gulf of Mexico Fishery Management Councils is considering whether to impose additional management measures limiting entry in the stone crab fishery in the EEZ in the Gulf of Mexico off Florida, and if there is a need to impose additional management measures. Possible measures include the establishment of a limited entry program to control participation or effort in the fishery. If a limited entry program is established, the Council is considering July 24, 1995, as a possible control date. Consideration of a control date is intended to discourage new entry into the fishery based upon economic speculation during the Council's deliberation on the issues.

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will eliminate existing text in the CFR.

Legal Authority: 16 USC 1451 et seq

CFR Citation: 15 CFR 931

Legal Deadline: None

Abstract: NOAA's Office of Ocean and Coastal Resources Management (OCRM) is issuing an immediate Final Rule removing part 931 from title 15 of the Code of Federal Regulations (part 931). Part 931 implements the Coastal Energy Impact Program (CEIP), which was established in 1976 under then-section 308 of the Coastal Zone Management Act (CZMA) to provide coastal states and units of general purpose local governments (local governments) in such States with Federal financial assistance to meet certain needs that result from specified energy development activities. In the 1990 amendments to the CZMA the CEIP was terminated and, therefore, the implementing regulations at part 931 are, for the most part, obsolete. Further, for those particular coastal States and local governments with outstanding CEIP loans, NOAA will continue to apply relevant repayment provisions of part 931 to such CEIP loan holders by providing actual and timely notice of their continued applicability, as well as copies of the pertinent provisions.

DOC—NOAA — Completed Actions

Therefore, part 931 need no longer be retained in the Code of Federal Regulations (CFR).

This action is determined to be not significant because it will not have an annual effect on the economy of $100 million or more, does not adversely affect in a material way the economy, environment, public health or safety, does not interfer with an action of another agency, and will not raise novel legal or policy issues.

DEPARTMENT OF COMMERCE (DOC)
National Telecommunications and Information Administration (NTIA)

Proposed Rule Stage

872. THE TELECOMMUNICATIONS AND INFORMATION INFRASTRUCTURE GRANT PROGRAM

Priority: Other Significant

Legal Authority: 47 USC 901 et seq

CFR Citation: None

Legal Deadline: None

Abstract: The Telecommunications and Information Infrastructure Assistance Program (TIIAP) was established within NTIA pursuant to the Departments of Commerce, Justice, State, the Judiciary, and Related Agencies Appropriations ACT of 1994, P.L. 103-212, 107 Stat. 1175. Appropriations of $26 million were made for fiscal year 1994 to fund the planning and construction of telecommunications and information infrastructure grants under NTIA's existing grant authority. The TIIAP is part of the President's plan for telecommunications and information infrastructure development. Under the program, matching grants are awarded to enable State and local governments and nonprofit entities to help bring the capabilities of advanced telecommunications technologies to the public. In FY 1994, $24.4 million in funds were awarded for a variety of demonstration and planning projects that provide the basis for connecting schools, libraries, health care facilities, museums, and other social and community services within interactive data, voice and video telecommunications capabilities. NTIA was appropriated $64 million for year 1995 under P.L. 103-317; however, a total of $19 million was later rescinded. For FY 1996, requested appropriations are $100 million. Although authorization legislation was introduced in both the house (H.R. 2639) and the Senate (S.1883), the bills were not acted upon. NTIA anticipates that new bills will be introduced in FY 1996 to authorize the program. Once authorizing legislation is in place, NTIA expects to issue program regulations.

Proposed Rule Stage

874. COMMUNICATIONS WITH THE PATENT AND TRADEMARK OFFICE

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 35 USC 6

CFR Citation: 37 CFR 1.1; 37 CFR 1.5; 37 CFR 1.8; 37 CFR 1.10; 37 CFR 1.3; 37 CFR 1.9; 37 CFR 5.33; 37 CFR 10.23

Legal Deadline: None

Abstract: Currently all letters and other communications intended for the Patent and Trademark Office must be addressed to "Commissioner of Patents and Trademarks," Washington, DC 20231. The proposed rule changes would: (1) provide separate mailing addresses for patents and trademarks; (2) provide a definition for "Federal holiday"; and (3) delete requirement for an "Express Mail" certificate.

875. SIMPLIFICATION OF THE REQUIREMENTS CONCERNING THE FILING AND PROCESSING OF TRADEMARK APPLICATIONS, INTENT TO USE DOCUMENTS, AND PETITIONS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 15 USC 1123; 35 USC 6

CFR Citation: 37 CFR 1.1; 37 CFR 1.6; 37 CFR 1.10; 37 CFR 1.8; 37 CFR 2

Legal Deadline: None

Abstract: The regulatory changes will simplify the filing and processing of trademark applications, intent-to-use documents, and petitions by eliminating some of the nonstatutory requirements now imposed by the Patent and Trademark Office. The changes will permit applicants to secure an application filing date more easily, to process their applications with fewer technical requirements and to clarify the process for petitions to the Commissioner. Many applicants now fail to receive a filing date or a trademark registration solely due to very technical requirements imposed by the Office. These requirements are not imposed by the Lanham Act.

880. CHANGES TO IMPLEMENT 18-MONTH PUBLICATION OF PATENT APPLICATIONS

Priority: Other Significant

Legal Authority: 35 USC 6

CFR Citation: 37 CFR 1

Legal Deadline: None

Abstract: Congress is considering legislation that would mandate early publication of pending patent applications, except those under secrecy order. Early publication will require printing some information about pending patent applications 18 months after the effective filing date of each patent application. This rulemaking implements that legislation.

DEPARTMENT OF DEFENSE (DOD)

DEPARTMENT OF DEFENSE

32 CFR Chs. I, V, VI, and VII

33 CFR Ch. II

36 CFR Ch. III

Improving Government Regulations; Regulatory Plan and Semiannual Agenda of Regulations

AGENCY: Department of Defense (DoD).

ACTION: Publication of the consolidated regulatory plan and semiannual agenda of DoD regulatory documents.

SUMMARY: The Department of Defense (DoD) is publishing this consolidated regulatory plan and semiannual agenda of regulatory documents, including those that are procurement-related, for public information and comments under E.O. 12866 "Regulatory Planning and Review" and the Office of Federal Procurement Policy Act of 1988 (41 U.S.C. 402). This agenda incorporates the objective and criteria, when applicable, of the regulatory reform program under E.O. 12866, the Federal Procurement Policy Act, and other regulatory guidance. It contains DoD issuances initiated by DoD components that may have economic and environmental impact on State, local, or tribal interests under the criteria of E.O. 12866. Although most DoD issuances listed in the agenda are of negligible public impact, their nature may be of public interest and, therefore, are published to provide notice of rulemaking and an opportunity for public participation in the internal DoD rulemaking process.

The agenda portion of this document updates the report published on May 8, 1995, and includes regulations expected to be issued and under review over the next 12 months. The procurement-related agenda items included herein will also be used by the Office of Federal Procurement Policy to publish the "Procurement Regulatory Activity Report" required by the Office of Federal Procurement Policy Act Amendments of 1988.

The next agenda is scheduled to be published in April 1996, with the next regulatory plan scheduled for October 1996. In addition to this agenda, DoD components also publish rulemaking notices pertaining to their specific statutory administration requirements as required.

FOR FURTHER INFORMATION CONTACT: For information concerning the overall DoD regulatory improvement program and for general regulatory plan and semiannual agenda information, contact Mr. William Pearce, telephone 703-604-4582, or write to Directorate for Information Operations and Reports, Washington Headquarters Services, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202-4302.

For questions of a legal nature concerning the agenda and its statutory requirements or obligations, write to Office of the General Counsel, 1600 Defense Pentagon, Washington, DC 20301-1600, or call 703-697-2714.

For general information on Office of the Secretary regulations, other than those which are procurement-related, contact Mr. Dan Cragg, Directives and Records Division, Directorate for Correspondence and Directives, Washington Headquarters Services; telephone 703-697-4111. For general information on Office of the Secretary agenda items which are procurement-related, contact Ms. Kathleen Fenk, telephone 703-602-0131, or write to Defense Acquisition Regulations Directorate, 3062 Defense Pentagon, Washington, DC 20301-3062.

For general information on Department of the Army regulations, contact Mr. Gregory Showalter, telephone 703-428-0567, or write to Commander, U.S. Army Publications and Printing Command, ATTN: ASQZ-PDS, Room 1050, Hoffman I, Alexandria, Virginia 22331-0302.

For general information on the U.S. Army Corps of Engineers regulations, contact Mr. Michael L. Davis, telephone 202-761-1785, or write to Office of the Chief of Engineers, ATTN: CECW-OR, Washington, DC 20314-1000.

For general information on Department of the Navy regulations, contact Ms. Alcinda P. Wenberg, telephone 703-602-6766, or write to Department of the Navy, Commander, Naval Information Systems Management Center, Crystal Gateway 2, Room 1500, 1225 Jefferson Davis Highway, Arlington, Virginia 22202-4311.

For general information on Department of the Air Force regulations, contact Ms. Patsy J. Conner, telephone 703-614-3488, or write to Department of the Air Force, SAF/AAIQ, 1610 Air Force Pentagon, Washington, DC 20330-1610.

For specific agenda items, contact the appropriate individual indicated in each DoD component report.

SUPPLEMENTARY INFORMATION: This edition of the Unified Agenda of Federal Regulations includes The Regulatory Plan, which appears in Part II of this issue of the **Federal Register**. The Department of Defense Statement of Regulatory Priorities is included in Part II. The Unified Agenda is further composed of the regulatory status reports, including procurement-related regulatory status reports, from the Office of the Secretary of Defense (OSD) and the Departments of the Army, Navy, and Air Force. Included also is the regulatory status report from the U.S. Army Corps of Engineers, whose civil works functions fall under the reporting requirements of E.O. 12866 and involve water resource projects and regulation of activities in waters of the United States.

DoD issuances range from DoD Directives (reflecting departmental policy) to implementing instructions and regulations (largely internal and used to implement Directives). The OSD agenda section contains the primary Directives under which DoD components promulgate their implementing regulations.

To ease identification and to clarify the differences among the variety of issuances reported, they are identified by their DoD internal numbering system, which denotes component level of authority and type of issuance, in addition to the required CFR number.

In addition, this agenda, although published under the reporting requirements of E.O. 12866, will continue to be the DoD single-source reporting vehicle, which will identify issuances that are currently applicable under the various regulatory reform programs in progress. Therefore, DoD components will identify those rules which come under the criteria of the:

a. Regulatory Flexibility Act;

b. Paperwork Reduction Act;

c. Office of Federal Procurement Policy Act Amendments of 1988.

These DoD issuances, which are directly applicable under these statutes, will be identified in the agenda and their action status indicated. Generally, the reports in this agenda will contain four sections: (1) Prerule stage; (2) proposed rule stage; (3) final rule stage; and (4) completed actions.

Although not a regulatory agency, DoD will continue to participate in regulatory initiatives designed to reduce economic costs and unnecessary environmental burdens upon the public. Comments and recommendations are invited on the rules reported and should be addressed to the DoD component representatives identified in each section.

Although sensitive to the needs of the public and regulatory reform, DoD reserves the right to exercise the exemptions and flexibility permitted in its rulemaking process in order to proceed with its overall defense-oriented mission. The publishing of this agenda does not waive the applicability of the military affairs exemption in section 553 of title 5 and section 3 of E.O. 12866.

Dated: September 18, 1995.

D. O. Cooke,

Director, Administration and Management.

Office of the Secretary—Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
895	Civil-Military Program (DoD Directive 1100aa)	0790-AF84

Proposed Rule Stage

895. CIVIL-MILITARY PROGRAM (DOD DIRECTIVE 1100AA)

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 10 USC 410

CFR Citation: 32 CFR 213

Legal Deadline: None

Abstract: This part establishes policy and assigns responsibilities for the establishment and implementation of Civil-Military Programs. It is DoD policy to employ DoD resources to the extent that they do not affect readiness, to contribute to meeting the domestic needs of the Nation in areas such as health and human services, education, and job training, and infrastructure building/ rehabilitation. Such activities may be as a byproduct of training, incidental to training, as a result of dedicated missions or the result of specifically authorized and funded program. Military support to civilian authorities (MSCA) is specifically excluded from Civil-Military Programs.

897. • TECHNICAL ASSISTANCE FOR PUBLIC PARTICIPATION

Priority: Substantive, Nonsignificant

Legal Authority: Sec 326, National Defense Authorization Act for FY 1995

CFR Citation: 32 CFR 203

Legal Deadline: Other, Statutory. Not later than 180 days after the date on which the Secretary of Defense announces a decision to establish the Restoration Advisory Board.

Abstract: The DoD intends to publish interim rules for providing technical assistance funding to citizens affected by the environmental restoration of DoD facilities. This request for comments discusses and solicits comments on several options the DoD is considering for providing assistance to community members of Technical Review Committee (TRCs) and Restoration Advisory Boards (RABs) to obtain technical advisors and facilitate the participation of these members and affected citizens in environmental restoration activities at their associated installations. The DoD will consider these comments in formulating an interim final rule.

898. • COLLECTION FROM THIRD PARTY PAYERS OF REASONABLE COSTS OF HEALTHCARE SERVICES; AMENDMENT

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 301; 10 USC 1095

CFR Citation: 32 CFR 220

Legal Deadline: None

Abstract: This proposed rule would establish a new rule under the Third Party Collection program for determining the reasonable costs of healthcare services provided by facilities of the Uniformed Services in cases in which care is provided under TRICARE Resource Sharing Agreements. For purposes of the Third Party Collection program, such services will be treated the same as other services provided by facilities of the Uniformed Services. This proposed rule also lowers the high cost ancillary threshold value from $60 to $25 for patients that come to the Uniformed Services facility for ancillary services requested by a source other than a Uniformed Services facility provider. The reasonable costs of such services will be accumulated on a daily basis.

899. GRANTS AND AGREEMENTS—MILITARY RECRUITING ON CAMPUS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 5 USC 301

CFR Citation: 32 CFR 23

Legal Deadline: None

Abstract: This Interim Rule implements section 558 of the National Defense Authorization Act for fiscal year 1995 (PL 103-337 (1994)), as it applies to grants. Section 558 states that funds available to the Department of Defense may not be provided by grant or contract to any institution of higher education that has a policy of denying, or which effectively prevents, the Secretary of Defense from obtaining for military recruiting purposes: entry to campuses; access to students on campuses; or access to directory information pertaining to students. This rule implements the law, as it applies to grants, by requiring inclusion of an appropriate clause in DoD grants with institutions of higher education. It also extends the requirement, as a matter of policy, to DoD cooperative agreements. because they are very similar to grants.

900. PROVISION OF EARLY INTERVENTION AND SPECIAL EDUCATION SERVICES FOR ELIGIBLE DOD DEPENDENTS IN OVERSEAS AREAS (DOD INSTRUCTION 1342.12)

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 20 USC 921; 20 USC 1400

CFR Citation: 32 CFR 57

Legal Deadline: None

Abstract: This part implements policy and updates responsibilities and procedures under 20 USC 921-932, 20 USC 1400 et seq., 32 CFR part 347, and 32 CFR part 71 for providing the following: (1) A free appropriate public education (FAPE) for children with disabilities who are eligible to enroll in the Department of Defense Dependents Schools (DoDDS); (2) Early intervention services for infants and toddlers birth through age 2 years who, but for their age, would be eligible to enroll in the DoDDS under 32 CFR part 71; (3) A comprehensive and multidisciplinary program of early intervention services for infants and toddlers with disabilities and their families. This part establishes a National Advisory Panel (NAP) on Education for Children with Disabilities, aged 3 to 21, inclusive and a DoD Inter-Component Coordinating Council (ICC) on Early Intervention, in accordance with DoD Directive 5105.4. This part establishes a DoD Coordinating Committee (DoD-CC) on Early Intervention, Special Education, and Medically Related Services (MRS). This part authorizes implementation instructions.

901. • REVITALIZING BASE CLOSURE COMMUNITIES AND COMMUNITY ASSISTANCE- COMMUNITY REDEVELOPMENT AND HOMELESS ASSISTANCE

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 10 USC 2687 note

CFR Citation: 32 CFR 92

Legal Deadline: None
Although no deadline for promulgating regulations was established in the statute, it was imperative that regulations be issued immediately to inform communities of the new process

Abstract: This interim rule promulgates policies and procedures, developed by both the Departments of Defense and Housing and Urban Development, for implementing the Base Closure Community Redevelopment and Homeless Assistance Act (the "Redevelopment Act"). The Department of Housing and Urban Development will be making a similar publication in 24 CFR part 586.

902. • FORMER SPOUSE PAYMENTS FROM RETIRED PAY; AMENDMENT

Priority: Other

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 10 USC 1408

CFR Citation: 32 CFR 63

Legal Deadline: None

Abstract: This proposed rule amends part 63 of title 32 to reflect amendments to the Uniformed Services Former Spouses' Protection Act and to clarify the language in section 63.6(c)(8) concerning court orders that provide for a division of retired pay by means of a formula. Guidance implementing the amendments have been incorporated into Volume 7, Part B of the DoD Financial Management Regulation, DoD 7000.14-R, but has not been previously published in the Federal Register.

904. • UNIVERSITY RESEARCH INITIATIVE SUPPORT PROGRAM (URISP)

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: PL 103-160 Section 802; 10 USC 2358 note

CFR Citation: 32 CFR 209

Legal Deadline: None

Abstract: This rule is to comply with Section 802 of PL 103-160. The University Research Initiative Support Program (URISP) is required to be a competitive university research program for research and development that is relevant to the requirements of the DoD, that is set aside for colleges and universities that have received less that $2 million dollars from the DoD over the two previous fiscal years. URISP is oriented toward assisting institutions build university research infrastructure in the fields of science, engineering, and mathematics, so they may become more competitive.

958. • CONTRACTOR PURCHASING SYSTEM REVIEWS (DFARS CASE 95-D026)

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 41 USC 421

CFR Citation: 48 CFR 244.303

Legal Deadline: None

Abstract: Modify the Defense FAR Supplement to delete the detailed instructions in Appendix C on the conduct of contractor purchasing system reviews and to require a risk assessment to determine the scope of contractor purchasing system reviews.

Timetable:

Action	Date	FR Cite

983. • TRUTH IN NEGOTIATIONS ACT AND RELATED CHANGES (DFARS CASE 95-D708)

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: PL 103-355

CFR Citation: 48 CFR 203.71; 48 CFR 204.805; 48 CFR 215.8; 48 CFR 216.203; 48 CFR 232.502; 48 CFR 233.7000; 48 CFR 235.015; 48 CFR 239.7406; 48 CFR 246.770; 48 CFR 252.215; 48 CFR 252.216; 48 CFR 252.243; 48 CFR 253.204

Legal Deadline: None

Abstract: Modify the Defense FAR Supplement to (1) remove language that has been moved to the FAR; (2) remove overly prescriptive language; (3) eliminate "certification" where appropriate; (4) replace $500,000 with "the cost or pricing data threshold"; (5) revise cross-references; (6) revise the Table of Contents; (7) revise section titles to match new FAR language; and (8) remove language on work measurement systems.

Proposed Rule Stage

1025. REGULATORY PROGRAMS OF THE CORPS OF ENGINEERS

Priority: Routine and Frequent

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 33 USC 401; 33 USC 403; 33 USC 1344; 33 USC 1413

CFR Citation: 33 CFR 320 to 330

Legal Deadline: None

Abstract: The Corps of Engineers intends to make numerous clarifications to its existing regulations at 33 CFR 320 to 330, to consolidate all permit regulations into one document, and to reorganize 33 CFR 325 for clarity. Since the Corps Regulatory Program final regulations were published in the Federal Register on November 13, 1986 (51 CFR 41206), there has been need to clarify several of those provisions. Since 1986, the Corps has adopted two new appendices at 33 CFR 325, appendices B and C, and the Corps has also adopted revisions to the Nationwide Permit Program (33 CFR 330), Class 1 Administrative Civil Penalties (33 CFR 326), and revisions to the definition of discharge of Dredged Material and Fill Material and prior converted croplands. For clarity, the Corps intends to consolidate all these changes into one document.

1026. REGULATORY PROGRAM OF THE CORPS OF ENGINEERS—90-DAY DECISIONS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 33 USC 401; 33 USC 403; 33 USC 1344; 33 USC 1413

CFR Citation: 33 CFR 325

Legal Deadline: None

Abstract: The Corps of Engineers is revising its regulations to provide that permit decisions should be made within 90 days of the issue of a public notice, unless precluded by other laws, such as the National Environmental Policy Act or the Endangered Species Act. A decision deadline would also be provided for these circumstances. This process is included in the President's Wetland Protection Plan to make sure that decisions are made without unnecessary delays. This will aid applicants in planning their projects and allows for more realistic expectations of obtaining permit decisions.

Final Rule Stage

1027. NATIONWIDE PERMIT PROGRAM (NEW NATIONWIDE PERMITS FOR ADDITIONAL ACTIVITIES)

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will eliminate existing text in the CFR.

Legal Authority: 33 USC 401; 33 USC 403; 33 USC 1344; 33 USC 1413

CFR Citation: 33 CFR 330

Legal Deadline: None

Abstract: The Corps will propose new nationwide permits based on a review of activities being authorized by individual permit. The authorization of activities by nationwide permits is the most efficient and effective way to regulate minor activities with minimal impacts and thus reduce the regulatory burden of the Corps regulatory program while maintaining environmental safeguards.

1028. REGULATORY PROGRAM OF THE CORPS OF ENGINEERS—ADMINISTRATIVE APPEALS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 33 USC 401; 33 USC 403; 33 USC 1344; 33 USC 1413

CFR Citation: 33 CFR 331

Legal Deadline: None

Abstract: The regulation establishes an administrative appeal process for permit denials by permit applicants and wetland delineations by property owners. This process is included in the President's Wetland Protection Plan to increase fairness in the permitting process by allowing landowners to seek a speedy recourse of these decisions without having to go to court.

1032. ADJUSTMENTS TO PRICES UNDER SHIPBUILDING CONTRACTS

Priority: Other

Legal Authority: 10 USC 2405

CFR Citation: 48 CFR 52

Legal Deadline: None

Abstract: The interim rule prescribes policies and procedures to restrict contract price adjustments under shipbuilding contracts, thus implementing by regulation the requirements of 10 USC 2405. The interim rule also defines the terminology of 10 USC 2405 and promulgates a solicitation provision and contract clause on price adjustments to shipbuilding contracts. This action is intended to clarify the meaning and ensure the consistent interpretation, implementation, and administration of the statute.

Priority: Substantive, Nonsignificant

Legal Authority: 10 USC ch 55; 5 USC 301

CFR Citation: 32 CFR 199

Legal Deadline: None

Abstract: This rule implements provisions of the 1993 National Defense Authorization Act which allows the Secretary of Defense to establish a case management program for CHAMPUS beneficiaries with extraordinary medical or psychological disorders and to allow such beneficiaries medical or psychological services, supplies, or durable medical equipment excluded by law or regulation as a CHAMPUS benefit. Under this program, waiver of benefit limits to the Basic CHAMPUS program may be authorized for beneficiaries when the provision of such services or supplies is cost-effective and clinically appropriate, as compared to historical or projected CHAMPUS/MTF utilization of health care services. It is designed to develop a cost-effective plan of care by targeting appropriate resources to meet the individual needs of the beneficiary.

Department of Education

Semiannual Regulatory Agenda

DEPARTMENT OF EDUCATION (ED)

DEPARTMENT OF EDUCATION

Office of the Secretary

34 CFR Subtitles A and B

Unified Agenda of Federal Regulations and The Regulatory Plan

AGENCY: Office of the Secretary, Education.

ACTION: Publication of the Unified Agenda of Federal Regulations and The Regulatory Plan.

SUMMARY: The Secretary of Education publishes a semiannual agenda of Federal regulations issued under the authority of section 4(b) of Executive Order 12866 "Regulatory Planning and Review." The purpose of the agenda is to encourage more effective public participation in the regulatory process by providing the public with early information about pending regulatory activities.

FOR FURTHER INFORMATION CONTACT: Questions or comments related to specific regulations listed in this agenda should be directed to the agency contact listed for those regulations. General questions or comments related to this agenda should be directed to Kenneth C. Depew, Division of Regulations Management, Office of the General Counsel, Department of Education, Room 5112, FB-10, 600 Independence Avenue SW., Washington, DC 20202-2241; telephone: (202) 401-8300. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m., eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 4(b) of Executive Order 12866, dated September 30, 1993, requires the Department of Education (ED) to publish, at a time and in a manner specified by the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), an agenda of all regulations under development or review. The Regulatory Flexibility Act, 5 U.S.C. 602(a), requires ED to publish, in October and April of each year, a regulatory flexibility agenda. The regulatory flexibility agenda may be combined with any other agenda that satisfies the statutory requirements (5 U.S.C. 605(a)). In compliance with the Executive order and the Regulatory Flexibility Act, the Secretary publishes this agenda.

For this edition of the Department of Education's regulatory agenda, the most important significant regulatory actions are included in The Regulatory Plan, which appears in Part II of this issue of the **Federal Register**. The Regulatory Plan entries are listed in the Table of Contents below and are denoted by the bracketed bold references, which direct the reader to the appropriate Sequence Numbers in Part II.

For each set of regulations listed, the agenda provides the title of the document, the type of document, a citation of any rulemaking or other action taken since publication of the most recent agenda, and planned dates of future rulemaking. In addition, the agenda provides the following information:

- An abstract, which includes a description of the problem to be addressed, any principal alternatives being considered, and potential costs and benefits of the action.
- An indication of whether the planned action is likely to have significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act (5 U.S.C. 601(b)).
- A reference to where a reader can find the current regulations in the Code of Federal Regulations.
- A citation of legal authority.
- A statement of whether the rulemaking is part of the Reinventing Government effort and, if so, the effect of the rulemaking.
- The name, address, and telephone number of the contact person at the Department from whom a reader can obtain additional information regarding the planned action.

In accordance with the Secretary's Principles for Regulating, listed in the preamble to the Department's regulatory plan, the Department of Education is committed to limiting its regulations to those that improve the quality and equality of services to its customers, learners of all ages. The Department will regulate only when absolutely necessary and then in the most flexible, most equitable, least burdensome way possible.

Interested members of the public are encouraged to comment on any of the items listed in this agenda that they believe are not consistent with the Principles for Regulating.

The Department also will review all of its regulations to ensure that, if appropriate, those regulations support the National Education Goals.

This publication in the **Federal Register** does not impose any binding obligation on the Department with regard to any specific item on the agenda. The Department may elect not to pursue any of the regulatory actions listed here, and regulatory action in addition to the items listed is not precluded. Dates of future regulatory actions are subject to revision in subsequent agendas.

Dated: October 2, 1995.

Judith A. Winston,

General Counsel.

DEPARTMENT OF EDUCATION (ED)
Departmental Management (EDMAN)

Proposed Rule Stage

1055. AMENDMENT TO EDUCATION DEPARTMENT GENERAL ADMINISTRATIVE REGULATIONS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 20 USC 1221e-3(a)(1)

CFR Citation: 34 CFR 75

Legal Deadline: None

Abstract: These proposed regulations--based on a recommendation under the National Performance Review--amend existing regulations by broadening the criteria the Secretary considers in determining the order in which discretionary grant applications will be selected for funding. Specifically, the proposed amendment would expand the criteria to include a grant recipient's past performance and previous use of funds, including failure to submit a performance report or submission of a report of unacceptable quality under any Department of Education grant programs. Currently the criteria include only past use of funds under the same grant programs. The proposed amendment would also clarify that the deadline date for the receipt of an application is the date that the application is received at the Department, not the postmark date. The proposed regulations would be developed in accordance with the Department's Principles for Regulating.

RIN: 1880–AA62

1056. • EDUCATION DEPARTMENT GENERAL ADMINISTRATIVE REGULATIONS (EDGAR)

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 20 USC 1221e-3(a)(1)

CFR Citation: 34 CFR 75; 34 CFR 76; 34 CFR 77

Legal Deadline: None

Abstract: These proposed regulations would reinvent key parts of EDGAR by eliminating unnecessary, obsolete, or duplicative provisions; replacing some provisions with non-regulatory guidance; and revising other sections to effect clarity and ease of use by the Department's customers.

Proposed Rule Stage

1057. • REVISED EDUCATION DEPARTMENT GENERAL ADMINISTRATIVE REGULATIONS (EDGAR) SELECTION CRITERIA

Regulatory Plan: This entry is Seq. No. 17 in Part II of this issue of the **Federal Register**.

RIN: 1880–AA74

1058. STUDENT RIGHTS IN RESEARCH, EXPERIMENTAL PROGRAMS, AND TESTING

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 20 USC 1232h

CFR Citation: 34 CFR 098

Legal Deadline: None

Abstract: These regulations are needed to implement section 1017 of the Goals 2000: Educate America Act (Pub. L. 103-227, 20 U.S.C. section 123h). That provision amends the Protection of Pupil Rights Amendment (PPRA) to require schools, in certain instances, to make specific educational materials available to parents for inspection. The provision also amends the PPRA to prohibit schools from requiring a student to submit to certain surveys, analyses, or evaluations without prior parental consent. The regulations are being developed in accordance with the Department's Principles for Regulating.

RIN: 1880–AA66

1059. FAMILY EDUCATIONAL RIGHTS AND PRIVACY

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 20 USC 1232g(a)(1); 20 USC 1232g(a)(2); 20 USC 1232g(b)(1)(A); 20 USC 1232g(b)(1)(E); 20 USC 1232g(b)(1)(J); 20 USC 1232g(b)(2); 20 USC 1232g(b)(4)(B); 20 USC 1232g(e); 20 USC 1232g(h)

CFR Citation: 34 CFR 099

Legal Deadline: None

Abstract: These proposed regulations are needed to implement section 444 of the Improving America's Schools Act of 1994, (Pub. L. 103-761). That provision amends the Family Educational Rights and Privacy Act (FERPA) to specify certain requirements with regard to the disclosure of information from education records, the right of parents to inspect and review certain records maintained on their children by State educational agencies, and the maintenance and disclosure of disciplinary information found in education records. The provision also removes, in certain law enforcement instances, the requirement that schools notify parents or students before complying with a subpoena or court order. The regulations would be developed in accordance with the Department's Principles for Regulating.

1063. • DIRECT GRANT PROGRAMS

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 20 USC 1221e-3; 20 USC 3473

CFR Citation: 34 CFR 75

Legal Deadline: None

Abstract: These amendments would reduce the need for specific regulations governing individual discretionary grant programs by authorizing the Secretary to establish selection criteria based on provisions of the program statute, selection criteria in the Department of Education General Administrative Regulations (EDGAR), or both. The amendments also would clarify the Secretary's authority to establish annual funding priorities based on certain statutory provisions, including allowable activities.

DEPARTMENT OF EDUCATION (ED)
Office of Bilingual Education and Minority Languages Affairs (OBEMLA) — **Proposed Rule Stage**

1069. BILINGUAL EDUCATION GRADUATE FELLOWSHIP PROGRAM

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 20 USC 7475; PL 103-382

CFR Citation: 34 CFR 535

Legal Deadline: None

Abstract: These proposed regulations would implement statutory changes under the Improving America's Schools Act of 1994 and address the role of institutions of higher education in the program. The Graduate Fellowship Program (34 CFR Part 535) replaces the existing Bilingual Education Fellowship Program (34 CFR Part 562) and expands the program to include post-doctoral fellowships. The regulations are being developed in accordance with the Department's Principles for Regulating to ensure that the Department regulates in the most flexible, equitable, and least burdensome way possible.

1070. • STANDARDS FOR THE CONDUCT AND EVALUATION OF ACTIVITIES CARRIED OUT BY THE OFFICE OF EDUCATIONAL RESEARCH AND IMPROVEMENT

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 20 USC 6011(i); 41 USC 423

CFR Citation: 34 CFR 700

Legal Deadline: None

Abstract: These regulations set standards for the evaluation of applications for grants and cooperative agreements and proposals for contracts under affected programs of the Office of Educational Research and Improvement (OERI). Beginning in fiscal year 1996, the programs will operate on the basis of these standards, together with provisions of authorizing program statutes. This will enable the Department to eliminate existing programmatic regulations, while ensuring that evaluations of applications and proposals meet the highest professional standards. Establishment of the standards was required by OERI's authorizing legislation.

1073. • TITLE XIV—GENERAL PROVISIONS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 20 USC 1232g

CFR Citation: 34 CFR 299

Legal Deadline: None

Abstract: These general provisions regulations would govern all programs under the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Improving America's Schools Act of 1994. The proposed regulations would establish uniform provisions under Title XIV of the ESEA applicable to consolidation of State and local administrative funds, maintenance of effort, and complaint procedures. The uniform provisions would minimize burdensome differences in implementing provisions in individual programs. The NPRM also includes a proposed priority for empowerment zones and enterprise communities. The proposed regulations are being developed in accordance with the Department's Principles for Regulating.

Abstract: These proposed revisions to existing regulations are needed to implement changes made to the Rehabilitation Act of 1973 by the Rehabilitation Act Amendments of 1992 and 1993. The changes include significant revisions in definitions, new definitions, new State plan requirements, and new eligibility requirements for services. The proposed regulations would include regulatory provisions previously listed under RIN 1820-AB15. In accordance with the Department's Principles for Regulating, the proposed regulations would reduce unnecessary process requirements, give States increased flexibility in administering the program, and eliminate requirements that do not directly contribute to the achievement of the program's objectives.

1094. THE STATE VOCATIONAL REHABILITATION SERVICES PROGRAM—EVALUATION STANDARDS AND PERFORMANCE INDICATORS

Priority: Other Significant

Legal Authority: PL 102-569

CFR Citation: 34 CFR 361

Legal Deadline: None

Abstract: These proposed revisions to existing regulations are needed because of changes in the authorizing legislation made by the Rehabilitation Act Amendments of 1992 (Pub. L. 102-569). The 1992 Amendments require the development of standards and performance indicators. The proposed regulations are being developed in accordance with the Department's Principles for Regulating.

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 29 USC 2201 to 2217

CFR Citation: 34 CFR 345

Legal Deadline: None

Abstract: These proposed regulations are needed to implement the Technology-Related Assistance for Individuals with Disabilities Act Amendments of 1994. The regulations also would authorize the National Institute on Disability and Rehabilitation Research to provide grants to States to support systems change and advocacy activities designed to assist States in developing and implementing consumer-responsive comprehensive Statewide programs of technology-related assistance. The proposed regulations would be developed in accordance with the Department's Principles for Regulating and would not impose significant non-statutory burdens.

Priority: Other Significant

Legal Authority: 29 USC 721(a)(5)(A); PL 102-569

CFR Citation: 34 CFR 361

Legal Deadline: None

Abstract: These amendments to existing regulations are needed because of changes in the authorizing legislation made by the Rehabilitation Act Amendments of 1992 (Pub. L. 102-569). The statute requires promulgation of specific regulations regarding the order of selection of eligible disabled individuals for services. The regulations are being developed in accordance with the Department's Principles for Regulating.

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 29 USC 711(c); 29 USC 750

CFR Citation: 34 CFR 371

Legal Deadline: None

Abstract: Proposed changes to the regulations are needed to implement section 130(b)(3) of the Rehabilitation Act of 1973, as amended, to provide greater funding continuity for tribal projects that are performing effectively by extending the normal 36-month project period for up to 24 additional months. Proposed changes are also needed to conform the purpose and outcome of the program, consistent with section 100(a)(2) of the Act, as revised by the 1992 Amendments, from placement in suitable employment to placement in gainful employment consistent with individual strengths, resources, priorities, concerns, abilities, capabilities, and informed choice. These proposed changes were developed in accordance with the Department's Principles for Regulating.

Semiannual Regulatory Agenda

DEPARTMENT OF ENERGY (DOE)

DEPARTMENT OF ENERGY

10 CFR Chs. II, III, and X

48 CFR Ch. 9

Regulatory Agenda

AGENCY: Department of Energy.

ACTION: October 1995 regulatory agenda.

SUMMARY: The Department of Energy (DOE) is publishing its October 1995 regulatory agenda pursuant to instructions of the Administrator, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB).

FOR FURTHER INFORMATION CONTACT: For further information about any particular item on the regulatory agenda, please contact the individual listed under that item. For general information on DOE's regulatory agenda, please contact: Romulo L. Diaz, Jr., Room 6B-234, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-2902 (telephone), (202) 586-0722 (fax).

SUPPLEMENTARY INFORMATION: Entries appended to this notice reflect the status of activities as of approximately September 29, 1995. They are divided into categories, first by subagencies and then according to their stage of rulemaking action: Prerule, proposed rulemaking, final rulemaking, or completed action.

For this edition of DOE's regulatory agenda, the most important significant regulatory actions are included in The Regulatory Plan, which appears in Part II of this issue of the **Federal Register**. The Regulatory Plan entries are listed in the Table of Contents below and are denoted by a bracketed bold reference, which directs the reader to the appropriate Sequence Number in Part II.

A draft of this regulatory agenda has been transmitted to the Chief Counsel for Advocacy of the U.S. Small Business Administration for comment, if any, pursuant to 5 U.S.C. 602(b).

Issued in Washington, DC, on October 13, 1995.

Robert R. Nordhaus,

General Counsel.

Energy Efficiency and Renewable Energy (EE)

1108. PRIVATE/LOCAL ALTERNATIVE FUELS FLEET PROGRAM

Priority: Economically Significant

Legal Authority: 42 USC 13257 Energy Policy Act, sec 507(b)

CFR Citation: 10 CFR 490

Legal Deadline: Final, Statutory, December 15, 1996.

Alternative Final Statutory Deadline is January 1, 2000.

Abstract: The Energy Policy Act of 1992 requires DOE to initiate a rulemaking to determine whether a private and local fleet program is deemed necessary to meet the fuel displacement goals in the Act. The criteria for making this determination are mandated by the Act.

1111. ENERGY EFFICIENCY STANDARDS FOR REFRIGERATORS, REFRIGERATOR- FREEZERS, AND FREEZERS

Priority: Economically Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 42 USC 6295

CFR Citation: 10 CFR 430.32

Legal Deadline: Final, Statutory, November 17, 1994.

Abstract: The Energy Policy and Conservation Act, as amended, establishes initial energy-efficiency standard levels for most types of major residential appliances and generally requires DOE to determine whether the extant standard for a covered product should be amended.

This rulemaking reviews the statutory standards for refrigerators, refrigerator-freezers and freezers to determine whether those levels need to be amended. This is the second reanalysis of the standard levels.

At the time of publication, it appears that the Department's rulemaking actions with respect to energy efficiency standards for appliances may be restricted in fiscal year 1996 by a rider attached to the Interior and Related Agencies appropriations bill. This rider, if enacted, would prohibit the Department from using fiscal year 1996 appropriations for the issuance of any proposed or final energy efficiency standards for appliances. Because of this rider and an internal review being conducted of the processes and methodologies used to develop and analyze appliance standards, the Department has not developed a revised schedule for this action.

Small Entities Affected: None

Government Levels Affected: State, Local

Additional Information:

Originally this rulemaking also included central air conditioners, heat pumps and furnaces. However to allow for more manageable schedules, this rulemaking has been split into separate rulemakings. The two other rulemakings are: 1904-AA77 (central air conditioners and heat pumps) and 1904-AA78 (furnaces).

A coalition of refrigerator manufacturers, electric utilities, and energy conservation advocates negotiated intensively for two conservation standards for refrigerator-freezers. DOE is using this recommendation in its analysis. -Merged with 1904-AA38, October 1995.

1112. ENERGY EFFICIENCY PERFORMANCE CODE FOR NEW FEDERAL RESIDENTIAL BUILDINGS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 42 USC 6834 Energy Policy Act of 1992, sec 101(a)(2)

CFR Citation: 10 CFR 435

Legal Deadline: Final, Statutory, October 24, 1994.

DOE—EE

Proposed Rule Stage

Abstract: Title III of the Energy Conservation and Production Act as amended by the Energy Policy Act of 1992 (PL 102-486, October 24, 1992) provides that DOE establish Federal building energy standards that require in new Federal buildings those energy efficiency measures that are technologically feasible and economically justified. The standards for Federal buildings are intended to parallel closely the voluntary building energy codes of the Energy Policy Act for private sector construction. Interim energy performance standards which DOE had issued before enactment of the Energy Policy Act are to remain in effect for the Federal sector until the new Federal building energy standards become effective.

1115. NATIONAL VOLUNTARY RESIDENTIAL ENERGY EFFICIENCY RATING GUIDELINES

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 8236

CFR Citation: 10 CFR 437

Legal Deadline: Final, Statutory, April 24, 1994.

Abstract: DOE is required to establish by rule national voluntary guidelines for home energy rating system. The guidelines are designed to encourage uniformity with regard to systems for rating the annual energy efficiency of residential buildings. The guidelines may be used to enable and encourage the assignment of energy efficiency ratings to residential buildings and the development of criteria for attractive financial instruments for energy efficient homes.

Final Rule Stage

1116. EQUIVALENT PETROLEUM-BASED FUEL ECONOMY CALCULATION FOR ELECTRIC AND HYBRID ELECTRIC VEHICLES

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: PL 96-185, sec 18; PL 94-413, sec 13(c); PL 94-163, sec 503(a)(3); PL 103-272

CFR Citation: 10 CFR 474

Legal Deadline: None

Abstract: The final rule on the inclusion of electric vehicles in the Corporate Average Fuel Economy (CAFE) program was issued by DOE on April 15, 1981. It established a methodology for determining the equivalent petroleum-based fuel economy (PEF) for electric vehicles so that they could be included in a manufacturer's overall CAFE program. This methodology was based on several factors including the energy efficiency of the vehicle, the efficiency of electric generation and transmission, the fuels used to generate electricity, and the driving patterns of electric vehicles. It established a method for determining the PEF of electric vehicles that are recharged from stationary sources only. Hybrid electric vehicles, a type of electric vehicle, are electrically recharged by an on-board mobile generator. This rulemaking would establish a methodology that is necessary for calculating the CAFE credits for electric vehicles that are recharged by mobile sources, and would update the methodology for calculating the CAFE credits for electric vehicles that are recharged by stationary sources. Rulemaking authority for establishing PEF values for electric and hybrid electric vehicles is provided under Public Law 103-272 (49 USC 32904).

1117. TEST PROCEDURES FOR FURNACES/BOILERS, VENTED HOME HEATING EQUIPMENT, AND POOL HEATERS—AMENDMENT

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 42 USC 6293

CFR Citation: 10 CFR 430

Legal Deadline: None

Abstract: These revisions to the test procedures for furnaces and boilers, vented home heating equipment and pool heaters in accordance with the Energy Policy and Conservation Act, as amended, would incorporate by reference ASHRAE Standard 103-1993 and would include waivers granted to manufacturers. This revision is prompted by the ASHRAE revision of Standard 103-1983 and the need to include waivers granted to manufacturers. DOE reopened the comments period on January 20, 1995, regarding new energy descriptors and a cost factor for the production and use of electricity. Based on the comments, DOE has decided to eliminate the new energy descriptor and to issue a final rule based on the existing energy descriptor.

CFR Citation: 10 CFR 490

Legal Deadline: Final, Statutory, January 1, 1994.
In addition, the statute requires final rules by 10/24/93, for electricity providers who purchase electric vehicles.

Abstract: These rules are required by the Energy Policy Act of 1992 in order to implement statutorily-imposed alternative fueled vehicle acquisition requirements that become effective by operation of law on September 1, 1995, when model year 1996 begins. These statutory requirements apply to certain alternative fuel providers and some State government vehicle fleets. The proposed rules principally cover: (1) Required interpretations necessary for affected entities to determine whether and to what extent the statutory requirements apply; (2) required procedures for exemptions and administrative remedies; and (3) a program of marketable credits to reward those who voluntarily acquire vehicles in excess of mandated requirements or before the requirements take effect, and to allow use of such credits in order to demonstrate compliance with those requirements.

1133. RENEWABLE ENERGY PRODUCTION INCENTIVE

Priority: Other Significant

Legal Authority: 42 USC 13317 Energy Policy Act of 1992, sec 1212

CFR Citation: 10 CFR 451

Legal Deadline: None

Abstract: Section 1212 of the Energy Policy Act requires the Department of Energy (DOE) to pay, subject to the availability of appropriations, a production incentive to the owner or operator of a "qualified renewable energy facility" for electric energy generated by the facility.

The need for Federal action was established by the Act. The specific requirements to receive payments are to be established by DOE. The incentive payments to publicly owned utilities provide a complement to the tax credits available to privately held utilities and electric power generators.

1134. • ENERGY EFFICIENCY STANDARDS FOR TELEVISION SETS

Priority: Routine and Frequent

Legal Authority: 42 USC 6295

CFR Citation: 10 CFR 430.32

Legal Deadline: Final, Statutory, January 1, 1992.

Abstract: The Energy Policy and Conservation Act as amended, establishes initial energy-efficiency . standard levels for most types of major residential appliances and generally requires DOE to undergo two subsequent rulemakings, at specified times, to determine whether the extant standard for a covered product should be amended.

This is the initial review of the statutory standards for television sets.

Television sets were originally included in a multi-product rulemaking (RIN 1904-AA38).

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: EO 12958; 42 USC 2161; 42 USC 2162

CFR Citation: 10 CFR 1045

Legal Deadline: Final, Statutory, October 16, 1995.

EO 12958 requires implementation regulation by 10/16/95

Abstract: The purpose of the proposed regulation is to disseminate the policies and procedures followed by the Department in implementing the requirements of the Atomic Energy Act for the classification and declassification of information. Also, the regulation implements the requirements of EO 12958 "Classified National Security Information" as they affect members of the public. This rule revises 10 CFR 1045.

Priority: Other

Legal Authority: 42 USC 2161; 42 USC 2165; 42 USC 2201

CFR Citation: 10 CFR 710

Legal Deadline: None

Abstract: The Department of Energy (DOE) has established the Personnel Security Assurance Program (PSAP) through the publication of the revision to 10 CFR 710, "Criteria and Procedures for Determining Eligibility for Access to Classified Matter or Significant Quantities of Special Nuclear Material." The PSAP was created in order to assure the reliability of individuals in certain positions, defined in Section 710.50(a), and referred to as PSAP positions for purposes of this proposed rule. The Department now proposes to amend this rule to promulgate guidelines for DOE contractors for testing for possible use of illegal drugs by their PSAP-cleared employees.

Priority: Routine and Frequent

Legal Authority: 42 USC 2077; 42 USC 2156 to 2158; 42 USC 2201; 42 USC 2273; PL 93-438, sec 104; PL 95-91, sec 301

CFR Citation: 10 CFR 810

Legal Deadline: None

Abstract: The Department of Energy is amending 10 CFR part 810 to remove Argentina, Brazil, Chile, and South Africa from the list of countries for which specific authorization by the Secretary of Energy is required before a person subject to U.S. jurisdiction can engage directly or indirectly in the production of special nuclear material outside the United States. The amendment will enable U.S. firms and individuals to assist civilian nuclear power reactor-related activities in these countries under general authorization. This will make the regulations consistent with U.S. foreign policy commitments and reflect the recent significant progress made by these four countries on matters related to nuclear nonproliferation.

1140. FREEDOM OF INFORMATION

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 5 USC 552

CFR Citation: 10 CFR 1004

Legal Deadline: None

Abstract: On October 23, 1991, DOE proposed to amend the procedures and principles to be applied in responding to requests for records under the Freedom of Information Act (FOIA) 5 USC 552. The proposal updated names and addresses of organizational entities, and updated guidelines for the schedule of fees associated with processing requests. A proposed section on policies clarified DOE's operation of a first-in, first-out policy in responding to FOIA requests, and the role of the Office of Hearings and Appeals was clarified. The proposal also included a statement of DOE policy on contractor records.

On December 12, 1994, DOE adopted the contractor records policy, with certain modifications. DOE expects to take final action on the remainder of the proposal in the near future.

1143. PAYMENTS FOR SPECIAL BURDENS AND IN LIEU OF TAXES

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2208 Atomic Energy Act of 1954, sec 168

CFR Citation: Not yet determined

Legal Deadline: None

Abstract: To revise the Department of Energy's policy on making payments for special burdens and in lieu of taxes to State and local taxing jurisdictions pursuant to the Atomic Energy Act of 1954. Prior to the 1987 issuance of DOE Order 2100.12, the Department and its predecessor agencies approved such payment requests on an ad hoc basis. To ensure all eligible taxing jurisdictions are provided appropriate opportunity to comment, the revised policy is being established through the rulemaking process. The Department anticipates no added costs by issuing the revised policy as a regulation rather than as an internal directive revision.

1144. OCCUPATIONAL RADIATION PROTECTION—AMENDMENT

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 42 USC 7191

CFR Citation: 10 CFR 835

Legal Deadline: None

Abstract: 10 CFR part 835 establishes the basic requirements for DOE contractor and subcontractor activities to ensure radiation protection of occupational workers at DOE facilities. See 58 FR 65458 (December 14, 1993). The proposed amendment to Part 835 would include several items not previously covered such as sealed radioactive source accountability and control, and surface contamination values for tritium. Sealed source accountability and control requirements currently appear in DOE Notice 5400.9, and tritium surface radioactivity values in the Radiation Control (RADCON) Manual. This rulemaking stems from DOE's ongoing effort to strengthen the protection of health and safety from the nuclear and radiological hazards posed by these DOE facilities.

We are reviewing this action in the context of DOE's recently announced accelerated DOE Order Reduction Initiative. This is to ensure both consistency of approach and consultation with DOE stakeholders.

1148. REDESIGN AND REVISION OF WHOLESALE POWER AND TRANSMISSION RATES

Priority: Other

Legal Authority: 16 USC 839e

CFR Citation: Not applicable

Legal Deadline: None

Abstract: This is an action by the Bonneville Power Administration (BPA) to redesign and revise its wholesale power and transmission rates. The principal purposes of this action would be to allow BPA to recover sufficient revenues to timely meet its repayment and other cost recovery obligations, to be a reliable and competitive power supplier, to send appropriate price signals to customers, and to otherwise meet BPA ratemaking standards set forth in various statutes.

Timetable:

Transmission Rates	
Notice of Intent to Revise Rates	12/28/94 (59 FR 66946)
NPRM	02/14/95 (60 FR 8505)

Notice of Intent to Revise Rates	12/28/94 (59 FR 66947)
NPRM	02/14/95 (60 FR 8496)
Draft Record of Decision	03/00/96
Final Record of Decision	04/30/96

Small Entities Affected: None

Government Levels Affected: None

Additional Information: On February 14, 1995, BPA also proposed comparable transmission terms and conditions (60 FR 8511).

This action would have been excluded from the regulatory agenda since it is being undertaken in accordance with the formal ratemaking provisions of section 7(i) of the Pacific Northwest Electric Power Planning and Conservation Act (16 USC 839e(i)). This action is being included, however, in order to provide the public with the fullest notice of DOE's rulemaking activities.

For these ratemakings, BPA's final action is characterized as the "final proposal," reflected in a final record of decision filed, together with the record, with the Federal Energy Regulatory Commission for confirmation and approval.

1156. ENERGY PLANNING AND MANAGEMENT PROGRAM

Priority: Other Significant

Legal Authority: PL 102-486, sec 114 Energy Policy Act of 1992

CFR Citation: Not yet determined

Legal Deadline: Final, Statutory, October 24, 1993.
Section 114 of PL 102-486 requires final regulations to be adopted by 10/24/93.

Abstract: Section 114 of PL 102-486 requires the Administrator of Western Area Power Administration (Western) to revise existing guidelines. New regulations, to be in place by 10/24/93, require each customer purchasing energy under a long-term firm power service contract with Western to implement integrated resource planning (IRP) by 10/24/95. Western's proposed rule does not consider alternatives to IRP, due to statutory mandate, although alternatives are being evaluated in the draft EIS. As part of the same rulemaking, where permitted by law, Western proposes to extend a major portion of long-term firm power sold to existing customers pursuant to contracts expiring over the next several years. Extensions of resource commitments will provide long-term resource stability necessary for effective IRP. Western is evaluating alternative lengths of contract extensions and amounts of resource commitments in the draft EIS, as well as a no-action alternative of using existing marketing criteria allocation processes for contract and resource extensions. Costs of compliance with these rules may be considerable, but utilities that have developed IRP have found the resulting benefits outweigh the expense.

Legal Authority: 42 USC 7254; 40 USC 486

CFR Citation: 48 CFR 909.4

Legal Deadline: None

Abstract: This rule removes the current regulation at 10 CFR 1035 and recodifies the regulation at 48 CFR Part 909 to revise and streamline procedures for debarment and suspension of DOE procurement contracts. The rule also amends 10 CFR 1036 which governs DOE nonprocurement and grants program to provide consistency between DOE and E.O. 12689 regarding a contractor or awardee debarred or suspended by one Federal agency shall also be debarred or suspended from contracting with or receiving awards from all other agencies.

1162. • DEAR: REGULATORY REINVENTION-PHASE III

Priority: Substantive, Nonsignificant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 42 USC 7254; 40 USC 4861(c)

CFR Citation: 48 CFR 901 to 971

Legal Deadline: None

Abstract: This action represents the third phase of DOE's effort to reinvent existing regulatory material. It will eliminate unnecessary material; streamline operations; reduce constraints, prescriptive requirements and administrative processes; and make requirements outcome rather than process oriented.

DOE—PR

Proposed Rule Stage

1163. • REVISIONS TO ORGANIZATIONAL CONFLICTS OF INTEREST

Priority: Other

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 42 USC 7254; 40 USC 486(c)

CFR Citation: 48 CFR 909; 48 CFR 952; 48 CFR 970

Legal Deadline: None

Abstract: The Department is proposing to amend its regulation to conform the DOE's Organizational Conflicts of Interest (OCI) policy to the extent practical to the Governmentwide requirements of the FAR and OEPP policy letter 89-1.

Public Laws 93-577 and 93-275 establish unique requirements regarding the Department's OCI practices preventing DOE from simply following the FAR.

1185. ACQUISITION REGULATION: DEPARTMENT OF ENERGY MANAGEMENT AND OPERATING CONTRACTS

Priority: Other Significant

Reinventing Government: This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority: 42 USC 2201; 42 USC 7254

CFR Citation: 48 CFR 970.71

Legal Deadline: None

Abstract: This action amends the Department of Energy (DOE) Acquisition Regulation provisions applicable to subcontracting by management and operating (M&O) contractors. The rule provides for greater reliance on commercial-like subcontracting objectives, expectations, and standards; eliminates the so-called "Federal norm" that, in effect, required DOE's M&Os to follow certain Federal-oriented prescribed procedures in their award of subcontracts; and eliminates the reference concerning General Accounting Office protest jurisdiction over such subcontract awards.

1188. PATENT WAIVER REGULATION

Priority: Other

Legal Authority: 42 USC 2182; 42 USC 5908; PL 99-661

CFR Citation: 10 CFR 784

Legal Deadline: None

Abstract: The regulation provides procedures and standards for obtaining a waiver of the Government's rights in inventions made under DOE research and development contracts with entities that are not small businesses or nonprofit institutions, and terms and conditions of such waivers. Currently, DOE waiver policy is provided in DOE Procurement Regulations (41 CFR 9-9.109-6). This regulation places DOE patent waiver policy in Title 10 of the CFR and also provides updates, revisions and clarifications to waiver policy as contained in 41 CFR 9-9.109-6.

Unified Agenda of Regulations

AGENCY: Office of the Secretary, HHS.

ACTION: Publication of unified agenda of regulations.

SUMMARY: The President's September 30, 1993, Executive order (12866) and the Regulatory Flexibility Act of 1980 require the Department to publish an agenda of significant regulations being developed and an indication of those regulatory actions that are being analyzed for their effect on small businesses. The Department published its last agenda on May 8, 1995.

DATES: Data, information, and views due date: December 5, 1995, for initial suggestions and any date thereafter for additional suggestions.

ADDRESSES: Addresses for submitting comments and information in response to this document are listed at the end.

FOR FURTHER INFORMATION CONTACT: Ann White, Department of Health and Human Services, Washington, DC 20201, (202) 690-6824, or the contact person for a specific division or agency of the Department listed at the end of this notice.

SUPPLEMENTARY INFORMATION:

Department of Health and Human Services' Regulatory Plan

For this edition of the Department's regulatory agenda, the most important significant regulatory actions are included in The Regulatory Plan, which appears in Part II of this issue of the **Federal Register**. The Regulatory Plan entries are listed in the Table of Contents below and are denoted by a bracketed bold reference, which directs the reader to the appropriate Sequence Number in Part II.

Background

On September 30, 1993, President Clinton issued Executive Order 12866 to make regulations less burdensome, more effective, and in greater alignment with the Administration's priorities and regulatory principles. As part of the Department of Health and Human Services efforts to effectively implement the Executive order, we published a notice in the **Federal Register**, January 20, 1994, providing a plan for periodic review of existing rules and inviting public comments to assist in determining the best priority for review.

The Executive order and the Administration's effort toward implementation have proven successful by providing real progress in reforming regulations. Building on those successes, in March of 1995, the President announced plans for more immediate, comprehensive reform.

First, the President directed each agency to undertake an exhaustive review of all regulations with an eye toward eliminating or modifying those that are obsolete or which are otherwise in need of reform. Second, the President directed each agency to change the way performance is measured—focusing on results, not process. Third, the President asked his senior executives to convene meetings in order to establish grassroots partnerships which would allow greater collaboration and participation in reinventing the regulatory process. Finally, the President requested that we further our efforts to negotiate more during the rulemaking process.

As a result of the initiative discussed above, this semiannual unified agenda reflects our efforts to reinvent rules identified as needing reform. As we embark on this effort, we continue to invite comments on our unified agenda entries and suggestions for furthering the President's regulatory reinvention strategy.

Comments should be sent to the addresses listed below, depending on the regulations addressed. Comments may be sent to the Office of the Secretary when the responsible division is not known or when the comment covers several regulatory areas crossing agency lines.

Health Care Financing Administration: Mary Ann Troanovitch, Executive for Regulations Management, Health Care Financing Administration, Room 309G, Hubert H. Humphrey Building, Washington, DC 20201; phone 202-690-7890.

Administration on Children and Families: Madeline Mocko, Director, Division of Policy and Legislation, 7th Floor, 370 L'Enfant Promenade SW., Washington, DC 20447; phone 202-401-9223.

Administration on Aging: Jack McCarthy, Executive Secretariat, Room 4753, Wilbur H. Cohen Building, 330 Independence Avenue SW., Washington, DC 20201; phone 202-619-0441.

Substance Abuse and Mental Health Services Administration: Joe Faha, 5600 Fishers Lane, Room 12-A-17, Rockville, Maryland 20857; phone 301-443-4640.

National Institutes of Health: Jerry Moore, 9000 Rockville Pike, Building 31, Room 3B-11, Bethesda, Maryland 20205; phone 301-496-4606.

Indian Health Services: Betty Penn, 5600 Fishers Lane, Twinbrook Building, Suite 450, Rockville, Maryland 20857; phone 301-443-1116.

Health Resource Services Administration: Alice Wallis, 5600 Fishers Lane, Room 14-A-12, Rockville, Maryland 20857; phone 301-443-1960.

Centers for Disease Control/Agency for Toxic Substances and Disease Registry: Galen Morris, 1600 Clifton Road NE., Building 1, Room 2050, Atlanta, Georgia 30333; phone 404-639-1548.

Agency for Health Care Policy and Research: Peggy Washburn, 6000 Executive Drive, Suite 603, Rockville, Maryland 20852; phone 301-594-1457.

Food and Drug Administration: Ed Dutra, Director, Regulatory Policy and Management Staff, (HF26), 5600 Fishers Lane, Room 12-A-17, Rockville, Maryland 20857; phone 301-443-3480.

Office of the Secretary: Jacquelyn Y. White, Deputy Executive Secretary, Office of the Executive Secretariat, Room 603H, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

Claudia Cooley,

Executive Secretary to the Department.
